Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

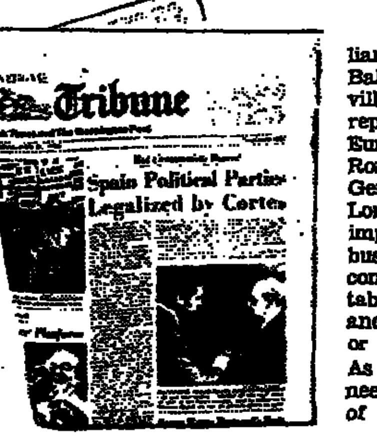
The following are dollar values only: Danish krone: 5.90875; Escudo: 31.40; Israeli £: 8.58; Peseta: 68.385; Schilling: 17.155; Sw. krona: 4.2280; Yen: 294.65; Norw. krone: 5.2850; Fin mark: 3.8440; Belgian financial franc: 37.25; Hong Kong $: 4.79; Singapore $: 2.4850. The Canadian dollar is worth U.S. $1.0215.



(c) Commercial franc. (*) Units of 100. (x) Units of 1,000. (y) Units of 10,000. (z) Amounts needed to buy one pound.

BE A NEW SUBSCRIBER
and save up to 47%

of the newsstand price
(Depending on your country of residence)

Take advantage of the International Herald Tribune's 25% Introductory Discount on the regular subscription rates. That's a big saving. But remember that the newsstand prices are always higher than the subscription rates. When you compare the reduced subscription rates with what you have been paying at the newsstand, you find that your saving is a lot more—you can save up to 47% of the newsstand price. In the Herald Tribune you'll find unsurpassed international news coverage and respected and influential columnists including James Reston, C.L. Sulzberger, Anthony Lewis, William Buckley, Art Buchwald, Russell Baker, Red Smith and Brian Glanville. In addition, you'll find special reports from the principal cities of Europe including Claire Sterling from Rome, John Dornberg from West Germany and Peter Lennon from London. You'll also find excellent important coverage of international business and economic news. And complete, daily Wall Street stock tables. Complete the coupon below and mail it to us with your check or money order today.

As the world gets smaller, everyone needs a newspaper with a bigger point of view.

These are the special rates after deduction of the introductory discount.

BOOKS

BLAMING

By Elizabeth Taylor. Viking. 190 pp. $7.95.

Reviewed by Anatole Broyard

WHEN your husband dies, Amy Henderson discovers, you have to do things you may have forgotten how to manage after 30 years of marriage. You have to form individual relationships with people you knew casually from your safe cover as one half of a couple. After investing most of your life in acting the part of a wife, you are obliged to gamble as a free agent. You must contend with new problems such as pity, officious solicitude and sexual attraction.

All at once, you are not a social asset or a pleasure to certain people, but a liability, or a problem. To others, with whom you felt safe, you are now exciting, and must live up to, or down to, their expectations. Precisely when you are feeling most forlorn and empty, you are expected to respond and give of yourself.

In Elizabeth Taylor's "Blaming," everyone tries to make it easy for Amy, a British widow, but it is their ease, usually, not hers. Her son begins to supervise Amy. His wife presses Amy to come and stay when neither woman wants this. Her American acquaintance, Martha, suddenly sees what she formerly regarded as a fairly dull woman as possible material for one of her depressing novels. Amy's cook imagines that she is dependent on his smiles and his menus. Everybody suddenly feels obliged to talk to Amy, when they really have nothing to say.

While she was bored in her marriage, Amy is bewildered by the complicated duties of widowhood. A widow, she realizes, is forced to become an actress, constantly enacting her altered condition, cast as a tragedian. Intent on their stereotypes, no one listens to what she is saying, or tries to find out what she is feeling.

Ernie, her cook, keeps making smoked salmon sandwiches for tea, imaging that they "go well with disaster." He flashes his new false teeth, making up for "all the wasted years I didn't smile."

Her son's wife inflicts her two Charles Addams children on Amy, assuming that one kind of pain will obliterate another. The minister takes to dropping in on her unannounced, to give her such comfort as can be derived from his demonstrating that the Lord's Prayer can be said in 30 seconds.

In "Blaming," Amy has to face all sorts of absurd and unanswerable questions: Would it have been better, in view of her diminished income, to have buried her husband in Istanbul where he died while they were on holiday —instead of incurring the considerable expense of flying his body home only to have it cremated? Can she afford to have a view of the river for the rest of her life, or must she narrow her vision to the four walls of a flat? Why is her son so much farther away from her now that there is no other man in her life? How can she look at television if there is no one at her side with whom she can pretend that the programs are terrible?

Elizabeth Taylor reminds us, through Amy, how many middle-aged people plod mechanically toward death, how they use their spouse to balance themselves out, how—when that balance is upset —their entire psychic economy is bankrupted. The devastating idea implicit in "Blaming" is that, without a "way of life," such people are lost, that they can no more re-enter the wilderness of random human contact than a zoo-bred lion can return to the bush.

In Amy and Martha, Mrs. Taylor juxtaposes two attitudes toward life in such a way that they seem to mock each other. Martha is a caricature of American nervousness and intrusive curiosity. In Amy's house, she takes up a box of matches, lights them one at a time, and blows them out, as if this was the burning of her own "hard, gem-like flame." She examines her face in Amy's spoons, as if the resulting distortion offered an English view of herself. It is characteristic of Martha that she has bought in Istanbul a large purse and a leather coat, both of which smell terrible.

Here is how Amy sees the novel of Martha's that she has read: "She had not known what to make of that humorless study of sensuality, the desperate foray into a man's—and married man's —world, or, rather a narrow aspect of it. The stresses and despair, and bloody-mindedness." Martha, of course, is both fascinated with and filled with contempt for Amy's lack of curiosity. Does it imply that she is secure beyond incessant inquiry, or resigned to never knowing everything? Are her silences brave or stupid? Is a place like England pregnant enough with history to permit an end to eschatological questions?

For all her venturing, Martha receives the most minimal returns: A marriage to Simon, who proposes on impulse when Martha refuses some rather expensive cakes in a café. Martha's one safe gesture turns out to be suicidal: Because she cannot live with Simon, she irrationally assumes that she cannot live with anyone else—or without anyone else.

Amy, of course, muddles through in classical English fashion. She marries her dead husband's closest friend, Gareth, thereby coming as close to replacing the man she has lost and regaining her old existence as she possibly can. "What a life before him, Gareth thought, quite contentedly —a life of advising, consoling, sheltering, all of which he could do."

In "Blaming" the late Mrs. Taylor is saying something quite subtle, the sort of thing she is widely admired for, about the relationship between the sexes. When Gareth proposes to her, Amy refuses at first: "Oh, no, Gareth. I should be far too embarrassed." It is this "embarrassment" which finally excites her and induces her to say yes to him. If we are not sophisticated, or desensitized beyond embarrassment, we have enough emotional face to enable us to survive. Or, to put it more simply, where there's embarrassment, there's hope.

Anatole Broyard is a book reviewer for The New York Times.

Pro Football Weekend

Steelers, Dolphins Tangle, Hoping for Playoffs

TTSBURGH, Nov. 12 (UPI).— sburgh coach Chuck Noll his Steelers and the Miami hins have so much in com- that Sunday's game is bound a close one.

think we fall into the same ories," Noll said. "So it's to be a very interesting tough game."

ch the Steelers and the Dol- s are two-time Super Bowl ers that got off to rocky this year, for some of the reasons.

ey had trouble defensively with injuries and having to other people in positions," said. "Now they are healthy." ey are coming on much like are right now," he added. ir defense is playing well 've only given up one touch- in the last two games, and offense is moving the ball They've scored 37 points in ast two games."

Steelers also were plagued with injuries that Noll said much to do with their art. Their turnaround also been impressive statistically; e recorded three straight ns while scoring 95 points.

Playoff Berths

teams now have identical records and slim hopes for berths. Miami trails Balti- (8-1) and New England in the AFC East and Pitts- trails Cincinnati (7-2) in AFC Central.

s said at the halfway point every game was a 'must' ," said Dolphins coach Don Shula of his team's chances for the playoffs. "With Cincinnati and Baltimore off to such good starts, a win here is necessary to stay in the playoff picture. We not only have to win but we have to continue to improve on both offense and defense because of the caliber of teams we face each week."

The following preview of this weekend's NFL games was prepared by William N. Wallace of The New York Times. Team records are in parentheses.

AMERICAN CONFERENCE

Miami (5-4-0) at Pittsburgh (5-4-0)—The Steelers have played the last 17 quarters without giving up a touchdown, the last 13 without a point. How do you beat that? The Dolphins' best chance would be for Bob Griese to throw 40 passes. But Don Shula will never allow it. Favorite: Pittsburgh by 10.

Denver (5-4-0) at San Diego (4-5-0)—The Broncos won the first game between these two, 26-0, and have improved while the "new" Chargers look more and more like the old ones. They have lost three in a row with the defense crumbling. Favorite: Denver by 4.

New England (6-3-0) at Baltimore (8-1-0)—This is the biggest game for the Patriots in a decade. If they can win it somehow, they might make the playoffs because the rest of the schedule is easy. Another reason for the Colts' success is that the coach, Ted Marchibroda, makes no speeches. He studies film instead. Favorite: Baltimore by 11.

Houston (4-5-0) at Cincinnati (7-2-0)—The Oilers have lost four in a row. Blame is focused on the easy ways of the coach, Bum Phillips, and disloyalty of the quarterback, Dan Pastorini. He's hurt and John Hadl will start. The Bengals don't make a lot of yards but they win the games. Favorite: Cincinnati by 13.

Tampa Bay (0-9-0) at Jets (2-7-0)—John McKay, the coach, says that if the Buccaneers had Ricky Bell, Southern California's star runner, this season they would have won four or five games by now. Who's he kidding? The Jets are playing these games purely for the edification of Richard Todd. Favorite: Jets by 7.

Kansas City (3-6-0) at Oakland (8-1-0)—The Raiders' Cliff Branch is averaging 27 yards a pass catch and nine of 31 have been good for touchdowns. The Chiefs' weak defense will need a net to cover him. Favorite: Oakland by 14.

NATIONAL CONFERENCE

St. Louis (7-2-0) at Los Angeles (6-2-1)—"We've got to get more offense," said Chuck Knox, the Rams' coach, and so he has switched quarterbacks—Pat Haden, the Rhodes scholar, for James Harris. The Cardinals are facing a brutal schedule without their big-play man, Mel Gray. This receiver will miss another game following surgery to repair a broken nose. Favorite: Los Angeles by 5.

Green Bay (4-5-0) at Chicago (4-5-0)—Walter Payton, the Bears' runner leading the league, needs only 101 more yards to reach 1,000. The Packers' next four games are all against the Bears and Vikings. Coach Bart Starr says, "We've got to win some of them to show improvement." Favorite: Chicago by 9

Washington (6-3-0) at Giants (0-9-0)—Redskins, who have a good shot at the playoffs, are sticking with Joe Theismann at quarterback. He has more mobility than Bill Kilmer and that's needed behind a wobbly offensive line. The only Giant among statistical leaders is the punter, Dave Jennings, second best in his conference. Favorite: Washington by 7.

Detroit (4-5-0) at New Orleans (2-7-0)—The Lions like their new coach, Tommy Hudspeth. Many say he's the best they have played for. All of a sudden Greg Landry is leading the conference in passing statistics. Bobby Douglass, who had not played regularly in three years, has done creditably as the Saints' quarterback. Favorite: Detroit by 4.

San Francisco (6-3-0) at Atlanta (2-7-0)—Del Williams, the 49er running back beginning to make a name, will miss this game because of an eye injury. Tommy Nobis, who has been with the Falcons since their start in 1966, is miffed and skipped practice for a day. He says some of his teammates are not trying and he may retire. Favorite: San Francisco by 9.

Seattle (2-7-0) at Minnesota (7-1-1)—The Seahawks believe they can set a record for expansion team victories, four in first season. But they are not counting on this one. The Vikings are pushing Sammy White, their receiver, as rookie of the year. Favorite: Minnesota by 20.

INTERCONFERENCE

Philadelphia (3-6-0) at Cleveland (5-4-0)—The Browns are in a quarterback turmoil and turn back to Brian Sipe, who bailed out last week's starter, Mike Phipps. The Eagles' goal is to ruin someone else's season. They are getting meaner and meaner with Oakland, Washington and Dallas ahead. Favorite: Cleveland by 7.

MONDAY NIGHT

Buffalo (2-7-0) at Dallas (8-1-0)—Tom Landry is dissatisfied with his running backs and will try some new ones like Charlie Young and Scott Laidlaw. He seems to have dozens. The Bills have had a terrible season and the fans are blaming the owner, Ralph Wilson. Favorite: Dallas by 14.

Associated Press.

A Chris Evert return in the 1976 Wightman Cup tourney.

U.S. Golf Unit Doubtful

A Worldwide Schedule Would Please Nicklaus

PONTE VEDRA, Fla., Nov. 12 (UPI).—Jack Nicklaus, who is passing up more and more U.S. golf tournaments to play in more lucrative overseas events, would like to see a single worldwide tournament schedule.

But given the current length of the U.S. tour and the debt that the Professional Golfers Association feels it has to the sponsors of U.S. tournaments, PGA commissioner Deane Beman doesn't believe a worldwide schedule is possible at this time.

Nicklaus, golf's leading money-winner with career earnings of nearly $3 million, and Beman, the outspoken commissioner, aired their views yesterday at a special press day at the redesigned Sawgrass golf course.

The palm-studded, seaside layout recently was selected as the permanent site of the $300,000 Tournament Players Championship event.

Cooperation Around the World

"I think we're going toward a worldwide schedule," said Nicklaus, who just returned from Australia where he won his fifth Australian Open. "It'll take the cooperation of the golf associations around the world.

"They're going to have to work off the U.S. schedule [which ended two weeks ago at the Pensacola Open]. But since the seasons are reversed in Australia, I think they can work the Australian Open in quite easily."

However, Beman said the sponsors of U.S. tour events are the ones responsible for building up the popularity of golf around the world and he believes they should have precedence over U.S. tour pros.

"As long as those people, those organizations want to continue to hold their events, I don't see how we can work in any overseas tournaments. I don't think the [PGA] policy board wants to do this.

"Just because golf has become popular worldwide, I don't think we can turn our backs on these people."

Looking back over the past year, Nicklaus said, "It was not my best, but it was not my worst year either."

The "Golden Bear" said he considers it a good year if he wins one of the so-called big four tournaments—the U.S. Open, the PGA Championship, the Masters or the British Open.

He failed to win any of these this year. "But I did win the three most significant tournaments after that—the Tournament Players Championship, the World Series of Golf and the Australian Open," he said.

'Next year the four major tournaments are being played on golf courses I know and like. I'm looking forward to a good year in 1977."

College Football Weekend

No. 1 Pittsburgh Faces Tormentor of 1975

W. YORK, Nov. 12 (UPI).— might have an Orange Bowl n sight, but it has West Vir- which upset the Panthers year, on its mind.

They know that good things d be ahead," coach Johnny ors says of his top-ranked, eated Panthers, "but they realize what's at stake this and how important the

ers, which moved into the No. 1 for the first time after Michi- lost to Purdue last week, will st to West Virginia tomorrow rivalry dating back to 1895. Panthers, going for their 10th ght victory this season, hold nificant edge in the series, 1.

tory and tradition aside, Pitt ored by 24 points and should little trouble with the Moun- taineers, whose record stands at 4-5.

However, last season's 17-14 West Virginia upset victory leaves a rancid taste in Majors's mouth and he is not about to take anything for granted.

In that game, a walk-on placekicker named Bill McKenzie kicked a 37-yard field goal as the gun sounded to give the Mountaineers the game and trigger nightlong celebrations in Morgantown.

Nothing for Granted

"This is a game of emotion," Majors says of the regionally televised contest. "We know West Virginia always gets ready for Pitt, and we plan on being ready for them."

Pitt will unveil no surprises—only Tony Dorsett, the extraordinary running back who owns more records than RCA.

Going into tomorrow's encounter, Dorsett holds nine NCAA records and is within striking distance of setting two more in his final two regular season games. The 5-foot-11, 192-pound back, averaging 169.4 yards a game, is 341 yards short of reaching the 6,000-yard mark for a college career, a plateau no one ever has reached. With an awesome 1,525 yards to his credit this season, the likely Heisman Trophy-winner needs 356 more yards to surpass Ed Marinaro's season record.

Pitt, the fifth-highest scoring team in the country with a 34-point-a-game average, also will be relying on the arm of Matt Cavanaugh, who is still recovering from a fibula fracture incurred earlier in the season.

Gottfried Finally Beats Borg, Gains Semifinals in Stockholm

STOCKHOLM, Nov. 12 (AP).—Brian Gottfried fought off a match point and knocked Wimbledon champion Bjorn Borg out of the $150,000 Stockholm Open tennis tournament today to reach the semifinals for the first time.

Gottfried, seeded eighth, won the tense two-hour battle, 6-2, 4-6, 7-6. The American saved a match point when trailing 5-6 in the tiebreaker and then held on to win it, 8-6, with a crackling backhand passing shot on the line.

It was sweet revenge for the 24-year-old who lost two tough four-setters to the Swede in fourth-round matches at Wimbledon and the U.S. Open at Forest Hills this year. Gottfried also lost his previous matches with Borg three years ago here and the following year at the U.S. court championships at Indianapolis.

Gottfried, ranked No. 6 in the United States, takes on Spain's Manuel Orantes in the semifinals tomorrow.

Orantes, the third seed, earlier scored an easy 6-4, 6-3 triumph in his quarterfinal against unseeded *Haroon Rahim*, a Pakistani who turned 27 today.

Borg, seeded second, behind American Jimmy Connors, had many chances to break through Gottfried's service late in the decisive set, but he blew them all.

After trading early service breaks, the determined American saved six break points in a marathon ninth game which lasted more than 10 minutes. Gottfried finally held his service to lead, 5-4, after Borg netted a weak backhand return.

Borg held for 5-5 and then missed another break point in the eleventh game, once again returning a looping ball that Gottfried smashed in.

Gottfried, who forms one of the world top doubles pairs with Mexico's Raul Ramirez, has improved considerably during the last few months, winning the *Pacific Southwest Grand Prix* tourney in Los Angeles in September and gaining the final a week later in San Francisco. He lost in San Francisco

U.S. Leads in Wightman

LONDON, Nov. 12 (Reuters).—American Terry Holladay beat Glynis Coles of Britain, 3-6, 6-1, 6-4, here tonight to put the United States 2-1 ahead in the Wightman Cup tennis match between the two countries.

Last night, Rosie Casals fell to Sue Barker, 1-6, 6-3, 6-2, after the opening singles matches of the Wightman Tennis Cup.

Thursday's Games

N.Y. Islanders 2, Boston 2 (D. Potvin, Parise; Forbes, Sheppard).
Philadelphia 6, Vancouver 4 (Leach, Kelly, Homgren, Lonsberry, Barber, Clarke; Lever, Sprucc, Oddleifson, Ververgaert).

Chris Evert gave the United States a lead with a victory over the British No. 1, Virginia Wade, earlier. But Casals, despite a fine start in which she allowed her opponent only eight points in the opening set, slumped badly to let Barker tie it for Britain, which has won the cup for the past two years.

Study Seeks to Aid Victims of Tennis Elbow

By Charles Friedman

NEW YORK, Nov. 12 (NYT).—"Ouch, that hurt!"

If you hit, say, a backhand or volley and feel pain in your arm, you may be ready to join the legion of tennis-elbow victims. A recent study says that 50 per cent of the estimated 35 million players in the country are now suffering from the ailment or will be before the indoor season ends.

That figure reflects a remarkable increase in recent years, according to experts. It means generally that players are not stroking the ball properly or lack muscle strength.

Dr. Willibald Nagler of New York Hospital-Cornell Medical Center, *who made the study*, offers this advice:

"Take lessons from a pro. Pros rarely get tennis elbow, yet they expose their elbows to much more frequent and severe strain than amateurs."

'Refinement of Strokes'

He goes on: "Players who suffer from the malady need some adjustment and refinement of their strokes, as well as the development of their muscle strength."

Over a five-year period, he treated more than 100 tennis-elbow patients. Effective results can be achieved through medical therapy, he found, but prevention is the best cure.

In his research he analyzed the sequences of the various components of motion in the patients' strokes through electromyography, a device that displays muscular activity on an oscilloscope. He found these factors to be related to the occurrence of tennis elbow:

- Incorrect position of the leading elbow at impact in backhands.
- Frequency of backhands and volleys.
- Gripping the racquet too firmly before and after the shot.
- Hitting the ball off the center of the racquet.
- Weakness in the wrist extensors, wrist flexors and forearm rotators.

He also found that those who played regularly were less likely to be victimized than infrequent players. And adults were afflicted *more than youngsters because* "the full development of the bony prominences where the tendons of the wrist muscles are anchored does not occur below the age of 18."

Tennis elbow, says Dr. Nagler, is characterized by pain at the attachment of the tendons of the muscles that move the wrists. This attachment is in the area of the elbow, but not in the joint.

"Pain is caused by irritation due to repetitive motions leading to mechanical stress," he says. As consolation to tennis players, he says golfers can get tennis elbow," but they develop it in the nonleading hand."

'Lawn-Tennis Arm'

The ailment is as old as the game, which was invented more than 100 years ago. It was first mentioned by an English physician, who called it "lawn-tennis arm."

As one remedy, Dr. Nagler prescribes an exercise program to increase the strength of the wrist extensor and flexor muscles and the forearm rotators. Then he advises learning a two-handed backhand—"tennis-elbow sufferers are very rare among players who use such a stroke."

He also urged a light flexible steel racquet with stringing at 52 to 60 pounds of tension, which will "dampen the sudden impact on the extensor muscles by its trampolining effect."

An elbow brace is helpful, he says, because it distributes the stress on the muscles. Finally, he suggests a couple of things that are bound to make certain players wince—"avoid going to the net as much as possible and avoid hitting too many topspin shots."

All-Around Play Of McAdoo Gives Nuggets 1st Loss

BUFFALO, N.Y., Nov. 12 (UPI).—In first impressions are lasting, then the Denver Nuggets must hold Bob McAdoo in high regard.

McAdoo scored 22 points, grabbed 25 rebounds and shook off a poor first half last night as the Buffalo Braves snapped the Nuggets' eight-game winning streak and downed previously unbeaten Denver 105-94.

"McAdoo has a bad shooting night but gets 25 rebounds and does a lot of other things," said Denver coach Larry Brown "I'm really impressed with them. I just like their ballclub."

McAdoo suffered through a poor first half as Denver's Bobby Jones did a good defensive job on Buffalo's 6-11 forward McAdoo shook it off in the second half, with some help from Braves coach Tates Locke.

McAdoo really took control in the final quarter, when he scored eight of his points.

Six American Jockeys Take a Clockwise Spin on Japanese Racetracks

By Andrew H. Malcolm

KYO, Nov. 12 (NYT).—The ys are well paid. First class and board are free. Races held only on weekends. The s run the wrong way. The s are orderly and quiet. No speaks English or Spanish. e are hills on the tracks and one at the race course is y, friendly and polite.

ter than that, horse racing pan is pretty much the as it is in the United s. That is what six Americ- jockeys are discovering this in an unusual jockey invi- al arrangement between and the eastern United s.

der the program, arranged e Japan Racing Association, n Rainey, executive secre- of the Jockey Club of New nominated six American ys.

e men were invited to spend weeks in Japan with their , all expenses paid, to meet Japanese peers, to visit facilities and to ride in ast four races against four ve other Japanese jockeys. each ride each man re- s $500 plus 5 per cent of winnings down through fifth

"The whole thing is just unbelievable," said Menotti Aristone, one of the six jockeys. "I never met people like this in my life. We're treated like royalty."

The other American riders are Gary Mineau, Daryl Montoya, Jose Rodrigues, Doug Thomas and Jorge Velasques, who participated only in the first weekend's activities before leaving.

In their first race at the Kyoto race course, on Saturday, only Thomas of the Americans was among the top finishers. The next day, after becoming familiar with the track competition, Thomas won, Velasques was third, Mineau fourth, Aristone fifth and Montoya sixth. The purse was $30,000.

This weekend the six Yankees will compete at the Tokyo race course.

According to Chuji Takahashi of the Japan Racing Association, the idea, which will likely be repeated, sprouted two years ago when jockeys of five nations were invited to Japan. The U.S. style of riding appealed more to those involved in Japanese horse racing, which dates back to feudal times.

Also, publicity surrounding an international sports competition in Japan draws extra-large paying crowds. In recent years this has resulted in a home-run hitting contest between Hank Aaron and Sadaharu Oh, Japan's premier slugger, during a tour of Japan by the New York Mets, and in a series of football games —one between U.S. All-Stars and Japanese players; one between Morgan State and Grambling, and one between the San Diego Chargers and the St. Louis Cardinals.

Last summer Muhammad Ali, the heavyweight boxing champion, faced Antonio Inoki, the Japanese wrestler, here.

"They're not rowdy," said Mineau. "You get thousands of people in those trilevel grandstands and you can still hear a pin drop. They're very polite. It must be their culture."

Mineau, a 32-year-old jockey who usually races at Suffolk Downs in Boston and Rockingham Park in New Hampshire, found it a little strange to race clockwise in Kyoto. The slight hills on the course required extra thinking. He found the horses very quiet, not high-strung like the U.S. animals bred for speed. "Most of the races here," Mineau pointed out, "are run over a mile."

Last year in Japan horse racing drew 39 million spectators, almost as many as attended bicycle races or motorboat races, on which fans may also bet. In 1975, the bettors wagered 1.5 trillion yen on horse races. That's $5.3 billion.

There are 37 race tracks in Japan, all run by the government. "The racing facilities here are far better than in the States," Aristone said. "They are simply beautiful. Every track is like Belmont. Money is no object here. They do everything the right way. We could take a real lesson from this."

"It's a shame," he added, "that the Japanese don't have the quality of horses to match."

Thomas estimated that the best horses here might bring upward of $20,000 while some he has seen might be worth only $3,000.

The Americans, whose crouching style with short stirrups greatly intrigues the Japanese, felt Japanese jockeys had a definite advantage in knowledge of the local courses.

"In *Kyoto on Saturday*," Aristone said, "I should have won that one. I was coming down to the stretch, see, and all of a sudden there's no more fence or hedge or nothing. There was room to drive 20 horses through. But we learned. We were ready the next day."

"The Japanese are good on strategy and good on letting a horse relax and get positioned," Thomas said, "but when it comes down to the drive on home, American riders are much superior. It's a matter of style, that's all. Our bodies are lower and we're in much better harmony with the horse and its movement."

"The Japanese don't seem to keep together with the horse," added Aristone, "They ride higher and their monkey style, bouncing up and down and all over, it has to hinder the horse."

Between race days, the Americans, escorted by interpreters, have been kept busy sightseeing and visiting with many of Japan's 894 professional jockeys. Thomas's wife Mary Ann found time to buy a kimono. En route home, some of the jockeys will stop in Hawaii for a brief vacation.

In a matter of days, though, they will be back at work at *U.S. tracks, primarily Keystone* in Pennsylvania. Then it's on to Garden State in February.

"But I'd do it again at the drop of a whip," said Mineau, "just for the privilege of being in Japan again."

Gary Mineau, a 32-year-old jockey who usually races at Suffolk Downs in Boston and Rockingham Park in New Hampshire, found it a little strange to race clockwise in Kyoto. The slight hills on the course required extra thinking. He found the horses very quiet, not high-strung like the U.S. animals bred for speed.

The Job Hunters

WASHINGTON.—As it must happen during every change of administration in Washington, there is a great deal of job hunting going on right now. The problem for many presidential appointees is that it's very difficult to go back to what they were doing before they got into the government. Having once tasted the power of running a billion-dollar federal bureau it's hard to return to selling insurance or working on a detergent account for J. Walter Thompson.

Buchwald

Unfortunately, government experience does not necessarily mean that you're qualified to handle an important job in the private sector.

Here is an example of what I mean.

"Please sit down, Mr. Maximum. Mr. Ratcliffe of the Republican National Committee spoke very highly of you. I see here you're looking for a position with our firm."

"Yes, sir. For the past eight years I was director of the U.S. government Inter-Office Affairs Council on Coordination and Rectification. It was one of the highest management jobs in Washington."

"What exactly did you do?"

"Our department was in charge of reviewing position papers on rectification of abuses of non-regulatory agencies involved in the areas of essential input and output, and to recommend to the White House their long-range effects on the economy."

"Could you be more specific?"

"I'm sorry. I didn't understand the question."

"What was your role in the department?"

"I was in charge of the entire operation. My staff brought me papers and I either signed them or refused to sign them. In many cases I advised that they be passed on to another bureau. In some instances I recommended hearings, and in others I turned over the matter to the Justice Department."

"Mr. Maximum, that's all very interesting, but since you are applying for a job as executive vice-president of this corporation we're trying to find out what kind of contribution you could make here."

"I believe my strength would be in budget planning. I had 20,000 people working for me and our yearly budget was $1.5 billion. It was a great responsibility because if we didn't spend all the money in the fiscal year we had to give it back to the Treasury. I'm proud to say I always managed to spend every cent of it."

"That's very good, Mr. Maximum, when you're working for the government. But when you're working for a private company the job of an executive is to save the corporation money."

"Why would you want to do that?"

"Well, we like to show a profit at the end of the year."

"What's a profit?"

"It's the money left over, after all our costs and taxes are paid."

"That's fascinating. We never worried about profits in the government. Our job was to spend money and get the job done. I believe the best way to solve a problem is to throw money at it."

"Yes, I see what you mean. Could you tell me what you consider was your greatest accomplishment during your government service?"

"Of course. I was responsible for 'Operation Molehill.' Everyone always talks about making a mountain out of a molehill. But no one has ever actually done it. I put my research and development people on it and they came up with a pilot program which would cost $100 million.

"The Office of Management and Budget turned it down, so I went directly to the chairman of the Senate Committee on Bulldozers and told him, if he could get the project off the ground, we'd build the mountain out of the molehill in his state. He immediately got the legislation passed and I got my $100 million."

"That's very good. We'll call you, Mr. Maximum, in a few days and give you our answer."

"Thank you. I'm sure I can be of great value to your company. Just give me the input and I'll give you the output, no matter what it costs."

Fire Destroys Two Chapels on Mount Athos

SALONIKA, Greece, Nov. 12 (Reuters).—Two chapels containing frescoes and icons were destroyed in a fire yesterday at the 1,000-year-old monastery of Meghistis Lavras on Mount Athos, a police spokesman said.

The fire apparently started from a small stove in the main building and spread quickly to the two chapels, the spokesman said.

Before it was brought under control, the fire destroyed the two chapels, which contained murals and Byzantine icons.

The monastery of Meghistis Lavras is one of 20 in the all-male religious community of Mount Athos.

Mary Blume

Positive Images of Women and Ideas

Jane Fonda and Vanessa Redgrave in a scene from 'Julia.'

PARIS (IHT).—In the second volume of Lillian Hellman's memoirs there is a story called "Julia" about two beloved childhood friends and the different paths they take—Lillian a successful playwright, living hard and cracking wise, and the well-born Julia an early anti-Fascist in Vienna and Berlin for whose cause Lillian smuggles money over the border from France and who ends, her body horribly broken by the Nazis, in a funeral parlor somewhere in London with Lillian as her sole mourner.

It is a shocking, angry, touchingly jagged story, not one that might immediately come to mind as a two-hour $8-million Panavision film. "When I first read it I never thought it could make a movie, it seemed such a gossamer kind of thing," says Fred Zinnemann, who is directing Alvin Sargent's respectful screenplay. "Julia" is being filmed in England and France, with Norfolk standing in for Martha's Vineyard, a suitably grisly former military hospital near the Gare de l'Est playing a hospital in Vienna, and with Oxford University, the Tuileries and the Hôtel Meurice as themselves.

Mr. Zinnemann is known for the moral authority of such films as "High Noon" and "A Man for All Seasons." Vanessa Redgrave, who plays Julia, and Jane Fonda, who plays Lillian, have deep, if different, political convictions. Not surprisingly, there is no agreement over whether Julia is a political picture.

"No," says the producer, Richard Roth.

"It has no political intentions," says Fred Zinnemann.

"Every film is political," says Jane Fonda, who is wearing a severe dress and rakishly titled 1930s hat by Anthea Sylbert and briskly sewing a pink tail onto a mouse costume for her daughter.

Refugee

"Every serious film is political," says Maximilian Schell, the Swiss actor who plays a small but pivotal role as a refugee who persuades Lillian to go on her mission to Germany.

"All films are political in the sense that all films are the expressions of the people who make them," says Vanessa Redgrave over hot chocolate in a café. "Julia is not a political film but certainly everyone who sees it will know the politics of the people who made it."

The background is enormously familiar to Fred Zinnemann, who was born in Vienna. "There will be certain phases where people will be reminded of the past," he says, "but we won't make a meal of it. The story deals with the personal relations of Lillian and Julia."

Commitments

This is why Jane Fonda wanted to make the film from the moment it was proposed, three years ago. "We never get to see positive images of women," she says. "Here is a story about two women who loved each other, who are supportive, who get excited about ideas and not just romances, who challenge each other always to be better. Deep relations, challenges, commitments, it's about that.

"Sometimes, when you decide to do something you forget why. The first week of shooting I felt very excited. I realized I've made so many movies, I'm reaching middle age rapidly and I've never had a chance to show real feeling for another woman, a feeling that is not neurotic, not erotic.

"Most movies show women competing, usually for a man. Look at all the films where men are friends, but people are so threatened by such a relationship between women. Being able to do a scene where Vanessa's face becomes just radiant when she talks about what's going on in Vienna in 1934. Seeing a woman's face on the screen so transported talking about books. It's great."

"There is a fascinating interplay of characters," Fred Zinnemann says. "Julia, who had this serenity and Lillian, who was torn. On the one hand she admired Julia's purity and on the other she was aware of the trappings of success and the nice things success brings. She also felt there was a kind of corruption to it. There was something about Julia's commitment that fascinated her and that she wanted to emulate though she was quite sure she couldn't.

"The way Jane looks at her. Have you ever owned a female cocker spaniel? You know the adoring look they can have? Jane was able to do that. I'm not easily moved by rushes, but I was moved by that."

Admiration

Julia, with her serenity and beauty, is necessarily larger than life and lacking in detail since she is shown through Lillian's memory and, as Miss Hellman says in explaining the painter's phrase, pentimento, which she uses as the title of her memoirs, old paint on canvases sometimes becomes transparent and reveals other images: "I wanted to see what was there for me once, what is there for me now."

"I know there is more in the story and you can never be sure whether Lillian Hellman is writing about her own feelings or what actually was the case," Vanessa Redgrave says. "I haven't talked to her about it; it would be neither here nor there."

Miss Redgrave's return to a central role in a film was dictated in part by her admiration for Fred Zinnemann, for whom she played Anne Boleyn in "A Man for All Seasons": "He's serious in the fullest sense of the word. He's considerate of the people he's working with, which is very rare—of the work they are doing, of the contribution they are making, and of themselves as individuals."

Mr. Zinnemann, she says, doesn't give much direction. "He's accumulated an enormous amount of experience working in the movies and that's contained in his silence. Silence can be a very positive way of working. I've got confidence in him. You always have to place that confidence in a director, even when you haven't got it."

The film of Julia that finally appears will be a layered collection of varied approaches and attitudes, differing even on what the film is about. It will be in itself a compressed illustration of the word pentimento.

"It's like every good film, it's about life," Max Schell says. "Julia is the recollecting of a person who made a great impression. Since it is covered by the years, it is a dream. But of course it should also recall the times before the war when people had to make a decision, to dare. And these times can always come back, some day."

PEOPLE: *Ex-Priest Groppi Gets Milwaukee Bus Route*

James Groppi ... a new "pa...

"The bus will be my church and the people who ride it will be my parishioners," declared **James Groppi**, an excommunicated Roman Catholic priest from Milwaukee. Groppi is finishing up a training course with the county transit system and will begin driving a regular route in Milwaukee Monday. He was excommunicated after his marriage in April to Peggy Rozga, who teaches English at the University of Wisconsin-Milwaukee. "More clergy should go out into the marketplace and work," said Groppi, "instead of isolating themselves in rectories and depending on families for their sustenance." Groppi was active in civil rights movements in the '60s, working for opening housing in Milwaukee.

* * *

A Swedish friend of **Greta Garbo**, asked to comment on a report that the actress had advanced cancer, suggests that it's only a rumor. The West German newspaper Bild Zeitung said that Garbo, a U.S. citizen since 1951, had been having anti-cancer treatment at Sloan Kettering in New York. Sloan Kettering refused comment. The newspaper quoted **Cecil Beaton**, the English photographer and stage designer, as saying that Garbo had said goodbye to old friends in Europe during a trip last spring. "I wouldn't believe him," said Garbo's Swedish friend, **Kerstin Bernadotte**. "Beaton has written many things about Garbo and they were all a pack of lies." In his book "The Happy Years," Beaton said he and Garbo had a love affair in the '40s and were engaged to marry. "It was a lot of crap," said Mrs. Bernadotte. "He has always taken an interest in celebrities, but women haven't been his forte." If Garbo did bid farewell to her friends, Mrs. Bernadotte said, "I don't think she would have included Mr. Beaton."

* * *

Sen. Edward Kennedy, D-Mass., his nephew, **Joseph Kennedy, 3d**, his foreign policy adviser **Robert Hunter**, and two friends, **Richard Coogan** and **Claude Hooton**, had an audience with **Pope Paul VI** Friday. Kennedy flew from Greece to Rome Thursday for a four-day visit. He called on Italian Premier **Giulio Andreotti** shortly after his arrival.

* * *

After the Department of Antiquities in Tel Aviv ruled last week that **Moshe Dayan**, the former Israeli defense minister, would have to give up some archaeological treasures owned by the state, authorities picked up a pair of sarcophagi in his garden. "My wife was using them to grow flowers in," said Dayan. "They gave me a nice thank you note and took them." This ... a New York newspaperman ... called that in 1967, when De[fense] Minister Dayan was showing his archaeological collecti[on in] his garden, Dayan ackno[wledg]ed that he had illegal pos[session] of some items. "If I wer[e] director of antiquities, I [would] arrest me," Dayan said. "[But it] is not me."

* * *

Robert John (Bucky) W[ater]field, 20, son of actress [Jane] Russell and football gre[at Bob] Waterfield, has been order[ed to] undergo at least 90 days [of psy]chiatric observation befor[e sen]tencing on a manslaughte[r con]viction. Young Waterfield [was] found guilty Oct. 14 of [volun]tary manslaughter in the [shoot]ing of a farm worker, ... Hernandez, in a bar in no[rthern] Santa Barbara County, Ca[lifor]nia. Waterfield said he had ... 24 cans of beer before the ... ing and could not remem[ber]. The judge said that he ... pears to have a serious alc[ohol and] drinking problem."

* * *

Raymond Leppard, 49, [prin]cipal conductor of the ... Northern Symphony Or[chestra] and musical director of th[e En]glish Chamber Orchestra, ... ing to the United States ... and intends to seek Am[erican] citizenship. He said, "I ... not approve of socialism ... cially the growing power ... unions."

—SAMUEL JUS...

The XM1, which will be built by Chrysler as the U.S. Army's main battle tank.

To Share Components With German Vehicle

Chrysler Chosen to Develop Tank

By John W. Finney

WASHINGTON, Nov. 14 (NYT).—The Army has selected Chrysler Corp. to develop and build its new main battle tank in a weapons program that is expected to cost $4.9 billion over the next decade.

Chrysler was chosen Friday by General Motors Corp. after a two-year competition between the two automobile manufacturers to develop a tank that would meet the Army's battlefield needs through the rest of this century. The selection of Chrysler reverses an Army recommendation last July that the General Motors version be adopted. That recommendation was rejected by the Defense Department, which directed the Army to reopen the competition between the two firms so that they could modify their proposals to incorporate standard components with West German tanks.

In the opinion of West German representatives, the outcome of the extension was a major step toward standardization of tank equipment among the North Atlantic Treaty Organization allies.

The new Army tank, the XM-1, will be known as the Abrams in honor of Gen. Creighton Abrams, the Army chief of staff, will be powered by a gas turbine engine that West Germany has also chosen for use in its new Leopard-2 tank.

At one time consideration was given to having the two major firms adopt the same tank. The Leopard-2 tank is still being evaluated by the Army at its testing grounds in Aberdeen, Md., but it is now generally accepted on both sides that largely for nationalistic reasons it is impossible to standardize and each nation will build its own, incorporating as many standard components as possible.

Standardization

The new tank will have a turret capable of handling either a 105-mm. gun, such as the Army is using in its present generation of M-60 tanks or a 120-mm. gun such as West Germany and Britain are developing for their next generation of tanks.

The U.S. and German tanks will also use the same track system. In principle, therefore, U.S. and West German tanks will use the same tank items that are logistically important on the battlefield, such as fuel, ammunition, guns, tracks and power plant.

According to defense sources, the revised Chrysler proposal completely undercut the Army's position that it should be permitted to proceed with the diesel-powered General Motors tank equipped with a 105-mm gun. With support from some members of the House Armed Services Committee, the Army had contended that modifying the turret to handle a 120-mm gun would result in additional cost and delays in the tank program. In its proposal, according to defense sources, Chrysler said it would build a turbine-powered tank capable of handling a 120-mm gun at no increase in cost, weight or schedule.

There is still a question of how soon the Army will shift to a 120-mm gun, which the West Germans have argued was superior to the 105-mm gun in its penetrating power and necessary to counter more heavily armored Soviet tanks, such as the new Soviet T-72.

At a Pentagon news conference, Army Secretary Martin Hoffmann expressed doubt that the 120-mm gun would be ready to be included on the Abrams tank when it goes into production in late 1979. West German representatives, however, expressed confidence that it was "only a matter of time" before an obviously reluctant Army shifts to the 120-mm gun on its future tanks.

Decision Expected

A decision is supposed to be made early next year on whether to adopt the smooth-bored 120-mm gun being developed by West Germany or a rifled 120-mm gun developed by Britain for its new Chieftain tank.

The tanks of the three nations will use a new type of laminated armor, developed in Britain, which is considered impenetrable by anti-tank weapons now in use.

The selection of the Chrysler tank was regarded in Pentagon circles as largely the handiwork of Defense Secretary Donald Rumsfeld, who refused to accept the Army's original recommendation and kept pressing the Army to move toward standardization with West Germany.

Mr. Hoffmann said Chrysler was selected because its tank had better battlefield effectiveness, lower operating costs, better maintainability and was priced somewhat lower than the General Motors version.

Mr. Hoffmann said he was "confident" Chrysler, which is now producing the M-60 tank for the Army, had not "bought in" to the new tank program by submitting an unrealistically low bid. At the same time, in the opinion of financial observers, the large tank program, stretching out over a decade, could be of considerable long-term benefit for Chrysler.

The Army plan calls for building 3,312 of the tanks at an estimated cost of $4.9 billion.

Missing GIs at Issue

Positions Appear to Soften In U.S.-Vietnam Paris Talks

By Flora Lewis

PARIS, Nov. 14 (NYT).—Although the State Department said that during the talks with Vietnam here Friday there was no progress on the issue of Americans missing in action, French diplomatic sources took the communique issued late Friday night by the Vietnamese delegation as an encouraging sign that serious negotiations can begin once there is a new administration in Washington.

The Vietnamese statement said that Hanoi was "disposed toward an exchange of views on the problems which preoccupy the American side and to meet fully its obligations under Article 8B of the Paris Vietnam accords." Article 8B requires a complete accounting of the fate of all missing U.S. servicemen and every possible effort to locate and repatriate the remains of those who died.

The United States had demanded a full report on the missing as a precondition for the much broader talks on "normalization of relations in the mutual interest of both parties" that the Vietnamese say they want.

This condition somewhat puzzles the Vietnamese negotiators, according to neutral sources, since it arbitrarily provides them with bargaining cards they would not otherwise hold. They are presumably aware that the United States has the ability to remove the issue when it chooses.

Presumed Dead

This is because it is generally believed by U.S. officials that all living U.S. prisoners have been returned and that those listed as missing are almost certainly dead. A reliable source said that the Department of Defense has been considering an announcement that the 800 listed as missing must be presumed dead. Such a move was being prepared by the Pentagon and would probably have been made late this year had President Ford been elected. Now the decision *is expected to be left to* President-elect Jimmy Carter.

It would have important political as well as economic implications in the United States. So long as the servicemen are list-

Conspicuous Continental Consumption

CALAIS, France, Nov. 14 (Reuters). — Customs officials were overwhelmed and roads were jammed today as tens of thousands of Europeans came home from a weekend spending spree in Britain.

Packed ferries arrived every 20 minutes in Calais carrying cars loaded with British goods bought at the most favorable exchange rates in years.

An estimated 10,000 French cars crossed the Channel for the long Nov. 11 weekend. They came back loaded with refrigerators, hi-fi sets, typewriters and a host of other goods. Customs men were swamped by the sheer number of travelers and appeared to turn a blind eye to what was going on.

1964 FBI Document Reportedly Found

Hoover Memo Said to Assert Oswald Told Cuba of Intention

By John M. Goshko

WASHINGTON, Nov. 14 (WP).—The Justice Department has reportedly discovered a 1964 memorandum by the late FBI director, J. Edgar Hoover, stating that Lee Harvey Oswald told Cuban officials before President John Kennedy's assassination that he intended to kill the president.

Informed sources said Friday that Hoover, in the memo, attributed this information to a highly reliable informant who claimed to have been told it personally by Cuban Premier Fidel Castro.

Mr. Castro, according to the information in the memo, reportedly said he had been advised by officials of the Cuban Embassy in Mexico City that they had met with Oswald before the Nov. 22, 1963, assassination of Kennedy in Dallas, and that Oswald informed them of his intentions.

The assertions reported in the Hoover memo go further than any information currently on the record concerning alleged statements made by Oswald during a visit to the Cuban Embassy in Mexico City before the murder of Kennedy.

There has been a persistent surmise about a possible involvement of the Castro government in the murder of Kennedy, possibly as a counterstroke against CIA efforts to assassinate the Cuban leader. There has also been speculation that the assassination may have been the work of Cuban-exile terrorists.

However, all of these reports have been fourth-hand or fifth-hand accounts originating with informants of doubtful reliability.

The Hoover memo was described by the sources as having been addressed to the Warren Commission, appointed by President Lyndon Johnson to investigate the assassination. But former commission staff members said Friday that they had no recollection of having received such a memo or having been told by Hoover or other FBI officials of the information in it.

Officials of the Justice Department and the FBI refused any

U.S. Sees 450-Billion Budget, a Rise of 10%

By Eileen Shanahan

WASHINGTON, Nov. 14 (NYT).—The Ford administration, in its first preliminary look at budget prospects for the fiscal year 1978, has estimated that government spending would approach or exceed $450 billion, even if the Carter administration proposed no new programs.

The estimated increase in outlays, without any new programs or phasing out of old ones, would amount to about 10 per cent, according to the Office of Management and Budget (OMB).

The estimates were contained in a special document, required by law to be submitted to Congress at this time of year, showing where the budget is headed under existing programs.

The document also details the amount of money that is expected to be spent in the current fiscal year, which began Oct. 1.

Existing Setup

The document said that spending for the 1977 fiscal year would range between $412 billion and $412.9 billion, under existing laws and funding arrangements.

It said that the budget deficit for fiscal 1977 could range between $54.2 billion and $59.3 billion, depending on what assumptions were made about the future course of the economy.

The administration laid out four sets of economic assumptions, but refused to choose the most probable.

Under the most optimistic of the forecasts, the unemployment rate, which is expected to average 7.6 or 7.7 per cent this year, would go down to 6.4 per cent in 1977 and 5.5 per cent in 1978. Under the most pessimistic assumption, it would be 6.9 per cent in 1977 and 6.5 per cent in 1978.

Consumer prices are expected to be 5.1 per cent higher next month than they were last December. Under the optimistic forecast, they would rise by another 5 per cent by December, 1977, and still another 5 per cent by December, 1978.

6.5% Rises

Under the pessimistic forecast, they would rise by 6.5 per cent by December, 1977, and another 6.5 per cent by December, 1978.

The differing growth and inflation possibilities yield considerably different budget estimates for the 1978 fiscal year. Spending for that year could range from $447.1 billion to $453.2 billion, depending on the economic assumptions, and the deficit could range from $32.6 billion to $56.2 billion, the OMB document said.

These figures all assume that there are no changes in the programs currently on the statute books, or in their funding.

A member of the staff of the House Budget Committee said that a quick look through the OMB documents indicated that the spending figures for fiscal 1978 might be a little low.

He said that the OMB had omitted the $635-million funding of local governments—sometimes called countercyclical revenue-sharing. This program would *automatically remain* in effect in 1978, under existing law, if unemployment was still high.

Another $1.9 billion that Congress expects to be spent in 1978 under the public service employment program was not included in the estimates, the Budget Committee staff expert said.

Paul O'Neill, deputy director of the OMB, said at a press briefing that the figures for fiscal 1977 might also be too low by $2.5 billion, if Congress goes ahead and votes funds for jobs, highway, Postal Service, education and other programs for which final funding was not approved before the congressional recess.

The 1977 spending figure of $412 billion to $412.9 billion contained in the OMB estimates was very close to the $413.1-billion figure that had been used by Congress for months. The $2.5 billion in still-unfunded programs might be added to that, however.

Turkey Rejects UN Cyprus Vote

ANKARA, Nov. 14 (Reuters).—Turkey yesterday rejected the UN General Assembly's resolution calling on this nation to withdraw its troops from Cyprus.

Foreign Minister Ihsan Sabri Caglayangil said that the resolution was not acceptable because the Turkish-Cypriot side was not allowed to address the Assembly.

The Assembly on Friday night demanded the urgent implementation of two previous resolutions calling for the withdrawal of foreign troops on Cyprus, the return home of refugees and negotiations between the island's two communities.

Associated Press.

PROTEST—Italians, mainly relatives of 335 Romans slaughtered by Nazis in World War II, march from Rome's Porta Latina toward the Ardeatine Caves to protest the announced release of Herbert Kappler, a Nazi officer who was serving a life sentence.

Involved in Ardeatine Caves Massacre

Italians Protest Release of a Gestapo Ex-Chief

ROME, Nov. 14 (AP).—About 4,000 Italians today marched to the graves of 335 civilians executed by the Nazis in World War II, protesting the release of the Gestapo officer imprisoned for directing the massacre.

Relatives of the victims wept beside the tombs in the Ardeatine Caves on the southern edge of the city, now a national memorial, while others held up protest placards against the release yesterday of Herbert Kappler.

Kappler, the Gestapo chief in Rome in 1944, was given provisional freedom by a military tribunal after having been imprisoned since 1948.

The peaceful protest, bringing together representatives of Jewish groups, World War II partisan organizations, and leftists, was led by Rome's chief rabbi, Elio Toaff, and Mayor Giulio Carlo Argan.

After the march ended, however, 50 youths tried to enter the Cello Military Hospital, near the Colosseum, where Kappler, 69, is reported in critical condition from stomach cancer, the police reported. The youths were repelled but later two representatives were allowed inside the hospital to see that Kappler was still inside and had not left the country.

Protesters announced they would stage an all-night vigil outside the hospital to prevent Kappler from being taken away unseen.

The executions of 335 civilians —70 of them Jews—were carried out on March 24, 1944, in reprisal for the slaying of 32 German

Change in Policy to Israel Denied

U.S. Vote in UN Called Bid to Arabs

By Peter Grose

UNITED NATIONS, N.Y., Nov. 14 (NYT).—The decision of the United States to join in the Security Council's criticism of Israel last week was part of what might be the final effort by Secretary of State Henry Kissinger to enhance U.S. influence among moderate Arabs, in expectation of possible Middle East peace talks early in the Carter administration.

This is the explanation given by knowledgeable U.S. diplomats for Washington's decision to join in Thursday's unanimous Security Council criticism of certain Israeli policies in the occupied Arab territories.

The move marked a shift in diplomatic tactics by the United States, *without changing* the substance of policy. Although it has resisted previous Security Council condemnations, the United States has never recognized Israel's annexation of Arab East Jerusalem and has repeatedly criticized the establishment of Israeli settlements in the lands taken in the 1967 war.

Israeli and Arab diplomats were consulted regularly by U.S. representatives throughout the days of private consultations that led up to the compromise statement by the Council.

These discussions led both Mr. Kissinger and the U.S. representative at the UN, William Scranton, to conclude that the United States had an opportunity to support moderate trends among the Arabs, without at the same time weakening the fundamental Israeli-U.S. relationship.

In Israel, however, Foreign Minister Yigal Allon called in the U.S. ambassador to express *displeasure over the vote and to* accuse the United States of "discrimination."

Reassurance

Even as they moved to reassure anxious Israelis that no real change in U.S. policy had occurred, U.S. diplomats said that the decision was specifically *designed to give a show of en*couragement to Egypt, Syria and Saudi Arabia. These governments recently concluded agreements that seem to be isolating the more radical factions of the Arab world.

Although formal Arab-Israeli negotiations are still far from realization, most experts here expect concerted efforts to resume the Geneva conference, or some similar forum where work on a comprehensive peace settlement could begin, as early as next spring.

Mr. Kissinger reportedly believes that the Arab alignment forged at Riyadh offers the best *hope of producing a responsible* Arab negotiating position. The so-called "rejection front" of Arab politics, including Iraq, Libya and the Palestine Liberation Organization, which have always taken an extreme position against Israel, clearly lost ground at the meeting in the Saudi capital. Qualified diplomats said that the United States had initially conveyed its annoyance, both here and in Cairo, that Egypt had brought the issue of the occupied territories to the Security Council at this time for no convincing reason.

In subsequent discussions, however, the Americans involved were impressed by what *they called* Egypt's "reasonable" attitudes—in contrast to the acrimonious statements that the Egyptian delegate, Ahmed Esmat Meguid, made in the public Council debate.

On one key point of the Council's statement, for instance, warning against "profanations of the holy places," the United States had been willing to caution "Israeli and local [Moslem]

Khaled Defends Price Policy

Saudi Ruler Berates West For Rise in Oil Consumption

RIYADH, Nov. 14.—After discussions with his foreign minister, Prince Saud bin Faisal, and petroleum minister, Sheikh Ahmed Zaki Yamani, King Khaled of Saudi Arabia was interviewed last week by Arnaud de Borchgrave, a senior editor of Newsweek magazine. Portions of the officially approved transcript follow:

Borchgrave—President-elect Jimmy Carter has said that an oil price increase would be a very serious blow to the economies of the oil-consuming nations. A 12-per-cent increase, for example, would add $25 billion to the oil bill of the developed nations alone. Britain is already $20 billion in debt. Italy must repay $15 billion over the next eight years. Mexico owes $18 billion, Brazil $22 billion and the LDCs' [less-developed *countries] global debt is now in* excess of $100 billion, $50 billion of which is owed to private lending institutions. Many experts believe that an increase at this juncture could plunge West Europe into a deeper recession and accelerate the day of reckoning. With Saudi Arabia in a very favorable surplus position, why not hold the line on oil prices?

King Khaled—Your question stems from a misconception. The increase in oil prices was only one of the factors that contributed to debt accumulation. But this debt problem existed long before oil prices went up. And the largest part of these debts is owed to the major industrialized nations. If the oil-price level concerned us alone, I can assure you we would have opted for a price freeze until the end of 1977. But our commitment and obligations to OPEC [Organization of Petroleum Exporting Countries] may preclude such a freeze. Bear in mind, however, that we will spare no effort to avoid causing the consumer nations any damage.

I shouldn't, of course, anticipate OPEC decisions in the matter. But it might be appropriate to point out that OPEC did indeed freeze oil prices for almost two years and this was done on Saudi Arabia's initiative. The decision was taken to allow the consuming nations a transition period during which they could adjust their economies and take adequate measures to conserve energy and control inflation. However, we notice that this has not been done. On the contrary, oil consumption has increased by 4 per cent annually and is expected to go up to 5 per cent. So where are these measures to save energy?

As for inflation, some countries have succeeded in controlling it but most were unable to take the necessary remedial measures. And it's for this reason that the producers are facing constant increases in the price of their imports. In addition, and while OPEC did freeze prices, there was no reciprocity on the part of the

Allies Ask 2 Blacks to Ease Stand At Geneva

GENEVA, Nov. 14 (UPI).—Four of the five "front-line" black states bordering Rhodesia today asked African nationalist leaders to compromise on a date for majority-rule independence to save the Rhodesia talks from possible breakdown.

Nationalist leaders Joshua Nkomo and Robert Mugabe maintained, however, their demands that Britain set Dec. 1, 1977, as the "principal" independence date, with March 1, 1978, as a possible alternative if the legal process on establishing majority rule is delayed.

"We cannot understand why Britain should agree with us that independence within one year is desirable but that it may take 15 months, but refuse to set a specific date," Mr. Nkomo's spokesman said.

Ivor Richard, the Briton who is conference chairman, wants the four black nationalist delegations and the white-minority government's representatives here to agree first on the various stages of the indepedence process, starting with formation of an interim government, and then fix a date

Showdown Session

Mr. Richard, who had scheduled for yesterday what could have been a final showdown plenary meeting, postponed the session until tomorrow morning after an intervention by observers from the "front-line" states of Tanzania, Zambia, Botswana and Mozambique.

The four countries, with Tanzania taking the lead, persuaded Mr. Richard that they might be able to get Mr. Nkomo and Mr. Mugabe to accept a compromise.

The four observers and Mr. Nkomo's and Mr. Mugabe's delegations met yesterday in a session that lasted until late last night.

Today, the two men conferred *privately on whether to modify* their position.

Mr. Nkomo charged yesterday that Mr. Richard, by refusing to set a specific date, was "siding with the regime of Ian Smith."

Mr. Richard said yesterday that he does "not anticipate" a collapse of the conference. Britain is known to be fearful of adjourning the talks because an almost inevitable escalation of guerrilla fighting in Rohedesia might make their resumption impossible.

Deadlock Threat

If a compromise is reached on the date, the 2 1/2-week-old conference would be able to start discussing issues *such as* the structure of an interim government. This question could lead to an almost immediate deadlock both between whites and blacks and among the black nationalists.

Mr. Nkomo and Mr. Mugabe want the conference to appoint a black prime minister who would choose his own cabinet ministers in an interim regime. Bishop Abel Muzorewa, another black leader, wants the transitional government to be chosen by the people in general elections.

The white delegation holds firm to proposals made by outgoing Secretary of State Henry Kissinger, who suggested appointment of a council of state, with equal black-white representation, to draft a constitution, appoint an interim prime minister who should be black, and a cabinet in which blacks would have a majority but with whites retaining control of the army and police portfolios.

Spain Authorizes Memorial Rally For Gen. Franco

MADRID, Nov. 14 (UPI).—The government yesterday gave authorization for a rightist rally *next Saturday to mark the first* anniversary of the death of Generalissimo Francisco Franco.

The go-ahead was given after a leftist-led nationwide strike Friday—the first event in a critical political period—failed to produce any major disturbances or clashes.

On Tuesday, the Cortes (parliament) will take up the government's reform bill, and officials and politicians fear that extremists of the left or right may try to put the democratization plan in jeopardy.

Hard-line Francoists are trying to mobilize up to 200,000 persons for the demonstration here next Saturday and had said the event would take place "with or without" government approval.

Focus on Spain

An 8-page, special section on Spain today takes a look at that country's progress, problems and promises.

The report begins on Page 9.

New Arrivals Cause Problem for South Africans

Angola Refugees Recount Raids on Villages

By John F. Burns

OMUNGWELUME, South-West Africa, Nov. 14 (NYT).—The civil war in Angola sputters on and here in the semi-desert nine miles south of the Angolan border fugitives from the killing huddle together pathetically beneath a blazing sun, dependent on white South Africans for their survival.

At noon Friday, there were 2,857 people, mostly women and children, gathered in a sandy compound at this tribal station and more truckloads were on the way. They were part of a refugee exodus of more than 9,000 that has crossed the frontier into South-West Africa (Namibia) since the latest round in the fighting flared up two weeks ago.

Friday, the South African military flew a group of 40 reporters on a 2,250-mile round trip from Pretoria to a base near the tribal station, to authenticate reports of atrocities against the tribal villagers of southern Angola. South Africa was itself deeply involved in the civil war until March, when it withdrew its troops.

In interviews, the refugees said that they had fled on foot across the border when Angolan government forces, supported by Cuban soldiers and guerrillas belonging to the South-West Africa People's Organization, attacked their villages. They said that many of their men had been killed, their huts burned and their cattle and crops destroyed.

From accounts by the refugees and by South African officials here, a picture emerges of an offensive along a broad front, running from a point north of here to villages more than 100 miles further west. The objective appears to have been to wipe out resistance by the forces of UNITA, the National Union for the Total Independence of Angola, which draws its main strength from villagers in the region.

UNITA was one of three nationalist groups that contended for power after the country gained its independence from Portugal a year ago. Allying itself with forces of the National Front for the Liberation of Angola (FNLA) and supported by South African troops, it battled for control of the country with the troops of the Popular Movement for the Liberation of Angola (MPLA).

The MPLA, supported by up to 15,000 Cuban troops equipped with modern Soviet arms, eventually prevailed. Its supremacy was sealed by March, when the South Africans, disillusioned by the congressional vote to cut off U.S. aid to the pro-Western UNITA and FNLA, withdrew. The MPLA government in Luanda, the capital, won widespread diplomatic recognition and embarked on a program of Marxist reforms.

More than eight months after the MPLA claimed total victory, however, the civil war continues. UNITA, retreating into the bushlands in the southern part of the country, has continued to harass MPLA and Cuban forces. The FNLA's fortunes are less certain, but its leader, Holden Roberto, claimed recently that he still has 30,000 men under arms, operating close to the Zaire border in the north.

South African military spokesmen theorize that the latest offensive was ordered in an attempt to wipe out UNITA before the first anniversary of the country's independence, or at least before the rainy season starts, in about two weeks' time. When the rains come, the soft sand of the region becomes impassable for motorized vehicles, removing the government's advantage.

Another theory is that the MPLA has decided to root out UNITA support in the border area and stop border crossings, in an attempt to halt South African support for the guerrilla movement. Such support, in the form of supplies of arms and training, has been rumored for months. However, there is no hard evidence to support it and South African military spokesmen have declined to discuss the issue.

The immediate problem for the South Africans is coping with the refugees as the rainy season approaches.

Friday, the rain clouds were gathering across the desert to the west, a warning that only a few days remain when it will be possible for most of the fugitives to sleep on the sand beneath the open skies. Airlifting tents by the military is a possibility, but the South Africans seems reluctant to give the camp an air of permanency.

About 1,000 of the refugees cluster together beneath a shelter of concrete and corrugated iron. The rest gather in the shade of the mopani trees that dot the compound, especially at noon, when the temperature reaches searing 110 degrees. The children, mostly naked, pass the time chasing each other around the compound. The old men just sit while the women suckle infants or guard meager possessions, such as cooking pots and water gourds.

There were no injuries apparent and most of the fugitives, who get three meals a day, appeared to be healthy.

Confrontations Avoided in Nairobi

Israel Awaits a New Unesco Victory

By Roger Mann

NAIROBI, Nov. 14 (WP).—Although some militant Third World and Arab countries feel that they have already made enough concessions to the "spirit of Nairobi," Western countries that generally back Israel are poised for another victory at Unesco's general conference.

Thirty African and Arab countries have submitted a resolution that condemns Israel's educational policies in the occupied Arab territories, but Western diplomats are optimistic that they will be able to gain support for a watered-down version that moderately criticizes but does not condemn Israel.

Debate on the issue begins tomorrow, just a few days after the UN Security Council unanimously deplored Israeli policies in the occupied territories and termed them an "obstacle to peace."

Educational Policies

When news from New York reached Nairobi, Arabs and Africans thought it would lend authority to their condemnation of Israel's educational policies in the occupied territories. Western delegations sent cables to their capitals seeking fresh instructions.

The Security Council's decision does not, however, seem to have had much impact on the conference here in Nairobi. In fact it may have given weight to the Israeli position that Unesco should stick to matters of education and culture and leave political questions to the General Assembly.

The Israelis know, however, that Unesco is extremely political. An American delegate said that "Unesco is the United Nations' most political agency because education and culture, by their nature, are very political." Nobody here in Nairobi speaks seriously of "depoliticizing" Unesco.

A striking example of how culture can be political is the debate that will begin later in the week on Israel's archaeological excavations in occupied Jerusalem. "We expect the Jerusalem issue to be the toughest for us," said Constantine Warvariv, a U.S. representative at Unesco headquarters in Paris.

Militant Third World representatives are looking for at least one opportunity to criticize Israel and go on record as a friend of the Arab cause. A radical Caribbean delegate said he finds Israel's continued occupation of Arab territories and mistreatment of Palestinians so abhorrent that he is angry that Israel has so far escaped censure.

'Soft as Dough'

"Even in the resolution calling for the eradication of racism and racial prejudice [which passed unanimously], we weren't allowed to mention Israel," he lamented. "I don't understand it. Even Cuba has become as soft as dough here."

Israel gained another victory when the conference approved, 70-0, with 17 abstentions, a parliamentary maneuver to allow only European nations to vote on Israel's application to join the organization's European region. Two years ago, at the last Unesco general conference, this proposal was turned down.

Although some delegates do feel uneasy with the "spirit of Nairobi"—the air of compromise and conciliation that has dominated the conference—it is likely to continue.

The African delegates are committed to make the conference succeed without open political warfare, because this is the first Unesco general conference held on African soil and because they want to support the director-general, fellow African Amadou Mahtar M'Bow of Senegal.

The African bloc has generally been successful in enlisting the support of its Arab friends. This has left the Soviet bloc without the Third World backing it has enjoyed at international forums during recent years.

Surprisingly, the Palestine Liberation Organization, usually considered the diehard militant of the Arab world, is being taken to task by radical Arab nations such as Iraq and Algeria.

In explaining his organisation's moderation, Ibrahim Sou the chief PLO observer said, "W need Unesco more than the Israelis and all of the Arab co tries together."

Mr. Souss said that Une and the PLO have a number joint projects, including a mu million-dollar "open univers that in 1978 will begin to br secondary and college educa to thousands of dispersed Pa tinians via television and ra

For this reason, the PLO endorsed a move to tone do the resolution on Israeli edu tion policies in occupied A territories. Endorsing "the sp of Nairobi," Mr. Souss ha that a subdued version not c taining an outright condem tion will be passed with token opposition.

The issue is not a new one 1974 the organization called Israel to accept a Unesco mission to investigate educ in occupied territories.

Israel refused then on grounds that Unesco had alr condemned its policies. Bu has recently agreed to acce commission that is schedul visit the occupied areas in J ary.

The Afro-Arab draft resol condemns Israel's "system Judaization of education and tural life in all occupied territories."

The very word "Judaizatio offensive to some delegates. the sponsors of the resolu cannot agree on an interpr tion. A Tanzanian delegate lieves that it means that I is preaching the racial supre of Jewish people to Arab chil in schools.

An Arab claims that to hi implies anti-Arab teachings a denigration of Arab cul while a Tunisian said it m means focusing on Israel schools, as former Euro powers taught their colonial jects that France or Britain the center of the universe conceded that "Israelitai would have been a more p and less offensive term.

The United States and E pean countries oppose the

Israel to Call Up Reserves in Test

TEL AVIV, Nov. 14 (AP).—The military command announced today plans for a practice call-up of reserve forces to test Israel's war readiness.

The timing and size of the exercise was not announced, but Israelis were advised by newspapers and radio to expect conscription notices and coded call-up signals on Israeli broadcasts.

The nation relies on reserves for most of its military manpower. Foreign studies indicate that Israel has a standing army of 156,000, with a reserve force of 450,000 men.

Movement Found in U.S.-Vietnam Discussions

(Continued from Page 1)

ed as missing, their families receive their full pay with combat bonuses and all benefits. When they are pronounced dead, there is a lump-sum settlement and pension rights go into effect.

A declaration changing the status of the list would remove the major obstacle on the U.S. side to proceeding with substantive negotiations.

The United States hinted that it was interested in moving on to broader political and economic issues when it referred in its bland announcement Friday to talks with the "Socialist Republic of Vietnam."

That is the new name that Hanoi has chosen for the unified country. The U.S. use of the name indicated that Washington does not intend to haggle over the question of recognition or to recall the clauses in the 1973 accords on South Vietnam and the role of the now-defunct Saigon government.

Official Hope

When Deputy Foreign Minister Nguyen Co Thach visited Paris last month, shortly before the U.S. elections, he expressed the hope that a new administration will be more far-sighted than its predecessor."

The conciliatory tone of the Vietnamese communiqué after Friday's talks seemed to reflect both this expectation and a realization that the United States can at any time withdraw the issue of the missing servicemen.

Instead of demanding, as in the past, that the United States fulfill Article 21 of the Paris agreements pledging U.S. aid for reconstruction throughout Indochina simultaneously with a Vietnamese accounting of the missing, the statement simply said that aid was a U.S. "obligation."

"This is not only a question of right, but also a question of honor, of responsibility and of conscience," the communiqué said, a much softer phrasing than in some past Hanoi declarations linking aid with war separations and an acknowledgment of guilt for aggression.

Hanoi called for "carrying out what had been agreed in the Mixed Economic Commission in Paris in 1973." In those negotiations, which continued here for several months after the formal agreements, the United States offered postwar aid but firmly refused to consider it as anything but a gesture of goodwill for the future.

The details of how far the Mixed Economic Commission got were never fully published. Negotiations trailed off after U.S. prisoners were returned and fighting continued in the South. When North Vietnamese forces began the offensive that led to the collapse of the South Vietnamese government last year, the United States said that this was a violation of the Paris pact, canceling U.S. obligations under the accord.

But Hanoi's reference to the economic commission's negotiations now appeared to scale down the sweeping reconstruction demands it had been making and to open the way for an initial compromise on terms the United States had been prepared to accept.

The U.S. delegates left Paris after Friday's meeting and were understood to have flown to Washington. No date was set for the next meeting so far as could be learned.

France Backs Vietnam at UN

UNITED NATIONS, N.Y., Nov. 14 (AP).—The United States came under more pressure to hold off a threatened veto of UN membership for Vietnam as the Security Council took up the application Friday.

France became the 11th sponsor of a pending resolution that would have the Council recommend that the General Assembly admit Vietnam. The Soviet Union and China both spoke out against the exclusion of Vietnam.

The two Communist countries were sponsors of the resolution along with Romania, Sweden, Pakistan, Guyana, Panama, Benin, Libya and Tanzania.

The 10 countries submitted the resolution Thursday, a day after a similar move by the Council's Membership Committee was blocked by the United States. The U.S. position was tied to Vietnam's failure to account for U.S. missing in action.

Soviet delegate Mikhail Kharlamov recalled that last year the United States twice vetoed separate memberships from North and South Vietnam filed after the war ended.

Freeing Nazi Is Protested

(Continued from Page 1)

soldiers by Italian partisans in downtown Rome the day before.

The marchers today carried placards saying, "Military Judges Have Never Visited the Ardeatine Caves" and "Money to Italy, Kappler to Germany."

Kappler was released under provisions of Italian law allowing the setting free of prisoners who have repented of their crimes as long as they have served at least 28 years in prison.

Kappler was transferred from the medieval castle-prison of Gaeta to the hospital in Rome 10 months ago, after he became seriously ill. He had expressed the desire to be returned to Germany so he could die in his homeland. The West German government, including President Walter Scheel, had made appeals to Italian authorities that Kappler be granted his freedom.

Under the law, after release Kappler would be required to stay in Italy where the police can check on him. Conditional liberty runs for five years.

Kappler's attorney, Franco Cuttica, said, however, that he was waiting for authorities to arrange to escort Kappler to Germany.

Bid Made to Moderate Arabs In U.S. Vote Against Israel

(Continued from Page 1)

authorities" against possible provocations. Egyptian negotiators preferred to leave out any specific citations, and persuaded their Arab colleagues to go along with language even milder than what Washington had suggested.

Israeli diplomats, led by the permanent representative, Chaim Herzog, have outspokenly criticized the Council's action in public statements. Privately, they admit that the majority of the Council would have voted a far stronger condemnation if the United States had not used the leverage of providing unanimity in order to tone down the earlier anti-Israel drafts.

Middle East experts in the UN diplomatic corps agreed that resolutions critical of Israel often achieve an opposite effect from that intended; they only anger the Israeli government and strengthen the hard-line elements. In this case, Thursday's action could also encourage extremist sentiments among Palestinians in the occupied territories.

Acknowledging this, U.S. officials expressed confidence nevertheless that any strains in the Israel-U.S. relationship would be short-lived. They were less confident about when any real signs of success in strengthening ties to the Arab states would be felt.

This week a spate of bitter and hostile speeches is expected when the General Assembly begins debate on the issues of Palestinian rights. At a time that the PLO has been sorely weakened by its defeats in Lebanon, the Arab governments may find it necessary to heighten their rhetoric to compensate for these reversals.

Syrian Forces Push Deep Into Rival Districts

BEIRUT, Nov. 14 (UPI).—The Arab League's Syrian peacekeeping force today pierced deep into Christian and Moslem territory north and south of Beirut and warned civilians to keep the highways clear for the force's push into the city, expected tomorrow at dawn.

"People are asked to avoid using the main roads and highways of Beirut and the suburbs between midnight Sunday and Monday evening to facilitate the implementation of the second phase of the security plan," Beirut radio stations said.

The first phase was implemented Wednesday when two Syrian-dominated armored brigades swept down from positions in the central mountains to the outskirts of Beirut.

More than 100 armored vehicles rolled from positions near the capital on the coastal highway deep into Christian areas. They passed Junieh, the Casino du Liban and the ancient seaport of Byblos on their way to Amsheet, 27 miles north of Beirut.

The column did not enter Junieh, the rightist "capital," but kept to the main highway along the coast.

Defends Price Policy in an Interview

Saudi Ruler Berates the West for Rise in Oil Consumption

(Continued from Page 1)

consumer nations. OPEC members have done more than any other group of nations to assist the other LDCs in overcoming the economic difficulties they face.

Borchgrave—Won't a recession in West Europe—which is bound to affect the U.S. economy as well—hurt your own development plans?

King Khaled—It's obvious that there is an interaction between the Western industrialized economies and the oil-producing nations. And it's for this very reason that OPEC took the decision on its own to freeze prices for approximately two years. And if the West European nations don't take the necessary steps to put their affairs in order, then their economic problems will continue and will indeed affect other nations. It simply isn't possible to demand from the oil producers that they subsidize West Europe's oil consumption by continuing the freeze at the sacrifice of OPEC members' economic interests. And I say this in the firm conviction that we have contributed more than our share in alleviating Europe's difficulties.

Borchgrave—Another solution, suggested by Western experts, is for Saudi Arabia to pump more oil, which would keep prices stable. What is your objection?

King Khaled—Increasing production to stabilize prices would be the most damaging thing that could happen to humanity. Experts also say that if oil consumption continues to increase as it has been, oil reserves will dry up by the end of this century. And if this happens and we don't find alternative sources of energy, the world won't only face recession but a disaster. That's why the international community should adopt corrective measures essential to the conservation of energy and to confine its use to reasonable levels.

Although Saudi Arabia has the largest reserves in the world, this doesn't mean that it will accept an invitation to deplete its prime source of wealth just because others are unable to conserve it or use it reasonably. But I do believe that we have shown our desire to cooperate during this transition by producing more oil than our development needs require in order to meet the persistent demand for oil. But do remember that when we produce one additional barrel, we will never be able to replace it. This is not Saudi Arabia's problem alone but the entire human race's. And in the absence of serious efforts by consuming nations to conserve, oil prices will continue to play a very important role in balancing supply and demand within reasonable limits.

Borchgrave—Mr. Carter says that the Arab boycott against Israel will stop when he gets into the White House.

King Khaled—The boycott is a retaliatory economic measure that the Arabs use to guarantee their security and to lessen Israel's ability to declare war on the Arab people and occupy their land. Therefore, the boycott is not directed against any other country and it is not based on racial or religious discrimination. And the Arabs are not the first, nor the only nation, that applies the boycott.

The U.S. is in the forefront of the nations calling for the use of boycott when its interests are threatened. Wouldn't the United States exert all of its efforts if it became the victim of a foreign invasion or occupation in order to expel the invaders, including the use of economic pressures against companies that assist and support the enemy, and didn't it do more than that against the German occupation of Europe in World War II? Didn't it apply the boycott against China and Cuba and doesn't it still do so?

Borchgrave—And what do you plan to do about new U.S. legislation?

King Khaled—The Arab boycott against Israel has been in existence for the last 20 years and it is therefore very strange that it should only now be a major issue in Arab-American relations, especially at a time when the U.S. volume of trade with the Arab world has increased tremendously and is expected to continue to climb. And it seems that the companies that assisted Israel and deprived themselves of doing business with the world have been encouraged Israeli pressure groups to try prevent other parties from ding with the Arabs.

U.S. legislation, encouraged the Israeli lobby, is designe penalize and thus prevent firms from trading with Arabs. If this trend contin the inevitable result will b cut American companies from Arab world, which has a po tion of 130 million. And urally, we're always wonde whether such legislation the interests of the Amer people because you will be ing yourselves, not the A As far as the Arabs are cerned, they have taken decision to end the boycott moment a just solution to Middle East problem has achieved.

Borchgrave—Can you for circumstances under which might be another oil embargo

King Khaled—We're not thinking of applying a new embargo and we hope that cumstances will not force us do so.

Borchgrave—What about gressional moves supported Mr. Carter to cutback on sales to Saudi Arabia?

King Khaled—All we from the U.S. is that its po in the Middle East be just fair and that you will be bala ed and equitable in dealing all the countries in the a bearing in mind your own tional interests and the preser tion of your relations with friends. Saudi Arabia, as history will testify, has never tacked anyone and it is not policy to do so. Our objective arming ourselves is first foremost self-defense.

The kingdom is a vast coun suffering from a relative ma power shortage in relation to size. So it's inevitable that take this factor into accou when drawing up our milita strategy and armaments requi ments. We have to compens for it as much as possible by ing sophisticated equipment a military technology. We are c tain that friendly governmen producing arms, including t United States, will appreciate t kingdom's motivations and obj tives in this regard.

Burns Sees No Conflict on Carter Policy

Reports Countered By Federal Reserve

WASHINGTON, Nov. 14 (NYT). —Arthur Burns, chairman of the Federal Reserve Board, has taken steps to counter an impression he left in many minds last week that he might be headed for a major fight over economic policy with the Carter administration.

He took advantage of a meeting on Friday—previously scheduled for another purpose—with Rep. Henry Reuss, D-Wis., the chairman of the House Banking Committee, to explain that he expected to be able to cooperate with President-elect Jimmy Carter's economic policies.

In addition, the public information officer for the Federal Reserve Board got in touch with reporters for The New York Times, the Wall Street Journal, The Washington Post and the Baltimore Sun and told them that Mr. Burns had been surprised at the view these papers took of his remarks Thursday before the Senate Banking Committee.

According to the Federal Reserve spokesman, Mr. Burns had intended only to warn Congress against adding to government spending as a means of stimulating the economy, not to warn the Carter administration against cutting taxes, which Mr. Carter has said he might attempt if the economy still looks weak in January.

'Traditional Policies'

Among the things that Mr. Burns said in his testimony Thursday was that "traditional policies of economic stimulation might well be counterproductive."

Such traditional policies have included both tax-reduction and expenditure increases, but Mr. Burns's spokesman said that the Federal Reserve chairman "had been surprised at the emphasis placed on the tax issue" in news accounts of his testimony "since he did not mention it."

Mr. Burns apparently succeeded in persuading Rep. Reuss that he was not planning or expecting any policy conflict with the Carter administration.

'Sensible, Moderate'

In a statement, Rep. Reuss said that he saw "no reason to think that Dr. Burns will not cooperate with President-elect Carter's economic policies, which I anticipate will be reasonable, sensible and moderate."

Rep. Reuss also said that he was "confident that a moderately expansive fiscal policy in the Carter administration, which is needed, will be accompanied by a moderately expansive monetary policy."

The Federal Reserve by law has sole authority over monetary policy and may act independently of, and contrary to, the wishes of any administration.

Absentee Ballot Survey

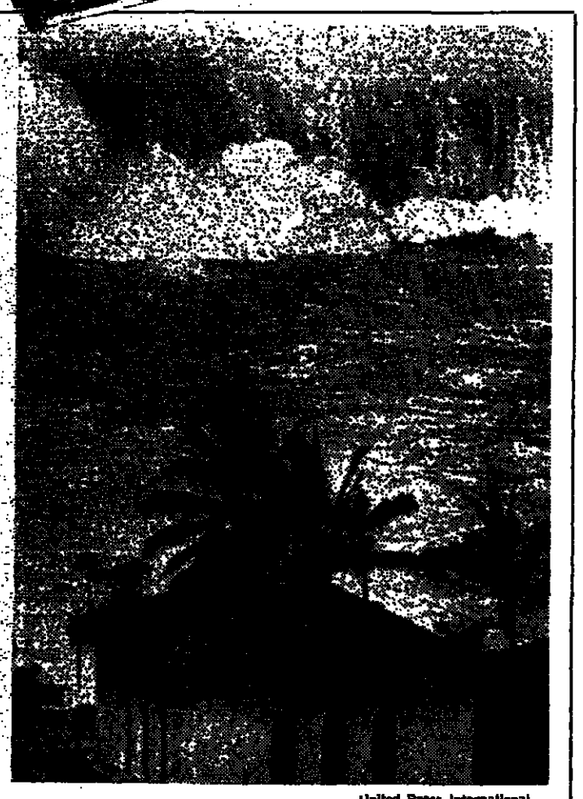
Philip Criticizes Welfare State, Stirring a Debate

LONDON, Nov. 14 (Reuters).—Prince Philip has caused a row by criticizing the welfare state and calling for more rewards for hard work and enterprise.

The comments, in a foreword to the 120th anniversary edition of the professional magazine Engineer, aroused immediate protests from left-wing members of the ruling Labor party.



The opposition Conservatives have been blaming creeping socialism and government spending for Britain's economic difficulties.

Prince Philip, who as the husband of Queen Elizabeth is supposed to abstain from political comment, wrote:

"The welfare state is a protection against failure and exploitation but a national recovery can take place only if innovators, and men of enterprise and hard work, can prosper."

A left-wing Labor member of Parliament, Dennis Skinner, said that Prince Philip, who collects an annual £65,000 (about $105,000) state grant, should be ashamed of himself. "Any old-age pensioner gets only 15 sterling a week, but he [Philip] lives off the state, he has a damn cheek," Mr. Skinner said.

Carter's Church Votes to End Race Barriers to Membership

PLAINS, Ga., Nov. 14 (AP).—The members of President-elect Jimmy Carter's Baptist church voted today to end racial barriers to church membership—a move long backed by Mr. Carter.

Mr. Carter, leaving Plains Baptist Church, stood in the rain and said: "I was proud of my church."

"The sun is shining on the South again," said the Rev. Clennon King, the black minister from Albany, Ga., who stirred the controversy anew a month ago when he announced he would seek membership in the church.

Mr. King, who awaited the verdict while standing in a chilly rain, can now return to Plains next Sunday and apply for church membership.

A Committee

Mr. Carter emerged from the Plains Baptist Church after a three-hour closed meeting to report that his fellow church members had also voted not to fire their pastor, the Rev. Bruce Edwards. He said they had decided to set up a "watch care" committee to judge the qualifications of any person desiring to join the church.

Asked whether he exerted any influence over the congregation, he said: "I was just one of the church members. I'm completely satisfied with the church. The pastor is pleased. There will be no exclusion based on race."

Rosalynn Carter, the President-elect's wife, was crying softly as she and her husband walked from the doors of the church.

Eleven years ago, the Carters were virtually the only members of the church to vote for the admittance of blacks.

The official results were announced from the church steps by state Sen. Hugh Carter, the President-elect's cousin.

"The fourth and final motion was to open the doors to all who want to worship Jesus Christ, and that motion passed 120 to 66," he said.

Carter's Stand

Mr. Carter's stand on segregation had been clear since at least 1965. He believed that the barriers should come down and the church should be opened to all who wished to worship there.

But other church members have been divided, some resenting the glare of publicity focused on their congregation by Mr. Carter's election to the presidency.

"I'll tell you what disturbs me so much," a church member said. "That we would let one black man disturb this community so bad. It's unreal."

The initial issue before the church in the closed meeting was whether the Rev. Bruce Edwards could continue as pastor after his criticism of the deacons' moves to uphold the church's 1965 policy barring "blacks and other civil rights activists."

Mr. King's attempt to join the all-white church led the church deacons to cancel services the Sunday before the election, jolting the Carter campaign in its closing days.

Last Sunday, services were held as scheduled, but the doors were locked to prevent Mr. King from entering.

Finnish Lutherans Say No to Women Clerics

TURKU, Finland, Nov. 14 (Reuters).—The Lutheran Church, Finland's largest with more than 90 per cent of the country's Christians, has refused to let women become ministers.

A proposal to allow women ministers failed to pass last week's annual meeting here by the required three-quarters majority although 66 delegates voted for women, with only 37 against.

Oswald Note Is Reported

(Continued from Page 1)

comment on the memo's existence, and other sources familiar with the assassination investigation said they had no knowledge of whether it actually was sent to the Warren Commission.

Search Is Ordered

Those sources, who told The Washington Post about the document, said its existence had apparently been unknown until recently. It was discovered, the sources said, as the result of information that came to the attention of the Justice Department and that prompted Attorney General Edward Levi to order a search of FBI files.

After the memo was found, the sources added, Mr. Levi established tight secrecy on the matter.

As a result, the sources said, they are unable to answer such questions as why the memo apparently never reached the Warren Commission, whether the information was accurate and, if so, whether Mr. Castro was informed about Oswald's intentions before or after Kennedy was killed.

2 or 3 Times

Documents released recently by the CIA under the Freedom of Information Act establish that Oswald visited Mexico City less than two months before the assassination and met there with officials of the Cuban Embassy.

One of these CIA documents, dated May 5, 1964, states that prior to October, 1963, Oswald visited the Cuban Embassy on two or three occasions.

The sources were unable to identify the informant described in the Hoover memo as having obtained the information from Mr. Castro. Some of the sources said, however, that they believed, "as an educated guess," that it was Rolando Cubela, a high Cuban official and Castro intimate whom the CIA recruited in 1961, and who later figured in CIA plans to kill Mr. Castro.

Other documents that have been made public recently indicate that Hoover and top FBI officials knew, while the bureau was investigating the Kennedy assassination, that the CIA had been exploring the possibility of having Mr. Castro killed. However, Hoover never informed the Warren Commission of the CIA's plotting against Mr. Castro.

Vietnam War Reportedly Gave Seoul Lobby Leverage in U.S.

By Richard Halloran

WASHINGTON, Nov. 14 (NYT). —A former State Department official in charge of Korean affairs has asserted that senior officials of the Nixon administration did little to curb an improper South Korean lobby here because they did not want to jeopardize the Korean commitment of 52,000 troops to the war in Vietnam.

Donald Ranard director of the Office of Korean Affairs from 1970 through 1974, said in an interview that senior administration officials were preoccupied with the Vietnam war in the early 1970s, when the Korean lobby started, and did not want to embarrass an ally. Mr. Ranard, who was in a position to know most of what went on inside the government on Korean issues, said he could recall no specific policy guidance on this question, but he added:

"There was always a feeling below the surface that the Korea lobby was to be left alone. We were in a position where we thought we needed them in Vietnam. We sure weren't going to be rapping their knuckles in Washington when we needed their help elsewhere."

Letter to Park

Mr. Ranard recalled that U.S. officials had to persuade the South Koreans to release U.S.-built F-5 jet fighters to the South Vietnamese. In another instance, he said, President Nixon wrote a personal letter to President Park Chung Hee asking him to keep Korean forces in Vietnam longer than planned.

Robert Funseth, a State Department spokesman, said that any charge that State Department officials had failed to curb improper acts by South Koreans in an effort to preserve the Korean troop commitment in Vietnam was "absolutely false."

"As we have stated in the past," he said, "when there was an indication of any illegal activity it was brought to the attention of the Justice Department for further investigation."

Mr. Ranard is now the director of the Center for International Policy, an organization here concerned with the study of human rights and foreign policy. He said that he had repeatedly brought the Korean lobby to the attention of his superiors. He said there had been no deliberate attempt at a coverup; it was simply that nothing was ever done about the lobby.

Mr. Ranard said that William Rogers, then secretary of state; Henry Kissinger, then presidential assistant for national security affairs and currently secretary of state, and William Saxbe, attorney general in the latter days of the Nixon administration, had been informed of the Korean operation.

Former Secretary of Defense Melvin Laird said last week that he had been aware of an improper Korean lobby and had warned the State Department about it. He also said he had warned the South Koreans that it was harmful.

Others Informed

A memorandum written by Alexis Johnson, under secretary of state for political affairs, the top career position in the department, shows that he knew about the Korean operation in 1971. Mr. Laird also said that William Porter, ambassador to Korea from 1967 to 1971 and under secretary from 1973 to 1974, and Philip Habib, ambassador to Korea from 1971 to 1974 and currently the under secretary, had been well informed on the Korean lobby.

Senior State Department officials have privately acknowledged that they knew of the Korean operation, but contended that "bureaucratic lethargy" precluded an investigation. A spokesman for the Department of Justice, which is currently investigating charges of bribery and illegal lobbying, had no comment. The case is before a federal grand jury here.

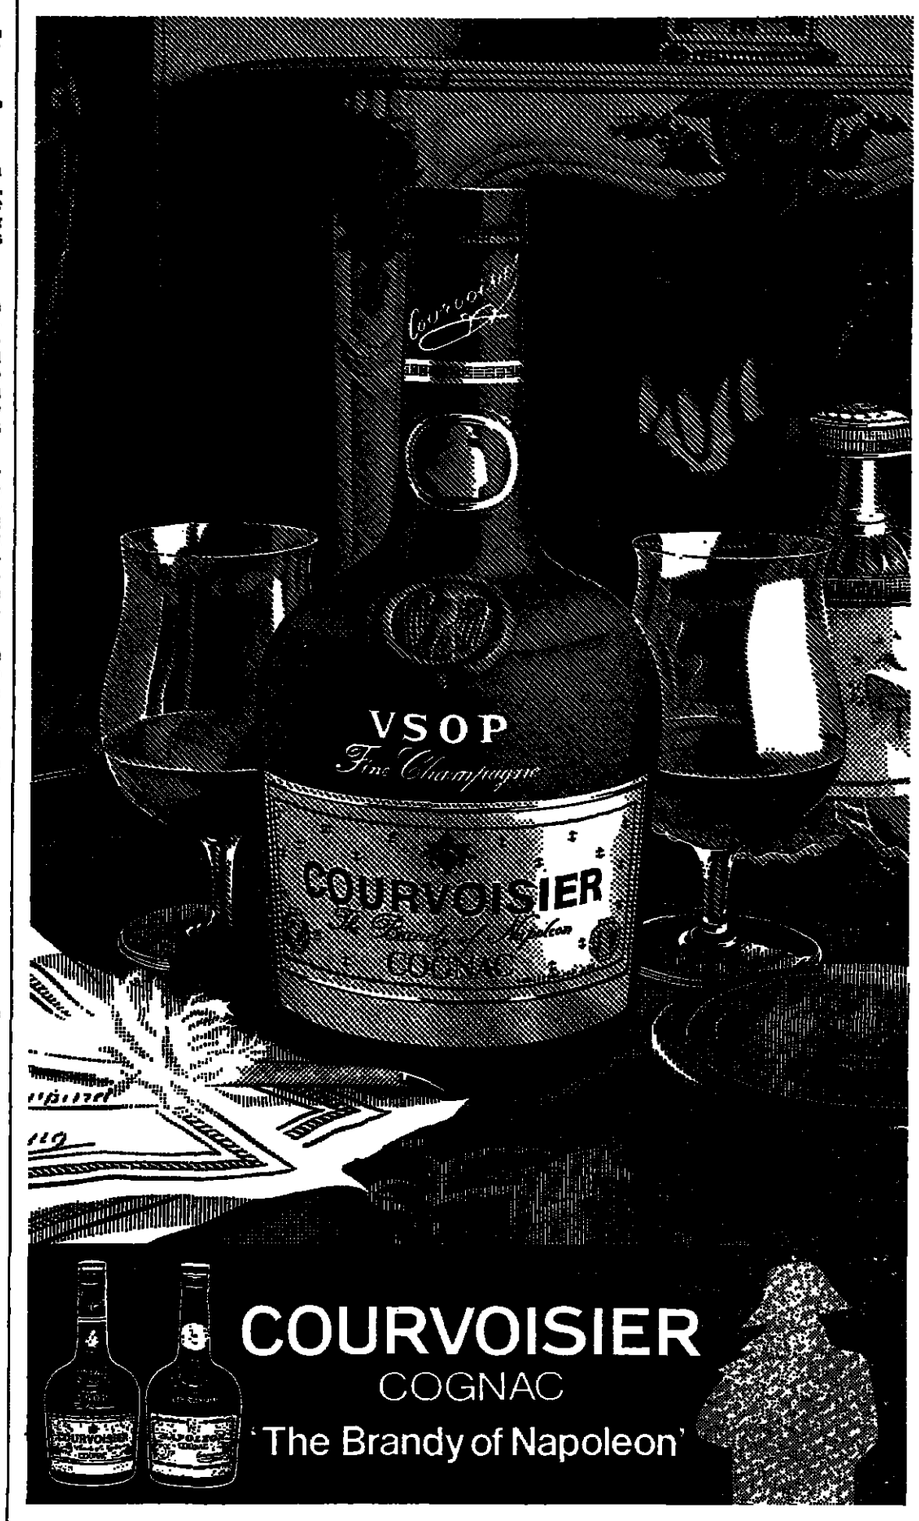
Mr. Saxbe, who is ambassador to India, told a New York Times correspondent in New Delhi that he never been informed that a key South Korean operative in the United States, Tongsun Park, was under investigation. But he said that he suspected something toward the end of his term as attorney general.

'Throwing Money Around'

Mr. Saxbe said that Tongsun Park, whom he had known socially for two years, gave a farewell party for him that included 100 guests from the Senate, the House and the Cabinet. "You know," Mr. Saxbe said, "anybody throwing money around like that in Washington, you wonder."

He said that he had not ordered an investigation because he had not had concrete information to go on. Yet congressional documents show that the FBI began investigating Korean Central Intelligence Agency operations in the United States in 1973, while Mr. Saxbe was attorney general.

Federal officials said that the FBI lacked the manpower to mount a thorough investigation until last year, just after Mr. Saxbe left for India. Those officials said that counterintelligence units of the FBI were occupied with watching agents of adversary nations and had little time for agents of allies.



Former Premier Chirac Victor In French Vote

PARIS, Nov. 14 (Reuters).—Former Prime Minister Jacques Chirac, a Gaullist, scored an impressive first-round victory in key French parliamentary by-elections today, but the government coalition was having trouble in other races.

Mr. Chirac, who resigned as premier in August after a policy dispute with President Valéry Giscard d'Estaing, won in his rural Corrèze constituency with more than 53 per cent of the vote.

Socialist Louis Eyraud captured a Haute Loire National Assembly seat for the leftist opposition. At least two former government ministers were forced into second-round votes in their constituencies next Sunday—necessary when there is no overall majority in the first test.

The by-elections are seen as an important test for Mr. Giscard d'Estaing's liberal-conservative administration with a general election 16 months away.

UNBEATABLE!

SAS STILL FASTEST EAST

Take the Scandinavian shortcut to Southeast Asia. Our nonstop DC-10s to Bangkok are the fastest flights available—only 10 hrs 55 mins. Our Trans-Asian Express straightway is unique. Only 12 hrs 15 mins with one stop.

All SAS flights depart from Copenhagen at 3 p.m. with good connections from all major cities in Europe. SAS time-savers are unbeatable.

Letelier Slayers Seen Highly Organized

Political-Motive Theory Gains in Chilean's Death

By Norman Kempster

WASHINGTON, Nov. 14.—A young woman who had debarked from a plane at Kennedy Airport in New York was approached by a stranger with a grim message.

"Tell your boyfriend to stay away from the Letelier case or somebody will get hurt," the man said, then melted into the crowd.

The woman was the fiancée of an FBI agent assigned to investigate the murder of Orlando Letelier, who had been foreign minister in the deposed government of President Salvadore Allende of Chile. Mr. Letelier was killed on Sept. 21 when a bomb exploded in his automobile on Washington's Embassy Row.

The threat told the FBI a great deal about the killers they were seeking.

Out of a Crowd

Mr. Letelier was murdered by members of a group sophisticated enough to find out which FBI agent was handling the case, place him under surveillance, determine the identity of his fiancée, learn her travel plans and pick her out of a crowd. In short, an organization with an effective intelligence apparatus.

That seems to rule out most nonpolitical motives and a lone individual with a personal grudge.

The FBI has assigned agents to work full-time on the case in Washington, New York, Miami and perhaps other cities, according to sources familiar with the investigation.

"This is a big case, like a big kidnapping," a source said. "There are a lot of people working on it."

The CIA is also understood to be participating in the investigation.

Two theories have emerged. One is that Mr. Letelier was killed by agents of the present government of Chile. The other is that he was murdered by rightist Cuban terrorists.

So far, there have been no arrests.

Although the FBI has been reluctant to discuss the case, it was understood that U.S. officials were shaken by the murder, which seemed to have been planned as a deliberate insult to the United States.

The 44-year-old former diplomat was killed when a charge of military-style C-4 plastic explosive detonated under the floorboards of his car. Also killed was a U.S. citizen, Ronnie Moffitt, 25, a colleague of Mr. Letelier's at the Institute for Policy Studies, a left-leaning Washington think tank. Mrs. Moffitt's husband, Michael, was also in the car but was not seriously hurt.

Mr. Letelier was driving near the most important embassies in the U.S. capital when the bomb exploded.

Settling a Score

If the killers had wanted to settle a score with Mr. Letelier without embarrassing the United States, the theory goes, they could have used a means that would not have endangered two Americans and they could have picked a less sensitive location.

Mr. Letelier served as foreign minister and defense minister in the Allende government. He had also been ambassador to Washington. He was an enemy of the military junta of President Augusto Pinochet, which overthrew Mr. Allende's elected government on Sept. 11, 1973.

Mr. Letelier was arrested by the junta the day the Allende government was overthrown. In an interview with Playboy magazine, made public following his death, Mr. Letelier said he was taken from his cell by a firing squad but for some reason was spared at the last minute. After spending a year in a Chilean prison, he was permitted to leave the country. He had been a member of the staff of the Institute for Policy Studies since then.

Only 11 days before Mr. Letelier was killed, the Pinochet government published an official decree revoking the Chilean nationality of the former Cabinet minister for conducting "a publicity campaign to obtain political and cultural isolation of Chile."

The decree specifically blamed Mr. Letelier for persuading the government of the Netherlands to withdraw a $63-million development credit Chile had been seeking.

The Pinochet government denied it was implicated in the killing, which it called an "atrocious act of terrorism."

U.S. officials discourage speculation that the Pinochet government played a part in the murder. The Washington Post quoted sources earlier this month as saying that CIA Director George Bush believes it would have been counterproductive for the junta to have committed such a crime.

Mr. Letelier's colleagues at the institute said that less than two weeks before he died, he told them he had received a letter from a source in Chile reporting that the junta had debated whether he should be killed.

Mr. Letelier said that, according to the letter, a moderate faction opposed to his assassination won the debate.

The FBI is understood to be actively investigating the possibility that rightist Cuban exiles may have been involved in the case.

The motive Cubans might have for killing a Chilean are obscure. But George Crile, Washington editor of Harper's magazine, recently quoted Max Lesnik, publisher of a Cuban newspaper in Miami, as saying: "The Chileans are using the Cubans; they use them because the Cubans are crusaders. You tell them there are 10 Chileans in Paris who were close to Allende and that Allende was close to Castro and they will go kill them."

There have been nine terrorist bombings in the Miami Cuban community in recent months.

The Letelier case is especially troublesome to the CIA, which trained many of the Cuban exiles during a series of efforts to assassinate Premier Fidel Castro. The CIA also maintained close relationships with some of Gen. Pinochet's supporters. The Senate Intelligence Committee reported earlier this year that former President Richard Nixon ordered the agency to attempt to undermine Mr. Allende's government.

A former CIA case officer who served in Latin America said the agency has sometimes found it difficult to make its Cuban protégés understand the difference between activities carried out at the suggestion of the U.S. government and private acts of terrorism.

"You can knock them off the payroll but you can't take back what you taught them to do," he said.

Walter Piston, 82, Composer, Pulitzer Winner

NEW YORK, Nov. 14 (NYT).—Walter Piston, a distinguished composer and teacher of music and winner of the Pulitzer Prize for Music in 1948 and 1961, died Friday at his home in Belmont, Mass. He was 82.

Mr. Piston, a professor emeritus of music at Harvard University, where he taught from 1926 until 1960, wrote largely for orchestra and chamber ensembles. His theater piece in 1938, "The Incredible Flutist," composed for a ballet, was an exception.

His works included numerous concertos, orchestral suites, five string quartets and eight symphonies. The Pulitzer awards were for his third and seventh symphonies.

He also wrote textbooks on harmony, counterpoint and orchestration that were considered classics in the field.

Olin Downes, the music critic, once described the composer as a man "who has thoroughly mastered the ground principles of his art; who knows what he wants to do and how to do it; whose basis is a thorough command of counterpoint and form, on which is superimposed brilliant treatment of the orchestra."

In accepting the Edward MacDowell Medal in 1974 on Mr. Piston's behalf, Michael Steinberg, a music critic, spoke of the composer as a deeply, richly conservative composer who referred to his own music as "mid-Victorian."

"But it is a wonderful, lucid transparent mid-Victorian that shows us that the vitality of a work has nothing to do with its modishness," Mr. Steinberg said.

Born in Maine

Mr. Piston was born on Jan. 20, 1894, in Rockland, Maine, where his grandfather had settled after his arrival from Italy. The family dropped the final "e" from the name Pistone. He moved to Boston at the age of 10.

As a young man, he could play the piano and violin with equal efficiency and he used these skills to earn a living in cafes around Boston. During World War I, he was in a service band, and taught himself to play most of the wind instruments.

In 1919, he enrolled in Harvard's music department. He was graduated in 1924 with highest honors, including a summa cum laude in music, and was awarded a traveling fellowship. This enabled him to study in Paris with Nadia Boulanger. He returned to Harvard to teach, and was Walter Naumburg Professor of Music from 1948 to 1960, when he retired.

His numerous awards included a Guggenheim Fellowship and the Coolidge Medal in 1935 and the New York Music Critics Circle Award in 1945 and 1959.

Mrs. Moufida Bourguiba

TUNIS, Nov. 14 (UPI).—Mrs. Moufida Bourguiba, 86, divorced French wife of President Habib Bourguiba, died yesterday in Tunis after an illness of several months, government officials announced today.

Mrs. Bourguiba, born Mathilde Lorrain, met Mr. Bourguiba when he was a law student in Paris. They were married in 1927 and had one son, Habib jr., former foreign minister of Tunisia and now president of the National Investment Society.

Mrs. Bourguiba won admiration from Tunisians during the battle for independence from France. She stuck by her marriage and brought up their son although Mr. Bourguiba was more often in prison for political agitation than at home.

Mrs. Bourguiba, born a Roman Catholic, gave up her religion in 1962 to be converted to that of her husband, Islam.

In 1962, Mr. Bourguiba—13 years younger than his wife—divorced her and married a Tunisian heiress. He continued to visit his first wife along with their son and three grandchildren in her villa in the hills of the capital.

Robert A. Uihlein Jr.

NEW YORK, Nov. 14 (NYT).—Robert Uihlein jr., 60, chairman and chief executive officer of the Jos. Schlitz Brewing Co. and a member of one of the country's most prominent brewing and banking families, died Friday at Milwaukee County Medical Complex, which he entered on Oct. 21 for treatment of leukemia.

Mr. Uihlein was the fourth generation of his family to head the 127-year-old Schlitz company. His great-great uncle, August Krug, founded the company in Milwaukee in 1849, and it grew into one of the nation's largest brewing concerns.

Jean Cartier

BUENOS AIRES, Nov. 14 (AP).—Romanian-born fashion designer Atanase Mironescu, 65, known internationally as Jean Cartier, died here today of heart failure, his associates said. He was also a television producer, especially of fashion shows.

Dacca Death Penalty

DACCA, Nov. 14 (Reuters).—Martial law authorities in Bangladesh have introduced the death penalty for anyone found guilty of armed insurrection or sabotage.

Panel in U.S. Asks Curb on Some Arms

Conventional Forces Also Subject of Study

By Don Oberdorfer

WASHINGTON, Nov. 14 (WP).—A private study panel, including several advisers to President-elect Jimmy Carter, today proposed a freeze on U.S. and Soviet military spending and non-nuclear force levels as a first step toward controlling the worldwide arms race in conventional weapons.

If talks with the Russians appear promising, the 34-member panel recommended, the United States should also consider reducing its military budget by 5 to 10 per cent if the Soviet Union would do likewise on the basis of a one-year "mutual example" deal.

According to David Linebaugh, a former Arms Control and Disarmament Agency official who was a consultant to the study panel, the United States and the Soviet Union secretly understood "mutual example" reductions in their European force levels in 1963-64. The tacit understanding to cut their military power without formal agreement was shattered by the U.S. buildup for the Vietnam war, Mr. Linebaugh said.

In 1973, Moscow proposed a 10-per-cent reduction in the military budgets of the five permanent members of the UN Security Council—the Soviet Union, the United States, China, France and Britain—with a portion of the savings to be used as aid to developing countries. The United States and the other powers involved did not accept the plan.

May Augur Well

The study panel, sponsored by the United Nation Association of the United States under a grant from the Rockefeller Foundation, said that "the continuing Soviet advocacy of budgetary limitations may augur well for the possibility of attaining an agreement [to limit spending] the U.S. is interested."

Former Deputy Secretary of Defense Cyrus Vance, who has been mentioned as a possible secretary of state under Mr. Carter, was vice-chairman of the panel. Other panel members who recently have been Carter advisers include Prof. Richard Gardner of Columbia University and Washington attorney Paul Warnke, both former U.S. government officials.

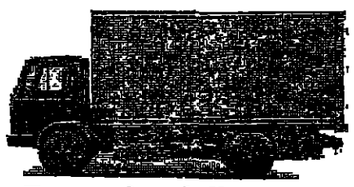
The chairman of the study panel was Thornton Bradshaw, president of the Atlantic Richfield oil firm. Other members included three retired military leaders, former Army Chief of Staff Matthew Ridgway, former Army Vice-Chief of Staff Bruce Palmer jr. and Gerald Miller, a commander of the U.S. Sixth Fleet.

Government policy on the military budget, disarmament negotiations and U.S. arms sales abroad was sharply criticized by Mr. Carter during his election campaign.

Soviet Lake Named After Jack London

MOSCOW, Nov. 14 (AP).—A lake at the extreme northeast tip of Asia has been named after author Jack London, who wrote about life in the extreme northwest part of North America.

Tass said last week that Jack London Lake, which it called "one of the most beautiful lakes of the Chukchi Peninsula," was named at the suggestion of Soviet geologist Yuri Bilibin. Mr. Bilibin was the first person to discover gold on the peninsula at the northeast extremity of Siberia.

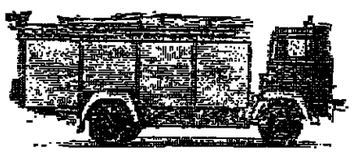


Iveco. Buses that never keep a traveller waiting.

A bus trip that has to keep on schedule. A housing site waiting to be cleared. A service station running out of gas. These and a thousand other needs are the world of industrial vehicles today.

It is a world of specialists. Because the most dependable way to do the job is different for every job.

Fiat, OM, Lancia, Unic and Magirus-Deutz have been specialists for generations. Experts in every aspect of road transport technology. In every class of commercial vehicle. In the different problems that must be met in different countries.



From city delivery to long-haul transport.

Now each of them has even more to offer. Because now they've created Iveco.

Iveco combines the best of all five makes. And gives a new international dimension to their knowledge and their experience.

Iveco is 50,000 people. 1,725,500 square meters of factories. And over 3,000 dealers and service points around the world.

Specialized vehicles for every use.

Iveco is big trucks for international haulage and small trucks for in-town deliveries. City buses and travel buses. Trucks that help put out fires and trucks that help build houses. In all, 200 different basic models in over 600 versions.

But we're not out to impress you with numbers. We prefer to impress you with a vehicle that's there when you need it.

Because building dependable transport is what Iveco is really all about.

After 2 Post-Mao Months

China Is Believed Not Ready To Soften Hostility to Russia

By Fox Butterfield

HONG KONG, Nov. 14 (NYT). Two months after the death of Mao Tse-tung, analysts here believe Peking has continued its unswerving adherence to his policy of hostility toward the Soviet Union despite hints by Moscow that it would welcome improved relations.

Senior Chinese officials have privately assured Western diplomats in Peking over the last two weeks that there will be no change in China's attitude under Hua Kuo-feng, Mao's successor as chairman of the Chinese Communist party.

The Chinese press has continued its almost daily polemics against what it sees as Soviet military and economic expansionism. On Friday, the Chinese news agency carried five dispatches on Soviet transgressions, ending a dispatch that aroused speculation of "setting the stage" to conquer Western Europe.

Analysts here do not exclude entirely the possibility that the new Chinese leaders may eventually move to lessen some of the dangers of conflict along the countries' borders, or that there may be gradual improvement in state-to-state relations. But they believe it is far too early to expect such changes from Mr. Hua, which could leave him open to charges of national betrayal.

Rift Between Parties

The analysts see even less chance of real progress in the party-to-party relations, which the Chinese maintain have been broken since the early 1960s and which involve deep ideological differences. When Mao died and then again when Mr. Hua was promoted his successor, Peking rejected messages from the Soviet Communist party because they came from the party, not the government.

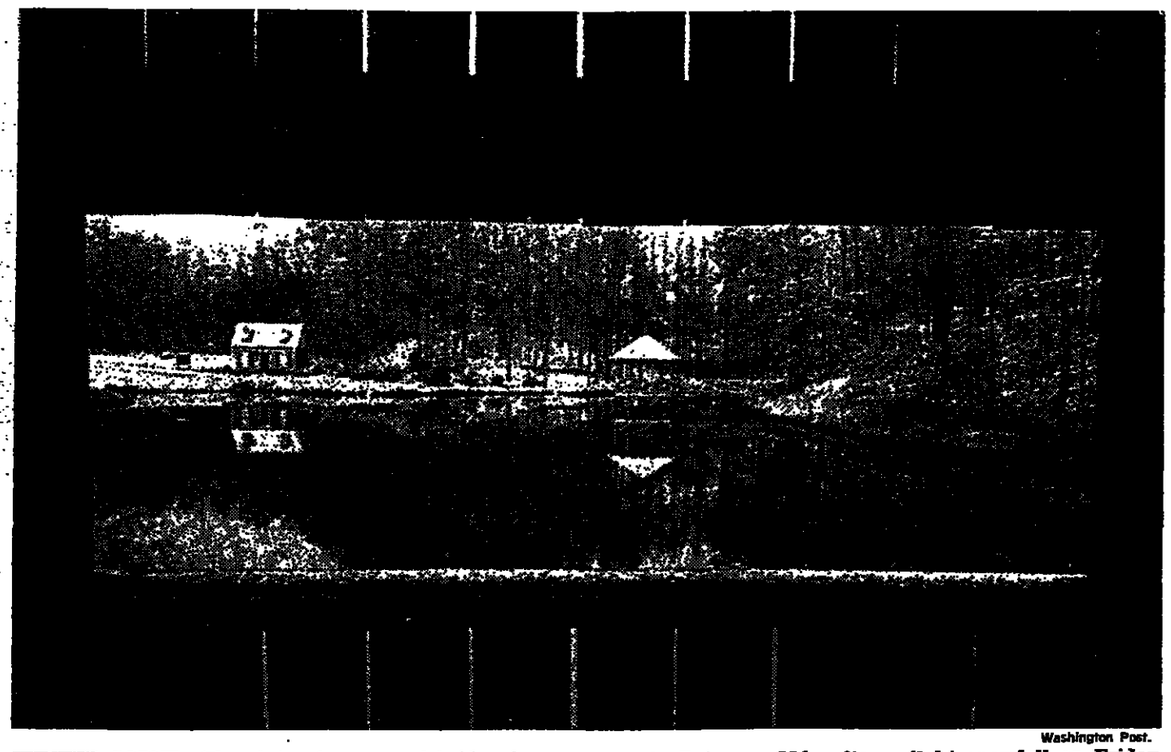
The analysts believe that several recent developments, interpreted in the West as possible signals of a change on the part of China's new leaders, have been misunderstood. These include a congratulatory telegram that Peking sent Moscow Nov. 6 to commemorate the 59th anniversary of the Russian Revolution and a Soviet movie that was unexpectedly shown on Canton television.

The telegram said the Chinese government believed that "disputes on questions of principle" must "not interfere with normal state relations between the two countries." The message, broadcast by Peking and Moscow, added that China would "support and develop interstate relations on the basis of the five principles" of peaceful coexistence.

Some diplomats suggested the message reflected a softening of Peking's position on state-to-state relations. But analysts in Hong Kong compared it with messages sent on previous Nov. 6 anniversaries and said they saw little difference.

The one difference they noticed was that this year's message did not include a specific reference to the border problem, as the earlier messages did. The analysts were unsure whether this meant Peking would stop insisting on resolving the border dispute before improving state-to-state relations.

The Soviet movie, shown on Chinese TV on the anniversary of the Russian Revolution, was called "Lenin in 1918." At first some analysts thought the showing might be a hint that China was ready to improve relations, done in the usual elliptical Chinese manner.



But Thursday, a Hong Kong Communist paper, Ta Kung Pao, offered an explanation suggesting that the movie was shown because it contained further evidence of the alleged perfidy of Chiang Ching, Mao's widow, who has been under arrest with three other senior Chinese leftists since Oct. 6.

The paper said Miss Chiang had earlier stopped the movie from being shown because it had a scene in which a woman spy tries to assassinate Lenin: "This image made her feel bad, so she ordered that it not be released." One charge against Miss Chiang is that she exercised a dictatorship over the Chinese movie, art and literary world.

Recapture of Mainland Still a Taiwan Theme

TAIPEI, Nov. 14 (AP).—The 11th congress of Nationalist China's Kuomintang party to be held since the death in April, '75, of Generalissimo Chiang Kai-shek was held last week.

Chiang Ching-kuo, the generalissimo's son and successor as leader of the millions of Chinese who fled the mainland following the Communist seizure of power in 1949, told delegates to the 11th party congress that "the opportune moment for recovering the mainland is approaching."

Washington Post.

WINTER SCENE—The slats of a covered bridge frame a lake in Potomac, Md., after a light snowfall on Friday.

Venezuela's Oil Nationalization Succeeds but Stirs a Dispute

By Joanne Omang

CARACAS, Venezuela, Nov. 14 (WP).—Nationalization of the oil industry, they say, was last year's story. It has gone well here, almost unchanged from the way U.S. companies ran the show. The trouble, however, according to the critics, is that the undertaking never did deal with the country's problems.

Venezuela is one of the few developing countries that is also a functioning democracy and rich as well. Its leaders regard themselves as an example to the world that stable development, help for the poor and a voice in world councils can be achieved without Communism or rightist dictatorship. Nationalization of the oil industry, which provides 86 per cent of the country's $10-billion annual income, was the symbol of Venezuela becoming master of its destiny.

The nationalization took place Jan. 1, 1976, under legislation providing compensation to the 21 foreign oil firms that were replaced with a holding company called Petroleums of Venezuela, or Petroven. It was born as the world's ninth-largest oil giant. Only three persons—top executives—lost their jobs at Creole, Exxon's subsidiary, when it became the Petroven department Lagoven, and virtually nothing has changed since then.

"If you hadn't been there to see them changing the signs, you'd never know anything had happened," a Lagoven employee said.

That was the way it was planned. The acrid debate preceding nationalization largely concerned whether gasoline would make it to local pumps, whether exports would falter and whether skilled labor would stay on to keep things running. There have been no problems in those areas, although some are brewing.

But there was no real debate over whether the oil and the oil revenue were being managed well.

"Was it all worth the trouble, the year's delay in attacking the country's real problems?" asked Freddy Munoz of the opposition Movement Toward Socialism party. "There was no sense of national action being taken to correct the way we were being exploited before."

Government spokesmen dismiss this claim. "Now that we have consolidated and have more confidence, we can move forward strongly," Mines and Hydrocarbons Minister Valentin Hernandez said.

There was never a real sense of confrontation with the U.S. firms, nor is there any such feeling now. The oil companies had achieved a reputation for efficiency and high pay during their half-century here, and it was obvious that their help would be needed after nationalization.

Most signed service contracts with Petroven, their top U.S. technicians here becoming temporary hired labor. Lagoven, for example, has purchased the services of 150 Exxon technicians who do just what they did when they worked for Creole, Exxon's subsidiary.

From all accounts, the "service companies" do not appear to be making more money now than before nationalization, a fear voiced by many Venezuelans last fall. Mr. Hernandez declined to reveal how much more money Venezuela makes, saying he was "saving it to surprise the country with."

In the near future, Petroven faces hard decisions that could have repercussions in the United States, which gets one-third of its oil imports from Venezuela.

The country is running out of gasoline. Although it is the fourth-largest oil exporter, with the largest refining capacity among members of the Organization of Petroleum Exporting Countries, Venezuela produces only 196,000 barrels per day of gasoline. Most of the rest of its production is fuel oil for U.S. consumption.

Domestic gasoline demand is rising so fast that the filling station pumps will run dry by 1982. "It would be sad indeed if we should have to import it," Mr. Hernandez said.

To meet the demand, Venezuela could produce less fuel oil and more gasoline, which would mean breaking a promise not to disturb U.S. supplies, or it could increase overall crude production, which would mean breaking a promise to hold down production for conservation purposes.

Outback Bushfires Rage

ALICE SPRINGS, Australia, Nov. 14 (Reuters).—A string of bushfires raged out of control across wide areas of the Outback in central and southern Australia yesterday.

No More Than 25 a Week Escape

Ebb in Refugee Flow Is Laid To Stiffer Cambodia Security

By Lewis M. Simons

ARANYAPRATHET, Thailand, Nov. 14 (WP).—Wat Sarun slipped out of his village on the night of Sept. 25. Within a few hours, as planned, he made contact with 59 others from nearby villages who were going to try to escape from Cambodia to Thailand. They thought the journey on foot would take a week.

A month and two days later, Wat Sarun and two others crossed the border. They were the only survivors—the other 57 had been shot to death in ambushes by Khmer Rouge soldiers.

Wat Sarun's and other accounts related by recent escapees at the Thai-run refugee camp here indicate that Cambodia's Communist government has succeeded in closing off the country from the rest of the world even more completely than previously during the year and a half since Khmer Rouge troops captured the capital, Phnom Penh.

Because of increased controls by Khmer Rouge soldiers, the flow of escapees has dried up dramatically. In the last three months, according to a source at the United Nations High Commission for Refugees in Bangkok, no more than 25 Cambodians a week have crossed into Thailand.

Less than a year ago, the source said, the weekly rate was in the hundreds. Since the Communist victory, according to UN figures, more than 22,000 Cambodians have fled to Thailand and several thousands others are known to have quietly blended into Thai communities on this side of the border or made their own way to the United States or Europe.

Some analysts in Bangkok have suggested recently that fewer Cambodians are fleeing because conditions there have improved.

According to some of these specialists, the widespread massacre of those thought to have been affiliated with the U.S.-supported government of former President Lon Nol had largely come to an end. There has also been speculation that food rations, which about a year ago were near the starvation level in some sections of the country, had been increased.

"We must begin to assume sooner or later that the rate of executions is dropping off," an analyst reasoned. "Otherwise, they'll soon come to the time when there'll be no one left there."

He referred to reports in some Western publications as long ago as six months placing the death toll at half a million. Cambodia's population at the end of the war was believed to be about 7 million.

Information pieced together from a variety of diplomatic and refugee sources suggests that the reason the number of escapees has declined sharply is tightened security rather than improved conditions.

"There has been no change, no improvement in the lives of the Cambodian people," said Meas Mony, a refugee from Battambang Province, along the Thai border.

Daily food rations in his village, An Long Kantzop, still consisted of half of a condensed milk can of rice for each person daily. Like most refugees, Meas Mony said his principal reasons for fleeing, leaving his wife and 8-month-old child behind, were that "there is not enough to eat, the work is too hard and there is no liberty at all."

Kroch Phy, a former professional soldier in Lon Nol's army who arrived here from Battambang Province with Meas Mony on Oct. 15, said many others he knew want to leave, "but they don't know how to avoid the Khmer Rouge. They're afraid."

A Bangkok analyst said: "It appears that the authorities have increased their efficiency to the point where leakage out of the country is now negligible."

Wat Sarun recalled that in the last three months before he fled he saw "at least 30" villagers, including two men he knew to be Buddhist monks, being "taken away."

"They were all in a line, their arms tied behind their backs, like this, with red nylon rope," said. "I didn't see the 30 men again. But everyone in the village knew that they were killed. Anytime anyone is taken away with his arms tied with the red rope, we know he will never come back."

A change in the pattern of life under the Khmer Rouge noted by recent arrivals is that the forced mass migration of persons from area to area has virtually ceased. Observers believe that this accounts in part for the decrease in escapees and why recent arrivals are all from border provinces.

Morocco Vote Results

RABAT, Nov. 14 (UPI).—Independent candidates won 64.4 per cent of municipal and regional council seats in Morocco's first election in 16 years in which political parties participated, government officials announced yesterday.

He sets very high standards for himself. And will expect no less from you.

The Germans prove it every year: in the export business there's no substitute for organization.

Germany may offer the ideal market for your products or services. But in this country your timing, packaging and promotion must be carefully conceived. Spotting an opening in Germany is one thing; exploiting it successfully is quite another. The key is organization, and here the Germans are past masters. When you arrive in Germany to do business, they'll expect you to be thoroughly briefed and prepared to discuss the most minute detail.

Come and see us at Société Générale before you go to Germany and after you've arrived be sure and take advantage of our expertise in this highly sophisticated market. We've been across the Rhine for over a century through our subsidiary, Sogenal, and are well acquainted with the Germans and their business methods. You'll find Sogenal in Frankfurt, Cologne, Karlsruhe, Sarrebruck and soon in Dusseldorf (Plus Austria, Belgium, Luxemburg and Switzerland).

In France our Germany specialists will provide you with details on the market, help you find the right outlets and can introduce you to the right people.

In Germany specialists at Sogenal are at your disposal, ready to assist you from the beginning of negotiations through to the final contract and financing. And when you're ready to set up major operations in Germany, Société Générale will advise you on the most reliable partnership arrangements within the most suitable financial framework.

Commercial field or finance, whatever your needs, Société Générale can help you. Everywhere.

Geneva After Pause

When the conference on giving majority rule to Rhodesia resumes today, it can only be hoped that the pause preceding the session gave time for fruitful thought. That the black nationalists should mistrust the white nationalists now ruling the country is understandable. But that they might break up the conference over dates and details would be a major tragedy—for Rhodesia and for Africa.

The process outlined by Ian Smith, the Rhodesian Prime Minister, does leave room for various types of skullduggery—a two-year transition in which the defense and police forces would be headed by whites, and the whites, in fact, would still be dominant. But the same pressures, from outside Rhodesia and from the realities within that caused Mr. Smith to make his offer of majority rule would persist. Blacks could gain experience in administration and electoral machinery; the economy would stand less chances of complete disruption—and black cooperation would frustrate whatever hopes the whites might have of being able to say to the world at large: "See: We offered an equitable settlement; it is the blacks who have turned it down."

It is difficult to see why 24 months is so much worse than 12, or 15, from the black standpoint. Yet that has been the sticking point up to now. And to substitute Britain for the Salisbury government as the dominant element during the transition would undoubtedly be much more promising of a swift and efficient transition than the Smith plan. But to expect Britain to take on a far larger and potentially much bloodier Northern Ireland at a time when, economically and politically Britain is walking a very narrow plank over an abyss, does not make much sense.

The so called "front-line" neighbors of Rhodesia—Botswana, Zambia, Mozambique and Tanzania—appear to have been responsible for delaying the full session of the conference from Saturday to Monday, apparently in the hope of preventing a breakdown in the talks. This may be a change from their recent stand that only war could transform white-ruled Rhodesia into black-ruled Zimbabwe. If so, the change is welcome, for war is what the Kissinger mission sought to prevent, and what it could prevent if the blacks approach the meeting with the idea of achieving their goals rationally, rather than by precipitating a gory and complex struggle in which none can really win except at the expense of many lives, chaos in the economy, and an accumulation of bitterness that will haunt Zimbabwe as it now haunts Angola, Lebanon and Northern Ireland. To build a state calls for more than mere emotion; it requires statesmanship. Today is the opportunity for all parties to display statesmanship in Geneva.

Rescuing the Pound

The dangers besetting the British pound are forcing large decisions on the United States at an awkward time. Washington is preoccupied with the transition from one administration to another. But the rescue of the pound is no mere technical operation. It draws the United States uncomfortably deep into British domestic politics. It affects the British government's chances of staying in office. It will influence Britain's role in NATO and the economic growth rates for the Common Market.

President-elect Carter needs to move fast on who will run his foreign economic policy. They should be included, at least informally, in the councils in which the Ford administration is now hammering out the extraordinary commitments—to Britain and by Britain—that Mr. Carter will inherit. Working out these agreements is arduous, and it is complicated by a Jan. 20 termination date of the Ford administration. Well before then Mr. Carter will be required to provide a clear indication of his view of Britain's plight and U.S. responsibilities.

The central issue is the severity of the conditions that the rich countries, led by the United States, impose upon the next crucial round of aid for the pound. The U.S. position is that further loans will be futile unless Britain commits itself to further stringent efforts to curb its inflation rate. The value of the pound keeps falling because inflation in Britain, currently 15 per cent a year, is higher than in most other major countries. But the rescue effort requires a judgment regarding Britain's actual ability to control the economic forces now in motion. That brings us to the sterling balances.

* * *

The sterling balances are simply the pounds owned by foreigners, including foreign governments. Some of the oil-exporting countries traditionally held their money in Britain. After the explosion of oil prices three years ago, their revenues and their British bank accounts soared. That held the pound stable for a time, even though the costs of buying oil were simultaneously widening Britain's deficits and aggravating inflation. But last year the oil-exporting countries began to have second thoughts about the security of their new wealth. They started to move it to safer places. The outflow of money helped push the pound downward. In April, 1975, it was worth $2.40. Last March it fell below $2 and kept sliding until, in June, a consortium of rich countries including the United States put up an emergency loan of $5.3 billion. There is a good deal of psychology in currency movements, and the purpose of the loan was to show the world that Britain would have plenty of resources to meet its obligations. But the loan was only for six months.

The loan stabilized the pound for a while, but in October it started to slide again. Now it is worth a little over $1.60, having dropped one-third of its value in 18 months. Last June's loan will expire on Dec. 9. The rich countries are ready to replace it with a long-term loan through the International Monetary Fund, but the IMF sets conditions on its loans. Those conditions are commitments on Britain's future economic policy, and they are the subject of tense and difficult negotiation. The lenders fear that if the conditions are too loose, they will find themselves financing continuing British deficits and inflation. The British fear that, if the conditions are too tight, the shock of drastic new austerity programs would destroy the present government. The lenders think that renewed action against inflation would reassure the owners of the sterling balances and end the damaging outflow of pounds. The British apparently aren't so sure, and think that the outflow might go on regardless of future action.

* * *

Policy question: Ought the United States and other rich countries fund the sterling balances? That is, ought they insure the foreign owners of pounds against further British inflation and devaluations in order to stop the flight from the pound? The present U.S. position is that the sterling balances are not even going to be discussed until the IMF loan has been negotiated—conditions and all. Obviously, a decision to fund these balances would take a great deal of pressure off the British government to meet the IMF's requirements. The U.S. government thinks, evidently, that pressure is essential to get serious remedies in place.

Whatever the resolution, it will have to be worked out in December. It can't wait for the inauguration. The present loan expires in a few weeks and the next one has to be put in place promptly. Since the conditions for this future are being negotiated very much in private, it is impossible to form a precise judgment on them. But it needs to be observed that, in a remarkable display of discipline, Britain's people have held themselves to stringent wage controls for the past 16 months and, partly as a result, their government is now operating with a very narrow margin of strength. Whatever blame attaches to their present situation, it developed over many years, and it is not going to be cured at one thunderclap. The IMF loan and its conditions will help. But when it is in place, it will probably be necessary for this country to proceed to fund at least part of the sterling balances.

The next 67 days will be a crucial time for the world's economy. The terms of the British loan are not only important in themselves, but will set precedents for cooperation with other nations in debt and in peril. Neither Mr. Carter nor the country can afford to let these 67 days pass without a clear signal of his intentions.

In the International Edition

Seventy-Five Years Ago

November 15, 1901

NEW YORK.—"The government of the United States has always held that, inasmuch as this country was not a party to the agreements of 1841, 1871 and 1878, it was in no way bound by them, and that the American ships of war might still pass through the Dardanelles and into the Black Sea without the permission of Turkey or any other power," according to the Commercial Advertiser, and concludes that "our position is based on law."

Fifty Years Ago

November 15, 1926

NEW YORK.—The jinx that lurked behind the scenes of the Metropolitan Opera House all last season is casting its diabolical shadow across the stage again this year, and although the season is less than two weeks old two members of the company already have felt the effects. Yesterday during the matinee of "La Boheme," Italian tenor Beniamino Gigli sprained his ankle and later the German singer Kurt Taucher was stricken with mastoiditis.

Political Dimensions of the Ulster Problem

By Garret FitzGerald

DUBLIN.—The political dimension of the Northern Ireland crisis has been overshadowed in the public mind by the violence of the last seven years. It is the violence of the Irish Republican Army, the counterviolence of the Protestant paramilitaries, and the efforts of the security forces to counter both, that make the headlines in Ireland and abroad. Yet this violence has changed nothing in the underlying situation apart from retarding political progress.

Northern Ireland was established as a separate political entity within the United Kingdom in 1920. Once this political unit came into existence, placing half a million Irish nationalists under the political dominance of a local majority of unionists, it created two new problems for Ireland.

The problem that for many years afterward was to loom largest was the political division of Ireland, which the great majority of its people had never sought and with which they could not easily reconcile themselves. The second was the inherently unstable situation created within the new political entity of Northern Ireland.

Fearful

The nationalists' half-million, finding themselves suddenly a minority in this new political entity, could not psychologically accept the subordinate role thus thrust upon them, and effectively opted out of the new political unit, which they did not in fact expect to survive for long. The unionist million, finding themselves transformed from a minority in the island of Ireland, fearful for their future in a land in which they had been in ascendancy for many centuries, reinforced their majority at local as well as provincial level by discrimination in housing and employment, thus securing control of local authorities even in areas where they were in a local minority. This potentially explosive situation was permitted to continue for decade after decade by a British Parliament that so far abdicated its responsibilities for the area as to refuse to consider questions relating to Northern Ireland.

Indeed, 40 years and more were to elapse before it began to be realized in Ireland, either north or south, that the two problems—the political division of the island and discrimination against the minority in the north—could be tackled effectively only in the reverse order. So long as nationalists and unionists in the north remained at loggerheads with each other, unable or unwilling to create a viable northern community, the question of the north's relationship with the south was bound to remain insoluble and, equally, the condition of the Northern nationalists was bound to remain intolerable, socially, economically and psychologically.

Conditions Met

By 1972, the conditions for a start to the resolution of the Northern Ireland problem were however, largely met in that the Northern minority accepted the existence of the Northern Ireland political system and was asserting its right to full participation in the operation of that system.

Second, the British government was convinced that self-government in Northern Ireland on a basis of the domination of one section of the community by another was indefensible and must be ended.

And third, the people of the south were now convinced that their role in the solution of the problem should not be to raise tensions in Northern Ireland by appearing to threaten the million unionists there, but rather to help the minority to secure their rightful role in the affairs of Northern Ireland in friendship and cooperation—which alone might in time soften and, it was hoped, eventually eliminate the political division of the island.

There remained the task of persuading the unionist majority, with 65 per cent of the population and almost 70 per cent of the adult population, to accept psychologically the ending of their dominant role in Northern Ireland self-government, and the restoration of a system of government in which, at least until trust and confidence between the two sections of the northern community could be established, power would be shared proportionately.

However, unionist fears regarding the nationalist minority persisted despite the evident commitment of the political leaders of the minority, the Social Democratic and Labor party, with the full backing of at least five-sixths of the minority population, to the proposition that change in the relationship between Northern Ireland and the Republic could come about only with full consent of the majority of people of Northern Ireland.

These fears might have been eased more rapidly but for two factors that have delayed agreement on joint self-government. The first of these has been the continuing campaign of violence by the IRA, and the counter-violence of the loyalist paramilitaries. The other has been the influence of extremist Protestant politicians who, despite strong evidence of a major shift in grass-roots unionist opinion in favor of moderation, and of acceptance of power-sharing for a period, have undermined the political positions of successive unionist leaders in favor of conciliation and compromise.

Deadlock

In the resultant situation of deadlock, with support for the IRA and the loyalist paramilitaries at its lowest ebb, but with politicians on both sides faced with the failure to secure a political solution through four years of negotiations and confrontations, a new element has recently been introduced by the emergence among the ordinary people of Northern Ireland of a peace movement that is nonpolitical in character and is directed simply against violence from every quarter.

The movement has demonstrated the abhorrence of both communities in the north for violence as a means of resolving the province's problems. It is now up to the political leaders in the north, building on the will for peace, and with the support of the British and Irish governments, to resolve the problem of the government of the north on a peaceful basis. It is the particular responsibility of the Irish and British governments to re-create political movement and progress in the north. This is a responsibility in which my government will play its part.

Garret FitzGerald is Ireland's Foreign Minister. This article was published in The New York Times.

A Time for the Fire Brigade

By C. L. Sulzberger

ISTANBUL.—U.S.-Turkish relationships, damaged by what is regarded here as a pro-Greek bias in Washington, produced by a clever pro-Greek lobby, and tinged with violent resentment against the congressional embargo on arms sales to this country, require swift effective action by U.S. diplomacy.

We cannot afford to await the results of Turkey's national election 11 months hence—as Turkey had to endure paralysis in our foreign policy during the political campaigning season. If such an artificially imposed pause prevails, it is entirely possible the situation will go from worse to worst and everyone involved will suffer: Turkey, Greece, Cyprus, NATO and the United States.

A tacit agreement is needed between the outgoing Ford administration and the incoming Carter administration that the existing East Mediterranean situation should be objectively analyzed immediately by an expert mission whose composition should be agreed to by the President and President-elect.

An obvious man to head such a diplomatic task force is Cyrus Vance, a former Democratic deputy defense secretary and special envoy. He has personal experience of the Greco-Turkish and Cyprus problems and is highly regarded by all principal parties to the dispute. Moreover, since relations between the executive and legislative branches of the U.S. government have been at odds on these matters, it might be well to include a small, bipartisan congressional delegation.

I find it hard to imagine that such a diplomatic voyage of discovery would not be welcomed by both Athens and Ankara. There would be no value at this time to including Cyprus on the itinerary. The mission's primary task should be to improve relationships right away among three NATO capitals—Washington, Athens and Ankara. Cyprus is neutral and while intimately involved can be dealt with separately and later.

Nor would such a visit find itself intruding on hostile governments. Turkey's Premier Demirel told me recently that the quarrel between Turkey and Greece on the Aegean continental shelf is soluble and "the shelf doesn't belong to either of us; it belongs to both. Negotiation has now begun between us and this will eliminate confrontation. The same is true of differences on national air space."

Demirel said of the forthcoming Carter administration (which the Turkish newspapers deplore): "I'm not worried. The policies of nations shouldn't change with changes in those who administer them. Policies are based on national interests. I think America is a great country and a great people. Yours are a wonderful, nice people. They have kept a true sense of values, of the dignity of man."

Anyone familiar with Greek realities likewise knows that despite emotional outbursts against America in the irresponsible press and extremist, if small, opposition, Premier Caramanlis has a strong parliamentary majority and is personally sympathetic to both the United States and NATO. He would like to see the Eastern Mediterranean reunited in a firm and friendly defense bond.

Such a Vance mission could produce much good by a quick, intensive survey and an objective report to leaders and legislators from both U.S. parties in order to bring about more understanding of realities and accord between the White House and Capitol Hill as well as between Ankara and Athens.

Vance, of course, is among candidates mentioned as a possible Carter secretary of state. Surely this would in no way diminish his prestige abroad, as chairman of such a mission; nor could its success damage his position should he be invited to succeed Kissinger.

Not only are both major Turkish parties eager to compose arguments with NATO and the United States (although they disagree on most other things); so is the majority Greek government. The other Atlantic allies point out Turkey can't fulfill its assigned NATO role without the necessary arms.

In fact, if accord can be arranged, the damage so far is not irreparable. U.S. bases in this country have been "suspended," not closed. American contingents are keeping up installations as caretakers. But if another 11 months are allowed to pass without decisive diplomatic efforts, Turkey may or may not end up with a stronger new government.

And the position of Caramanlis in Greece could well be eroded, thus making the situation measurably worse, with mass opinion disliking us even more than it now does here. Today is the time to act and Ford's pledged support of Carter would seem to imply readiness to go along with such an *eminently sensible move.*

Letters

The U.S. Electorate

The editorial entitled "President Jimmy Carter" (IHT, Nov. 4) prompts some thought and a few comments:

1. In its concern with the image of champion of democracy in the world, the United States often criticizes, pressures (or even interferes) with a country's internal affairs in order to obtain, for its citizens, the freedom associated with electing its government at will. The concluding paragraph of your editorial perpetuates this self-righteousness by contrasting the recent events in India and Burundi with the presidential election in the United States.

By no means do I wish to even suggest that I disapprove of such lofty ideals as the freedom to vote. Yet one cannot help but notice that only some 50 per cent of the U.S. electorate bothered to exercise this right and privilege, for whose defense many American lives have been lost at home and abroad.

Is it conceivable that, similar to its compulsive desire to acquire wealth for wealth's sake, the American people believe that liberty ought to be ostensibly touted and displayed, but sparingly used?

2. Americans abroad finally obtained the right to participate fully in the political life of their state and country, after much complaining and petitioning. Some of my American friends, however, deliberately declined to vote once they realized they would henceforth pay taxes in their declared state of residence.

Their ancestors fought bitterly against taxation without representation. Now, these self-centered and smug individuals, who indulge in flag-waving statements about the greatness of their country, refuse to participate in the setting of its future and their children's for opportunistic reasons. Is representation without taxation, for this admittedly small segment of Americans abroad, the fine example they wish to set as a symbol of their country to their hosts?

JEAN-PIERRE FRANKENHUIS

Paris.

More Human Comedy

Erudition in action, even when the anecdotes involved are inventions, or at best apocryphal, is a beautiful thing to behold, but I must protest the belittlement of garlic, for who is the man who has not noticed that it improves the breath of slovenly girls?

Ten or more years ago Vladimir Nabokov and Edmund Wilson exchanged shots in the literary columns of a famous publication about something less than fascinating which in any case disappeared among the fine points of the meticulous writing, but in the exchange between Alfred Friendly and Waverley Root we know what they are talking about.

Anybody with anxieties about swine flu, or indeed about swine of any kind, need only chew a fresh white clove every morning and rest easy. Can the same be said for science?

WILLIAM SAROYAN.

Paris.

Washington Vis-à-Vis Hanoi in Pari

By William Buckley J

NEW YORK—The talks betwe the government of Vietn and our own government warra a preliminary examination of questions involved. First, formalities:

1) The normal thing to do is recognize de facto governme If there is reason to believe, or hope, that by declining to do another government—a friendl one—will replace the incumb government, then one holds Inasmuch as approximately 80 cent of the people of South Vi nam did not desire the pres government, and to the end preventing its ascendancy t them enlisted the aid of United States to the tune of million U.S. soldiers and $150 lion over a seven-year perio and even so failed to prevent government of North Viet from taking power, it is reaso ble to assume that there is prospect for a fresh governm hospitable to human freedom

The North Vietnamese are c cerned with the formalities cause there is of course the gering question of the legitim of their hegemony over the So They like to consider that war they concluded was reall civil war, that the stand took was against secession b territory organically tied to North. They have a neat form here.

U.S. Aid

But beyond formalities, 2) th is the question of strategic des The North Vietnamese desire economic aid. They had dis ered that the enthusiastic as tance of the Chinese and Russians diminished sharply w the war was won. The So Union is prepared to make tensive economic sacrifices into the future, in order to m tain a base in enemy terri Its continued sponsorship of C tro's Cuba is a case in point. Vietnam cannot be thought quite in the same terms as C The United States proved 15 y ago that it had shrunk from responsibilities of the Mon Doctrine. The liberation of C by Americans is, quite simply, cluded by the American temp ment as evolved.

The replacement of the gov ment of North Vietnam by Chinese is something entirely ferent. The Chinese would hesitate to overrun Vietnam more than they hesitated to r run Tibet, if there were suffic provocation. Sufficient provo tion is here defined as any c gious effort by the Soviet Un to line itself up a satellite Southeast Asia. One does trifle with the vital interes China—or of the Soviet Un

Chinese View

Now paradoxically, substan U.S. aid to Vietnam would not resented in the least by China the reason that China knows has nothing to fear from United States. Moreover, Ch has wished now for several ye that the United States act m manfully against the So Union. Under the circumstan Vietnam has its eye on econo aid—not from China, which fers economically trying to f its own people and nourish own industrial and milit plants; not from the Soviet Un—whose imperialism it has rea to fear; but from the Uni States—which is so used to m nanimous enterprises, and so ised to exacting a quid pro q

Speaking of which, 3) we fi ourselves, as so often befo slavishly asking for somethi which should have been ours a matter of course. The nam of 800 Americans missing in tion, together with any inform tion as to their whereabouts, li ing or dead. It surpasses t imagination of decent men th the government of North Vie nam should continue to deny f families in the United States de so precious for them, so mea ingless for the North Vietname But they know a heart-strik when they see one, and they k plucking this one for all it worth: so much so that we re read routine reports about how are demanding just this as a pr condition to "talks": read, aid.

We should, then, agree to e tend diplomatic recognition return for all of the informati about the missing in action: a thus draw the curtain finally that awful war. But econom aid? It should be limited volunteering copies of the Decl ration of Independence or t United Nations Declaration Human Rights. And copies, many as desired, of Henry Haz litt's "Economics in One Lesson which is worth billions in ec nomic aid.

Demonstrators against nuclear power hurling objects at police in Brokdorf, Germany.

Attack on A-Site Repulsed in W. Germany

BROKDORF, West Germany, Nov. 14 (Reuters).—Police used water cannon, tear-gas and batons to beat back thousands of demonstrators trying to storm the site of a nuclear power plant here yesterday.

About 3,000 protesters used tanks to bridge a moat around the site. They tried to force a way through barbed wire erected as a second line of defense, but water cannon discharged from behind the wire swept them back into the moat.

At the same time police charged the demonstrators from the rear swinging batons and hurling tear gas grenades.

The police said they did not know the number of casualties, but Red Cross officials reported that at least 50 people were hurt.

The demonstrators had come from a nearby rally at which 25,000 persons protested plans for the power station. Work has begun on the 1,300-megawatt plant at this Elbe River village about 50 kilometers northwest of Hamburg.

The rally had begun with a religious service at which four clergymen backed pleas by the rally organizers that the protesters refrain from violence. Most demonstrators heeded the pleas.

But many militants, described by police as "fringe anarchists," had arrived with shields, helmets, gas masks and heavy rainwear. They began their onslaught with a hail of stones.

Despite Yugoslav Protest

Austria Holds a Nationwide Language Census

KLAGENFURT, Austria, Nov. (Reuters).—Austrians took part today in a controversial language census, part of an all-party plan to defuse tension between the Slovene minority and German-speaking majority along Austria's southern border with Yugoslavia. Authorities are going ahead with the census despite angry protests from neighboring Yugoslavia and the threat of a boycott that could make the results meaningless.

Slovene-speaking Austrians burned census forms in Klagenfurt and at Zell Pfarre, a mountain village near the Yugoslav border, and elsewhere blocked census booths for up to 30 minutes today.

Slovene community leaders in Klagenfurt, the provincial capital of Carinthia, have declared a boycott of the census, which they claim is designed to restrict minority rights guaranteed 21 years ago, when the postwar occupation powers signed a state treaty re-establishing Austrian independence.

The Slovenes have received vigorous backing from Yugoslavia, which warned Austria yesterday in the latest of a series of sharp diplomatic notes that the census was likely to damage their relations.

The Vienna government's main problem is a treaty promise to put up dual-language signposts in mixed-population areas.

In 1972, when Chancellor Bruno Kreisky's government ordered that the signposts should be put up they were torn down by German-language nationalists.

To obtain all-party support for a renewed attempt to replace the signposts, Mr. Kreisky agreed to rightist demands from the German-language majority that the Slovene minority should be counted first.

The Slovenes claim their language is spoken by up to 50,000 people in southern Carinthia, while their German nationalist opponents say the total is only 10,000. The minority says it is resisting pressures to assimilate with the German speakers.

Tension has risen with a series of bomb attacks. A goods train narrowly escaped derailment near Klagenfurt on Thursday after a blast damaged the railway line. The police linked the bomb with an earlier blast that shattered a monument to World War II Yugoslav partisans.

Fear of Future Claims

German-language nationalists say they fear a possible future territorial claim by Yugoslavia if the Slovenes are granted dual-language signs across the province. Yugoslav troops occupied the area at the end of both World Wars.

The Belgrade government has renounced all territorial claims to Carinthia but says it has the right to back the Slovene campaign because it is a co-signatory of the 1955 state treaty.

The census calls for all Austrians over the age of 14 to go to polling stations and fill in a form indicating their mother tongue.

The results, which will be worked out centrally by the National Statistics Office, will not be known until January at the earliest.

Chancellor Kreisky has denied that the census is a violation of the state treaty, declaring that the results will only be used for guidance, not as the final basis for granting minority rights.

Spanish Nun Beatified

VATICAN CITY, Nov. 14 (UPI).—Pope Paul proclaimed 19th-century Spanish nun Maria Rivas a blessed of the Roman Catholic Church today in beatification ceremonies at St. Peter's Basilica.

Revolution in Telecommunications and Transport

Greenlanders Are Emerging From Their Ice-Bound Isolation

By Colin Narbrough

GODTHAAB, Greenland, Nov. 14 (Reuters).—Greenlanders have emerged from their ice-bound isolation and now enjoy many luxuries from tropical foods to pirated color television.

Since the former colony became a province of Denmark in 1953, an advanced technical and telecommunications revolution has completely altered its way of life.

There are only about 200 kilometers of road in the whole 2,700-kilometer-long island in the North Atlantic, but helicopter and regular flights to Copenhagen bring in delicacies such as mangoes and passion fruit to people whose staple food used to be blubber.

Automatic dial phones and telecommunications to the outside world have also given a new dimension to life here.

Cable TV

In recent years, Greenlanders have been able to enjoy the added pleasure of color cable television pirated by a cooperative that secretly records Danish, Swedish and West German networks and flies the tapes to Greenland.

Although a few dogsleds and kayaks, the traditional Eskimo transport, still exist, they have been replaced by the sonwmobile and the fiberglass motorboat.

Rough terrain and lack of roads severely restrict the usefulness of wheeled vehicles, but traffic in the bigger towns, like Godthaab, the capital, could almost be described as busy.

A Danish taxi driver, resident in Godthaab for four years, commented that business was so good that he had just bought himself a new Mercedes-Benz after starting out with nothing.

"Greenlanders do not buy cars themselves, but they certainly like riding taxis. I've got customers who ride up and down town all day. It's not expensive either, because there is really nowhere to drive to," he said.

The center of settlement since the white man came to Greenland has always been the trading station, now largely replaced by the supermarket.

Nowadays the choice of goods, even in the smaller towns, rivals European supermarkets.

The supermarket in the west coast fishing town of Sukkertoppen (population 3,000) sells a variety of fruits and vegetables, none of which grow here.

But while displaying fresh mangoes from Kenya, Israeli oranges and passion fruit from the Caribbean, the store also has Greenland specialties, reindeer meat and seal blubber.

Radio Greenland, the local network, plays a central role in the emerging national awareness of the Greenlanders, who are scheduled for home rule by the end of the decade.

Firm Ideas

The chief of Radio Greenland, Finn Lynge, a Catholic priest and native Greenlander, said: "We believe in catering to all-round taste as our charter says we should. We broadcast about 10 hours a day and about 50 per cent of that is music."

"All newscasts are made in both Danish and Greenlandic but other cultural programs are about 70 per cent Greenlandic," he said.

Father Lynge said that the radio has pressed the provincial council for some time to start TV services, but so far without success.

At present cable TV is operated in all the main population centers by cooperative organizations that use the pirated tapes.

"This is technically illegal, but court procedures are long and complicated and Greenland judges often interpret things in their own particular way. As things look now, it is unlikely that anyone will try to stop it," Father Lynge said.

"One problem is that they are not subtitled in Greenlandic, which is a nuisance for most people here. A study group was sent to Finland to look into how the Finns manage to fit their strange, extended words onto the TV screen. The Eskimo language has something of the same trouble," he said.

Confident Portuguese Reds End Congress

By Marvine Howe

LISBON, Nov. 14 (NYT).—The Portuguese Communist party today concluded its national congress firm in its role as a revolutionary vanguard and determined to regain lost ground.

Scarcely a year after suffering serious defeats, the Communist party has demonstrated its resilience and again appears to be a major factor on the Portuguese political scene.

"The party is strong, united and confident," Portuguese Communist leader Alvaro Cunhal asserted in his closing speech. "Democracy cannot be built in Portugal without the Communist party and much less against it."

Mr. Cunhal, 63, was unanimously re-elected party secretary-general and dominated the four-day congress. It put an end to rumors that Mr. Cunhal, who is known as a Stalinist, would be put aside with honors and replaced by a younger, "more European" leader.

The 1,200 delegates to the congress also elected an enlarged, 90-member Central Committee of 54 effective members and 36 substitutes. The 22 effective members and 14 substitutes of the former Central Committee were all elected as full members of the new panel.

In his report to the congress, Mr. Cunhal had stressed the need to broaden the party leadership and bring in more young persons, workers and women. The congress failed to meet his demands on women.

The average age of the members of the new Central Committee is 44.7, compared to 48 for the old panel, and representation by workers and employees has been increased to 73.5 per cent of the total, compared to 63.9 per cent previously. But the number of women in the party's leadership remains low, only six.

According to Mr. Cunhal's detailed report on the party's structure, it now claims 115,000 members and 7,000 committees, making it the largest, best-structured party in Portugal. The Socialists, who have been the dominant force in all the recent elections, claim only 94,000 members.

The congress today approved a lengthy political resolution that is essentially an endorsement of the party's policy for the last 2 1/2 years—since the overthrow of the right-wing dictatorship brought with it legitimacy—and guidelines for future action.

There was practically no criticism of the party leadership for last year's reversals. In fact, there was no indication that the Communists had come close to dominating the centers of power in the spring of last year, only to be driven out of the key posts in the administration, military, press and even some labor unions.

Reaffirming its revolutionary mission as "the vanguard of the working classes," the congress proclaimed the Communist party's principal and immediate tasks to be:

- To reinforce workers' control in industry to prevent capitalist recovery.
- To defend positions already won by farmworkers under the agrarian reform program and force continued land expropriations under the law.
- To fight for the unity of the labor union movement to prevent the return of big landowners and monopolies.
- To try in next month's municipal elections to counter the attempts by reactionary forces to regain power.

UPI.

Alvaro Cunhal

Mr. Cunhal also reaffirmed the party's hard line on international relations. In particular, he asserted that the Italian-styled Eurocommunism "doesn't suit the Portuguese reality." He made a point of expressing gratitude to East European countries—especially the Soviet Union, East Germany and Bulgaria—for their support during the "complex process of the Portuguese revolution."

The American Express Card. For people who travel.

The American Express Card was created for people who travel because it relieves the need for carrying large sums of money and yet imposes no pre-set limit on spending – planned or otherwise. The Card helps cope with the unexpected bill or expense, and those moments of not having enough of the right currency.

When you carry the Card you can settle your bills in style at hotels, restaurants, stores and for many other services all around the world. It is like a financial passport – and it crosses frontiers more easily than cash. Yet you are billed in your chosen currency, irrespective of where you used the Card.

With the Card, you can sign for airline tickets, hire a car without deposit at major car rentals and you can even cash a personal cheque in an emergency at designated American Express Offices worldwide.

So, isn't it time you travelled a little easier? Peace of mind with the American Express Card costs just $25.00 annual fee (if billed in U.S. dollars) and $10.00 for each additional Supplementary Card. Apply now for the many international privileges and services of the American Express Card.

The American Express Card. Don't leave home without it.

IT'S EASY TO APPLY. COMPLETE AND POST THIS FORM TODAY.

Post to: Membership Secretary, American Express Company, P.O. Box 130, Haywards Heath, Sussex RH16 1GU, England.

PERSONAL ACCOUNT ONLY

S.A.N. 945 930 0455 | A.I. | J.D.

Send no money: $25 Annual Subscription is charged when Card is issued (Supplementary Card $10).

Kennedy-Congress Ties Reviewed for Clues to Carter's Performance

By David E. Rosenbaum

WASHINGTON (NYT).—Searching for clues about what is likely to happen in Jimmy Carter's administration, political analysts here are reviewing the relationship between President John Kennedy and Congress in the early 1960s.

There are, to be sure, a number of striking parallels. But there have been significant changes in Congress in the last decade and they appear in many instances to outweigh the similarities between the situation faced by Kennedy and that which Mr. Carter will face when he takes office in January.

Mr. Carter will assume the presidency, as Kennedy did 16 years ago, after several years of a government divided between a Republican president and a Democratic Congress, a division that led to paralysis in many areas of governmental policy.

Like Mr. Carter, Kennedy was committed to a sweeping legislative program to institute fundamental changes in U.S. society.

Although Kennedy had some successes, most notably in obtaining from Congress sharp increases in spending for defense and space exploration, his major proposals on social policy were stymied. Civil-rights laws, health care for the elderly, a tax reduction and education aid, to name several important initiatives, were blocked by Congress and were not enacted until after Kennedy's death.

New Generations

Mr. Carter will have to confront some of the same problems Kennedy had. He is part of a new generation of Democratic politicians and is viewed with some skepticism by the party's old guard in Congress. He was elected by an eyelash and his presence at the head of the Democratic ticket hardly seems to have been a factor in the election of a heavily Democratic Congress, meaning that there are few in Congress who owe him a political debt.

However, there are vast differences between the Congress of 1961 and the Congress of today and most of those differences appear likely to work in Mr. Carter's favor.

First and foremost, the prevailing ideology in Congress today is moderate-to-liberal, apparently in line with Mr. Carter's own views. When Kennedy took office, Congress was dominated by a conservative coalition of Republicans and Southern Democrats.

In part, the change came about because of the departure of most of the powerful Southern committee chairmen who held the reins of Congress in the early 1960s. Among them were Sens. Richard Russell of Georgia, Robert Kerr of Oklahoma and Harry Byrd sr. of Virginia and Reps. Howard Smith of Virginia, Carl Vinson of Georgia and Wilbur Mills of Arkansas.

Even among back-benchers, the Dixiecrat element in Congress is rapidly becoming extinct. Race is no longer the overriding issue that it used to be. And, in every election in the last decade, more and more of the old-line Southerners have been replaced by moderates and even liberals.

Less Hostility

In the few cases where there are still strongholds of Southern conservative influence—Sens. Russell Long of Louisiana and James Eastland of Mississippi and Reps. George Mahon of Texas and Jamie Whitten of Mississippi, for instance—Mr. Carter's own Southern background could reduce the hostility.

Moreover, there is a different breed of leadership on Capitol Hill today. No one wields the might of the late Sam Rayburn of Texas, the speaker of the House, who supported Kennedy on some matters but undermined him on others.

Rep. Thomas O'Neill jr. of Massachusetts, who is virtually certain to become speaker next year, has neither the personal political strength of Rayburn nor the will to oppose Mr. Carter. Rep. O'Neill is primarily a party man who has seldom strayed from the official Democratic line.

The probable Senate majority leader in the new Congress, Robert Byrd of West Virginia, has shed his conservatism of years past and has become in recent years an unabashedly partisan Democrat of no perceptible ideology.

Great Changes

Finally, there have been enormous changes in congressional procedures designed to make Congress less obstructive.

Kennedy's first battle in Congress was over control of the House Rules Committee, which in those days held sway over every piece of legislation in the House and which was dominated by men dead set against the Kennedy legislative program. Kennedy eventually won the fight, but the struggle was so intense that it hardened the liberal-conservative lines and made accommodation difficult for the rest of the Kennedy presidency.

Today, the Rules Committee is an arm of the Democratic leadership in the House. It still must approve legislation for floor action, but it no longer holds independent power.

Another important change in procedures made all committee chairmen in the House subject at the start of every Congress to election by the caucus of all House Democrats. Nowadays, a chairman knows that his job is in jeopardy if he is not responsive to the will of the majority of Democrats. That knowledge alone should influence the actions of those like Rep. Mahon, chairman of the Appropriations Committee, who are more conservative than most of their Democratic colleagues.

Senate Democrats have adopted similar procedures for electing chairmen. Perhaps even more significant, the Senate has relaxed its filibuster rule. Kennedy was repeatedly frustrated by the rule that required two-thirds of the senators voting to shut off a debate and bring controversial legislation to a vote. Now, it takes the votes of only 60 senators to invoke cloture.

Measure of Control

All that having been said, it is most unlikely that Congress will merely rubber-stamp the Carter legislative program.

Congress's self-image has gone full cycle. When Kennedy took office, the prevailing view on Capitol Hill and elsewhere was that Congress was the primary branch of the government. Between 1964 and 1974, the role of the president ascended and that of Congress declined to the point where nearly all policy was set in the White House. Gradually, in the last few years, Congress has begun to reassert itself and those now in Congress are determined to maintain their prerogatives.

New budget procedures allow Congress a measure of control over government spending and overall economic policy that never existed before. The Watergate inquiries and the investigations of the intelligence agencies gave Congress confidence that not all wisdom lay in the executive branch. The War Powers Act is a guarantee that no president can get the country into a long-term war without congressional sanction.

In addition, some of Mr. Carter's asserted intentions—government reorganization and tax reform, to name two—strike at the heart of the congressional establishment. It will require a good deal of negotiation and compromise before measures in those areas can be enacted.

One early battle that Mr. Carter will almost certainly have to fight with Congress involves the so-called legislative veto. Increasingly in recent years, Congress has reserved for itself the right to curb specific actions by the president.

For example, under current law, the president has the ability to raise the price of crude oil and to approve the sale of military equipment abroad. But if Congress disapproves of any step by the president in those matters, it can, by majority vote, block the action and the president has no further recourse. Such restrictions cut so deeply into traditional executive authority that no president can allow them to stand without a fight.

The membership turnover [illegible] Congress cannot be exaggerated. Only 23 senators and about [illegible] representatives in the new Congress were in office when Kennedy was sworn in. Forty-[illegible] senators will be in their fi[illegible] terms and about 150 House members will be in their first or second terms.

Most of the members of the 95th Congress have never served under a Democratic presid[illegible]. For them and the country, will be a new experience.

Hoping Carter Can Reverse Trend

Scientists Show Growing Concern Over U.S. Enterprise in Research

By Robert Gillette

LOS ANGELES—As the first President-elect since Herbert Hoover (in 1928) with formal training as an engineer, Jimmy Carter will take office at a time of general malaise among the half-million research scientists and engineers in the United States.

To be sure, the U.S. research community is better off than it was in the late 1960s and early 1970s, when a combination of stagnating growth in federal support for science and technology, and high inflation, put physicists and aerospace engineers on the unemployment rolls across the country.

Unemployment in the research community is below 1 per cent today, and in the two years of the Ford administration the slump in federal research support has bottomed out and begun a gentle recovery. Federal support, budgeted at $23.5 billion this year, is the main sustenance of the American scientific research.

Even so, a recent survey by the National Science Foundation found a continuing undercurrent of concern that the U.S. research enterprise is losing its historic vigor.

In universities and federal laboratories alike, according to the report, there is deep concern that the government is overemphasizing applied research with a potential short-term payoff at the expense of the kind of basic science that wins Nobel Prizes and ultimately determines the ability of U.S. industry to compete in an increasingly technological world.

Innovation Slowed

Industrial research managers, for their part, point to a number of indicators to argue that outdated patent, anti-trust and tax regulations are stifling technological innovation. The decline in fundamental research is also a serious concern in industry.

Whether any president can reverse these trends is open to question. It is far too soon to predict whether Jimmy Carter will develop the kind of special affinity for scientists and other academics that John Kennedy had.

Nevertheless, a number of leading researchers are hopeful that Mr. Carter's background will make him more conversant not only with their problems but with such global issues as energy supply, food, arms control and economic development—all issues in which technology forms a large part of both problem and solution.

Although Mr. Carter does not have an advanced degree, about half his undergraduate education at the Naval Academy was devoted to science, mathematics and engineering courses, and he spent one semester taking introductory graduate courses in nuclear physics and reactor engineering at Union College in Schenectady, N.Y. This, plus practical experience gained in the Navy, led one commentator in Science magazine, a leading research journal, to conclude that Mr Carter's self-description as an engineer was "apt enough."

Their Language

In any case, researchers seem generally pleased, whatever their ideological leanings, to have someone moving into the White House who can speak their language.

"It's nice to have a President-elect who's had two years of calculus," observed Lewis Branscomb, a former head of the National Bureau of Standards who now is vice-president and chief scientist of IBM Corp.

Mr. Branscomb, who organized a science advisory group for the Carter campaign, adds that his own contacts with Mr. Carter during the last year left him with the impression that "he's very, very bright, and his experience should give him a better understanding of technology than other recent presidents have had."

Similarly, Harold Brown, the president of the California Institute of Technology and a member of the Carter campaign's science, defense and foreign policy groups, came away convinced that Mr. Carter "is really interested in science and technology."

Important Change

There are, moreover, indications that a Carter administration may bring important changes to the way the government spends its billions on research and development—at least, if comments by the President-elect, published shortly before the election, accurately reflected his views.

In response to questions submitted in writing by two of the largest U.S. scientific organizations—the American Physical Society and the American Chemical Society—Mr. Carter said he foresaw "a great opportunity to rebalance expenditures" so as to place more emphasis on basic research and less on large technological development projects.

Besides putting new emphasis on basic research, Mr. Carter said he would give higher priority than the Ford administration had to certain fields of applied research —especially those fields "likely to be of long-term economic importance" or those touching on health, the environment and the nutritional quality of the world's food supplies.

'Study of Baby With Hand Grenade'

$275 Billion and Growing

International Debt Buildup Is Finance's Biggest Worry

By Leonard Silk

NEW YORK (NYT).—The biggest single worry in financial markets these days is over the enormous buildup of international debt—much of it owed to private commercial banks. There is no way to conceal the danger that some heavy borrowers from abroad may be unable to meet their obligations.

Nobody really knows just how large the mountain of international debt is. But what is important is not the aggregate figure, which runs into hundreds of billions of dollars, but the ability of particular nations to meet their payments.

Estimates by the Morgan Guaranty Trust Co. and The New York Times show some of the nations what government officials and private bankers in the United States are most concerned about today.

At the head of the list stands Britain, with total borrowings of $45 billion, including both public and private debts. Close behind it come the Comecon countries—the Soviet Union and its satellites in Eastern Europe—with $40 billion in debt outstanding.

Brazil, Mexico and Italy are all in the more than $20-billion class. France, Finland and Indonesia each has outstanding foreign debts of close to $10 billion.

Virtually all the oil-importing developing countries belong on the worry list, collectively, their external debts exceed $150 billion.

A vast amount of foreign lending—mostly in dollars—has taken place through the so-called Eurocurrency market, through banks in the major European countries, the Bahamas, Canada, Panama, the Cayman Islands, Japan and Singapore. The net foreign-currency liabilities of Euromarket banks in 1970 were $70 billion. By 1973, the figure had reached $160 billion.

Today, it exceeds $275 billion and is still growing.

The scaremongers of the world, who seem never to be in short supply, are once again writing scenarios about how the entire world monetary system could collapse if one or two countries, even small ones, were to go under.

In part, the motivation for such scaremongering is commercial—whether to sell gold or diamonds or books of fact and fiction.

To be sure, the motivation of those who be little the danger of national defaults to private banks and other countries may also be commercial—to protect their own past loans (or follies) and ward off a ruinous blow to public confidence that could itself bring the mountain of debt down with a calamitous crash.

In the midst of the Cassandras and the Pollyannas, is there any way to evaluate the risk that the U.S. and world economies are now facing from the overextension of foreign loans?

The question cannot be answered in the abstract—as though the future somehow already exists. Everything depends on national actions still to be taken.

Crucial Decisions

One critical action will be taken next month when the Organization of Petroleum Exporting Countries decides whether to increase the price of oil, and if so, by how much. If OPEC puts the price up substantially—say by 10 per cent or more—this would aggravate the payments problem of all oil-importing countries and push some closer to the brink of default. Can the United States and others dissuade OPEC from a stiff increase?

Some crucial decisions lie in the hands of private bankers, not public officials. Many bankers feel that they have already lent too much to poor credit risks. But if they cut off lending now, they may bring on the defaults—and the crash—they fear. If they go on lending to poor credit risks, however, they will be throwing good money after bad and only increasing the potential size of a future collapse.

What can government do to resolve this dilemma?

This will be the crucial economic question facing the Carter administration.

The United States remains the key decision-maker in the world economy both because of its great economic size and also because there is no other nation that can assume the political leadership required for a monetary rescue operation.

Greatest Danger

The first requisite for such a rescue is a faster rate of expansion in the three most powerful and stable economies of the industrial world—the United States, West Germany and Japan.

Thanks to the intense persuasiveness of President Ford's economic and financial advisers, especially Secretary of the Treasury William Simon and chief economic counselor Alan Greenspan, the business and financial community has come to regard rapid expansion as the greatest danger facing the U.S. and world economies.

Worry about a faster rate of economic growth—held to be the likely cause of renewed inflation —has been depressing the stock and bond markets at home and abroad ever since Jimmy Carter's election.

However, the financial markets may be completely wrong. At least some of the most sophisticated members of the financial community think so.

For instance, Rimmer de Vries, the top international economist of Morgan Guaranty, says that a stronger fiscal push by the Carter administration would help restore balance to the world economy in two ways: By strengthening loan demand at home, thereby reducing foreign lending, and by increasing the U.S. demand for foreign goods, thereby improving world commodity prices and sales, and consequently increasing the foreign earnings of the weaker countries.

The United States will now do its part, Mr. De Vries thinks, but he—and many other economists —are more worried about Japan and West Germany, whose conservatism seems unshaken by the persistent world slump.

U.S. Exhibit In Moscow Is Open

MOSCOW, Nov. 14 (UPI).—The biggest U.S. exhibition ever staged here opened last week as part of Bicentennial Year celebrations.

The exhibition, prepared by the U.S. Information Agency at a cost of $1.3 million, includes displays illustrating the political, social, economic and cultural life in the United States. It covers nearly an acre in a pavilion in Moscow's Sokolniki Park.

At opening ceremonies USIA director James Keogh said the aim of the exposition was to improve understanding between the United States and the Soviet Union as "part of a sweeping effort to ensure peace for the peoples of the two countries."

3 West German Terrorists Charged With Murders, Bombings

Baader-Meinhof Trial Near End After 18 Month

By Murray Seeger

BONN—Almost 18 months after it began, the tense, sometimes violent trial of leaders of the Baader-Meinhof terrorist gang is dragging to a close in the fortress-like Stuttgart courtroom built for it.

The proceedings of the trial have long since fallen into the columns of routine news in the West German press, and most readers have stopped paying attention to it. Only if the three remaining defendants out of the original five were found not guilty would the case regain the prominence it once held both in West Germany and around the world.

The prosecutor has made his final summation and asked for life sentences for the three remaining defendants, who are charged with murdering four Americans and a German, 54 attempted murders, several bombings and robberies and the formation of an illegal organization.

Defense lawyers will make their summaries and then the panel of five Supreme Court judges will retire to consider their verdicts. An announcement is expected about Nov. 1, a year and a half after the trial opened.

Despite the fading of public interest, the Baader-Meinhof trial stands as one of the most important legal proceedings in the postwar history of West Germany.

German Justice

On one hand, the trial has revealed a great deal about the West German system of criminal justice, differentiating the country from Britain and the United States, which provided it with the models for its political system.

On the other hand, the long legal process in Stuttgart has come to symbolize the end of the domestic anarchist terror movement, which had ties both to the Communist world and to the Palestinian terrorists and found its strength in the strong revulsion many young Germans felt toward U.S. involvement in the Vietnam war.

There are still occasional bombings in various cities, and strong security measures are still in force at airports, in public buildings and all over the small capital city of Bonn, but there has been no new group created to replace the Red Army Faction, the original Baader-Meinhof guerrilla group.

"All movements set in motion since have been nothing but a pale imitation of the original hard core, who had always been capable of developing their ideological motifs into strategic plans," Hans Josef Horchem, chief of internal security for the city of Hamburg, one of the terrorists' favorite action centers, said recently.

Unless another propagandist as provocative as Ulrike Meinhof appears on the scene, the remaining terrorists "will be stuck with a 'Bonnie and Clyde' image —a challenge to the state, a taste for danger, pleasure in inspiring terror, but not a single 'revolutionary war,'" he said.

Miss Meinhof's death in her cell last May, a year after she went on trial, inspired a series of violent demonstrations in different cities. In August, her attorney announced that an international committee would investigate the circumstances of her death, since some of her sympathizers did not believe the official finding of suicide.

Since then, no credible evidence has been offered to suggest anything but what the authorities originally concluded: that the 41-year-old former journalist had become so depressed after four years in jail and so disillusioned that her revolutionary movement never caught fire that she hanged herself.

One of the other original defendants, Holger Meins, died in the same jail in November, 1974, following a hunger strike.

3 Survivors

The three surviving defendants, Andreas Baader, 34, Gudrun Ensslin, 36, and Jan-Carl Raspe, 33, have all suffered physical and mental deterioration and have sat in the courtroom only occasionally during the long, acrimonious trial.

Outside observers have been highly critical of the legal system for holding the defendants in jail three years before putting them on trial and then consuming another 18 months to conduct the trial.

A defendant in another terrorist trial, in Kaiserslautern, Wolfgang Grundman, was released this week after 4 1/2 years in jail without being convicted of anything. The judges said there was insufficient evidence to hold him on murder and robbery charges, and the remaining count against him, belonging to an illegal organization, called for a maximum of five years in jail.

Since German law contains no provision for requiring a speedy trial or releasing a defendant on bail—the basic habeas corpus right inherent in British and U.S. law—an accused can be held for long periods while evidence against him is collected.

The law presumes the defendants are innocent until proved otherwise but permits public comment by newspapers and public officials that assumes the accused are guilty. There is no provision for calling a mistrial because of adverse publicity or negative public opinion, perhaps because trials are conducted by a panel of career judges and not before a jury.

The Baader-Meinhof defense opened the trial last year with a petition that asserted it was impossible for the accused to get a fair trial in West Germany. The five judges rejected the petition.

West German judges take a vigorous role in trials, asking questions of witnesses and attorneys, and therefore become participants as well as umpires, exposing themselves to charges of prejudice.

This participatory role for judges has exposed them to violent tactics by the terrorists.

One gang member, Klaus Juenschke, on trial in Kaiserslautern but called to Stuttgart as a defense witness, refused to testify and instead leaped from his seat and knocked Chief Judge Theodor Prinzing out of his chair.

Another terrorist witness, Werner Hoppe, serving a 10-year sentence in Hamburg, added to the circus atmosphere by telling the judges, "We don't usually talk to people like you, we shoot them."

The Stuttgart court, like most West German courts, has been meeting only three days a week on its normal schedule and has had many recesses. Between the state and defense summaries, for instance, a 10-day recess has been called.

Some of the delay has been caused by the judicial system itself and some by the defendants. After the trial opened last year, defense lawyers asserted the long time spent in jail by the four defendants had weakened them so much that they could not endure long trial sessions.

A panel of doctors supported the defense contention, but Judge Prinzing ruled that the trial could proceed without the four present in the courtroom.

He said the defendants had decided to sabotage the trial process as part of their anti-government campaign. They were weak, Judge Prinzing said, because they had engaged in hunger strikes and other forms of protest in jail, not because they were confined, mostly in solitary cells.

Baader screamed that the judge was "a complete idiot" and an "imperialist-state pig." A defense lawyer said the judge had committed "an unbelievable act of oppression."

An appeal of the judge's ruling caused a 30-day recess in the trial last fall and ended with a find[illegible] in his favor.

Despite the claim of phys[illegible] weakness, the defendants w[illegible] able to beat up two of t[illegible] guards in the same period t[illegible] force another trial delay.

Some of the defense law[illegible] also became participants in [illegible] gang's campaigns by not only [illegible] fending them in court but [illegible] by coordinating outside activ[illegible] by supporters.

The defendants have not [illegible] lenged the basic evidence p[illegible] ed by the state but have [illegible] their case on the contention [illegible] their actions were politica[illegible] therefore not covered by crim[illegible] statutes.

After refusing to give testim[illegible] for many months, like his [illegible] defendants, Baader last Jan[illegible] declared the gang was "an u[illegible] guerrilla group, a little mo[illegible] start up the great revolution[illegible] armed force."

"We have learned that po[illegible] comes from the end of a g[illegible] he added.

A defense lawyer, Axel Ax[illegible] said the group saw itself "as p[illegible] of the international liberat[illegible] struggle against imperialism c[illegible] ducting class war in West G[illegible] many."

One of the gang's prime tar[illegible] was the U.S. military presenc[illegible] West Germany. Four U.S. s[illegible] diers were killed in 1972 in t[illegible] bombing attacks at mili[illegible] headquarters in Heidelberg [illegible] Frankfurt. The fifth mur[illegible] charged against the gang [illegible] that of a policeman killed dur[illegible] a bank holdup.

Anti-U.S. Attacks

The attacks against U.S. [illegible] stallations were asserted to be [illegible] retaliation for U.S. actions [illegible] Vietnam. At one point O[illegible] Schily, a defense attorney, as[illegible] that former President Richa[illegible] Nixon and other U.S. leaders [illegible] called to testify so that it co[illegible] be established that the Baade[illegible] Meinhof campaign had bee[illegible] force Washington to end its [illegible] volvement in Vietnam.

Instead of by a civilian cou[illegible] Mr. Schily said, the gang me[illegible] bers should be tried by a milit[illegible] tribunal, since they had engag[illegible] in "partisan warfare" as defi[illegible] by international law. They s[illegible] "prisoners of war," he said.

Prosecutor Heinrich Wun[illegible] disagreed, as did the panel [illegible] judges, since West Germany [illegible] not involved in the Vietnam w[illegible]

"We live in peace, and mur[illegible] is dealt with in this country [illegible] what it really is," Mr. Wun[illegible] said.

The Baader-Meinhof g[illegible] originated with university a[illegible] war groups in the 1960s and turn[illegible] ed to terrorist tactics when [illegible] members found their political ac[illegible] tivities failed to change W[illegible] German society.

A talented writer who start[illegible] her career by analyzing social [illegible] sues, Miss Meinhof evolv[illegible] through a period of Communi[illegible] party activity to terrorism, in[illegible] cluding a course in bombing an[illegible] weaponry taught at a Palestini[illegible] camp in Lebanon.

She led an attack on a Berli[illegible] jail in 1970 to free Baader, an[illegible] they went underground for tw[illegible] years of violent activity, culmi[illegible] nating with their arrests in 197[illegible]

Summing up the evidence [illegible] against the remaining defendant[illegible] Mr. Wunder said, "These three [illegible] people were not capable of creat[illegible] ing a revolution. They lived in a [illegible] dream world and had no chance [illegible] as terrorists in our country."

FOCUS ON SPAIN, 1976

Country Is Shaking Off the Bonds Left by Franco; The Economic Situation Is Difficult, but Not Critical

Slow Liberalization

Way Is Now Opened To Full Role in EEC

MADRID (IHT).—With the death of Generalissimo Francisco Franco and the gradual, though slow, liberalization of his regime as it moves toward democracy, the way is now open for Spain to eventually become a full member of the EEC.

When Franco decided in September 1975 to have five political activists shot by firing squads for killing policemen, he unleashed a torrent of criticism that the EEC suspended its trade negotiations with Spain. "Cut off by his age, his outlook and his regime, one man is trying to isolate 35 million Spaniards from the rest of the world," remarked Claude Cheysson, EEC commissioner and supporter of the French Socialist party at the time. With the establishment of the monarchy under King Juan Carlos last November and the government's promises to bring Spain into line with other West-ern European countries, the EEC resumed negotiations.

Under Franco, Spain was isolated from the rest of Europe for obvious reasons and it took refuge ideologically behind the Pyrenees. Now Spain is looking steadily toward the rest of Europe and, along with Greece and Portugal, to being among the next three full members. While the political situation between Spain and the EEC has thawed, although there are still some obstacles, economically the same problems exist and they are the main stumbling blocks in the negotiations.

Spain signed a preferential trade agreement with the EEC back in 1970 and agreed to lower her exceptionally high tariffs and her quota restrictions on incoming goods in return for The Six giving Spain concessions on her industrial exports. From 1973 Spain has enjoyed up to 60 per cent reduction on most of her industrial exports going to the EEC, and over half the volume of her agricultural exports benefit from some concession provided that their prices respect certain minimum levels.

Spain has in effect reduced her tariffs by about 25 per cent for most industrial goods that The Six export to her. There are hardly any concessions for agricultural goods as the exports of the Six are almost entirely industrial goods, apart from a few milk products. Overall, the reductions which Spain gives at the moment amount to an average of 5 per cent, and in return she gets a 3-per-cent reduction on her industrial goods exported to the Six.

Exports

In 1969 Spain's exports to The Six represented 24 per cent of all her exports abroad compared with 31 per cent in 1973—the last year considered as "normal" because of the petrol crisis, which has badly affected the country's economic situation.

With the entry of Denmark, Great Britain and Ireland into the EEC in 1973, creating The Nine, Spain signed a protocol agreement which maintained the status quo and temporarily excluded the new three from the benefits which Spain gives to the original Six.

By the beginning of next year the tariffs of Denmark, Ireland and Great Britain will have to be brought into line with those of the Six and this is going to affect Spain. Last year Great Britain was Spain's fifth most important supplier and her fourth largest customer, almost entirely in agricultural produce. But since Great Britain joined the EEC she has tended to look more to the EEC as a supplier of agricultural produce than before, to the obvious disadvantage of Spain. Last year Spain's agricultural exports to Great Britain amounted to £130 million more than Britain's agricultural exports to Spain.

The issue of Spain's agricultural exports is the sticky point, particularly as Spain argues that the present EEC offer to her will work against her important agricultural interests. The offer is to create a free trade industrial zone and an improvement in the situation of agricultural exports until such time as Spain is a full member. Spain in effect would have to reduce her 13-per-cent tariffs to zero and The Six their 3 per cent, which Spain says is unjust. The Spanish delegation accepts with reserve the idea of free trade for industrial exports but with the condition that it can control it if the country's agricultural exports do not reach the same monetary level.

The delegation argues that the Italian orange and the Dutch potato will get better treatment than the equivalent Spanish products. Spain would prefer a simple modification of the 1970 agreement with better agricultural conditions.

Italy in particular is opposed to granting Spain any further agricultural concessions and the powerful French agricultural lobby sees its interests threatened by Spain. This was clearly outlined in a confidential report by the French National Center of Young Agriculturalists in May entitled "Spain: A Shock for Europe." The odd incident when Spanish trucks carrying oranges over the French border have been overturned shows the feelings of French farmers.

Public opinion is strongly behind Spain going into the EEC. The entry date was put at 1980 by the last foreign minister, Jose Maria Areilza, who worked tirelessly for the European cause. This date is considered optimistic and will probably be revised to 1981.

On the political front there are inevitably disagreements about just how democratic Spain is going to be. In September a delegation of opposition politicians went to Strasbourg to complain about the wording of a resolution proposed by the Council of Europe on Spain's present political situation. The opposition said that basic freedoms are still denied; that the government has not taken the opposition's objections into account, and that the culmination of the transition, controlled by the government, will not necessarily be a true democracy. Socialists, Christian Democrats and liberals succeeded in getting the council to tone down its favorable resolution, which said that democratic freedoms must be guaranteed before elections take place.

The business class is getting keyed up for entry, viewing the prospect of international competitiveness with optimism, but realising that many changes are going to have to be made, not the least in a more rational labor market policy.

Monetary Policies Stressed

By Harry Debelius

MADRID (IHT).—Spain's newly appointed first vice-premier, Lt. Gen. Manuel Gutiérrez Mellado, recently said that the situation of the Spanish economy "is difficult, although not so critical as some prophets would have us believe."

But there are serious differences of opinion at the highest levels of government, as well as among economists, about the extent of and the remedy for Spain's economic ills. The second vice-premier, Alfonso Osorio, told the Spanish nation in a televised speech Oct. 8, "It would be inadmissible to hide the fact that the Spanish economy is in grave condition."

He pointed out that the country is suffering from a growing inflation, uncertainty and lack of confidence among investors, trade deficits, a negative balance of payments and increasing foreign indebtedness. In Mr. Osorio's opinion, the solution to the problem is "a policy of economic stability in the broadest sense, which also includes measures of stimulation and reactivation."

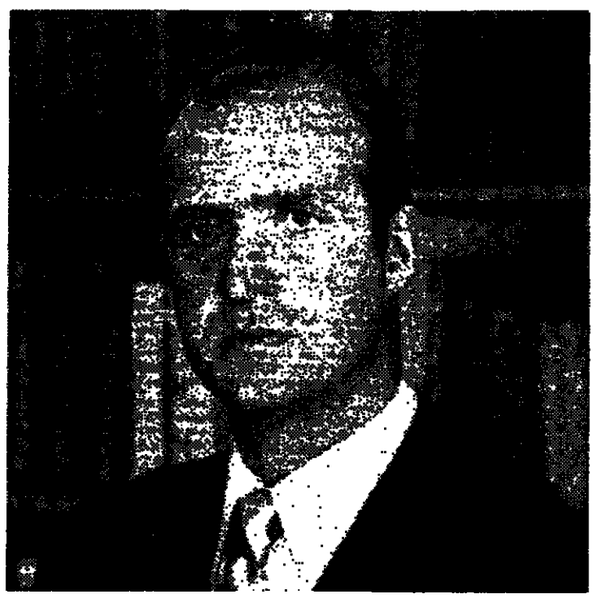
For Gen. Gutiérrez, the solution is simply a question of everyone's doing his duty. In an interview published Oct. 23 by the semi-official news agency Efe —the same interview in which he said the situation is "not so critical"—he said:

"I don't think it will be possible for the nation to get ahead unless each and every one of us is determined to render the maximum in our job and to fulfill our obligations of all kinds to the government."

Political Answer

Premier Adolfo Suárez thinks the answer is political. He said in a speech broadcast nationwide Sept. 10:

"There cannot be a reactivation or economic stability until the political doubts which are affecting the country have been cleared up. This is one more point which shows us the interrelation between political and economic processes, as well as another vital reason obliging us to undertake the important operation of our political reform with clarity, speed and firmness, at the same time reorganizing the economy."



There are differences, too, about what "measures of stimulation and reactivation" should be applied.

It was only at the end of October that the disagreement between Finance Minister Eduardo Carriles and the governor of the Bank of Spain, Jose Maria Lopez de Letona, about the expansion of credit was resolved in favor of the governor of the Bank of Spain. Mr. Lopez de Letona's announcement that credit will be expanded in this final quarter of

Upsurge Follows a Two-Year Slump

Bank Optimistic on Foreign Trade Future

MADRID (IHT).—Spain's foreign trade picture is not exactly rosy, but there are ways of making the statistics look encouraging if you are optimistic, as the Banco Hispano Americano demonstrated here recently.

According to a study carried out by that bank, the value of Spanish exports from January through August increased by 12 per cent with respect to the last eight months of 1975, and imports grew by less than 2 per cent during the first eight months of 1976 compared with the last eight months of 1975.

A bulletin announcing the results of the bank's study added, "The growth of nonagricultural exports reflects the robustness of the upsurge in exports. All things considered, the evolution of the foreign trade sector seems to indicate a slight improvement, in contrast to the deterioration of the two preceding years."

Curiously, the Bank of Bilbao, working with the same figures, developed a much less optimistic analysis. That bank adopted the more customary procedure of contrasting the first eight months of this year with the same period last year (that is, January-August, 1976, compared to January-August, 1975) and came up with the conclusion that imports had increased by nearly 30 per cent while exports had grown by only slightly more than 19 per cent.

20% Increase

Regardless of how the statistics are interpreted, it is clear that Spain's foreign trade deficit of 389,833 million pesetas was nearly 20 per cent greater than it was for the same eight-month period of the preceding year.

The steady deterioration of Spain's trade balance, combined with the steady decrease of its gold and currency reserves, motivated the government last month to put a surcharge of 20 per cent on duties on most imports, and to increase incentives for exports. Whether those measures will work remains to be seen. In any case they do not alter the situation with regard to the poor degree of price competitiveness of Spanish products—a direct result of the continuing inflation.

Coupled with the unsatisfactory balance of trade is the sharp drop in foreign currency income from the tourist industry. Tourist revenue is estimated to be about 12 per cent lower this year than in 1975. And, as a result of the balance of payments gap, Spain's gold and foreign currency reserves were down to about $5.3 billion in September, $174 million less than during the same month of 1975.

The nation's foreign debt is expected to reach more than $12 billion by the end of the current year, which is four times what it was only four years ago.

One important negative factor in Spain's balance of payments is the amount which Spanish manufacturers spend on foreign royalties and technological assistance, compared with the very small amount they spend on research to develop their own technology. In the first quarter of this year alone, Spanish companies paid out more than $123 million for foreign technology, compared with less than $71 million during the same period of 1975.

During the whole of last year, the payments deficit for technology amounted to nearly $314 million, of which 60 per cent was for patents and licenses and 40 per cent was for technical assistance.

According to Enrique Kaibel, director general of Industrial and Technological Promotion, Spanish firms are so reluctant to sponsor their own research that "it is commonplace, paradoxically, for Spanish firms to work on the basis of licenses from foreign companies which have a smaller production capacity and even have less experience in their particular field of production."

The government will not find it easy to significantly reduce imports, since the categories in which imports increased most in 1975 were machinery, precision tools and optical goods and food and agricultural products—all more or less essential items for a country which is just crossing the threshold between a developing and a developed nation. During 1975, Spanish imports of crude oil increased by nearly 3 per cent in cost, but actually decreased by nearly 6 per cent in tonnage.

A look at export figures offers a clear picture of what is happening: The balance of trade is not in Spain's favor in commerce with any of the country's principal trading partners. Trade with the United States in 1975 put Spain in the red by about $1.6 billion; Spain's exports to the United States decreased by more than 3 per cent, and U.S. exports to Spain went up by nearly 8 per cent.

The picture in Europe is similarly discouraging. During the first six months of 1976, Spain's deficit in trade with West Germany was $469 million; with France it was $92 million; with Britain it was $108 million; with Italy, $246 million, with the Netherlands, $2 million.

Even trade with Eastern Europe, which in the past has generally been in Spain's favor, showed a significant deficit. The Spain-Comecon figures added nearly $80 million to the Spanish trade debt.

The most expansive export sector for Spain in 1975 was metals and metal products, up more than 45 per cent over the previous year's figure. Foreign sales of transport material (except ships) increased during the year by nearly 29 per cent, continuing a trend of growth which was first noticeable about five years earlier. Exports of footwear, Spain's principal export to the United States, were more than 31 per cent higher in 1975 than in 1974. The United States buys about 21 per cent of all the shoes produced in Spain.

Sales of mechanical and electrical machinery abroad increased by nearly 20 per cent in 1975. Agricultural exports, including wine and olive oil, slipped downward but remained the biggest item on Spain's export list, with a value of $1.5 billion, or nearly one-fourth of the total.

Makes Slow Progress to Democracy

By William Chislett

MADRID (IHT).—"All is tied up, well tied up," said Generalissimo Francisco Franco some time before he died; and now that he is dead, ending a regime which lasted 30 years, his supporters and his enemies are trying to unravel the intricate knots of his dictatorship.

King Juan Carlos, the dictator's 38-year-old successor, committed to establishing a constitutional monarchy, is himself caught in these knots—knowing full well, as he said with some irony the day he was sworn in as Spain's first king since 1931, that it is impossible to understand the contemporary political situation in Spain without referring to Franco.

When the dictator died almost exactly a year ago (Nov. 20) after a five-week battle with death, many were the misguided predictions that Spain would be plunged into another civil war. This is the last thing the people want, over 65 per cent of whom belong to the "silent (post civil war) generation." But nevertheless political violence, perpetrated by extremists at both ends of the country's incredibly confusing political spectrum, shows that Spain's slow march to democracy is fraught with dangers. To date more than 40 people have died in political violence, including those shot by the police in demonstrations; and it is worth pointing out that this number is far greater than the number of deaths in neighboring Portugal, which has had a revolution.

Matadors, Bulls

Were Spain to undergo a Portuguese-style revolution, which is most unlikely, there would be a bloodbath, for, as Foreign Minister Marcelino Oreja aptly pointed out in an interview, one of the differences between Spain and Portugal is that in Portugal matadors do not kill bulls, but in Spain they do.

The extreme left in such organisations as the Basque separatist movement ETA, which believes in using violence to achieve home rule for the Basque country, is aiming at creating a pre-revolutionary situation. The extreme right aims at creating sufficient chaos in its attacks on "subversive" bookshops and by beating up people it doesn't like to produce a backlash and a military dictatorship.

The armed forces, the main pillar of the Franco regime, are keeping ominously quiet while the country's bitter ideological struggle continues. Forever priding themselves under Franco on their so-called pristine neutrality, which meant support for his regime, the armed forces now find themselves in the strange position of sitting back and watching the dismantling of the dictatorship, to the obvious anger of rightist generals who would dearly like to intervene and once again raise the banner of the nationalist civil war "crusade."

Premier Adolfo Suárez fired his Vice-Premier, Lt. Gen. Fernando de Santiago y Diez de Mendivil, in September because he was too approachable by the right. Mr. Suárez, Europe's youngest premier, replaced him with the more liberal Lt. Gen. Gutiérrez Mellado, a close friend of the King's, whose appointment was generally welcomed by most of the opposition. Lt. Gen. Gutiérrez achieved a remarkable turnabout in the armed forces' intransigent stand when he said last month that he was ready to enter into dialogue with everyone. But he warned that he was not prepared to allow any more fratricidal fights and that "Spain is for all Spaniards."

The other change, although not so noticeable, has been in the Catholic Church. The church became divided long before Franco died. Toward the end of his rule even the traditional hierarchy began to speak out, albeit carefully, against his one-party system. In return for the church's support of the "crusade" in the Civil War, a Concordat was signed in 1953 which gave the church a privileged position and enabled Franco to try to control the progressive tendencies. Dissident clergymen

(Continued on Page 10.)

The Nation Is Shaking Off Bonds Left by Franco

(Continued from Page 9.)

were imprisoned in a special prison at Zamora.

The prison was closed earlier this year and the Concordat was revised in August, after the King renounced his right as head of state to name candidates for the office of bishop, and the church in return renounced certain ecclesiastical privileges.

Along with the clamor for an amnesty for political prisoners, the other great battle cry since Franco died has been the growing demand for autonomy for the Basque country and Catalonia. The Basques and the Catalans, both fiercely proud, want to return to the kind of situation they had before the Civil War when they had their own autonomy with local governments, a measure of economic independence from Madrid (both the Basque country and Catalonia are far more industrially prosperous than the rest of Spain) and recognition of their own distinct culture.

At the end of last month the government recommended that King Juan Carlos revoke Franco's decree law of 1937 which punished the Basques for not supporting his cause. This decree took away the Basques' independence from Madrid.

This will mean that Basques will eventually be able to collect their own taxes, have their own police force and university and form an assembly made up of freely elected town councils. But until such time as the administrative apparatus is set up, existing laws stay in force. Psychologically this will boost the morale of Basques, but what they want is an updating of the 1937 situation and not just a straight reinstatement.

Under Franco all signs of Catalan and Basque nationalism were quickly suppressed, and so they were until as recently as September, when the Basque Ikarrina flag began at last to be tolerated.

Economically it makes no sense for the two regions to be given complete independence, but politically there is a lot to be said for allowing the Basques and Catalans much more say. Incidents like that which occurred Oct. 4, when a leading politician and four policemen were shot dead by the ETA in broad daylight, show how volatile is the home-rule issue.

Probably the greatest single step forward which Spain has taken in the last year is to have granted an amnesty for political prisoners and exiles. The fact that it took six months showed the pressures against it. When Franco died there were hundreds of political prisoners and thousands of political exiles waiting to return.

Although most political prisoners have now been released (about 300) the amnesty cry has not entirely stopped. This is partly because it has been left to employers as to whether they want to take back workers dismissed for political reasons. Also only nonviolent political prisoners have been released. Lawyers argue that many of the so-called "terrorists" are not so in the strict sense of the word, but only under the sweeping Spanish terrorism law. There are estimated to be at least 300 "terrorists" still in prison, most of them belonging to ETA.

Furthermore the political courts are still working, though less actively than before, and people are still fined without trial for political offenses. The justice minister, Landelino Lavilla, has promised to end both these abhorrent aspects of the Franco regime.

Police on Trial

The other important aspect is that at last policemen are beginning to come to trial for maltreating and torturing suspects.

The first big trial took place in Barcelona last month amid angry scenes by other policemen who gathered outside the courtroom to protest at the trial and jostle witnesses. Under Franco, policemen, particularly the political ones belonging to the Brigada Social, enjoyed immunity from punishment. The government now intends to reorganize the police forces, but it is unclear whether the Brigada Social will disappear altogether or just be given another name.

The cry "amnistia y libertad" did not stop until July 31 when the King granted the amnesty. By then the government of Carlos Arias, Franco's last premier and the King's first, had fallen and Adolfo Suárez was appointed.

With Franco's death ending what a Socialist called "the long dark night of the dictatorship," the democratic opposition parties in two alliances—the Communist-founded Democratic Junta and the more socialistic Platform of Democratic Convergence—called for a provisional government. Santiago Carrillo, the secretary general of the Spanish Communist party, said in exile in Paris that the time had come to put an end to the spirit of the Civil War. But the King reluctantly appointed Mr. Arias in December under pressure from the right, which saw the idea of a provisional government as undoing all they stood for. The King was not given much choice in the matter, for the 17-man Council of the Realm, the country's highest advisory body, responsible for drawing up the list of candidates, is a bastion of Francoism.

As the months went by, amnesty demonstrations mounted and the opposition lost what little confidence it had that things were going to change quickly. News leaked out from the King's Zarzuela Palace that Mr. Arias was an "unmitigated disaster" and in July he was replaced.

Only now, with the new European image which Mr. Suárez is trying to cultivate, is the spirit of the Civil War beginning to be buried. Franco kept the spirit alive, the psychological wounds festering, and reminded everyone once a year at the annual victory parade that he was the winner. Mr. Arias made no great effort to bury the differences, and in June the King presided over what was probably the last victory parade after a dispute which the right won about changing the name to "Day of the Armed Forces." The spirit and terminology are now only being kept alive by extremists. Nevertheless, while most people care to forget the Civil War, what happened in those fratricidal three years is inevitably conditioning political events now.

...While most people care to forget the Civil War, what happened in those fratricidal three years is inevitably conditioning political events now.

When Mr. Arias was dismissed, the opposition again said that this was an ideal time to bring all the country's political forces into a government until elections were held. By then the Junta and the Platform had come together in another curiously named organization, Democratic Coordination (CD).

This was formed in March and its first meeting was broken up by the police. Marcelino Camacho, leader of the Workers' Commissions, the illegal Communist-dominated trade union, and Prof. Ramon Tamames, a Communist, were imprisoned for a month.

The parties in CD are: the Communist Movement, the Spanish Communist party, the Carlist party, the Spanish Workers' Socialist party (PSOE), the Popular Socialist party (PSP), the Workers' party, Democratic Left (ID), the Revolutionary Workers' Organization, the Spanish Social Democratic Union, the Independent Group, the Social Democrat party, and finally three trade unions, the Workers' Commissions, the General Union of Workers and the Workers' Syndical Union.

The decision to ban the meeting, taken by Manuel Fraga, the then interior minister, reflected the government's nervousness faced with the prospect of a united opposition. The government need not have worried, for the opposition, while it has made advances, has still not reached real unity on a national scale. The internal squabblings, opposed viewpoints and inability to present a credible alternative are beginning to result in some strong attacks from the press, enjoying its new-found freedom to criticize the opposition and the government.

Part of the opposition's inability to speak with one voice, even though they are in basic agreement over the need for a provisional national government, is that with the lifting of 36 years' repression against political parties there has inevitably been a tremendous upsurge of political activity. No longer is the National Movement the only legal political organization, although it continues to exist, using 4,000 million pesetas of public funds every year with civil governors acting as provincial heads. The Movement is present in every village and could act as a springboard for pro-government forces in the elections.

Something that is often forgotten in Europe is that Spaniards are only now being allowed to meet, discuss, form parties, but are still under an arbitrary government, which one day permits an organization to meet and the next day bans it.

Franco cleverly added to the already existing divisions among the various political forces by tolerating some more than others, with the Communist party as Public Enemy No. 1. The Communist party is still the least tolerated, and the rest of the opposition, by a quirk of Byzantine logic, is open to bannings because it spurns legality, rejecting it unless the Communists are also allowed.

While the amount of freedom allowed bears no comparison to the Franco era, technically speaking a political party is not legal until it has requested permission from the government's registrar of political associations. All reject it as an anti-democratic procedure. This to some extent explains the alphabet soup of political parties, with several hundred groups. No one's cause was heard under Franco. Now everyone wants to be heard.

The confusing spectrum of political groups is playing into the hands of diehard Francoists, like José Antonio Giron, head of the General's Civil War veterans, who frequently says that to allow political parties would only bring chaos. This furnishes fuel to the myth that every Spaniard is a party unto himself and that Spain needs a Napoleon, a Caesar or a Franco. Franco himself said that "parties have always been the cause of agitation and infighting." It is a bold man who dares to predict exactly what is going to happen when the country's first general elections in more than 40 years are held before the end of next June. The elections will be for a lower house and a Senate, elected on a proportional representation basis, with the King probably able to appoint a sixth of the senators.

Coordination's concept of how to liberalize the country and the government's are far apart. The government insists that democracy will hopefully come through Franco's institutions. But what happens if it doesn't?

The other opposition to the government comes from the extreme right, which believes that Franco's system only has to be "perfected" and not scrapped. And somewhere in between the two lies a recently formed alliance which claims to represent the center.

Fossilized Remains

The most powerful single party in Coordination is the PSOE led by Felipe Gonzalez, a 34-year-old Sevillian lawyer. The PSOE, recognized by other European Socialist parties, was founded in 1879 and after the Civil War most of its leaders went into exile like Rodolfo Llopis. This eventually led in 1972 to a split between those working underground in Spain and those abroad, with Mr. Gonzalez taking over the "renovated" PSOE. The fossilized remains called themselves the "historic" PSOE. When these exiles returned this year they found that the younger generation had taken over.

Since Franco died, Mr. Gonzalez, aided by his matador good looks, boundless energy and charisma, has become the best known opposition leader. He now finds himself in the strange position of heading a party which is capable of attracting a lot of votes but rejects the government's reforms. Partly because of this the government has banned the PSOE congress this month under pressure from the right.

The other important Socialist party is the PSP headed by Prof. Enrique Tierno Galván. It is numerically smaller than the PSOE but is still influential and talks have started for the two to join together. Dr. Tierno Galván, 58, known as "the old professor," got his professorship back last month at Salamanca University from where he was sacked in 1965 for political reasons. The PSP is more pro-Communist than the PSOE.

Prof. Tierno Galván, with his customary eloquence, summed up the opposition's objections to the government when he said: "If the government intends to construct the house [a democratic Spain], furnish it and then invite us to live in it as tenants, then negotiation is not going to be possible. If, on the other hand, they invite the opposition to construct the house and furnish it, then negotiation is possible."

The PSOE is wary of forming an electoral front with the Communist party because it is still banned and because, as Mr. Gonzalez said in an interview, a coalition with the Communists could provoke a civil war and a coup d'état from the army. The Communist party is the most liberal and anti-Kremlin in Europe, but despite its clean image opposition politicians are still undecided as to whether the change is tactical or sincere.

The Communist party was founded in 1921 and Mr. Carrillo, 62, is still persona non grata in Spain. His family returned last month, but authorities have denied him a passport along with Dolores Ibarruri, the legendary "La Pasionaria" and party president.

Francoists have kept alive the image of Mr. Carrillo as an extremist. Mr. Carrillo fled after the war to lead a life of clandestinity in many countries. In 1968 he attacked the Russian invasion of Czechoslovakia, incurring Soviet wrath.

He has been back to Spain at least once since Franco died and many people argue that the party will not be a reconciled country until the Communist party is allowed the same political rights as other parties. Better to bring the party into the open and drive it underground is the sentiment of even conservatives.

Christian Democrats are led by Joaquín Ruiz-Giménez, 67, who heads the Democratic Left, and José María Gil-Robles, 78, who heads the Popular Democratic Federation. Prof. Ruiz-Giménez, former education minister and ambassador to the Vatican under Franco, is a man who has come over from the regime to being an outspoken member of the opposition. Although he was fired in 1956 he changed his Falangist blue shirt for the suit of a lawyer defending political cases.

Prof. Gil-Robles is an extraordinary Civil War relic. He was minister of war in the Republic from 1934-36, head of the right-wing Catholic action group CEDA and later a member of the royal council of Don Juan, father of King Juan Carlos, whom Franco bypassed when he picked Juan Carlos as his successor in 1969. The two groups are in the process of forming an alliance.

While Socialists, Communists and Christian Democrats debate how to approach the forthcoming elections, the Popular Alliance of Mr. Fraga and five other former ministers hopes to gain support and cash in on their dilemma. The alliance, formed last month, has more than a head start. It sees itself as representing the great mass of apolitical Spaniards, particularly the middle class, afraid of political change. The alliance does not accept the Communist party, is against Basque autonomy and is strongly in favor of law and order.

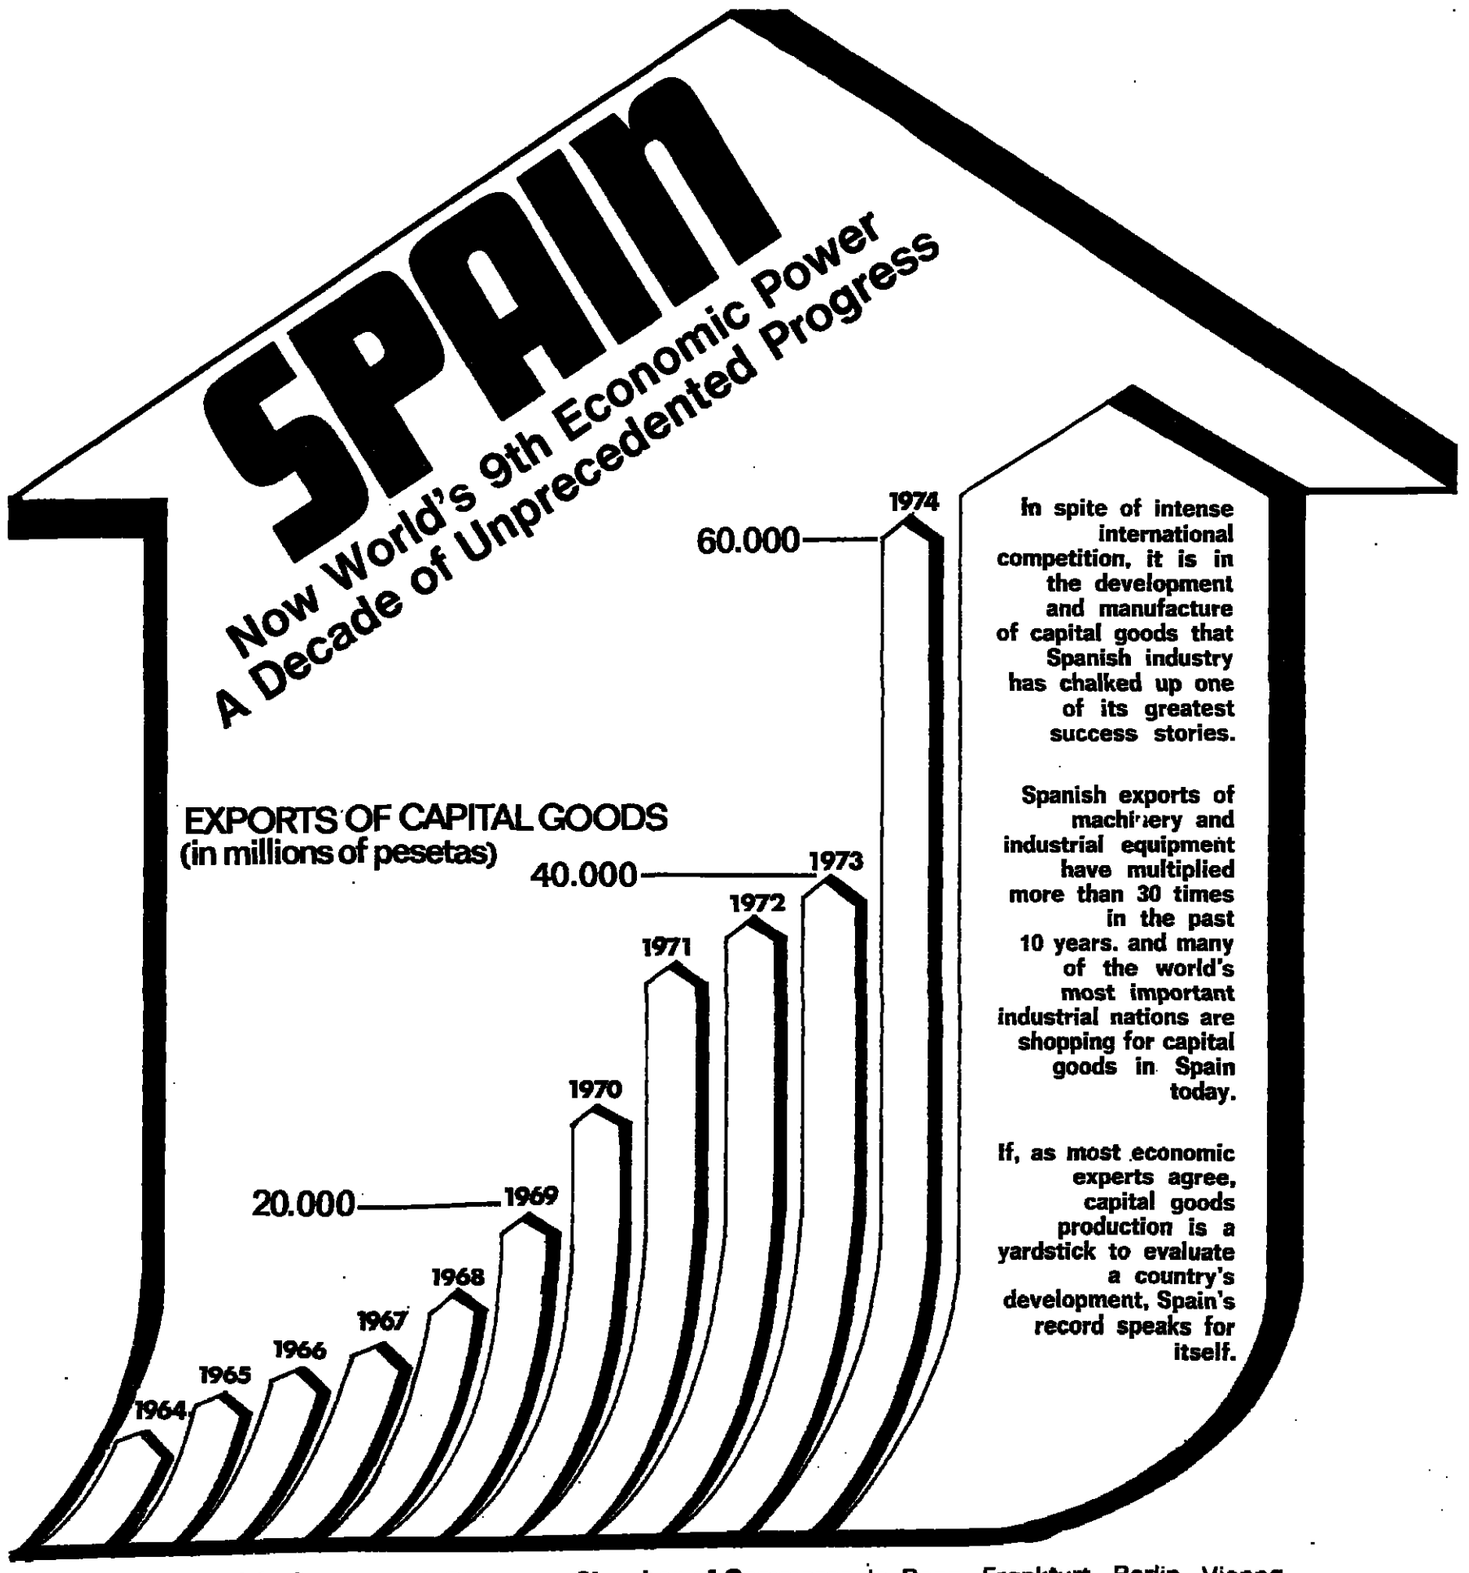
"I am the center," says Mr. Fraga, former ambassador to London after his political wings were clipped in 1969, when Franco fired him as information and tourism minister. Authoritarian with a quick temper, Mr. Fraga is a force to be reckoned with. His Francoist enemies consider him a "turncoat" and the opposition does not trust him either.

The real center alliance, which is to be formed, a traditional European one. Moves are being made to form another alliance which could group together Christian Democrats and liberals falling out of Coordination or alternatively another alliance formed within the ranks of the government as a kind of "third force" between the Popular Alliance and Coordination.

An important person who has kept relatively quiet is Manuel María Areilza, the former foreign minister, who decided to serve in the present government. Mr. Areilza warned last month that the government should negotiate with all the country's political forces that sincerely want democracy. He said it was the only viable way to peacefully bring democracy. He joined the Popular party in November, which will take some of the right out of the Popular Alliance's sails.

Is Spain ready for this democracy about which everyone is talking? According to Spanish sociologist Enrique Martín López in an epilogue to a 1,400-page report on how Spain has changed in the last 15 years:

"We have a governable people who want to be well governed. It is thus the time to test whether their leaders are the equal of their people."



When Franco died, Spain was an urban, industrialised society in which the post-Civil War generation were enjoying an immeasurably higher standard of living than their fathers and in which the young were questioning the old beliefs.

The Cortes (parliament) will debate the constitutional reforms on Nov. 16 when Franco's hardliners can be expected to put up a last-ditch stand as the first blow is given to his regime. Under Franco the Cortes rubber-stamped everything that was presented for its approval. Since his death it has managed to prolong its life, refusing to commit political suicide.

And what happens if it refuses to do so, failing to give the government the two-thirds majority which it needs for the reforms? The irony is that King Juan Carlos can dissolve the Cortes and submit the reforms straight to the people in a national referendum under powers left to him by his predecessor Franco—but with a difference. This procedure can only be done with the approval of the Council of the Realm, which, when Franco was alive bowed to his wishes. But now?

The reforms will be submitted to the people in a referendum anyway, for Franco's fundamental laws cannot be changed without the public's blessing. Some political commentators have even started to speculate what might happen if the Cortes approves the reforms, but the people reject them in the referendum, considered most unlikely. But in Spain, the home of surrealism, anything is possible and nothing is probable.

YOUR BUSINESS CAN PROFIT FROM SPAIN'S PROGRESS

هكذا من الأصل

The Economic Situation Is Difficult, but Not Critical

(Continued from Page 9.)

...ear is an indication that his ...sis won out.

Although the bank governor is ...vinced that monetary policy is ...t the only measure available ...rescuing businesses in the ...rrent crisis, he apparently also ...ls that a mere lack of liquidity ...ould not be a reason for bus...ss failures on a large scale.

For Luis Coronel de Palma, the director general of the Confederation of Savings Banks and former governor of the Bank of Spain, the solution to the country's problems lies in a three-pronged attack: anti-inflationary measures, an economic program to restore competition and a market economy, and a plan which takes into account regional capabilities, needs, desires and differences in order to promote the economic development of the more backward regions by using the strength of the more developed regions.

Confusion

There is little wonder that the average Spaniard is confused about his country's economy. While government officials advance a plethora of "solutions," some of them contradictory, prices and unemployment keep going up.

In a televised interview, Industry Minister Carlos Perez de Bricio predicted last month that the Spanish economy will grow by only 2 per cent this year. Some Madrid economists think that even that prediction is optimistic. The previous official prediction for the 1976 growth rate was 4 per cent.

Growth was very slight last year and the sluggishness of industry this year makes many observers doubtful that production figures will go high enough to reach even the 2-per-cent goal. Furthermore, until a solution or solutions are found, whether political or economical, or both, there is not even much hope of a satisfactory growth in the GNP next year.

Inflation

One of the biggest bugaboos of the economy is inflation, which appears to be headed for 20 per cent this year. Inflation has obviously eroded the value of the peseta, but then—if it is any consolation to the Spanish authorities—inflation is also still taking big bites out of what used to be more stable currencies such as the pound sterling.

Of the 16 major foreign currencies, six failed to gain ground against the peseta in the period between Feb. 9 (when the peseta was devalued) and the second week in June, according to the statistical services of the Banco Hispano Americano.

This means that, while the rate of inflation in Spain in the second quarter of this year was about double the average of the other member countries of the Organization for Economic Cooperation and Development, the value of Spain's currency dropped in a lesser proportion. Weaker currencies included, notably, the pound, the French franc and the lira.

The competitiveness of Spanish exports, in terms of sale prices in dollars, was reduced by nearly 6 per cent in the February-June period, in the estimate of the Banco Hispano Americano.

The analysis by the bank stated, "The prospects for the second half of 1976 point toward a progressive deterioration of the competitiveness of Spanish products in foreign markets. Consumer prices of Spain's principal trading partners will go up by about 3 per cent in what remains of the year. The Spanish cost-of-living index will probably rise by between 9 and 10 per cent in the second semester.

"If these predictions come true, Spanish products will be 11 per cent more expensive by the end of the year than they were immediately after the February devaluation."

Rumors Denied

Rumors that the peseta would be devalued for a second time this year began circulating regularly in the summer and continued in the fall. But as late as this month, such rumors were being officially denied. Nevertheless, the national weekly Guadiana claimed in mid-October that a 15 to 20-per-cent devaluation was "inevitable and imminent."

According to Guadiana, "The imperious need to increase exports calls for such a measure, which should be accompanied by decisions regarding investment and financing of production." The magazine article, entitled "On the Brink of Devaluation," quoted an unidentified high Commerce Ministry official as saying:

"The increasing deterioration of our commercial balance with foreign countries will force the government to take this step sooner or later, but probably before the end of the year. Now, what must be determined is the extent to which the devaluation will contribute to the inflationary process. . . But nearly all the experts feel that the deficit, at the level which it has reached, is more of an inflationary factor than a devaluation would be. There are still a few calculations to be made, and above all one has to wait for the proper psychological moment. But the option looks clearer all the time."

Guadiana also quotes Luis Olarra Ugartemendia, president of the Businessmen's Council of Vizcaya, one of Spain's leading industrial provinces, as follows:

"There is a great deal of discussion going on now about the advantages and disadvantages of devaluation, but what seems plain is that a devaluation is generally nothing more than the consequence of the kind of economic development which we are seeing now; that is, it is proof that consumption has outstripped the possibilities of a country. I can tell you one thing: Without a shadow of a doubt, the parity is not real. Therefore, there is no advantage in maintaining it to the bitter end, because if we do we will wake up one day and find ourselves caught in a South American-type inflation-devaluation cycle. If we want to export, we have to act as soon as possible regarding the parity of the peseta, and at the same time take steps to break the inflationary cycle."

Indicators

Little hope was offered by the traditional economic indicators by autumn. The unemployment figure, for instance, was unofficially estimated to be about 800,000 (out of a labor force of *some 11 million*) and *headed toward* the million mark before the end of the year.

Political parties, predictably, were highlighting the increasing unemployment in an effort to discredit the government in these times of transition. Yet it is doubtful that any of the parties, if they had been in power instead of Mr. Suárez's government, could have done better.

Economic pundits here foresee continuing unemployment for some time at what would formerly have been considered unacceptable levels.

Spanish businessmen's hopes were dashed after signs of reactivation appeared briefly and weakly in July, then faded. The question of trust in the future, as Mr. Suárez suggests, is significant. His government managed to stop the downward slide of the Madrid stock market late last month, although there was no sign of real recovery and no guarantee that the slide might not start again. By engaging in active dialogue with leaders of opposition groups, Mr. Suárez gave at least a medium-term impression of political stability as a basis for economic stability.

Exports Lagging

A major problem, full of unpredictables, was the balance of payments. With exports lagging far behind imports as the year wore on, with tourism plunging and foreign currency reserves being drained off by the currency market, there was not a great deal of optimism, even in government circles.

Much depended on the ability of the Suárez government to hold the line on wages and prices of basic necessities, something which the previous government had failed to do and which Mr. Osorio has promised to do.

What is the government doing about all this? A series of economic measures was launched in August with special incentives for investment in the stock market. Two weeks later the government announced additional measures, including raising the price of 96-octane gasoline to the equivalent of $1.58 per gallon, increasing luxury taxes and death duties, and stimulating exports via sales incentives and loans to developing countries that buy Spanish products.

The toughest measures, most of them oriented toward cutting down on the nation's bill for imports of crude oil, were announced Oct. 8.

Those measures, according to Vice-Premier Osorio, can be divided into five categories: those designed to fight inflation, those aimed at reducing unemployment and reactivating the economy, those designed to diminish the trade deficit and save energy, those intended to increase tax revenue and cut down on tax fraud, and those planned to hold down government expenditures.

Among the sternest anti-inflation measures was a two-month freeze on prices of all goods and services to be followed in December by the publication of a list of fixed prices on certain items which will remain in effect until 1977. Another was a ceiling on wage increases which was flagrantly violated almost immediately when employers had to deal with a construction strike in Bilbao and a public transport strike in Madrid.

The largest number of special measures in that package deals with energy conservation. They include premium charges for energy used in excess of 90 per cent of the amount consumed during the previous year; a nationwide maximum speed limit (which went into effect on Nov. 1) of 100 kph for cars and 80 kph for trucks and buses; restrictions on the use of illumination for shop windows, advertising signs and public monuments; a surcharge on excess electricity used by industry, an 11:30 p.m. daily sign-off for the national television network, except on Saturdays and the eves of holidays, and the stimulation of research and prospecting to find and develop other energy sources.

Mr. Osorio said it would be "tantamount *to collective suicide*" if Spain took no steps to correct the current economic situation, using the excuse that political reform should come first. But he pointed out that the present measures are temporary and are only intended to pave the way for eventual "structural reforms" of the Spanish economy once "this period of transition in which we are living" has passed.

He said the basic criteria taken into account by the government "in adopting a prudently anti-inflationary policy which would not have a negative effect on reactivation of the economy" were the following:

1 Transition toward a sounder economic structure, in order to permit a deeper transformation of the socio-economic structure.

2 The social consideration that the current economic situation demands that those who earn more should bear more of the brunt.

3. The economic consideration of the need to combine price-control measures with a reactivation of business, taking maximum advantage of the available resources.

4 The realistic consideration that the measures taken should be based on specific and sincere recognition that only by a process of political reform, with new regulation of the rights to form trade unions and to strike, can the mechanisms of the socio-economic contract enter into play.

The anti-inflationary measures he announced included holding down wage increases to the same percentage as the increase in the cost of living (a surprisingly important factor, since average factory wages have increased by about 35 per cent per year for the past two years in Spain). They also included limitations on the distribution of dividends by companies.

Measures aimed at reactivating the economy included "a more reasonable use of public investments, the acceleration of the policy of regional development, improving the possibilities of the small and medium-sized business, and the use of the government's faculty for action in monetary affairs."

The reactivation policy also included the most controversial measure of all—the suspension of article 35 of the labor relations law. The suspension made it easier for employers to fire workers, but at the same time it made them less reluctant to take on new staff.

The minister alluded to "rigorous measures to reduce the consumption of energy and to stimulate the conservation of energy," in his speech, but he did not specify them. They were announced later.

Fiscal measures included an announced determination to make Spaniards take their income-tax payments more seriously, in order to achieve a fairer distribution of income. They included a 10-per-cent increase in the basic tax rate for incomes over 1 million pesetas ($14,925) and "tough measures for the repression of tax fraud, because (the government) considers that it is inadmissible, illicit and dishonest for this to go on any longer."

Spain's steady, if sometimes faltering, upward climb from the economic cellar since the late 1950s deserves recognition and must surely be of some value in predicting the economic future of the country notwithstanding political changes, for Spain's growth rate over the last decade and a half has been surpassed by few other nations.

Bankers Find Going Is Tough

MADRID (IHT)—Businessmen are not the only ones who are moaning about the economy in Spain these days; so are bankers.

The chairman of the board of Banco Popular Español Rafael Termes, told his bank's shareholders in a circular letter in October, "As the fourth quarter begins, Spain's economic situation unfortunately is much worse than what even the pessimists might have thought at the beginning of the year."

His words, of course, merely echo the words of many other Spaniards, but they are particularly important because they are the words of a banker, and they suggest that banks are suffering as well as businesses.

The fact is, that as inflation persists (it is expected to top 20 per cent this year) and business and the stock market continue weak, there is an increasing demand for credit, accompanied by a parallel reduction in savings (in real terms).

According to the letter from Mr. Termes, private banks increased their loans during the first nine months of this year by 491 billion pesetas, compared to an increase of only 425 billion pesetas during the same period last year.

Credits

But the figures are deceptive, he points out. In terms of 1974 pesetas, the credit extended in the first nine months of 1976 was worth only 394 billion, and the credit extended during the first nine months of 1975 was worth 401 billion pesetas. In other words, the purchasing power of the additional money lent this year was less than that of the additional money lent last year.

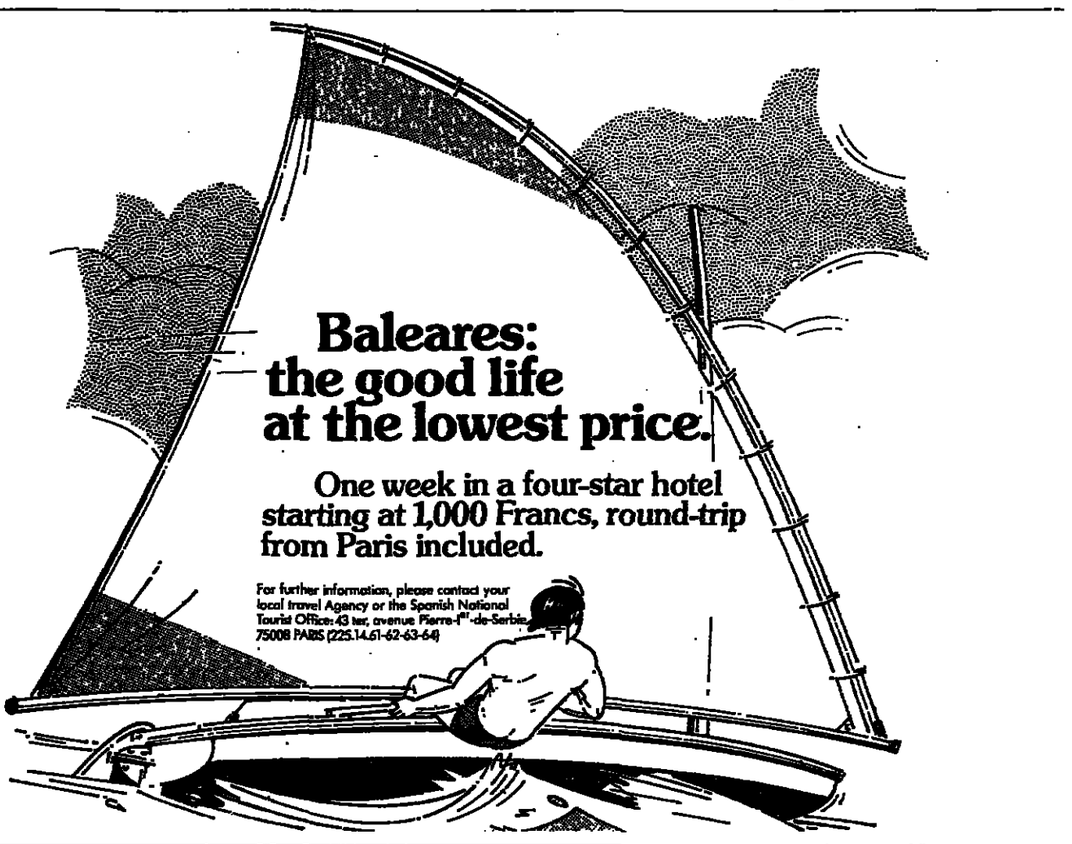
This partially explains the fact that businesses find the going tough this year, even with more credits. Mr. Termes said that, in the circumstances, the government will soon "increase the liquidity of the system so that banks can considerably expand their credit to the private sector."

As if in answer to a prayer, the governor of the Bank of Spain, José María Lopez de Letona, said in late October at a meeting of financial analysts, "Within the next three months there will be sufficient liquidity and enough money for the banks to attend to the requests of industry."

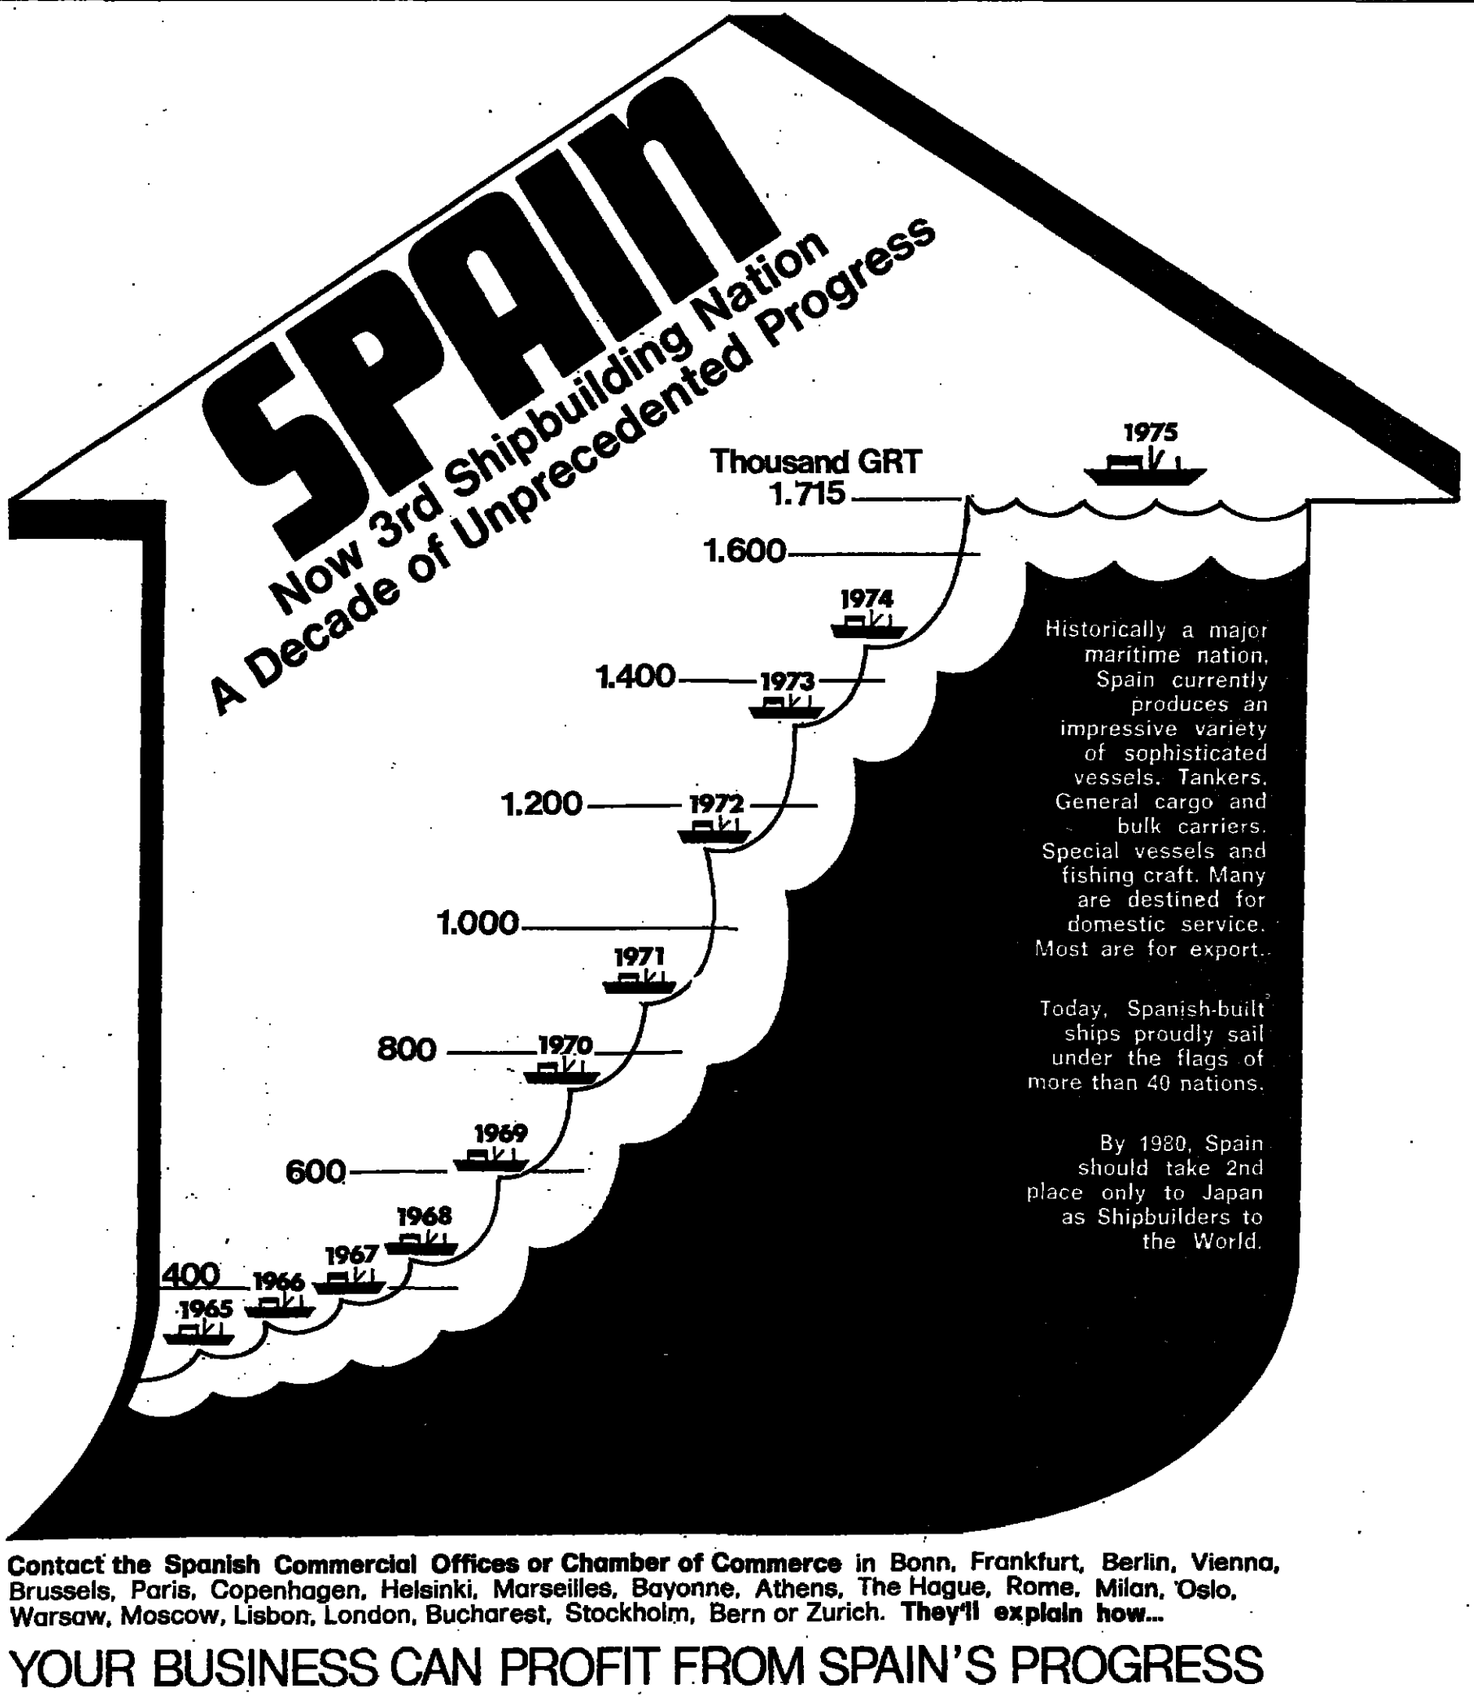
Mr. López de Letona added that bank credit as of last Sept. 30 was 370 billion pesetas, or nearly 15 per cent higher than it was last Jan. 1. By the end of this year, he said, Spain's banking system will have increased that amount by 327 billion pesetas.

Inflation is not the only enemy of good times in Spain. Income from abroad has decreased, as a result of waning tourism and fewer remittances from Spaniards working abroad. Such factors whittle away at savings. So does the flight of capital. Knowledgeable persons estimate that about one-quarter of Spain's potential investment capital has gone to Switzerland over the past year, and that this partially explains the low rate of investment in industry.

Savings



The downward trend in savings was evident even before Gen. Franco died one year ago. In terms of constant pesetas (base: Dec., 1974), savings increased by 19 per cent in 1972, by 13 per cent in 1973, by 2 per cent in 1974 and by 3 per cent in 1975. This year the increase, if there is one, will be minimal.



More so than in many other countries, it is in the interest of the government in this country to protect the financial health of the private banks, for six of the largest banks control an estimated 40 per cent of the nation's industry and five of them hold 46 per cent of the total capital and reserves of private banks in Spain.

During the nearly four decades of the late Gen. Franco's rule, there was always a close working relationship between the government and the major private banks, to the extent that high government officials in many cases simultaneously held important posts in the world of finance. That situation has not changed.

Nor is the situation expected to change rapidly, but competition from large foreign banks is expected to increase. It has been widely reported that the recent loan of $1 billion which Spain got from a consortium of banks —most of them American—was conditioned to permission for a number of foreign banks to set up full operations in Spain; however, these reports have not been officially confirmed.

In a major speech on the state of the economy, Vice-Premier Alfonso Osorio promised in October that the government would "bring interest rates up to date... With a view toward more adequate retribution for savings and a more ideal distribution of credit," but the exact percentage of the new rates was not announced right away. The basic discount rate at the time Mr. Osorio spoke was 7 per cent, fixed in August, 1974.

YOUR BUSINESS CAN PROFIT FROM SPAIN'S PROGRESS

Former Trade Union Restrictions Show Signs of Lifting

MADRID (IHT).—The issue of reforming Spain's state-run trade union system is as conflictive and confusing as that of trying to make sense of the maze of opposition groups. The government has promised to allow greater trade union freedom after 37 years of rigid control, but whether the official structure will be completely dismantled, as the illegal trade union groups ask, remains to be seen.

The "vertical" *sindicatos* were founded in 1940 on the pattern of Mussolini's corporations. Each *sindicato* is made up of everyone in a given branch of production —workers, middle and higher executives and employers—and only the official *sindicato* organization is legal.

The aim of the *sindicatos* is to control the working population through appointment of all leaders from above and to try to get rid of the concept of classes. In practice workers are subject to the state and cannot defend their occupational interests. The purpose of the *sindicatos* was summed up by Raimundo Fernández Cuesta, a former minister of the National Movement, the official political organization, when he said: "The vertical *sindicatos* are not class *sindicatos* . . . but an instrument serving the state's policy."

There are 29 national *sindicatos*, subdivided into provincial and local affiliates. Membership in a *sindicato* continues to be compulsory for the labor force of 12 million workers. Dues for the *sindicato* are deducted from the pay packet along with dues for social security, which entitles workers to medical treatment.

Strike Law

Labor disputes have theoretically been allowed since last year, but are so surrounded by legal requirements that in practice strikes continue to be a punishable offense. Workers invariably run the risk of being dismissed, fined without trial or imprisoned for taking part in strikes.

Among the conditions that have to be fulfilled before workers can legally go on strike are: a 60-per-cent vote in favor of a strike and five days notice to employers.

While Franco was in control, strikes were considered acts of sedition, particularly in the public sectors. When Madrid's postal workers went on strike early this year, soon after the Generalissimo died, the government immediately militarized them, which ended the dispute, for workers feared the possibility of court-martial. But the same procedure was not taken in September when postal workers went on strike again because, by then, workers had become less susceptible to government threats. Also the government felt that its authority would be undermined if the workers did not go back to work after being militarized.

Labor disputes have theoretically been allowed since last year but are so surrounded by legal requirements that in practice strikes continue to be a punishable offense.

Elections for some *sindicato* posts have been held since 1944. Candidates have to be of "legal fitness" (i.e. politically desirable) no electoral campaigning is allowed and the elections are presided over by employers. The number of shop stewards elected for each firm varies according to its size. For example, a firm with 51 to 100 employees elects four representatives. When a worker is elected, his powers are purely consultative and he takes no part in making decisions.

The Syndical Organization is the coordinating body for all the 29 *sindicatos*. One of the main headaches facing Spain's minister for the *sindicatos*, Enrique de la Mata, is how to devise a way of finding jobs for 30,000 *sindicato* civil servants who work in the ministry.

Mr. de la Mata has promised that when and if the ministry goes, the jobs of employees will be guaranteed. As a step towards this, the government created in October an autonomous organization, funded by the state, for employees of the ministry. The organization will look after most of the patrimony.

Leaders of the illegal unions say that the patrimony must be turned over to the workers because it is largely made up of their contributions. It is believed that workers will no longer have to pay dues to the *sindicatos* beginning next year.

Bloc of Deputies

Another problem is that the largest bloc of deputies in the Cortes (parliament) comes from the *sindicatos*. A total of 150 of the approximately 550 deputies are heads of *sindicatos* and other posts. They will study trade union reform and, in effect, they are being asked to vote themselves out of a job when the structure is changed and the parliament freely elected.

The Cabinet approved in October the text of a proposed law to be submitted to the Cortes. It would authorize workers to form "associations" to promote their mutual interests. Representatives of management would also be allowed to group together in associations. This law, if approved, would go a long way toward dismantling the political structure of the *sindicatos*.

The government originally wanted to do this by decree law but, under pressure from rightists, has agreed to go through normal channels. Not surprisingly, workers have little or no confidence in their leaders, whom they see as not representing their occupational interests but as allies of the employers. So workers turn to the many different illegal trade unions and increasingly use strikes for political reasons, as opposed to purely economic reasons.

Strikes have increased rapidly in the last 10 years. Under Franco, they were harshly put down and strike leaders imprisoned. This is still common practice. Invariably what happens is that more workers then go out on strike.

In 1966, the number of strikes officially recorded was 191. In 1975, there were 855. According to the Syndical Organization, 10,355,000 work hours were lost in 1975 (the Ministry of Labor put the figure higher, at 15,356,858), compared to 49 million work hours lost in the first three months of this year alone. The number of workers who took part in strikes in the first three months of this year was estimated at 1,049,500, and in all of 1975, it was 990,424, according to the Syndical Organization.

With Franco dead and greater tolerance shown, there were massive strikes this year. But the tolerance has been arbitrary. In March a climactic point was reached when police broke up a workers' meeting in a church in Vitoria in the Basque country. Five workers were shot dead. The dispute originated in a strike at the metal foundry Forjas Alavesas. Workers were locked out and strike leaders arrested. Churches have always been a favorite place for meetings, for under the Concordat police were not allowed to enter churches without ecclesiastical permission, although they often did.

Spanish bishops declared in 1968 that "the strike may be a necessary, even if extreme, means for defending the rights of workers" and expressed the desire to see "active participation by workers in the conduct both of the enterprises in which they work and of the higher organisms in which major decisions are taken on political, economic and social questions." In other words, the hierarchy called for the recognition of the same basic rights that exist in other West European countries.

The government fixed a new minimum daily wage in September of 380 pesetas for unskilled laborers, compared with the 700 to 1,000 pesetas which workers have been demanding. A recent survey revealed that 600 pesetas is considered to be the average amount of money which a couple with two children need to meet their daily needs in Madrid. There is a plan being considered that would raise the minimum daily wage every time the cost of living index rises by 4 per cent.

Workers have a five-day or six-day week for a maximum of 48 hours. Workers are generally demanding a 40-hour week. They are paid for 14 months a year —an extra payment on July 18, the anniversary of the beginning of the Civil War, and double pay at Christmas.

Overtime is paid double on Sundays and generally at time-and-a-half on other days. Pension plans exist under the complicated laws and people in the professions often contract into mutual insurance schemes.

There are four main trade unions—the Communist-influenced Workers' Commissions, the Socialist General Union of Workers (UGT), the Syndical Work Union (USO) and the anarchist National Confederation of Labor (CNT). The first three have formed the Coordination of Syndical Organizations, a tactical alliance designed to achieve a break with the present system. The three are also in the Democratic Coordination, the main opposition political alliance.

All four trade unions have reached agreement on basic general issues like the need for an amnesty for all workers dismissed for political reasons and the establishment of a democratic government with full political rights for everyone. The amnesty granted by King Juan Carlos July 30 only affected political prisoners, and the issue of whether to reinstate workers is left up to employers. The clamor for a labor amnesty has not let up.

The most powerful trade union is the Workers' Commissions, which, because of their Communist influence, were strongly repressed under Franco and are still not tolerated as much as the others. They date from about 1962, when there were massive strikes which posed a serious threat to the regime. The commissions were formed of dissident Falangists, socially conscious Catholics belonging to the Workers' Brotherhood of Catholic Action (HOAC) and the Young Catholic Workers (JOC), Socialists and Communists. One of the ironies of this trade union is that it first used to meet in a Falangist social center.

In 1966, the Commissions decided that the best way to fight the system was to infiltrate the official structure. Like the Spanish Communist party, the Commissions eschewed violence and aimed at planting cells in the vertical *sindicatos*.

When the *sindicato* elections were held in 1966, many Commissions members were elected to posts, a process which culminated last year in a high percentage of the lower posts being held by the Commissions. Candidates, of course, did not admit publicly their political affiliations. In some cases, candidates known to be Commissions members were barred from standing.

Trial of 10

The Commissions came into the limelight in December, 1973, when 10 of their leaders, including Marcelino Camacho, Spain's best-known workers' leader, lawyer Nicolás Sartorius and a Jesuit priest, Father "Paco" García Salve, went on trial. The trial, known as 1001 (the number of the case) started Dec. 20, the same day that Adm. Luis Carrero Blanco, Franco's premier, was assassinated. Stiff sentences, reflecting the government's determination to crack down on any kind of opposition, were handed out, ranging from 12 to 20 years, later reduced on appeal to between 2 and 6 years in February, 1975.

The Commissions have always said that they represent a social-political movement independent of all political parties. To a certain extent, this is true but this has to be put into perspective with the fact that 20 of the 27 members of the Executive Committee are members of the Communist party and six others belong to extreme-left organizations like the Maoist Workers party and the Communist Movement.

The Supreme Court ruled during the 1001 trial that the Commissions were an organ of the Communist party. The government fears that if it allows the Commissions to freely operate this will open the way for the Communist party, which is still illegal and will not be allowed to take part in next year's elections.

Many Spaniards believe that Mr. Camacho's public declaration at the party's congress in Rome in August that he is a Communist has spoiled the Commissions' so-called image of being independent. Early this year there were some icy statements from the UGT and USO leaders that the Commissions were trying to gain control of the trade unions. The Commissions believe in one single democratic union while the others want their own identity.

It is reliably reported that the government will not legalize the Commissions unless they show evidence that they are definitely independent of the Communist party.

The UGT is the trade union wing of the Spanish Socialist Workers Party (PSOE). It was formed in 1888 by textile workers in Barcelona. In 1932, it had over a million members. After the Civil War, during which it played an important part, UGT members were imprisoned or managed to escape into exile where it began to reorganize.

In April, the UGT had the honor of being the first illegal trade union since the Civil War to hold an authorized congress in Spain. The permission produced bellicose remarks from entrenched rightists who accused the government of giving in to subversion.

The PSOE, by most accounts, will play a decisive part in Spain's political future, although it has refused, like most opposition groups, to accept the government's reforms and may well boycott the general elections. And the UGT will probably play an important role. Two members of the UGT main committee are also members of the PSOE executive committee, including Nicolás Redondo, the UGT secretary. Like nearly all illegal trade union leaders, he has a long history of anti-regime militancy.

Like Mr. Camacho, who has spent years in prison, Mr. Redondo has been arrested many times. In 1973, he was dismissed from Astilleros Españoles where he had worked for 31 years. He has been taken back.

The UGT is trying to regain its property, which was confiscated after the Civil War and which today is estimated to be worth about $100 million. When UGT members saw Mr. de la Mata in September, this was one of the first things they asked him about.

The USO came into being around 1960 when members of the Workers' Brotherhood of Catholic Action and the Young Catholic Workers decided to channel discontent with the official structure into a trade union. These two organizations played an important part in the 1950s and 1960s and attempted to create a Christian Syndical Front. Many HOAC and JOC members became disenchanted and joined the USO.

The USO has links with the Federation of Socialist Parties which is made up of 15 regional Socialist parties, and denies that it is tied to the Roman Catholic Church. The USO has a strong industrial base, but is weak in the countryside.

Breeding Ground

The CNT dates from 1911 and is independent of all political parties. Like the UGT, it was founded in Barcelona and challenged the Socialists for power. The migration from the countryside, particularly from Andalusia to industrial cities like Barcelona constituted a breeding ground for the strongest anarchist movement in Europe (1.5 million militants recorded in 1933).

The CNT refused to see Mr. de la Mata in September when he started making overtures to the illegal unions.

The trade union situation is further confused by the existence of regional groups, most of which have little importance. The largest is probably the Solidarity of Basque Workers, linked to the powerful Basque Nationalist party. It is pro-home rule, anti-Marxist and Catholic.

Even Falangist groups are in disagreement and dispute, each group claiming that it represents the true spirit of the original Falange.

The most likely outcome of the trade union reform will be that the illegal groups will only become legal if they go through the procedure of seeking approval from the government. This is the procedure for political parties and, needless to say, all the main opposition political groups have refused to accept this, arguing that it is an anti-democratic procedure.

Premier Adolfo Suárez said in a policy speech Sept. 9 that the new freely elected parliament will deal with such issues as the "definitive trade union reform." Until then, the situation will not be clear and the issue will be left smoldering.

If you're looking for a transnational bank, come to the Pyramid.

The Bankers Trust Pyramid is virtually everywhere. We have offices in 48 key cities on 6 continents and a network of 1,700 correspondents in 119 countries.

But being transnational—that is, able to conduct business beyond national boundaries—is not as important as *how well* we conduct business. We pride ourselves on being skilled professionals, with over 60 years of experience in international banking to draw from.

It would be fairly difficult to exhaust our international services. They range from complicated loan syndications, overseas private placements and trade financings, through foreign exchange and cash and Eurocurrency management, to routine remittances via air freight.

Our bankers are prepared for the most intricate and demanding projects. (A case in point might be one involving a transnational company, a developing country, several government agencies and multiple currencies.)

This is why so many companies come to us for so many different types of financing—a Yugoslavian nickel mine, for example, or an American company building tractors in Germany for Turkish farmers, or a North Sea oil exploration project, or an American company exporting grain throughout the world.

Wherever you see the Bankers Trust Pyramid, you're dealing with a full service bank in the fullest sense of the word, with the capacity to raise, lend and manage money worldwide.

Whatever your needs, a visit to the Pyramid can be a rewarding experience. For more information, contact Matthew Chlapowski, Vice President, Almagro 34, Madrid 4, Spain (410-1557).

Government Imposes Severe Curbs to Conserve Energy

MADRID (IHT)—The measures in Spain to conserve energy nounced by the government last gth reveal how serious the ntry's energy crisis is.

he special measures include aimum charges for all energy in excess of 90 per cent of amount consumed during the ious year; a nationwide max- m speed limit of 100 kilome- an hour for cars and 80 kilo- rs an hour for trucks and s; an increase in the price electricity for industrial use; 11:30 p.m. daily sign-off for television network except on irdays and the days before days; the stimulation of arch and prospecting to find use other energy sources and government-sponsored campaign impress on people the impor- ce of saving energy.

surprisingly, no direct measures re taken, although they may later, to restrict the use of mobile. The "energy crisis" of it is hitting Spain very hard to some extent is responsible bleeding the economy. While er European countries have aged to reduce or control th consumption of energy, ich, according to the Interna- nal Agency of Energy, was far ead of other nations last year.

The country is now paying for large dependence on imported le oil as a prime energy source. e figures published for the first months of this year alone ost a black picture. Imports energy resources totaled 136.2 lion pesetas (of which 118.6 bil- was for crude oil) while ex- s of energy products were a y 7.3 billion pesetas, giving an rge balance-of-payments defi- of 128 billion (the total figure last year was 225.8 billion).

Half of Deficit

Imports of crude oil account for lf of Spain's commercial deficit. e National Energy Plan of 1975 es to rectify this situation and et the various demands over e next 10 years, particularly anding crude oil. In 1975 crude represented almost 70 per cent the material used in the pro- ion of energy. The energy ed last year was the equiva- of 96 million tons of coal this demand is expected to e between 173 million and million by 1985. The problem ow to cut down on dependence crude oil given that other rgy sources like coal and roelectricity in Spain are not pected to increase their pro- ion substantially over the xt decade.

Energy authorities are hoping reduce the growth of the con- mption of energy over the next ade to 6-7 per cent compared the 9 per cent of the sixties. According to the energy plan, thorities are hoping to increase production of coal from the million tons of 1975 to 36.5 lion tons by 1980. Hydro- ectricity is expected to be reased from the average an- al production of 30 billion kilo- tts to 45 billion by 1985. An rease in the consumption of tural gas, which at the mo- nt accounts for a very small rcentage of the total primary ergy, is also envisaged from 3 1.3 billion cubic meters in 1975 to 15 billion by 1985. The great white hope, however, for Spain's energy crisis is to enormously increase the production of nuclear energy. Experts are optimistically hoping to increase the production of nuclear energy by 16 times the present rate in 1985, which aim supposes an immensely ambitious plan to build more reactors.

Over the next 10 years, if all the increases in the production of energy are achieved, this will mean that Spain's reliance on imported crude oil could decrease by as much as four times the present rate. In many circles this is considered wildly ambitious and unrealistic.

The energy plan envisages the nuclear energy potential by 1985 being about 24,000 megawatts, which would serve 60 per cent of Spain's needs. Last year nuclear energy represented about 7 per cent of the other sources used in the production of electricity; and almost half came from crude-oil combustibles.

22 New Reactors

As a result about 22 new reactors will have to be installed by 1985 to produce the necessary energy. There are three nuclear centers working in Spain at the moment. The first one was started at Zorita, in Guadalajara, in 1968 and it has a capacity of 160 megawatts. The next was at Garona, near Burgos, in 1971 with 460 megawatts and lastly Vandellos, in Tarragona, in 1972 with 480 megawatts. Apart from the 22 in the planning stage, another seven reactors are in the process of being constructed, including two at Lemoniz, in Vizcaya, in the north, of 930 megawatts each, which would put them in the top bracket in Europe. Lemoniz is expected to be working by 1978.

The Tarragona area, in the northeast along with the stretch of Basque coastline leading to the French border, will be heavily concentrated with reactors if all the present plans go ahead. In Tarragona alone there is already one in action, two more authorized this year, two more in the planning stage and two presently being built. In the Basque country there are six being planned: two at Deva, two at Ea and the two at Lemoniz now being built. By 1985 it is estimated that the reactors together will be able to produce 8,600 megawatts of electricity, making Spain the seventh nuclear-industrial power in the world.

The Vandellos reactor uses natural uranium and the others, including those being built, use enriched uranium. The extent of Spain's uranium reserves is not known, but it is believed not to be sufficient for the planned reactors. The International Organization of Atomic Energy said recently that Spain's nuclear program could run into trouble by 1980 through lack of uranium.

Public opinion, particularly with the death of Franco and the consequent greater freedom of expression allowed, has come out strongly against the program. Feelings are running particularly high in the Basque country, where even the provincial authorities in Guipuzcoa, one of the Basque provinces, have come out against the Iberduero firm, which wants to construct the two reactors at Deva. Dames and Moore carried out research for the authorities and came up with the conclusion in June that Iberduero had not studied all the risks involved. They said among other things that the system of refrigeration could have serious effects on marine life and that the storage of radioactive residues had not been given sufficient thought.

Basque Commission

A commission for a nonnuclear Basque country was set up this summer and popular feeling is such that it could result in the government having to take decisions against powerful economic interests.

The Deva reactors and the other four reactors planned on the coastline are very near to Bilbao, a city of 800,000 and a major industrial center.

There have been a string of statements and demonstrations over the last year by various professional and civic organizations condemning the lack of information available to the public about the nuclear program and the dangers involved. This prompted the then industry minister, Alfonso Alvarez Miranda, to say last year: "If we do not establish nuclear centers the development of the country will come to a halt," and that "to be against them is to have an anti-social attitude."

Professional organizations have called for the nationalization of the large electric companies involved in the centers, pointing out that they stand to make huge profits.

The other worrying issue for the public is that Spain has not yet signed the Treaty on Nonproliferation of Nuclear Arms and so could join the atomic club some time in the future by making its first bomb. According to the International Peace Research Institute, Spain is one of the 16 countries on the point of becoming a nuclear power. The last foreign minister, José María Areilsa, said on U.S. television in March that Spain could become a nuclear power shortly.

People have little confidence in the assurances of security from the firms involved in building reactors and are alarmed at the comparative ease with which planning permission can be got for nuclear centers. There is the often quoted case of a lawyer who bought 450 hectares of land near the tiny village of Juzbado outside Salamanca in 1973 and the next thing local people learned was that the national uranium firm planned to use the site for a factory to make equipment for reactors.

'Concertada'

Coupled with the plan to greatly increase production of nuclear energy is a far more modest program of rapid investment in the coal industry to increase production in order to reduce the dependence of national energy supply on imported oil. The government is encouraging investment by giving subsidies to several individual companies whose plans are approved in a plan called "acción concertada." In June the government made a deal with various companies to invest 2.6 billion pesetas in mines, of which 1.3 billion will be provided by the state.

Spain's coal reserves are modest and expensive to extract and of poor quality. While the government is prepared to continue subsidizing the coal mining industry for a time, in the long term it will not be viable to maintain the industry at a loss.

The great majority of Spain's natural gas is imported from Libya (89 per cent last year) and the rest from Algeria. Spain is studying the possibility of importing from Iran and Nigeria. The international Segamo firm in which Spain has a 25-per-cent interest, represented by Enagas (the National Natural Gas Monopoly) is trying to devise a way of bringing a pipeline under the Mediterranean from Algiers to the south of Spain, but this involves complicated technological problems and is a long-term project. There are no gas deposits offshore, although there are investigations being made near Gijon on the Cantabrian coast. Town gas is scant, Madrid and Gerona are almost the only places, and most gas consumed in homes comes in cylinders from Butano, which bottles gas in Barcelona and other cities.

An important new oil find was discovered this year offshore from Tarragona on the edge of the continental shelf. The total reserves are believed to be about 30 million tons, which at the present rate of consumption represents about nine months' supply—not much, but not to be scoffed at in Spain, where industry is conscious of the huge amount imported every year. By 1985 Spain might be able to produce about 10 per cent of its oil needs. The present rate of production is about 4 per cent.

Shell has between 50-75 per cent interest in seven rigs off Spanish coastlines making test drillings. The small quantity of oil produced in Spain and the large amount imported has had obvious effects on the petrochemical industry. Last year's production figures were only 6 per cent more than the previous year which, in an industry that has had up to 35-per-cent increases in monetary terms, was bad news.

The government is to invest 145 billion pesetas in the industry over the next five years, mainly in the Huelva area in the south.

This summer's severe drought has accentuated the energy crisis, for all lakes are down some dropping as low as 12 per cent of capacity, substantially reducing the production of hydroelectricity. A lot of rain would be a blessing from heaven, as Spaniards would say, but the problem goes far deeper than that.

Whatever your field may be, you can do business with the largest industrial corporation in Spain.

INI SPAIN

Instituto Nacional de Industria

INI (National Institute for Industry) is a public corporation, rated among the first in Europe, due to its volume of activities and to the diversity of operations it obtains through dependent companies.
INI participates directly in 60 companies, and through these, indirectly in more then 200 additional ones with a yearly sales volume of 7,300 million dollars. The total exports of the group exceed 1,200 million dollars and foreign sales of goods represent 11% of the national total. A staff of 250,000 employees make INI the largest industrial corporation in Spain and one of the most important ones in the Western countries.
The industrial activity of INI includes:

Petroleum and Petrochemistry. INI invests directly in petroleum exploration inside the country some 15 million dollars. HISPANOIL, in petroleum exploration abroad, more than 40 million dollars yearly. ENPETROL controls 40% of the refining capacity of the country.

Gas. BUTANO distribute 100% of the domestic and industrial consumption of butane and propane. ENAGAS is responsible for the introduction of natural gas in Spain on a wide scale.

Electric Power. Companies of the group produce 14% of Spain's electric power.

Trucks and Buses. ENASA makes 60% of the national production of trucks and 77% of buses. The companies of the INI group produce 60% of the light industrial vehicles manufactured in Spain.

Automobiles. SEAT makes half of the national production of tourist cars.

Shipbuilding. AESA, BAZAN and ASTANO build 90% of the national total. Spain's shipbuilding ranks fifth in the world and is also her prime export.

Industrial Equipment. INI participates in companies, such as LA MAQUINISTA, which build turbines, railway material and other large mechanical transformations

Air Transport. The companies IBERIA for international and domestic air transport and AVIACO, fundamentally dedicated to "charter" traffic transport. Respectively, 9.5 and 1.4 million passengers are handled annually.

Fertilizers. ENFERSA produce 39% of the nitrogenous fertilizers in the country.

Paper Pulp and Paper. 46% of all the wood chemical cehullosic pulp made in Spain is produced by ENCE.

Mining. ADARO is the company in Spain considered the most important for mining prospecting and engineering and the various companies of the group produce 62% of the coal, 41% of the lignite and 41% of the potash mined nationally.

Metal and Steel Industry. ENSIDESA, the largest steel mill in the country, produces 45% of Spain's steel and ENDASA, 57% of her aluminium. AESA manufactures the total production of forging and heavy casting.

Engineering and Consulting. EDES is one of the most important Spanish groups in its field, carrying out studies and projects in various countries.

Optics. ENOSA makes precision optical and educational material.

Other Sectors. INI also participates in the fields of: FOOD PRODUCTS with meat industries as well as canned fish and vegetable industries. DATA PROCESSING (hardware and software), WEAPONS (production and research with the most up-to-date technology). HOTELS, including historical buildings of unique architectural value converted into magnificent hotels. CRAFTMANSHIP, in which ARTESPAÑA promotes and sells at both national and international level the rich Spanish craftmanship. INI is a shareholder of the BANCO EXTERIOR DE ESPAÑA, which deals mainly in foreign trade, of the BANCO ARABE-ESPAÑOL and in various companies with investments in foreign countries, for which reason INI can be considered as the most important Spanish multinational Corporation.

For further information please contact its Directors who will inform you about who can do business with the largest Spanish industrial corporation and how it can be done.

Established in 1857

BANCO DE BILBAO

We are a Spanish bank, established in 1857.

We were the first Spanish bank to establish offices abroad opening in Paris in 1902.

Today we have a 15,000-strong team of experienced personnel, numerous offices in United Kingdom, France, USA, Germany and Italy and over 500 offices in Spain.

Through these, and our world-wide network of correspondents, we are able to transact any kind of international business in any part of the world.

Our Foreign Department in Madrid has more years of experience in international business than any other Spanish bank.

For this reason we are and indeed are expected to be, just that much faster and more accurate in all we do.

Try us - whatever your language, nationality or currency.

You'll find us most understanding.

Shipbuilding Reflects World Slump

MADRID (IHT).—Spain's proud claim to be the world's fourth most important shipbuilding nation is one that no longer brings a sparkle to the eye of Industry Ministry officials.

Headlines in Spanish news magazines which read "Shattered Shipyards" and "Ships: Everybody is Sinking" can hardly be expected to comfort either government planners who drafted a utopian scheme to keep Spain's yards working or shipbuilders whose order books are getting thinner and who are finding it ever harder to collect payments or credits.

Spain's shipbuilding capacity could produce enough tonnage for the country to move further up the chart among shipbuilding nations. This is an industry which expanded rapidly in Spain, particularly during the first half of the '70s, and which quickly developed a capacity for constructing supertankers—just in time, regrettably for Spain, for the demand for that type of ship to fall off.

Orders Down

In April, 1976, Spain's order books called for the construction of 7.6 million DWT; by April, 1975, the pending orders were down to 6 million DWT; by April of this year, they had dwindled to 4.1 million DWT, and by July they were down to 3.3 million.

A much-publicized government plan to shore up the shipyards with orders for one million tons of new shipping is foundering for lack of interest on the part of possible buyers and on the part of the banks, which are reluctant to advance credit to build more ships at a time when worldwide demand is clearly dropping.

By early September, the government plan had aroused enough interest for the yards to take provisional orders for 700,000 tons. But there was a catch. Some of the orders were from state-owned companies, and there was no guarantee even in October that private or even official banks would take the plunge.

According to figures prepared by the Japanese Transport Ministry and presented in Rome last September by Japanese shipbuilders during a meeting with representatives of the Association of Western European Shipbuilders, the annual demand over the coming years can be expected to amount to about 12 million DWT, compared with 34 million in 1975. Many Spanish shipbuilders think the demand will fall even further than that, until early in the 1980s.

The Spanish shipbuilding industry's woes are further complicated by the sorrows of Spanish shipping companies. Shippers claim that there are increasingly long delays in collecting for freight shipments; surprisingly the companies which are dragging their feet on payment include some of the largest of the firms which are wholly or partially owned by the state's industrial cartel, INI (Instituto Nacional de Industria).

In 1975, when the recession was evident here but when export orders gave the Spanish industry enough momentum to deliver 40 per cent more tonnage than the previous year, the number of new contracts signed was already beginning to slack off.

By the beginning of 1976, 60 per cent of the tonnage on order in Spain corresponded to oil tankers, and almost two-thirds of them had been ordered by Spanish companies.

Ships built for foreign owners increased in 1975 by 19 per cent over the previous year, for a total of 38 and a value of $387 million.

An indication of the increased size of ships built in Spain can be drawn from the fact that in 1975 Spain built nine times as much tonnage as in 1968 but only twice as many ships.

It is of small consolation to Spanish shipbuilders, but it is by no means alone in its shipbuilding crisis.

According to an analysis of the situation published in the Industry Ministry's publication Industrial Economy, only 15 million tons of shipping were contracted for in the whole world in 1975, compared with 44 million tons in 1974. Similarly, world order books reflected a total of 133 million tons in March 1976, but only 90 million tons at the end of 1975. Not only was there a decrease in tonnage; there was also a shift in the proportion between tankers and smaller ships.

And that, precisely, is Spain's one ray of hope. Before getting too excited about creating yards capable of producing supertankers, Spain had been doing quite well for several years producing fishing trawlers and specialized ships of relatively small tonnage, even though it will mean utilizing the biggest yards well below their capacity, the changeover to producing smaller ships may be difficult for Spain, where only small shipbuilding facilities were preserved along with the big ones more than for other countries, and the yards specializing in smaller vessels had already begun to disappear when the need for ships to transport by sea quintupled in the decade between 1963 and [illegible]

Metals: Looking for a Boost

MADRID (IHT). — While the rest of Europe and the United States seem to be recovering from the slump in steel production, Spain's steel mills produced more than 2 per cent less during the first eight months of this year than in the same period last year.

How to give iron and steel a boost in Spain is a question which Premier Adolfo Suárez's government has not yet been able to answer, but surely part of the answer lies in stimulating exports. And Spanish exports in this field are suffering from heavy competition, a price-cost squeeze, and a retraction of investments in new equipment.

Recent British accusations of dumping made against Spanish producers of certain types of specialty steels have stymied the efforts of Spanish businessmen to revive their markets abroad at a time when the government is increasing import duties. Whether the charges of dumping are justified or not is debatable; but the fact is that Spain's iron and steel products are being sold at surprisingly competitive prices at a time when inflation in Spain is rampant, and when many exporters are complaining to the Spanish government that they are losing money on exports.

The lack of new investments has led to a decrease in productivity in Spanish steel plants. It coincides too with a sharp decrease in domestic demand, reflecting the stagnation of the shipbuilding industry, the hesitant growth of the automobile industry and the slump in the appliance industry.

A curious aspect of the business is that the sales of certain specialty products increased unexpectedly in the spring, leading some companies to seek additional credits to expand production; then the flurry of specialized demand vanished as quickly as it had appeared. As a result stocks continued at a high level.

Spain's dependence on foreign sources for much of the raw materials needed in the metal industries complicates the matter. For this reason, measures such as the recent Spanish tariff boost on imports could boomerang against Spain, forcing up costs of many domestically manufactured products and thus bringing new pressures to bear on the inflationary spiral. More than half of the iron ore and coke used in Spain is imported; and the proportion is expected to continue without much change at least through 1980, for, although Spain's production of those items will increase, its output of iron and steel will grow just about as fast.

Overall, 39 per cent of Spain's minerals must be imported, and in 1975 they represented 12 per cent of the country's trade deficit. By 1980, according to the Ministry of Commerce, the present amount of the metal-import deficit, about $892 million, will more than double unless national ore production increases.

Government plans to assure an adequate supply are based on three parallel actions: the search for new mines and the development of existing ones; diversification of the supply of ore from abroad, especially through the participation of Spanish companies in joint prospecting and mining efforts in countries having such resources; and long-term supply contracts as a hedge against interruptions due to political or economic changes on the international scene.

The exports of metals and metal products have almost tripled in the past four years, to reach a total of 55 billion pesetas, according to the OECD, in 1975. With that kind of growth rate the industry should have enough to survive these trying times.

IBM in Spain

IBM started business operations in Spain in 1926. Today it employs over 2,700 people. People who are dedicated to satisfying the office equipment and data processing needs of Spain. These employees work in a manufacturing plant, education centers, a scientific center and numerous sales and support offices throughout Spain.

Their efforts are not limited to the national boundaries of Spain. In 1975 the employees of IBM Spain helped produce products and services sold outside of Spain worth more than 1,200 million Pesetas.

The computer today is a development of world-wide efforts not limited to any one area, country or continent. There is a constant interchange of ideas, people and expertise between users of computer systems and their manufacturers. This international interchange has helped IBM develop products that serve a world marketplace. Our commitment to producing a world-wide product line is based on a free exchange of computer technology and the opportunity to market products in a free economic environment.

As a part of the IBM organization, IBM Spain makes a significant contribution to our operations throughout the world and to the economy of Spain.

Tourism—Hit by Recession, Over-Construction—Still Optimistic

MADRID (IHT)—Spain is still a power in the tourist industry, according to the subsecretary of the Ministry of Information and Tourism, Ignacio Aguirre, whether it will continue to be a power or not, in the words of the subsecretary, "depends on our promotion abroad and on how we respond to the challenge which our competitors of the Mediterranean area have presented to us."

Mr. Aguirre's remarks sum up Spain's tourist situation today although it played host to 25.1 million foreign visitors in the first nine months of this year, Spain's tourist industry is not in the best of health. More than anything else, the reason is sheer bigness. Those 25 million-plus visitors were 1 million fewer than the number who came to Spain in the comparable period the year before.

Spain's offer in the tourist market, which grew dizzily during this country's boom years and before the petroleum crisis hit all the industrialized nations of the West, is colossal. It is no easy task to find a demand that can fill the Spanish capacity.

As the above figures show, when you are dealing with such large numbers, the losses are also reflected in large numbers. If the present trend continues, Spain will wind up the current year with a decrease of more than four per cent in the number of tourists for the year, compared with 1975.

Subsecretary Aguirre, a tall, soft-spoken diplomat who somehow got shunted into the hard-headed tourist business, is not discouraged. He explained in a recent interview in Madrid:

"This is no time to look for someone to blame: it is a time to find solutions. If the petroleum crisis had not affected the demand, there would not have been such a noticeable gap between supply and demand. We should recall that Spain practically monopolized Mediterranean tourism, and with the aid of the tourist industry, which had a brilliant showing, thousands of businesses were created without any prior market research, without professionalism and with a lack of capital from the start. Those are factors which provoke difficult situations in a large number of firms just as soon as there is a slight retraction of the demand.

"I don't deny that the authorities went along with the current. With the experience we have now things would be done differently if we had to draw up plans, starting from scratch. Right now we have no choice other than to attract tourists in order to fill the more than two million beds we have. And that means admitting mass tourism, which is not exactly the most profitable."

Promotion

As Mr. Aguirre explained, "The problem of the tourist industry in Spain can be solved by better promotion of what we have to offer. Perhaps not having serious competition made us careless in this important regard until now. While Greece spends 23 per cent of its (tourist) profits in publicity abroad—according to OECD data—Turkey spends 16 per cent; Italy, seven, and Great Britain eight; the figure for Spain is only 2.7 per cent.

"In my opinion, the administration must assume the responsibility for this task. And we have managed to have the budget increased to 450 million pesetas (about $6.8 million) to carry out a shock campaign in the United States, Great Britain, the German Federal Republic and France, among other countries. A reactivation of the demand is visible in Great Britain and the United States."

Mr. Aguirre's work is apparently appreciated. He held on to his job as the top government official in tourism through the Cabinet shake-up of last July, despite the fact that such senior officials as subsecretaries and directors-general customarily change when their ministers change. Undoubtedly his realistic approach is more in line with official thinking in these times of political transition in Spain.

Speaking of the serious problems of the tourist industry in Mallorca, Europe's biggest mecca for holidaymakers, problems which induced Palma hoteliers to stage a march on the Ministry of Information and Tourism in Madrid last September, he said, "We are going to try to find solutions. But the real solution will only come when there is more balance between supply and demand, when the marginal hotels—the ones that constitute sometimes unfair competition and deteriorate an image which must be kept bright—are eliminated."

The main reason for the excess of hotels in Spain is the optimism during the years of skyrocketing business graphs, when the travel industry was growing worldwide.

That optimism led both private investors and the government, through easy credit for hotel construction, to glut the market. As Mr. Aguirre put it:

"The tourist crisis is not new. It began toward the end of 1973, when new petroleum prices brought on recessions in the countries which were our principal tourist clients. Since then the demand has not followed the ascending line to which we had become accustomed. And, since the supply of beds continued to increase, a gap appeared, which has grown wider lately.

"Between June 1975 and the same month in 1976 our hotel capacity increased by 28,465 beds, 3,420 of them corresponded to five-star establishments, and 986 to those of four stars. In 1975 alone—when the crisis was already hardly a secret for anybody—the supply of beds in hotels of four and five stars increased by 51 per cent on the Costa del Sol. Look at Mallorca: in Palma there are 340,000 beds (54,000 of them on the bay), which means there are 65,000 more than there are in all of Greece. Benidorm alone has a greater hotel capacity than Portugal. Right now we have more than 2.2 million beds in hotels and other establishments."

On the positive side, he pointed out, "we continue to be the country with the largest and best infrastructure for the tourist industry, the only one capable of meeting the European demand. While Spain can offer more than two million beds, all of our competitors of the Mediterranean basin put together can't match that number . . . In nine years 90 million Frenchmen have come to Spain—that's almost twice the population of our neighbor country . . . Most of these visitors don't know anything but our beaches, and Spain is much more than that. There are still enormous possibilities."

For Leather, Textiles, Outlook Cautious

MADRID (IHT)—A survey carried out early this year by the Ministry of Industry showed that a majority of textile manufacturers felt that production would remain the same this year and prices would go up. A majority of those filling foreign orders expressed the opinion that the export demand was weak.

The same survey showed that Spanish shoe manufacturers also felt that production would remain at normal levels while prices would rise; but they considered that not only export demand, but demand in general, was weak.

Both were right. The demand for textiles showed moderate buoyancy in the first half of this year while the demand for shoes slowed down, prices (and costs) went up and by year's end there were still disturbing doubts about continuing sales of footwear in the United States, Spain's biggest foreign market for the industry.

In the same survey, the industry leaders were asked whether they expected plans for new investments to be increased or diminished, and in both industries the answer was that the investment plans would remain unchanged.

A majority of those polled in both industries gave as the main reason for new investments the manufacture of new products, and likewise both said that the most discouraging factor to new investments was the increase of competition from foreign products in the domestic market.

On the surface of things the caution of the impresarios might seem surprising, considering that exports of leather goods and footwear increased by nearly 20 per cent in 1975, according to the Industry Ministry, for a total of about $530 million, and exports of textiles increased by more than 4 per cent, for a total value of $303 million. In the leather-goods and footwear category, shoes were responsible for most of the income: $383 million.

However, particularly in shoe manufacture, they had a reason to be wary. Although shoe sales had increased dramatically during 1975 in the United States, the best market, there was a stagnation of sales in the latter part of the year. Worse yet, there was a new threat that the American shoe manufacturers' lobby in Washington would succeed in its efforts to have protective tariffs or quotas imposed with regard to shoes made outside the United States. That threat did not disappear until last spring, when President Ford gave the Spanish government a personal assurance in that regard.

The United States is vital to Spanish shoe manufacturers because the American market absorbs more than 50 per cent of the footwear exported by Spain, and footwear is the major Spanish product sold in the United States. Last year shoes accounted for 30 per cent of the value of exports to the United States. Manufacturers estimate that about 21,000 persons are employed in Spain merely to make shoes for Americans.

Luis Sempere, Spanish commercial attaché in New York, admits in an article published in the Spain-U.S. Chamber of Commerce Bulletin in New York that the process of concentration of Spain's exports to America "can be considered as one of the negative aspects of the qualitative evolution of our exports to the United States."

Marginal

Despite the foreign currency which this industry brings to Spain, for a great many manufacturers it is a marginal industry. So close is it to the dangerous final dip in the sales charts that in September one of Spain's biggest and most respected shoe manufacturing companies, Segarra, asked for a *moratorium on payments*. The only explanation company officials could give was that costs were too high. Workers have asked the government to take over, even offering to give up part of their salaries, to keep the factory going until a definitive solution can be found.

Costs are of serious concern to the manufacturers at present, since the international shoe market is a cutthroat affair, and Spanish exports must win out over the economically priced, stylish and generally high-quality footwear produced by Italy, Brazil and other countries.

As for the textile industry, although its exports grew more slowly than the shoe industry's did last year, it seems to be in sounder shape than the shoe industry. However, textiles are only number 17 on the list of Spain's most important industrial exports, whereas shoes are in second place, right behind industrial goods.

The textile industry is coping reasonably well with three tough problems at the moment: the need to modernize and install new machinery in order to remain competitive, workers' demands for higher pay and the complicated commercialization of its products.

The latter problem is particularly important in the domestic market, and finding a solution to it is mostly an individual task for each producer. The solution to the second problem, labor demands, does not seem to be in sight for the moment, given the fact that Spain is in a period of transition and labor is flexing its muscles after nearly 40 years under the authoritarian rule of Gen. Franco. The government is lending a hand in seeking a solution to the first problem, the need to modernize.

However, in spite of government assistance, the level of new investment is low, primarily because of a lack of confidence on the part of management in the industry. Such hesitance increased as the year wore on, because of political uncertainties and rising costs, which steadily undermined the competitive position of Spanish goods, particularly on the export market, which consumes about 15 per cent of the production of this sector.

The need to cut costs and boost profits has encouraged manufacturers to take a hard look at their distribution systems, with the idea of improving them to take advantage of modern sales trends. Thus the local wholesaler is becoming increasingly rare; more and more, business is being done directly between producers and retailers. Nevertheless, at the same time, the number of regional (as opposed to local) wholesalers is increasing.

The finished products which are Spain's best sellers for the textile industry are men's outer clothing, representing about 35 per cent of the value of goods sold; women's outer clothing, representing about 30 per cent of the value, and children's clothing, representing about 8 per cent.

Surprisingly, the statistics reveal that the average Spanish man spends more on clothing than the Spanish woman, although the proportion is changing in favor of more clothing for women.

Construction Is at a Standstill

MADRID (IHT)—The Spanish construction industry was in such bad shape late in October that the Madrid daily Ya published a commentary on the industry's problems entitled "Construction in 'Destruction'." Today it is in even worse shape.

Of all the labor problems in this country in the year since Gen. Franco's death—and there have been more than ever before—the one industry most affected was the construction industry. By late October, 60 per cent of the labor disputes then in progress were in construction, with strikes in many cities.

Labor conflict is not the only thing bugging builders, but it is important, both to construction companies which are being squeezed between zooming costs and a shrinking market—and to the government—which has to figure out what to do about the 300,000 building workers now out of work and the estimated 500,000 who might be out of work by Christmas.

In September alone, new building contracts were off by 8 per cent compared with the same month in 1975. By the end of the year the experts figure that orders will be down by as much as 30 per cent in comparison with the same period a year ago.

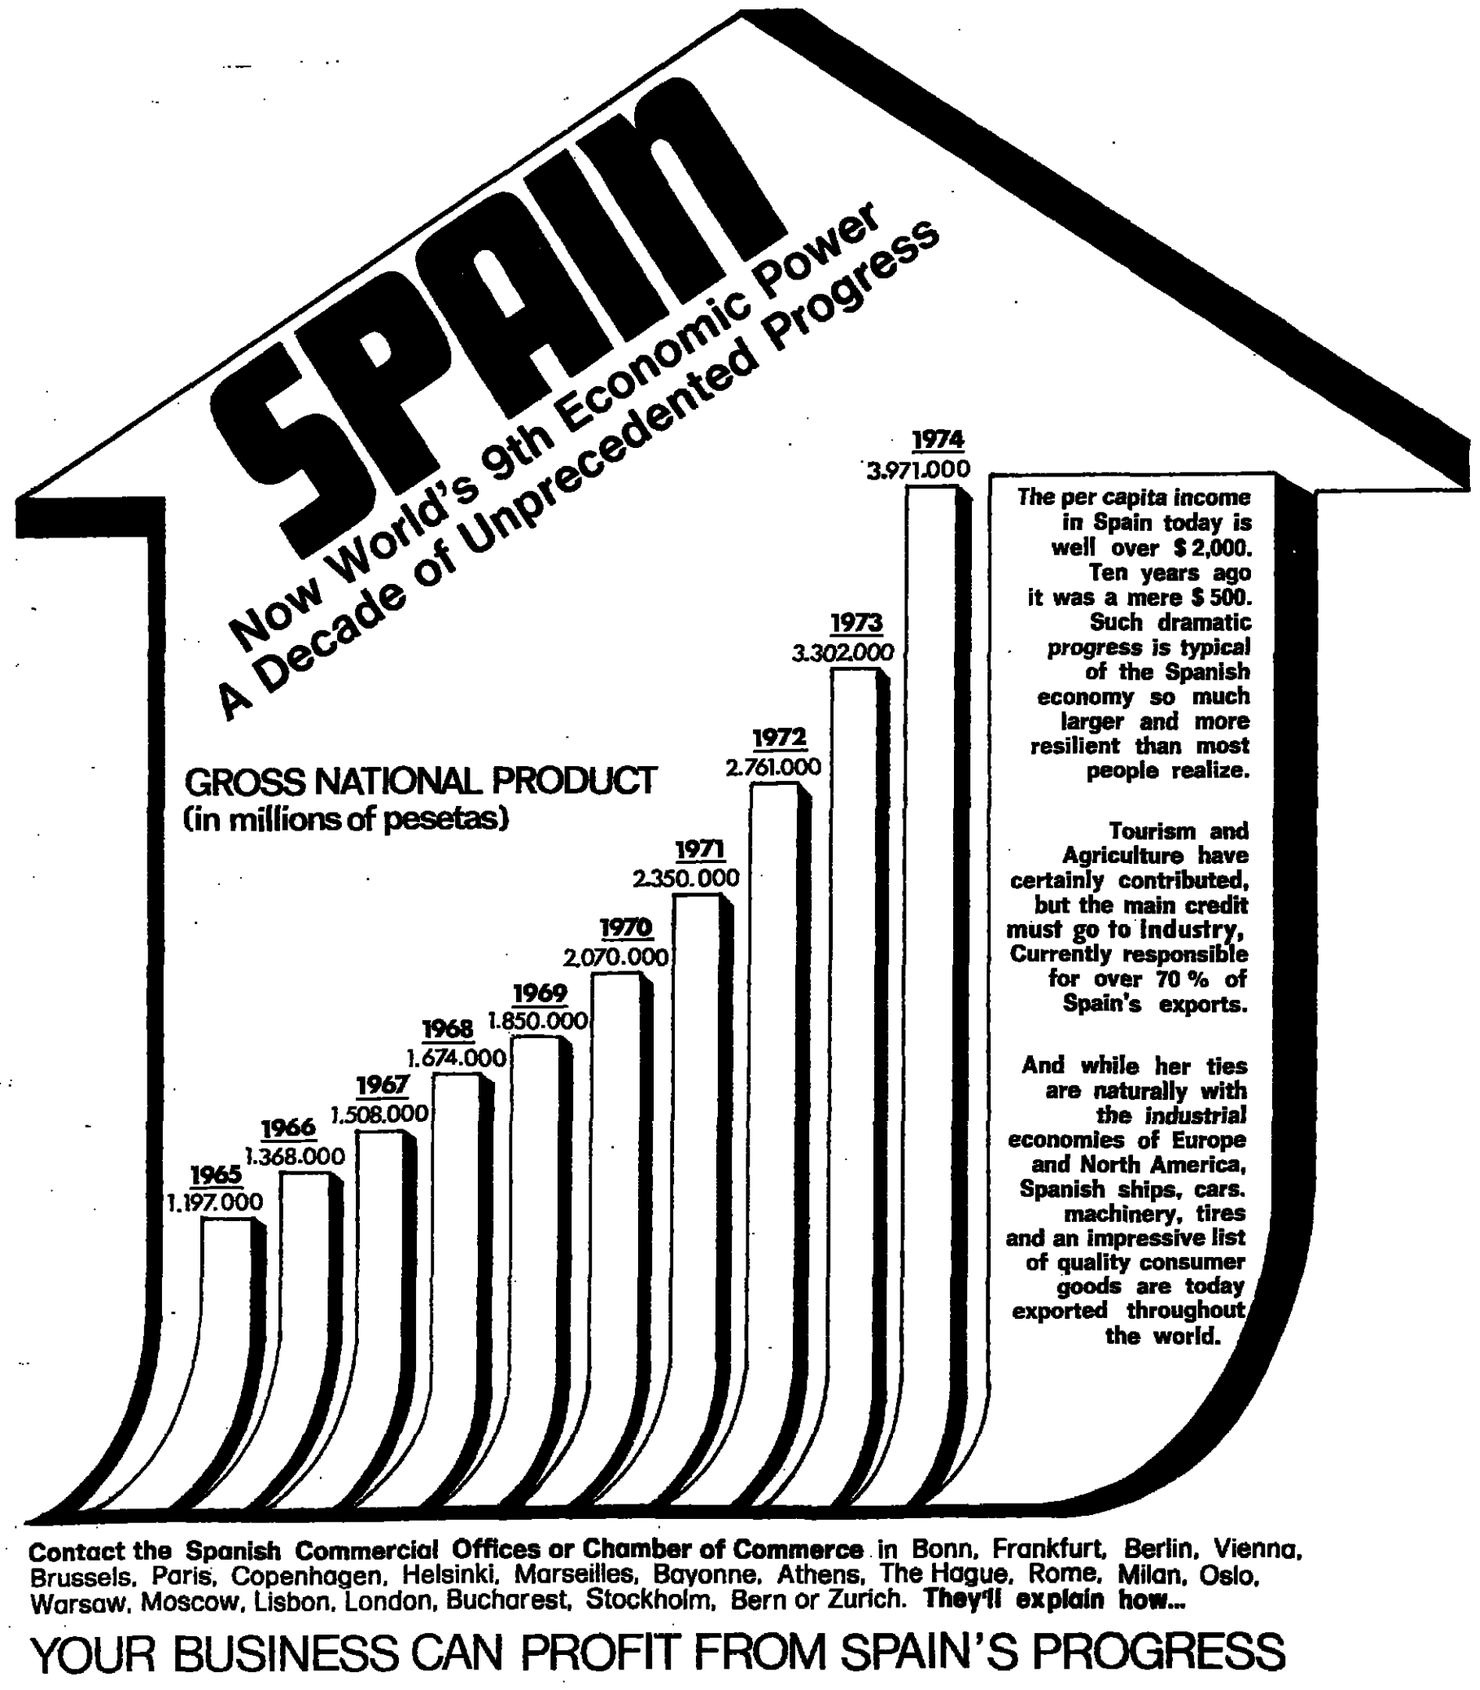
The Outlook

The most disturbing aspect of this situation is that there is not much hope of a quick comeback. The tourist boom, which used to keep builders busy putting up hotels and holiday flats as fast as they could along the coasts, is finished. So are easy government credits in that sector, since the Ministry of Information has become aware of the fact that many areas are overbuilt.

In view of the sales pace, some builders, particularly of luxury flats in Madrid, have resorted to the technique of employing only a few men on nearly completed buildings—just enough to put the finishing touches on each contracted apartment, and to work on the unsold apartments in between. This system cuts down payroll costs. Rushing to complete a job, unless there are penalties for delays written into the building contract, is not in the interest of the builders, for they often have no new job to which they can assign their workers when they have finished a building.

One thing which bothers builders is the Spanish bureaucracy's apparent lack of concern for the critical state of the industry. Spokesmen for the construction industry claim that the government owes various firms about 30,000 million pesetas ($455 million) in payment for public works contracted. In addition, the government is reportedly behind in advancing another 45,000 million pesetas ($683 million) in promised loans. Such delays in payment could be the straw that breaks the camel's back for many companies.

Trade Union



With the building business facing hard times, one might expect labor to be more cooperative. But not so in Spain, where trade-unionism is still developing and where there is a confusing parallelism between the official obligatory state-run trade unions and the ones which really wield influence but which are technically illegal.

The present depressed state of the construction industry is all the more disappointing because there were signs of reactivation last July which faded out. At that time there was a slight increase in new building contracts, particularly in private housing; and sales of construction machinery had begun to pick up.

There is no doubt that the generally poor overall economic situation is having a severe effect on construction. The government is trying to keep the annual increase in public spending within the limit set by inflation, which virtually excludes any possibility of increased spending on public works; investments are down and there is a tendency for new investments in industry to be directed toward the manufacture of new products rather than toward expansion of plant facilities; lack of confidence in Spain's immediate future, as a result of the political situation, has caused a considerable flight of capital, thereby reducing the amount of money available for investment in general; growing unemployment reduces demand for private housing.

The official downhold on spending resulted in a 35-percent decrease in government construction contracts in the first six months of this year at a time when the industry could have benefited greatly from a boost.

YOUR BUSINESS CAN PROFIT FROM SPAIN'S PROGRESS

What people need today:

INITIATIVE

RONDA IBERIA - a 5 star service in the sky to make your long trips shorter.
RED JACKETS - to solve your problems in any of the main airports of Spain.
IBERIABONO - a special opportunity to fly all over Spain for only US$ 99.
INFORIBERIA - a permanent multilingual information service in Madrid.
AIR BRIDGE - an efficient business solution for traveling between Madrid and Barcelona, and vice versa.
MUNDICOLOR - wonderful holiday programs with all the guarantees you need, and at very reasonable prices.
ROUTES - we fly to all the major cities in South, and Central America and Europe, as well as Montreal, New York and many important cities in Africa. And, in Spain, we have the largest national network in Western Europe. We offer you the best connections for your business needs.

No Shortage of Wine for Export

MADRID (IHT).—Spain's wine hangover is beginning to go away at last, but until it disappears completely it will continue to make life miserable for a lot of people.

The hangover is the annual surplus of wine which undermines prices paid to producers, obliges the government to subsidize sometimes inferior products and keeps an unnecessarily large percentage of the work force employed in agriculture.

Of course at the present time, with unemployment increasing, that is not such a bad situation. Yet in the long run it must be corrected, for it hardly benefits the nation's economy.

Last year that surplus, combined with the need to keep up exports when the general business outlook was bad, led Spain to export more than 13 per cent more wine than in 1974—but for 12 per cent less money than in 1974. As one Spanish businessman put it, "We are selling *duros* (five-peseta coins) for four pesetas."

The drop in revenue was the result of the government's efforts to stimulate sales in new markets in the face of fierce international competition. The stimulus was applied in several ways, but primarily via the direct cooperation of Spanish commercial attachés, in embassies, consulates and delegations, in the task of introducing Spain's wines. In addition, wine shippers were offered incentive subsidies to help defray the costs of promotion in new markets.

Success, But...

The campaign was successful in the sense that it helped market the excess and presumably introduced more foreigners to Spanish wine. But producers and exporters—even those who did well on the shipments—cannot forget that the average price of Spanish wine dropped by 25 per cent in the export market.

That, however, was last year, when it was vital to siphon off the "wine lake" which had resulted from several years of bumper crops in a row. The lake still needs draining, but the threat of a devastating flood is past. According to initial estimates, the Spanish wine-grape crop this year was considerably smaller than last year, with losses of up to 50 per cent in some regions like the Mancha, largely as a result of mildew, hail and drought.

A smaller crop this year should help things return to normal. Nevertheless, there is no reason why wine exports should decrease in 1976, bearing in mind that most good wines are the result of several years' aging, and considering that Spanish shippers will fight hard to retain the foothold they have gained in new markets. In fact, most producers of quality wines are convinced that their overseas sales will keep on growing.

There will be no shortage of

State Wakes Up to Farm Ills

MADRID (IHT).—If you are inclined to think of Spain as largely an agricultural nation, consider this: Spain imported about $849 million more in agricultural and food products in 1975 than it exported.

Although it has made some progress, although there have been government programs to help farmers, although the government has remembered to give special credits to farmers in times of drought, such as last August—the fact remains that Spain's agricultural sector is frankly anemic.

Overall government policy has subjugated agricultural development to industrial development ever since Spain began its economic take-off about 15 years ago. The growth of industry brought Spain many benefits, but it depleted much of the countryside, creating ghost towns and abandoned farmland in some places, while it left only the elderly to take care of the farms in many other places.

The shift of population from rural areas to industrial centers is a common phenomenon in this age of industry, but in Spain it occurred extremely fast and it was accompanied by massive emigration to industrialized countries. The age level of the rural population went up sharply, and the implications of that are tremendous: It means farmers with less work capacity, fewer children to be brought up as farmers, very few young men and women with farming experience.

Squeezed out by near-starvation, Spaniards left the country's poorer provinces in droves, heading for industrialized countries north of the border, where there was a labor shortage until the petroleum crisis came, and to Spain's own growing industrial centers such as Barcelona, Bilbao, Madrid, Valencia and, more recently, Seville.

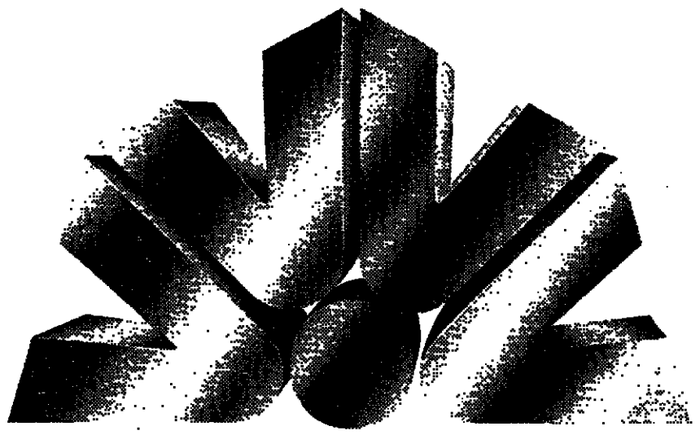
Spanish workers' earnings abroad contributed heavily to Spain's reserves, as the fat paychecks were sent back home to villages where money had always been scarce. The sacrifice was tremendous for the emigrants, many of whom had to leave behind a young wife and children to work the harsh land (if they owned any) and await the monthly allotment of marks or francs which went into money orders.

Now the farm population is decreasing by attrition more than by emigration.

It is only fair to say that the government has been encouraging better farming methods for years, largely through the generally well-trained personnel of the agricultural extension service.

One of the steps the Ministry of Agriculture is taking to help farmers is to improve marketing facilities. For that purpose the government has established more than 30 new farmers' markets under the control of experts in many parts of the country. These markets shorten the chain of distribution, encourage farmers to band together for more effective commercialization, encourage the fixing of quality standards and generally give the farmer more money for his crop than he would have got otherwise.

Other measures now in effect include research to develop better crops, programs to promote the rational use of land, promotion of the use of fertilizers and crop rotation to keep the soil from becoming exhausted, increasing the amount of land under irrigation, establishing support prices for certain crops, efforts to reduce crop damage from insects or plant diseases, and conservation and fire control.



New Vines

Winegrowers in regions that produce especially good wine like the sherry district centered around Jerez in southwest Spain, the Rioja district in the north and the Penedés district near Barcelona, to mention only a few—began planting new vines a decade or more ago when they saw their sales zoom upward.

Those new vines, which will be about four years to begin productive and which do not produce the best grapes for a few years more, are now beginning to add to the output of the older vineyards, and by 1980 almost all the new vineyards are expected to be producing. This poses a threat of considerable overproduction in areas like the sherry district.

While overproduction in table wine districts is solved by distilling the surplus into commercial alcohol or brandy, sherry producers are reluctant to do this because the sherry grape is the costliest one to produce in Spain. For this reason, for many years they have been using wine from other regions to make the cheaper grades of brandy, instead of turning all the true sherry grapes into wine.

While the government has done little to limit the amount of land dedicated to grapes, it has tackled the problem of excess production and poor financial return by encouraging wine producers to band together in each district and form a regulating council, a body which enforces quality-control measures and certifies the origin of the wine. (In some ways similar to the French *appellation contrôlée*). There are now more than 30 such councils, and their emphasis on quality and marketing techniques has helped wine-makers to sell a better product at a better price than

Put the total banking experience behind this symbol to work for you internationally

It stands for the EUROPARTNERS: Banco di Roma of Italy, Banco Hispano Americano of Spain, Commerzbank of Germany, and Crédit Lyonnais of France.

Our joint expertise, know-how and solid experience have added a new dimension to international banking and provide an ideal foundation to help solve your international financial problems.

With international business — meaning essentially the right contact in the right place at the right time — our many specialists can assist you on the spot with intimate local knowledge to simplify and expedite the handling of your financial transactions.

Our worldwide presence (the EUROPARTNERS are represented in 60 countries), our close affinity to the national markets (over 4000 offices in Europe), and a financing potential of some 62 billion dollars are ideal ingredients to help you solve the problems of today and exploit the opportunities of tomorrow. Call us. And let us put our combined experience to work for you.

Decline of Outstanding Issues Is Worrying Professionals

By Carl Gewirtz

PARIS, Nov. 14 (IHT).—Prices [of] outstanding Eurobonds dropped [last] week, triggering a wave of [anx]iety among professionals [at a po]int where the market is l[e]ad[...]. These worries were magnifi[ed] by the large volume of new [iss]ues on offer which some [ana]lysts fear may be too much [for] the market to comfortably [abs]orb.

[F]rom a technical point of view, [the] bond market is in a strong [pos]ition. Short-term interest [rate]s for three and six-month [mon]ey remain below 8 per cent, [leav]ing a wide gap favoring the [pur]chase of bonds yielding over [8] per cent.

[Ne]vertheless, bankers in all [ma]rket centers report that there [ha]s been a distinct change in [the] mood of the market.

[T]he reasons cited are varied. [Th]e decline in the U.S. bond [ma]rket was a psychological [de]pressant and the factors af[fect]ing that market also apply [here]—namely, the uncertainty [abo]ut the economic policies that [the] Carter administration will [foll]ow. News that the Federal [Res]erve Board had cut by half [a] point the target ceiling for the [gro]wth in the U.S. money supply [wa]s interpreted as signaling an [end] to the downturn in short-[ter]m rates.

Average Decline

"Uncertainty breeds caution," [a] banker commented, "and that [mea]ns a wait-and-see attitude [to]ward buying new issues." With [buy]ers retreating to the sidelines, [the] sellers were left in the [ma]rket and as prices slipped, the [sel]ling picked up speed. Over[all], prices were down an average [of] a point for the week.

The widespread assumption is that many banks which have been deploying their idle assets to buy bonds are now in the process of selling their holdings. The reasoning is that these banks do not want to show such holdings in their year-end financial reports and are beginning to prepare their "window-dressing" operations to show as liquid a position as possible.

"The critical point has been passed," a U.S. banker observed. "Loan demand is showing signs of picking up and we're now beginning to look to the other [upward] side of the interest-rate slope."

Yet another factor is the renewed investor interest in bonds denominated in deutsche marks. While Swiss bankers report that the recommended currency mix in a typical portfolio remains evenly divided in Swiss francs, deutsche marks and U.S. dollars, it appears that a large part of the funds currently available for investment are going into DM bonds.

Unsuitable Terms

This shift may be motivated by a fear of an impending shake-out in the dollar sector. The calendar of new issues is heavy and if the rumors are accurate, the flow of offerings will remain heavy through the end of the year.

Implicit in this attitude is the fear that the market will not easily digest this volume—a fear reinforced by the fact that the terms on some of the new issues appear to be unsuitable to investors.

The most worrisome issues are both for U.K. borrowers. Midland Bank is seeking $75 million for 10 years with a coupon of 8 3/4 per cent and the South of Scotland Electricity Board is seeking $75 million for five years at 8 1/4 per cent.

Bankers note that comparable U.K. issues trading in the secondary market are yielding much more to investors. National Westminster's 10-year, 9-per-cent bonds, issued in June, are trading at 99 1/2 for a yield of just over 9 per cent. It is argued that there is no justification for Midland's lower coupon.

The same is true for the Electricity Board. The National Coal Board five-year notes carrying a coupon of 8 5/8 are trading at par.

Managers of these issues argue that the market for U.K. paper is very narrow and that prices can be affected by the slightest selling pressure. These bankers maintain that the secondary-market quotes are not truly indicative of where the true rate is. This is not a widely held view.

Swiss Bank Corp., for example, declined to co-manage the Scotland Electricity Board issue. "We couldn't accept because we couldn't place bonds on these terms," a spokesman said.

Political Decision

Union Bank of Switzerland did accept to be a co-manager, but a spokesman for the bank said the decision to do so was strictly a political decision, that all efforts should be made to keep Britain's access to the bond market open. "We did not feel

(Continued on Page 21, Col. 1)

New York Stock Market

NEW YORK, Nov. 14 (NYT).—The slowing pace of new-car sales proved a damper for the stock market last week as the Dow Jones industrial average retreated 15.38 points to close at 927.69.

This came on the heels of the previous week's decline of 21.86 points, when Wall Street had its first chance to react to the victory of Jimmy Carter in the presidential election. By last week the industrial average had slipped to its lowest point since mid-January, as weakness appeared in automotive, semi-conductor, drug and bank stocks, in other sectors of the market.

But it was the announcement by General Motors of a $200 rebate on certain small-car models that really caught investors by surprise and symbolized the slowing national economy that elsewhere had brough plant layoffs and that lowered earnings estimates. GM's stock slumped 3 1/2 points for the week to finish at 67 1/2. This was in sharp contrast to its recent strength, when the shares sold above 75.

Gold and precious metal stocks, by contrast, enjoyed a boom as the price of bullion advanced in European markets, partly on the rationale that President-elect Carter is likely to re-ignite inflation when he takes office. ASA Ltd., finishing at 27 7/8, was ahead more than 3 points for the week. In August, this gold-oriented issue traded as low as 12 5/8.

Volume for the week came to 83.41 million shares, compared with the previous week's 80.21 million shares.

Bond prices trended lower, partly because of inflation fears and partly because of disappointment that the Federal Reserve Board has not eased its monetary policy.

The U.S. Economic Scene

Du Pont Leader Is Confident on U.S. Economy

By Thomas E. Mullaney

WILMINGTON, Del., Nov. 14 (NYT).—While the financial markets and many businessmen continue to manifest concern over the economic recovery and the policies they expect from the Carter administration, there is an island of calmness and patience here in the executive suite of one of the nation's largest business enterprises.

This is the corporate home of E.I. du Pont de Nemours & Co., the world's biggest diversified chemical producer and one of the largest manufacturers in the United States, with sales this year likely to cross the $8-billion level for the first time.

The head of du Pont has always been a powerful influence in American industry by virtue of the company's vast operations in the industrial chemical, fiber, fabric, photographic, plastic and other fields. But the current occupant of that post, Irving Shapiro, is probably a bigger power in that realm since he also heads the Business Roundtable, a group of some 160 top corporate executives that develops position papers on issues most crucial to business.

If one person might be considered the principal spokesman for private business enterprise at this time, it is this 60-year-old lawyer who left the anti-trust division of the Justice Department 25 years ago for a career with du Pont that catapulted him to the top echelon in 1973.

At an interview last week, Mr. Shapiro took a confident view on the American economy for 1977 and the decade ahead, as well as a hopeful attitude on the policies that may evolve from the new administration in Washington next January.

As chairman of the roundtable, Mr. Shapiro sought—and received—an invitation to meet President-elect Jimmy Carter during the campaign last September. He wanted the candidate to address the membership of the roundtable, but, instead, he was asked to go to Atlanta to join a group of 16 other prominent businessmen, bankers and trade association officials for a four-hour luncheon with the contender.

Each participant at that meeting was allotted three or four minutes for a statement, given in a sequence determined by lot. Mr. Shapiro said he took a seat near Mr. Carter while he awaited his turn.

"I wanted to watch him in operation close-up, judge how he functioned and come up with a gut reaction," he said. "I came away with a feeling that here was a man of considerable intellect, a careful and precise person. He asked a lot of questions, took copious notes and wanted to understand problems. When he disagreed, he was explicit. On some issues, he was inexperienced, and said so."

Position Papers

After the meeting, Mr. Shapiro said, the Carter group invited him to submit position papers on the subjects he discussed, in addition to several others. "I was asked," he said, "to turn in papers on nine subjects and told to keep them short."

The nine subjects were capital formation and jobs, common picketing (or expansion of the striking authority of a building-trade local to an entire construction site), the Consumer Protection Agency, energy problems, environmental issues, national health insurance, standby wage and price controls, taxation of foreign-source income, and unemployment.

The du Pont chairman did not disclose what points he tried to make with Mr. Carter other than to say that he told the candidate "he was making a mistake in favoring the Consumer Protection Agency." No doubt he also raised questions about environmental priorities, costs and the timetable for water-quality upgrading and other improvements,

(Continued on Page 21, Col. 4)

U.S. Commodities

CHICAGO, Nov. 14 (AP).—Farm commodity futures fell sharply last week after the government announced that farmers probably will harvest a record corn crop this year.

The crop report estimated corn production this year at 6.063 billion bushels. Soybean production was estimated at 1.252 billion bushels. After the report was issued Wednesday, prices of the major commodities declined. The next day, in advance of another report, the trade estimated that the numbers of cattle on feed on Nov. 1 probably would be some 4 per cent under the year-ago figure.

The cattle report meant that there would be fewer head of livestock to eat feed grains, already in great abundance, thus new selling was set off on Friday.

Beside the crop and cattle reports, the Agriculture Department also noted that Russia, Poland and Czechoslovakia probably will harvest more small grain in 1976 than had been expected a month ago. Also, India, nominally an importer of grains, could now turn to an exporting nation because of a fair harvest, but an alarming scarcity of storage space.

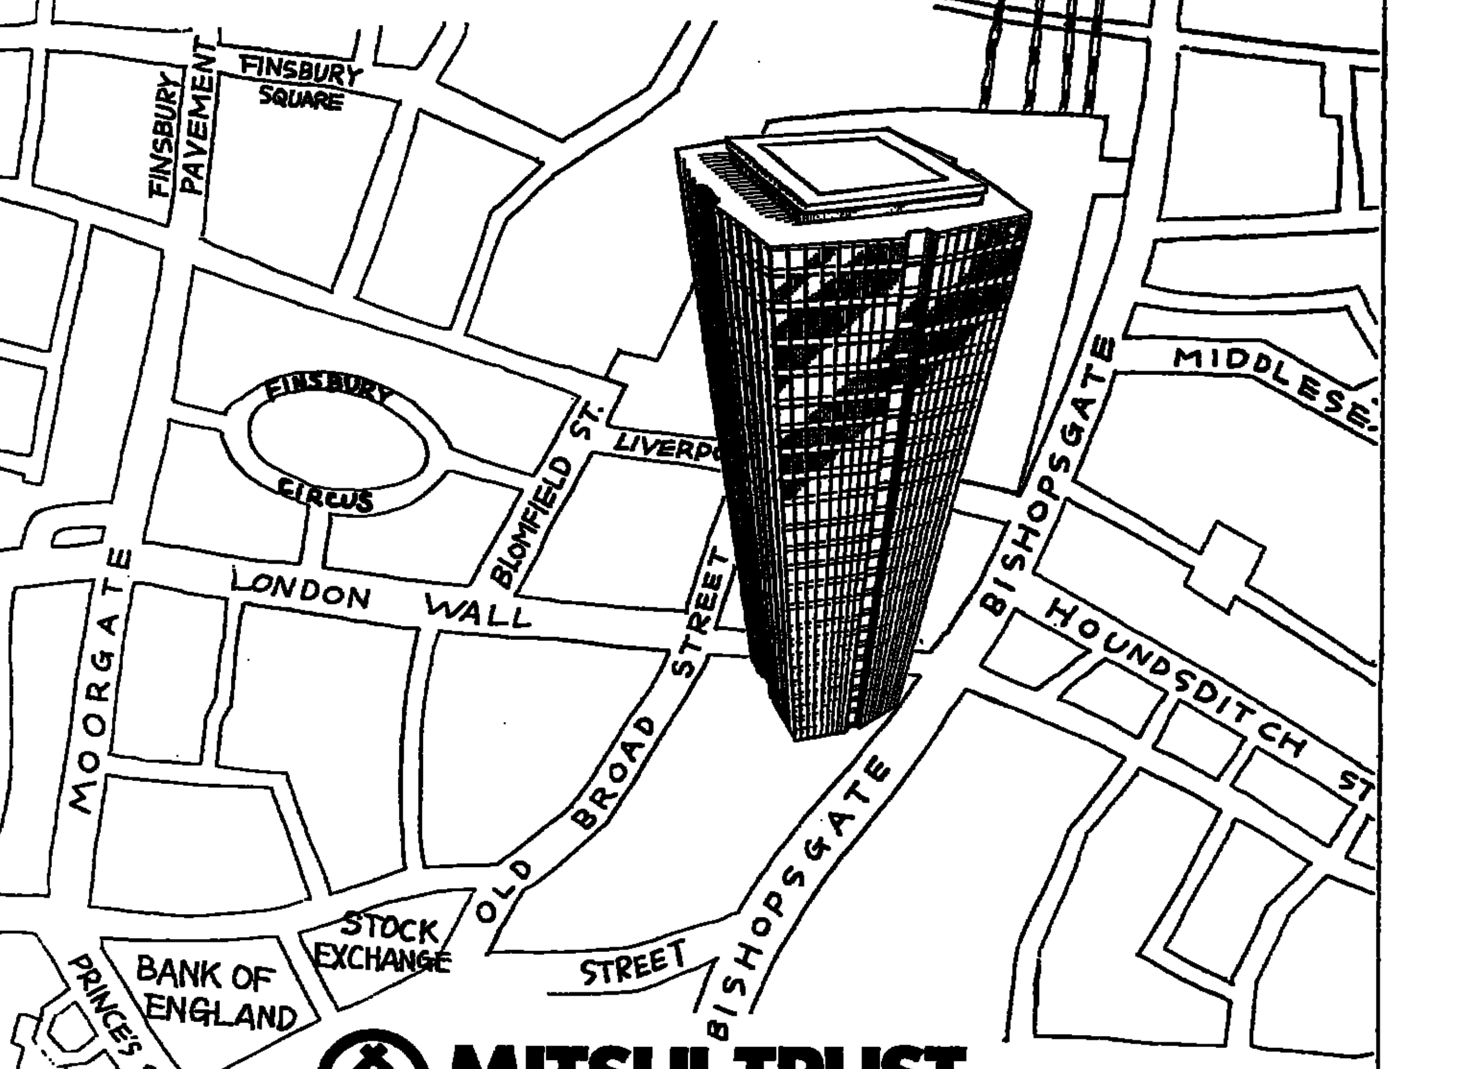
When grain trade had ended, soybeans were down 16 to 38 1/2 cents a bushel, November 6.50; wheat was 14 3/4 to 23 1/4 lower, December 2.57; corn was 14 to 19 3/4 lower, December 2.33; oats were 8 1/4 to 9 1/4 lower, December 1.52 1/4; soybean meal fell 6.50 to 11.50 per ton, December 179.30; soybean oil was .20 to 1.25 cents per pound lower, December 22.25; and iced broilers were 10 points lower to 1.65 higher (about 1 2/3 cents), November 36.50.

Live cattle futures fell $1.57 per hundredweight while live hog futures ended the week 37 cents per hundredweight lower to 75 higher. Pork belly futures were little changed for the week, despite some wide moves during the five sessions.

The corn crop estimate and private projections of an adequate beef supply into next year served to influence selling of live cattle futures, but there was a reasonably stable carcass beef trade. Shell egg demand eased near week's end on some fear of consumer resistance to higher prices.

A steady cash market and expectations of fair marketings this winter led to buying live hog futures, but deferred options came up against resistance as the feed grain futures were released. Ample slaughterings and small increases in storage led to selling, but a larger output of bacon and some easing of retail bacon prices led to buying.

Over-Counter Market



NEW YORK (AP) — Weekly Over the Counter stocks giving the high, low and last bid prices for the week with the net change from the previous week's last. National Association of Securities Dealers Inc. are not actual transactions but are representative interdealer prices at which these securities could have been sold. Prices do not include retail markup, markdown or commission. Sales supplied by NASD.

Bundesbank Say[s] Pound Purchase[s] Reports Untrue

FRANKFURT, Nov. 14 (A[P-]DJ).—Reports that the Bund[esbank] has been purchasing st[erl]ing since last week were den[ied] by an official of the West Ge[r]man central bank today.

"We are aware of such repor[ts] but they aren't true," the offic[ial] said.

Reports from London quoti[ng] well informed German sourc[es] claimed that the Bundesba[nk] bought about £500 million la[st] Thursday and Friday and ha[d] continued such purchases th[is] week.

The West German bank ha[s] not purchased any pounds, eith[er] on the two days mentioned i[n] the reports or afterward, the o[f]ficial said. "The plain fact is w[e] haven't bought any pounds," h[e] added.

The official said the Bundes[bank] also is not aware of an understanding reportedly reache[d] between British Prime Ministe[r] James Callaghan and West Ger[man] Chancellor Helmut Schmid[t] concerning sterling purchase[s]. Mr. Callaghan met Mr. Schmid[t] in Britain in October.

Ebic, the European banking community for international business

EBIC, European Banks International. Seven leading independent banks. Each bank is a separate entity. Together we can offer a lot of financial weight in some very competitive markets.

This is how we do it:

1. In Europe. In addition to our more than 9800 branches, we also have Banque Européene de Crédit (BEC) in Brussels and European Banking Company in London for long term, large scale international financing (European Banking Company also has a branch in Chicago).

2. In America. You will find European-American Banking Corporation with offices in New York, Los Angeles and San Francisco and European-American Bank & Trust Company with more than 100 branches in the New York area.

3. In Asia. We're in the major business centres of Singapore, Hong Kong, Manila, Jakarta, Kuala Lumpur and Karachi as European Asian Bank.

4. In Australia. There is the Euro-Pacific Finance Corporation in Melbourne and Sydney.

Your point of contact for these organisations is at any of the more than 9800 branches operated by the seven leading banks comprising EBIC.

New York Stock Exchange Weekly Bond Sales

City Investing's income climbs sharply in 3rd quarter of 1976

All of City Investing Company's businesses — manufacturing, housing and insurance — showed gains during the third quarter of 1976. Our insurance business was particularly strong, a sign that the company's underwriting activities have clearly rebounded. Here are some specifics:

Net income more than doubles

City Investing's third-quarter 1976 net income rose to $15.1 million, more than double the $7.3 million for the same period last year.

Primary net income per share was $.54 in 1976 compared to $.17 in last year's third quarter.

Total revenues for the third quarter rose to $649.7 million vs. $554.5 million for the third quarter of 1975 — an increase of 17%.

15% gain in manufacturing

Third-quarter pretax operating income of City Investing's *domestic* manufacturing activities rose 15% to $13.8 million compared to $11.9 million in 1975. The company's air-conditioning, container, and magazine printing operations continued to perform strongly, while the company's refrigeration operation reported a small loss.

City Investing's *international* manufacturing operations showed a 27% gain in pretax income in the third quarter. Income rose to $4.8 million from $3.8 million, after absorbing currency losses caused by devaluation of the Mexican peso.

24% gain in housing

City Investing's housing activities continued to rebound in the third period. Pretax income rose 24% to $7.5 million from the $6.0 million reported in 1975. Single-family home sales and mobile home shipments were both ahead of last year's figures.

Income from our budget motel operation is at record levels.

275% gain in insurance

The Company's third-quarter pretax income from insurance and financial activities rose to $15.2 million from $4.1 million in 1975 — an increase of 275%.

Property and casualty insurance underwriting losses dropped to $5.2 million compared to the $15 million loss in last year's third period, and the $13.5 million loss in the second quarter of 1976.

Property and casualty investment income rose 4% to $17.3 million from $16.6 million in last year's third quarter.

Strong performances were reported by the life insurance and savings and loan operations.

The positive impact of premium rate increases, lower rates of inflation, and the significantly improved cash flow in our insurance operations all indicate that underwriting activities will continue to improve.

These conditions, plus continued gains in our manufacturing and housing operations, provide for a very favorable outlook for this year and into 1977.

Sincerely,

Geo. T. Scharffenberger
Chairman and Chief Executive Officer

This announcement is neither an offer to buy nor a solicitation of an offer to sell any of these securities. The offer is made solely by the Exchange Offer Circular and is not being made, nor will tenders for exchange be accepted from holders of Owens-Illinois Common Shares in any state in which the making or acceptance thereof would not be in compliance with the securities or blue sky laws of such state. In those states where the offer must be made through dealers, the offer shall be deemed to be made by such dealers as agents for Owens-Illinois, Inc.

Notice of Exchange Offer by

Owens-Illinois, Inc.

To Holders of Its Common Shares

1,226,016 Shares

Owens-Corning Fiberglas Corporation

Common Stock
($1.00 par value)

Owens-Illinois, Inc. ("Owens-Illinois") hereby invites tenders of 1,362,240 shares of its Common Shares, $3.125 par value ("Common Shares"), subject to the terms and conditions contained in the Exchange Offer Circular, in exchange for 1,226,016 shares of the Common Stock, $1.00 par value ("Common Stock"), of Owens-Corning Fiberglas Corporation ("Fiberglas") on the following basis:

1 Common Share of Owens-Illinois
for
.9 of 1 Share of Fiberglas Common Stock

The Exchange Offer Will Expire at 5:00 P.M., New York Time, on December 9, 1976, Unless Extended by Owens-Illinois.

Owens-Illinois will accept any and all properly tendered Common Shares up to 1,362,240. In no event will Owens-Illinois accept more than 1,362,240 of its Common Shares.

Holders of Owens-Illinois Common Shares who wish to accept the Exchange Offer, after reviewing the Exchange Offer Circular in which the terms of the Exchange Offer are set forth, should send certificates for the Common Shares they wish to exchange and any other required documents, together with a properly completed Letter of Transmittal in the form accompanying the Exchange Offer Circular, in time to reach the Exchange Agent no later than 5:00 P.M., New York Time, on December 9, 1976.

Owens-Illinois will not pay any fee or commission to any broker, dealer or other person (other than the Managers) in connection with the solicitation of exchanges pursuant to the Exchange Offer.

Copies of the Exchange Offer Circular and the Letter of Transmittal may be obtained from the following:

Euromarket

(Continued From Page 17)

..ly enough (about the cou.. to withdraw our support ..the U.K. Treasury coming to market," the banker added. ..is quite possible that this will be less of a burden on ..market than many bankers ..as managers say that "a part" has been pre-placed. ..source reports that $50 mil.. has been sold to an oil-..ing country thought to be ..Saudi Arabia or Nigeria.

..nagers for both issues stress the pricing on the loans ..in and will be set in light ..ket conditions. At present ..and Electricity would have ..priced at 98 5/8 to bring ..ctly into line with the Coal ..and Midland would have ..sold at 98 3/8 to bring it ..line with NatWest. However, ..the attitude of managers, ..the secondary market price ..orted, pricing on these new ..is not likely to be aimed ..ging them exactly into ..with the outstanding loans ..sinking fund on the Midland loan will reduce the average life of the issue to 7.2 years.

France is also in the market. The Crédit National is seeking $100 million for 10 years with a coupon of 8 1/2 per cent. A sinking fund, beginning in the sixth year, will reduce the average life to eight years. The nation's port authority, Ports Autonomes, earlier this month sold $40 million of 15-year bonds with a coupon of 9 per cent at 99. The issue is trading at 97 3/8-98 1/8 for a yield to maturity of 9.28 per cent.

Long Maturity

Also in the market for fixed-rate debt is Skandinaviska Enskilda Banken, which is seeking $40 million at 9 per cent. However, its loan is for 15 years and while a sinking fund will reduce the average life to 9.75 years, the long maturity is seen by many bankers as a handicap. Managers believe the 9-per-cent coupon is enough of a sweetener to overcome this resistance.

The short-end of the banking market appears to have fallen apart last week, with the floating-rate notes for Banco de Vizcaya and Banco Popular Espanol trading around 98-99. The initial coupon on both notes is 7 1/4 per cent, some 1 1/4 points over the interbank rate and a level that had been assumed would attract investor support.

It now appears that the appetite for Spanish banking paper is far more limited than had been thought. In addition, some bankers argue that it is erroneous to focus on the minimum guaranteed coupon. Although at present this looks very generous, these bankers note that when interest rates rise beyond the 7 1/4-per-cent minimum and the 1/4-point spread over the interbank rate becomes the operative guide for the coupon level, these notes will be yielding the same as any other bank paper. While there has been considerable variance on minimum-coupon guarantees, all floating notes have offered a uniform 1/4 over interbank. The dissenters argue that in these conditions there will be no premium offered on the Spanish paper.

In any event, the poor performance in the secondary market is expected to delay Banco Urquijo's expected floating-rate notes.

Other new issues on offer include:

• $30 million for the European Coal and Steel Community. These seven-year notes are being underwritten and placed with Mideast institutions and carry a coupon of 8 per cent. The borrower last week sold $150 million in the New York market divided evenly between eight-year, 8 1/8-per-cent notes priced at 99.563 and 20-year, 8 7/8 bonds sold at 99.

• $50 million for Spain's railroad agency, Renfe. The seven-year loan is expected to carry a coupon of 9 1/4 per cent. A purchase fund, which will operate if the price falls below par, will cut the average life to 5.5 years. This will be the first fixed-rate debt offering from a Spanish borrower since 1973.

• $20 million for Fairchild Camera & Instrument Corp. These 15-year convertible bonds are expected to carry a coupon of 5 1/2 to 5 3/4 per cent and a conversion premium of 10 to 15 per cent over the stock price when the final terms are set.

The $15-million convertible for Ricoh of Japan was priced last week at par with a coupon of 6 1/4 per cent. The bonds can be used to purchase Ricoh shares at a price of 439 yen, representing a premium of 8.4 per cent over the Tokyo quote when the terms were set. The dollar conversion into yen was fixed for the life of the bonds at 295 yen.

Still to be priced is the 10-year loan for New Zealand. The amount of the loan is expected to be increased to $125 million from the initially indicated $100 million and the 8 1/4 per-cent paper is expected to be sold at par.

Some Resistance

OKI Electric is said to be running into the same kind of resistance as the U.K. loans. The indicated 8 1/4-per-cent coupon on its five-year loan is looking low in the light of the drop in the price of the recent five-year loan for Nippon Fudosan from the issue price of par to a mid-price of 98 1/2. Managers initially indicated that OKI should pay about a quarter-point more than Nippon, which would now mean a yield to investors of 8.6 per cent.

Expected to be announced this week is a $30-million loan for IU International.

In the DM market, Norsea Gas announced that its 100-million DM, 12-year loan would carry a coupon of 7 1/2 per cent. Also on offer is a 100-million DM loan for the European Investment Bank. The eight-year loan is expected to carry a coupon of 7 1/4 per cent and an issue price of par.

The seven-year loan for Mexico's Pemex was priced at par with a coupon of 8 3/4 per cent but ended the week at 99 1/4-99 3/4.

Scheduled to be announced next week is a 100-million DM, 10-year loan for Brazil's Comp. Vale do Rio Doce.

The U.S. Economic Scene

(Continued From Page 17)

since those things constitute one of the favorite topics of many businessmen.

On the subject of a possible tax cut that the President-elect raised recently if the economy is not more vigorous again by January, Mr. Shapiro said:

"It's too early to tell whether a tax reduction would be the right remedy. If we have a strong retailing performance in the Christmas season—and it does look promising—and if autos and housing continue strong, maybe we won't have to get any more stimulus. I think we are already seeing monetary stimulus."

More Jobs

He said he agreed that providing jobs for more people "has to be the No. 1 issue for the new President," but he added that "the inflation question goes right along with it, and we have to deal with both together."

Asked how he would tackle the unemployment situation were he president, Mr. Shapiro said he would want "to take it apart into three groupings and consider how to cope with each."

He said a stronger economy, which he expected, would take care of the first two groups of unemployed—the male heads of households and the women who go in and out of the work force but are not heads of households.

"The third category of joblessness is the most serious," he said. It consists of youths under 20, from the center cities, who are not educated or not equipped to hold a job. That's the situation we have to address promptly. Even with a good economy, none of those youngsters will be employed unless special steps are taken to help them."

He said two programs should be adopted. One would be an arrangement of incentives to encourage the private sector (through subsidies) to educate and train these youths. The other would be a public-works program for those who, for one reason or another, would not yet be able to get into the private programs.

"Without incentives, private business cannot afford to hire these people," Mr. Shapiro cautioned. "The government ought to subsidize their education and their training for jobs in business, while the business world should pay them only for the work performed."

He rejected the idea of hiring such people at less-than-normal pay rates, as some sources have suggested.

"I don't think you can hire anyone at a marginal rate of pay and satisfy him," he said. "You've got to bring these youngsters in and convince them they can do something with their lives. Show them they can earn money to support themselves and be useful in society.

"A civilian conservation corps program should only be a last resort for those who can't be placed in industry or in training jobs. It could be useful for that purpose if you give them meaningful tasks, not leaf-raking."

What does he, as a prominent businessman, expect from the new administration?

"I hope for a state of mind that recognizes no administration can be successful unless the economy of the United States is working well," Mr. Shapiro said. "There is a great need for industry and the government to work together to make the economy work that way. We wouldn't then be adversaries."

After Terrorists Change Tactics

U.S. Firms Start to Protect Executives Abroad

By Robert E. Dallos

NEW YORK, Nov. 14.—An American executive walking through the air terminal in Buenos Aires looks unusually stocky. He is wearing a bulletproof vest.

Another American businessman, traveling to Africa, takes his cook along. He does not want to be poisoned.

Suddenly U.S. corporations—long apathetic to the terrorist threat—are taking steps to protect themselves. Terrorist groups have shifted their emphasis. Instead of attacking U.S. government buildings, they are concentrating on American corporations.

According to Benjamin Weiner, head of Probe International, a six-year-old firm engaged in political research for U.S. companies, "embassies and other U.S. facilities abroad are very secure," and as a consequence "U.S. businesses are becoming symbolic alternatives."

Sharing Ideas

Corporations with overseas operations are learning, with help from the State Department, to look out for themselves. Douglas Heck, who directs the department's office for combating terrorism, told a reporter:

"Through our embassies we are sharing what ideas we have on the subject with the American business community overseas."

A major reason for the new concern for security is that corporations are having problems getting executives and their families to accept overseas assignments to some areas, one consultant said. The greatest reluctance, he added, is to transfer to Argentina, Italy, Colombia and Venezuela.

High-level corporate executives are attending seminars on terrorism. A session in Tehran some months ago attracted only a handful. But after three employees of North American Rockwell there were assassinated on their way to work in August, a second session drew several hundred.

The American Society for Industrial Security, a trade group, recently held a conference in London for executives of American firms. On the agenda: Defense strategy and tactics against extortion, bombing and bombing threats, kidnapping and assassination. A similar session is scheduled next month in Chicago.

According to a recent study by the CIA, the number of international terrorist incidents—including skyjackings and bombings—has grown from 123 in 1968 to 218 in the first eight months of this year.

The number of persons killed and injured was 53 in 1968. That figure grew to a total of 756 through last Aug. 31. There have been 4,521 casualties (killed and injured) in the last 8 1/2 years. According to Mr. Weiner, 40 per cent of the victims in those years were Americans.

More Targets

The CIA fears that terrorism "will be more sharply felt in the United States in years just ahead." Targets are expected to include such facilities as offshore oil drilling rigs, nuclear power plants, large computers and pipelines—among them the Alaska pipeline.

Corporations are unwilling to talk about what steps they are taking. (Kidnapping insurance becomes void if companies disclose that they have it.) But the quest for protection has resulted in a growing industry that supplies anti-terrorist and anti-kidnapping devices.

There is a firm in Texas that converts conventional cars to armored vehicles for $30,000 and more.

New paraphernalia is coming on the market almost daily, from a minuscule beeper transmitter that can be hidden in the heel of a shoe, to personal tear-gas aerosol bombs, to letter-bomb detection devices.

But Timothy Walsh, a security consultant, contends that all the paraphernalia in the world is of no use against attacks on corporations if they and their executives continue to stick their necks out.

"Corporation executives must deal with their vulnerability," he said. "They must maintain a low profile. They must be unpredictable. They should alter their schedules all the time."

Terrorist Types

He said that corporations are dealing with two kinds of terrorists. Each, he says, requires a somewhat different response. First, there is the terrorist who is politically motivated. He is usually the more dangerous, according to the consultant, because his only ambition is the success of his mission. He does not care how many people are killed, including himself.

The criminal terrorist is relatively new to the scene, Mr. Walsh said. He has found that the rewards can be great.

Experts say that U.S.-owned companies should try to lose their American identity overseas. They say foreign companies in the United States do this.

At home, they advise, corporate executives should not grant interviews with newspapers when moving into a new community, and they should avoid such eye-catching details as putting distinctive license plates on their cars or names on private airplanes.

The demand for protection has also helped the business of security firms, which supply everything from guards to advice.

Portugal, to Help Economy, Orders A Program of Forced Savings

LISBON, Nov. 14 (AP).—The government has announced a program of forced savings affecting hundreds of thousands of persons in an attempt to rebuild the economy.

Premier Mario Soares's three-month-old minority Cabinet said one-fourteenth of all income over 120,000 escudos ($3,960 a year would have to be converted into long-term government bonds that will begin to pay interest in 1978. The government said only 7,000 escudos ($223) of the traditional extra-month's salary awarded at Christmas could be taken in cash.

With Portugal's national minimum wage pegged at 4,500 escudos ($149) a month, the measures were expected to hit mostly the well-to-do. They were softer than those outlined by Mr. Soares in September, which set the cut-off point for the Christmas bonus at 5,000 escudos ($165).

Economic Planning Minister Antonio da Sousa Gomes said recently that tough.. measures might be implemented after the first of the year.

Mr. Soares has unveiled other austerity moves to restore discipline in the factories, curb wage increases and raise import tariffs. The package has come under fire both from the Communists and from radicals within his own party.

Ulster Peace Unit Plans New Drive

BRISTOL, England, Nov. 14 (AP).—A leader of Northern Ireland's peace movement, Mrs. Betty Williams, told 6,000 sympathizers here yesterday that the campaign would start a new phase after a rally in London Nov. 27.

"We have a few surprises up our sleeves," Mrs. Williams, a 32-year-old Roman Catholic housewife from Belfast, told the group after leading them on a march through this port city in southwestern England.

She said the London rally would mark the end of a series of marches that the peace movement has held in major cities throughout Britain. The new phase, she said, would be based mainly in Northern Ireland.

Options? Listen.

The option market offers both conservative and speculative investors a wide range of market strategies. For the conservative investor, the selling of options against stock you now own or may want to own can offer an additional yield on investment. In addition, it can offer you protection of equity positions and act as a partial hedge against inflation. Those investors wishing to speculate may be attracted by the leverage and predetermined dollar risks of option buying also available in this market place.

E.F. Hutton has been a major participant in the listed option market since its inception. And we have established many services which can help investors develop appropriate option strategies including an options advisory service, daily option commentary available through our Account Executives, and theoretical option price computer models.

For a copy of our latest bimonthly Options Research Report, write us at Box 444, New York, N.Y. 10004. We will enclose an Options Clearing Operation Prospectus to help you determine the inherent risks and potential rewards of options trading.

CROSSWORD — *Edited by Will Weng*

ACROSS

1 Like France's south coast
6 Canter or trot
10 Rhyme scheme
14 De Lesseps's concern
15 —— and shine
16 Prefix for phone or cycle
17 TV soaper
20 Music combo
21 Ilka or wild goose
22 Northern native
23 Narrow: Prefix
24 African insect
25 Companion of cease
28 Grain product
30 Business-letter abbr.
31 Eldest, in France
32 Water body: Abbr.
35 TV soaper
40 Superlative ending
41 Time of day
42 Yellow Brick, for one
43 Delta deposits
44 Secret and foreign
46 Having branches
49 Experts
50 Popeye's friend
51 Whole components
53 Spanish title: Abbr.
56 TV soaper
59 Tech graduate: Abbr.
60 Incubator sound
61 Put into force
62 Durbeyfield
63 Caps
64 House spirits

DOWN

1 Educ. institute
2 Miss Pitts
3 Preposition
4 Relative of olé
5 Takes a choice
6 Painful sound
7 Hangs out to dry
8 Man or Pines
9 Mack
10 Charm
11 Left-Bank wear
12 —— Del
13 Moisten a roast
18 Stimulate
19 Cornstalk part
23 Chant
24 Partner of a-ling
25 Engagement
26 Biblical endings
27 Proof word
28 Black-ink items
29 Japanese coin
32 Classic struggle
33 Pronoun
34 Crack trains: Abbr.
36 One who brings together
37 Captive of Hercules
38 Miss Lamour, to friends
39 Upsets
43 String addicts
44 Dada and pop
45 First four N.T. books
46 Synonym man
47 Coeur d' ——
48 Fine vases
49 Stage pieces
51 Legal move
52 Throaty sound
53 Take the lead
54 Yellow, white or black
55 Heights: Abbr.
57 Relevant
58 —— fix (stymied)

A GOOD AGE

By Dr. Alex Comfort. Crown. Illustrated. 224 pp. $9.9

Reviewed by Anatole Broyard

"UNINTELLIGENT, unemployable, crazy and asexual"—this is how our society, according to Dr. Alex Comfort, tends to see old people. And it is a self-fulfilling prophecy, for, in many cases, the old accept the description and impersonate it. More than the natural physical decline that comes with age the author claims, the old are suffering from "sociogenic" decay.

What, exactly, does it mean to be old? Comfort, who worked as a pioneering gerontologist for 25 years, is in an excellent position to tell us, and in "A Good Age," he does. The human brain, he asserts, "does not shrink, wilt, perish or deteriorate with age. It normally continues to function well through as many as nine decades." The reason old people do not respond well to intelligence tests lies in the fact that these tests have usually been devised for young people, often emphasizing speed of response. Also, old people are inhibited in testing by the fact that they feel themselves to be on the defensive.

Memory, Comfort tells us, does not fail in old age. It simply takes longer to respond, as the reflexes do. The "blunting" of the mind that is considered characteristic of the old is attributed by the author to a number of factors that have nothing to do with the biology of age, but with overmedication, especially the use of tranquilizers, with depression resulting from lack of contact and loss of social standing, with a rusting away of personality through idleness.

Quite apart from the many famous cases of uninterrupted high-level functioning of old people in the arts and sciences, Comfort points out that when the elderly were brought out of retirement during World War II and given difficult, responsible jobs, they generally performed them well.

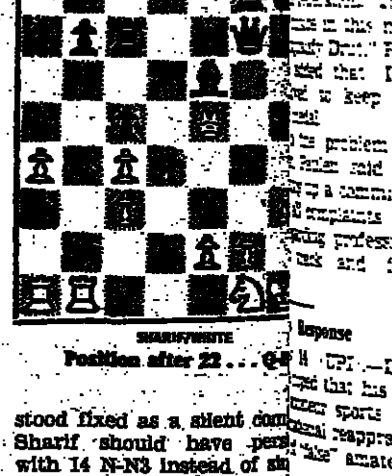
In "A Good Age," the author views the undervaluing of the old as a relatively recent phenomenon and a peculiarly American one, based on an overvaluing of youth. The present generation of old people were taken by surprise, he believes, and have not yet succeeded in organizing an adequate resistance to the creaking stereotype projected [on] them. In the future, he obs[erves,] when you and I are old, w[e will] not take it so quietly. Al[ready] there is an organization [called] the Gray Panthers which [op]poses all forms of "agis[m"] unjustified putdowns.

Comfort cites evidence [to the] effect that learning ability [is not] impaired at 60, that correc[t exer]cise can help to keep the [body] vigorous and attractive; th[at an] active sex life is an integra[l part] of one's sense of self [and is] theoretically possible at a[ny age.] Sex, especially when it [is ac]companied by love, is one [of the] healthiest forms of "e[ngage]ment" in the old. Diseng[agement] at any age is damaging.

Author of the best-sellin[g "Joy] of Sex," Comfort has pro[ceeded] quite naturally to the joy[s of age.] But while most of his [ideas] are both useful and rea[sonable,] he sometimes seems [a bit] optimistic in both of the[se.] He repeatedly talks in "[A Good] Age" of a "new career" [for peo]ple who have retired at [65. It is] not as easy as he seems [to envi]sion it, and he gives few [concrete] examples of the forms su[ch careers] might take.

A man who writes two [books] about joy in the 1970s [is doing] what might be called a p[ublic service] in favor of the positive. [He] sees the identity crisis o[f mid]dle age as another adole[scence,] a "second opportunity" [and a] life in a passionate embra[ce. This] is a splendid idea, yet th[ere is] something just a bit overw[rought] in the way the author prop[oses it.] He seems not to realiz[e that] what he is suggesting requ[ires an] effort not very far short of [moral] and physical heroism.

Let us have heroism an[d] romance by all means, [if we] can. Let us also have ce[n]ters for the old where th[ey can] find companionship and e[ven] to rehearse their human[ity, since] the family no longer welcom[es the] old as it once did, there [is] can take its place. Wh[ile we] cannot choose our relativ[es, we] can choose our friends. [And we] can, and should, choo[se a] second occupation, for mo[re than] two weeks of retirement is [not real]ly better, in Comfort's eye[s, than] standing around in the co[rner.]



Gerontology, says the [author,] has been relatively [neglected] largely because the old a[re not] powerful enough, or rich e[nough,] to support it. This situati[on will] probably improve, howev[er, be]cause contemporary phil[osophy] and sociology are more [apoca]lyptic or death-consciou[s than] they once were. Also, m[any of] today's young seem to have [taken] up an early acquaintan[ce with] decrepitude.

Anatole Broyard is a book reviewer for The New Yo[rk Times].

CHESS — *By Robert B[yrne]*

BYRNE/BLACK

SHARIF/WHITE

Position after 22 . . . Q-[B2]

It is not a good idea to let yourself in for doubled pawns in the absence of clear-cut reliable compensation. On those occasions when a player succeeds with them, or at least when he claims such, it is more likely that he made it in spite of them. Naturally, all doubled pawns are not created equal. Without considering the variety of piece placements that can go with them, it makes a great difference whether the foremost (and, hence, most vulnerable) of the two is protected by one of its own pawns. If it is not, it will be extremely awkward to defend.

It is not that such a pawn must be lost, but what the renowned French-Polish theoretician, Savielly Tartakover, said about the isolated pawn—it spreads gloom all over the board—applies here too. On the first board in the first round of the Olympiad in Haifa, Israel, M. Sharif of Iran tried to revise a formation against my Nimzo-Indian defense that was used by Alekhine once or twice in the 1930s but 40 years has not improved the vintage and I scored a point by devouring a doubled pawn. Sharif's 5 P-KN3, to fianchetto the King Bishop, neither enables White to advance strongly in the center, nor to prepare for a kingside attack. Consequently, Black can afford the time for 5... N-K5 and the doubling of the QBP's with 6... BxN.

The Alekhine plan that Sharif was following aimed at inhibiting Black's most aggressive development, a counter fianchetto of the Queen Bishop. Thus, after 12 Q-K3, I could not play 12... P-QN3 because of 13 PxP, NPxP, 14 N-K5, PxN, 15 BxN, winning the KP. Nevertheless, the modest, yet flexible 12... B-Q2 left Sharif without any reasonable perspectives for obtaining the initiative, while White's doubled QBP's stood fixed as a silent com[plaint.]

Sharif should have pers[isted] with 14 N-N3 instead of sim[plify]ing with 14 BxN, RxB. P[erhaps] he had looked ahead to th[e posi]tion after 16... P-K4 and [wrong]ly assumed that he could [open] the game by 17 P-Q5, on[ly] noticing that 17... B-R4 [follow]ed by 18... P-B4 would g[ive] a powerful attack.

With 18 N-B1 and 19 Q-[Q2, he] hoped to get back into th[e game] with 20 N-K3 and 21 N-Q[5, but] he had not reckoned wi[th the] sharp pawn sacrifice 19... [P-B5.] 20 Q-Q5ch, B-K3. After 21 [QxKP,] PxP, 22 RPxP, Q-B2, Sharif [could] not play 23 Q-K3, BxP, 24 [...] since 24... R-K1, 25 Q-B[...] wins a decisive pawn. [23] Q-B4 also surrendered [a pawn] after 23... QxQ, 24 PxQ, R[xP, 25] N-K3, BxP, though the roo[k-and-]pawn ending emerging fr[om 26] NxB, RxN gave Sharif his [only] hope. Yet he could not h[old] and after 46... P-B6, he h[ad to] resign since the king-and[-pawn] ending that comes up foll[owing] 47 K-B6, R-B2, 48 P-K6, [...] 49 P-K7, RxP, 50 KxR, [...] R-R1, P-B8/Q, KxR is unte[nable.]

Beat Redskins, 12-9

Giants Break 9-Game Losing Streak

EAST RUTHERFORD, N.J., Nov. 14 (UPI).—Joe Danelo's 50-yard fourth-quarter field goal, longest of his career and his fifth of the game, gave the New York Giants a 12-9 victory over Washington today for their first triumph in 10 games this season.

Danelo booted a field goal in the first quarter to snap a string of eight victories by the Redskins over the Giants and a personal string of 15 for Washington coach George Allen. Danelo's winning boot came with 4:32 left in the game to break the longest losing streak in the Giants' history, even though the team now has gone 18 quarters without scoring a touchdown.

Joe Moseley provided the only points for the Giants with field goals in each of the first three quarters as the New York defense extended its string to 10 quarters without allowing a touchdown.

It was also the Giant defense that sealed the victory when Mike Sidenke made an interception in the end zone of a Joe Theismann pass with 34 seconds left in the game after the Redskins had marched 52 yards in nine plays to the New York seven-yard line. Danelo earlier booted field goals of 30, 26 and 39 yards, and Moseley hit from 41, 31 and 43 yards as the two teams tied an NFL record with 11 field goals.

The victory was engineered by New York quarterback Norm Snead, who, though he completed only 12 passes in the game, hooked Craig Morton, who suffered a severe abrasion on his throwing arm in last week's 9-3 loss to Dallas.

Snead marched the Giants 78 yards in 16 plays, not once throwing a pass, to set up the game-winning field goal by Danelo, who was picked up on waivers from Green Bay by the Giants a week before the season began.

Jets 24, Buccaneers 0

In New York, Joe Namath came off the bench late in the first quarter to spark a 24-point first half and New York's defense burned in its first shutout in 13 years as the Jets routed Tampa Bay, 24-0.

Namath threw for one touchdown and set up two others as the Jets, who had scored an NFL low of only 76 points in nine previous games, registered their biggest offensive outburst of the year. It was New York's third victory against seven losses and first shutout since 1963. The Bucs fell to 0-10.

Clark Gaines ran 14 yards for one TD, Namath hit Rich Caster with a three-yard TD pass, Pat Leahy kicked a 21-yard field goal and Steve Davis ran five yards for a TD as the Jets ran up a 24-0 halftime lead. Lou Piccone's 60-yard punt return for a TD made it 31-0 early in the second half and Leahy added a 30-yard field goal in the last period.

Namath entered the game with two minutes left in the first quarter after starter Richard Todd faltered. New York scored on all four series Namath directed. Gaines, who finished with 103 yards, scored on Namath's first call, slashing in from 14 yards out after the Jets' Phil Wise had recovered Louis Carter's fumble there.

Browns 24, Eagles 3

At Cleveland, Brian Sipe threw two touchdown passes and the Cleveland defense bottled up the Philadelphia defense to give the Browns a 24-3 victory over the Eagles.

Sipe hit Reggie Rucker with a 20-yard scoring throw for Rucker's seventh touchdown catch of the year and threw a nine-yarder to Paul Warfield to lead the Browns to their fifth victory in their last six games as Cleveland remained in contention for a playoff berth.

The victory left Cleveland, 6-4, holding second in the AFC Central race, while Philadelphia, 3-7, remained fourth in the NFC East.

The Browns' defense, which has allowed only 81 points in the last six games, sacked Eagles quarterback Mike Boryla six times in holding the Eagles to Horst Muhlmann's 32-yard field goal.

The Cleveland defense also contributed a touchdown, Ron Bolton's 37-yard interception return, and set up Don Cockroft's 32-yard field goal with Thom Barden's interception.

The Browns also were in scoring position two other times, but Cockroft was short from 50 yards and wide from 42 yards out.

In the first half, when the Browns took a decisive 10-0 lead, Philadelphia crossed midfield only twice.

Clarence Scott and Bob Babich also intercepted Boryla passes as the Browns put together their best defensive effort of the season.

Dave Hampton's 59-yard run in the third quarter, which set up Muhlmann's field goal, was the Eagles' only offensive play of more than 17 yards.

Falcons 21, 49ers 16

At Atlanta, Scott Hunter connected with Albert Jenkins for a pair of fourth-period touchdown passes to give the Falcons a 21-16 upset over San Francisco in the rain.

Hunter and Jenkins gave the Falcons a 14-10 lead 13 seconds after the final period began with a 34-yard touchdown pass and then added the clincher on a 21-yard scoring play with 9:22 left in the game.

The underdog Falcons marched 63 yards after the opening kickoff to take the lead on a five-yard run by Haskel Stanback. The 49ers got their only first-half points on a 27-yard field goal by Steve Mike-Mayer midway through the second period.

San Francisco grabbed the lead at 10:07 of the third period on a 40-yard pass from Jim Plunkett to Gene Washington. But the 49ers were unable to get out of their own territory again until late in the final period when Plunkett threw a 10-yard touchdown pass to Washington with 1:55 left to play.

The Falcons had opportunities to increase their first-half lead when they drove to the San Francisco seven-yard line early in the second period and then to the San Francisco five with barely a minute left in the half, but Nick Mike-Meyer missed field-goal attempts of 24 and 22 yards.

The 49ers drove from their own 23 all the way to the Atlanta 10 after the second Hunter-to-Jenkins touchdown pass. But a holding penalty pushed them back to the 20 and they lost possession on downs after three straight pass incompletions.

San Francisco quickly got the ball back, however, and drove 52 yards to close to within five points of the Falcons on Plunkett's pass to Washington.

Rams vs. Cardinals

NEW YORK, Nov. 14 (NYT).—The important game later today is in Los Angeles, matching the St. Louis Cardinals and the Rams. A defeat for either team will damage the drive to the post-season playoff and both are in a precarious position as to personnel.

The Rams are switching quarterbacks, Pat Haden for James Harris, and when a contending team does that in the 10th week of the season the move hardly reflects confidence.

Chuck Knox, the coach, protected Harris like a mother hen for three seasons before caving in. Knox went down fighting, saying that the move in no way reflected on the ability of Harris but that Haden deserved the chance "to show what he can do."

The Cardinals will be without Mel Gray, the wide receiver who has made so many big plays. He is recovering from surgery to repair a broken nose.

Gray is one of the few who can change an opponent's defensive plan. Terry Metcalf, the other big-play maker, is easier to cover on pass plays when Gray has not pulled half the defensive secondary 30 yards down the field.

This game, however, will be won on the line of scrimmage, like so many others. So the focus will be on the Cardinals' offensive line, rated the best in the league when blocking for Metcalf or Jim Otis, or protecting the passer, Jim Hart.

Offensive linemen have been characterized as meek and methodical compared to the brawling type who play the defensive line positions.

But Jim Hanifan, the offensive line coach, believes his charges are exceptions. He has brawlers in Dan Dierdoff, Conrad Dobler, Roger Finnie, Bob Young and Tom Banks.

American Is Victor In Melbourne Golf

MELBOURNE, Nov. 14 (UPI).—American golfer Mark Lye surged home today with a 5-under-par 67 to take the $184,500 Champion of Champions Tournament at the Victoria Club by a stroke in a drama-charged finish.

Lye notched a birdie at each of the last two holes to squeeze out the early leader, Simon Owen of New Zealand, with a tally of 276—12 under the card—for the winner's check of $36,000.

In Stockholm Tennis

Connors, Orantes Are Upset by Cox

STOCKHOLM, Nov. 14 (UPI).—Unranked 33-year-old Briton Mark Cox, who upset top-seed Jimmy Connors in yesterday's semifinals, earned his place in the tennis record books today when he defeated No. 3-seed Manuel Orantes of Spain, 4-6, 7-5, 7-6, to capture the $155,000 Stockholm Open.

Cox won the tiebreak, 7-3, after rallying from 3-5 down in the second and third sets to take the $24,000 singles championship.

"Whatever the word is, I'm more than surprised. I feel very lucky," Cox said. "It must be the top of my career."

In one of the most thrilling matches in the eight-year history of the tournament at Stockholm's Royal Tennis Hall, Cox upset Connors of the United States in the semifinals, 7-6, 3-6, 7-6, snatching two tiebreaks from the Forest Hills champion for the first time in three years.

"Within the limitations of my own game, I may have played better against Orantes," Cox said. "I was more forceful today."

UPI.
Mark Cox on his way to Stockholm title.

After losing the chance to repeat his 6-4, 6-4 victory over the Briton at last week's Dewar Cup in London, Orantes took the lead 5-3 with three match points in the final set. "But didn't make it," the 27-year-old Spaniard said.

Although Orantes rallied, serving four beautiful shots to the Briton's backhand to take the crucial 12th game, 40-0, he lost the contest of nerves and speed on the fast tile court.

Nevertheless, "I think I played well," said Orantes, who never has won an indoor tournament. "And it's more important for me to play well than to win. I get very depressed when I play badly."

Orantes had easily defeated No. 8-seed Brian Gottfried of the United States, 6-2, 6-2, in the semifinals.

Orantes said he was surprised by his quick victory over Gottfried, whose performance was pale in comparison to his 6-2, 4-6, 7-6 quarterfinal upset of No. 2-seed Bjorn Borg of Sweden on Friday.

In Hong Kong Tennis

Rosewall Beats a Passive Nastase

HONG KONG, Nov. 14 (AP).—Veteran Ken Rosewall of Australia won the $75,000 Hong Kong Tennis Classic today when temperamental Romanian Ilie Nastase threw away the deciding set, letting Rosewall score points without challenge.

Rosewall won $10,500 for his 1-6, 6-4, 7-6, 6-0 victory. Nastase, seeded first in the tournament, was booed by spectators when he received his prize of $5,250.

The 30-year-old Nastase, famed for his court antics, appeared irritated when the umpire asked him to serve again during the second game of the fourth set because Rosewall was not ready for his initial service. Nastase, instead, slammed the ball skyward.

That brought a wave of boos from many of the 7,000 spectators, and several shouted clearly: "Play tennis. We paid to see the match."

Nastase responded by standing still on the court during Rosewall's services, allowing the Australian to score points without challenge.

'Childish' Behavior

Rosewall, 42, said he was happy to win but sorry that it had to occur under such circumstances. "He didn't show any courtesy," said Rosewall, who described Nastase's actions as "rather childish."

A spokesman for the Hong Kong Tennis Association said that no protest to the International Tennis Federation over Nastase's performance is planned.

Nastase easily won the first set in less than 20 minutes. But Rosewall rallied to take the second, relying on backhand shots.

In the third set, the two battled for every point, each putting on a masterful display of services, baseline drives and drop shots before Rosewall won it, 7-6.

The Americans went into the third day's play with a 3-1 lead and needing only one more match to wrap up the victory. But Rosie Casals had to retire against Virginia Wade after winning the first set, 6-3, and losing the second, 7-9.

Casals fell awkwardly at 5-5 in the second set and reinjured her already bandaged leg. Although she twice managed to hold her service, she could not hold on for long and after losing the set, she hobbled off the Crystal Palace court to a sympathetic ovation.

Wightman Cup to U.S.

LONDON, Nov. 14 (UPI).—The United States reclaimed the Wightman Cup from Britain yesterday after two years when Chris Evert won her second singles to clinch the best-of-seven match.

Evert, who has never lost a Wightman Cup match, had to come from behind to down Sue Barker, 2-6, 6-2, 6-2. Then Ann Kiyomura and Mona Guerrant defeated Britons Sue Mappin and Lesley Charles, 6-2, 8-6, to give the U.S. team an overall 5-2 victory.

It was the 39th time that U.S. women have won the cup which Britain had won 9 times, including the last two years.

Drut Banned by IAAF For Accepting Money

AMSTERDAM, Nov. 14 (Reu-)—Olympic gold-medalist Guy of France was banned to-from amateur athletics by International Amateur Ath-Federation because he ac-ed illegal payments.

e president of the IAAF, an Paulen, said at the end of ree-day IAAF meeting here Drut had admitted taking ents in a letter sent by him the French Athletics Federa-on Oct. 14.

Drut, who won the 110-meter dles at Montreal, is no longer ible to compete in amateur letics, Paulen said.

It is a very sad case, but we st go by the rules and reg-ions of the federation. There s no other choice in this mat-r but to disqualify Drut," Pau-said. He added that Drut ld be allowed to keep his pic gold medal.

Referring to the problem of ofessionalism, Paulen said the F was setting up a committee investigate all complaints and ications regarding profession-m among track and field letes.

Drut's Response

PARIS, Nov. 14 (UPI).—Drut today he hoped that his ex-sion from amateur sports will e an international reappraisal the rules of "false" amateur-m.

What I wish above all is that measure taken regarding me ld bring out the anachronism he current rules regarding teur sports," Drut said.

dare to hope that that which pened today can serve as an mple and that the interna-al authorities will find now ves for an indispensable re-n of the rules of amateur-m.

e athlete said that he had ntention of seeking rehabili-n because I am convinced I not commit dishonest acts." ut said, "After my public arations on false amateurism after I renounced amateur petition, I took all respon-ity. The International Ama-Athletics Federation in ex-cluding me took a measure which I consider quite normal."

Michel Marmion, president of the French Athletics Federation, said, "This sanction against Guy conformed to what I expected."

Drut said, "The important thing for me was that I can keep my gold medal and Olympic title from Montreal and I find that a consolation."

Pitt Overcomes Errors and W. Virginia to Assure Bowl Trip

By Gordon S. White Jr.

PITTSBURGH, Nov. 14 (NYT).—Pittsburgh found that being king of the hill is a precarious position as the undefeated and untied Panthers, ranked No. 1 in the nation, overcame their own mistakes and jitters yesterday to beat West Virginia, 24-16, thus clearing the way for an all-expenses-paid trip to a bowl game.

Tony Dorsett helped save Pitt from a shocking reversal as the tailback scored the three Panther touchdowns and rushed for 199 yards. But the senior, who is the prime candidate for the Heisman Trophy, was expelled in the final minute of the game—the first time in his varsity career—after both teams became involved in a melee in front of the Pittsburgh bench.

Sitting through it all were representatives of the Orange, Sugar and Cotton Bowls. The Panthers can go to any of the three. The invitations, and Pitt's decision, cannot take place until 6 p.m. next Saturday. Pitt has an open date that day.

Pitt has one regular season game remaining—against Penn State, Nov. 26—so the Panthers should still be No. 1 and will surely be unbeaten when they make their bowl choice known. The Orange and Sugar Bowls appear to have an edge on the Cotton Bowl in Pitt thinking.

Pitt-West Virginia games have always been hard-fought and the Mountaineers came into this game a heavy underdog and hit hard right from the start.

Dorsett, meanwhile, did his thing, scoring on runs of 17, and 30 yards.

With 29 seconds to go, he ran left and was smothered under a gang tackle. He came up fighting, slammed the ball to the ground and swung. The field was immediately full of flailing football players.

No one was seriously hurt, but Dorsett, the first to throw a punch, was out of the game. He walked to the dressing room to cheers from most of the 56,500 fans.

Associated Press
Pitt's Tony Dorsett charges for gain against W. Virginia.

Pitt's other score came on a 27-yard field goal by Carson Long.

Dorsett did his weekly rewrite on the record book, increasing his college career rushing mark to 5,855 yards with one game to go. He became the first college player to carry the ball more than 1,000 times in a career. His 33 attempts yesterday gave him 1,036 rushes in four seasons. He raised his career record all-purpose running to 6,391 yards (rushing, pass receiving and kick returns).

But while Dorsett again excelled, other Pitt players lost five fumbles to the Mountaineers, who scored after each of three of these costly turnovers—two touchdowns and a field goal.

Matt Cavanaugh, the Pitt quarterback, lost three fumbles to West Virginia. He suffered a badly bruised passing elbow early in the game. His swollen right arm was drained at halftime by the team doctor, but he came back to finish the battle.

UCLA 45, Oregon St. 14

CORVALLIS, Ore., Nov. 14 (AP).—Second-ranked UCLA scored three touchdowns in the second quarter, two on runs by backup halfback James Owens, and rolled to a 45-14 Pacific-8 Conference victory over Oregon State.

Southern Cal. 20, Wash. 3

At Los Angeles, Vince Evans's passing provided a touchdown and set up another and Glen Walker kicked two field goals as third-ranked Southern California downed Washington, 20-3.

The Trojans' victory sends them into next weekend's Pacific-8 title showdown against UCLA with a perfect 6-0 conference record.

Michigan 38, Illinois 7

At Ann Arbor, Rob Lytle scored three touchdowns and became Michigan's all-time rushing leader as the fourth-ranked Wolverines rolled to a 38-7 victory over Illinois.

Lytle scored on a five-yard pass from quarterback Rick Leach in the second quarter, then scored on runs of 13 and 3 yards in the third period as Michigan raised its conference record to 6-1 and 9-1 overall, heading into next Saturday's showdown championship game at Ohio State.

Ohio St. 9, Minnesota 3

At Minneapolis, the Ohio State defense, which has allowed only two touchdowns in its last four games, stopped two Minnesota scoring drives in the second half as the Buckeyes hung on for a 9-3 Big-Ten victory over the Gophers.

Notre Dame 21, Alabama 13

At South Bend, Notre Dame continued its mastery over Alabama as Rick Slager passed for 208 yards in the first half, including a 56-yard touchdown bomb to Dan Kelleher, and led the Irish to a 21-13 victory in the first regular-season meeting between the two teams.

Notre Dame built a 21-7 halftime lead but survived a series of second-half scares and did not nail down the victory until Jim Browner intercepted Jeff Rutledge's pass in the end zone with 4:17 left and halfback Pete Cavan wide open and waving for the ball across the field. Rutledge, however, never saw him.

The triumph gave 18th-ranked Notre Dame a 7-2 record and kept its hopes alive for a major bowl bid. Alabama, which was ranked 10th, had a five-game winning streak snapped and dropped to 7-3 overall, the most losses for the Crimson Tide since 1970.

Iowa St. 37, Nebraska 28

At Ames, Iowa, Dexter Green ran for two touchdowns as Iowa State surprised ninth-ranked Nebraska, 37-28, to take a share of the Big-Eight Conference lead.

Yale 21, Harvard 7

At Cambridge, junior halfback sensation John Pagliaro, held in check in the first half, broke loose after the intermission and powered Yale to a 21-7 victory over Harvard, giving the Eli's a share of the Ivy League football championship with Brown.

Brown 28, Columbia 17

At New York, Brown rallied from a 10-point halftime deficit to defeat Columbia, 28-17, as quarterback Paul Michalko directed the Bruins to three second-half touchdowns.

Army 29, Colgate 13

At West Point, quarterback Leamon Hall set two more Army records and threw three touchdown passes, leading the Cadets to a 29-13 triumph and ruining Colgate's bid for an undefeated season.

Tenn. 32, Miss. 6

At Knoxville, sparked by Andy Spiva and Jeff Moore, Tennessee's defense hit Ole Miss for 10 turnovers to lead the Vols to a 32-6 Southeastern Conference victory.

Penn St. 21, Miami 7

At Miami, quarterback Chuck Fusina threw two touchdown passes in the second half to lead Penn State to a 21-7 victory over University of Miami and virtually assure the Nittany Lions of a bowl invitation.

Rutgers 29, Maine 20

At New Orleans, a humiliated Rutgers defense came alive late in the game and quarterback Bert Kosup scored on a one-yard sneak to whip Tulane, 29-20, and keep the nation's longest collegiate victory streak alive at 17 games.

Navy 34, Georgia Tech 28

At Annapolis, Navy tailback Joe Gattuso ran 25 yards for a touchdown and teamed with quarterback Bob Leszczynski on a 75-yard pass for another score as the Midshipmen defeated Georgia Tech, 34-28, in a wide-open defensive battle.

NBA Pistons Win 5th in Row, Giving Bulls 7th Straight Loss

CHICAGO, Nov. 4 (UPI).—Ralph Simpson scored 24 points last night to lead the Detroit Pistons to their fifth straight NBA victory, a 106-103 triumph over the Chicago Bulls.

It was Chicago's seventh straight loss.

The Pistons battled back from a 13-point deficit midway in the third period to gain the lead for the first time, 77-76, in the opening seconds of the final period.

Chicago built up a seven-point lead, 92-85, but Detroit came back again at 5:55 on a Simpson jumper, making it 94-93. A basket by Chris Ford with 3:27 remaining put Detroit ahead for good.

Braves 118, Celtics 107

At Buffalo, second-year pro John Shumate and rookie Adrian Dantley combined for 49 points as the Braves cruised to their fifth straight victory, 118-107, over Boston.

Shumate scored 26 points and hauled in 12 rebounds and Dantley added 23 points and 10 rebounds for Buffalo. Dantley hit on 11 of 15 shots from the floor and Shumate 11 of 17.

Warriors 128, Pacers 112

At Oakland, veteran guard Phil Smith and rookie center Robert Parish combined for 24 fourth-quarter points to give Golden State a 120-112 victory over Indiana.

The victory snapped a four-game losing streak for the Warriors and raised their record to 4-6. Indiana is 4-8.

Nuggets 128, Kings 94

At Denver, David Thompson scored 23 points in 25 minutes and the Nuggets rebounded from their first loss of the season with a 128-94 rout of Kansas City.

Forward Paul Silas became the 12th NBA player in history to notch more than 10,000 points and 10,000 rebounds when he moved his career scoring total to 10,000 with 18 points. He also added 14 rebounds. Center Dan Issel had 16 points and Marvin Webster had a season-high 15 points and 12 rebounds as Denver upped its NBA record to 9-1.

Jazz 115, Hawks 86

At Atlanta, Pete Maravich scored 30 points to lead New Orleans to a 115-86 victory over the Hawks.

Maravich had 11 points in the first quarter as the Jazz opened up a tight game late in the period by scoring seven straight for a 33-23 lead.

76ers 114, Bullets 109

At Landover, Md., Julius Erving scored 10 of his 22 points in the fourth period to lead Philadelphia to a 114-109 victory over Washington.

The 76ers, who trailed 84-83 early in the final period, reeled off 16 consecutive points over a three-minute span to insure their second victory in as many nights over the Bullets.

Knicks 110, Bucks 97

At New York, Walt Frazier's 25 points and 19 by Phil Jackson enabled the Knicks to defeat Milwaukee, 110-97, despite a 29-point effort by Brian Winters.

New York led, 28-15, at the end of the first quarter, maintained a 56-43 advantage at the half and led, 84-76, at the three-quarter mark.

Cavaliers 103, Suns 90

At Phoenix, guards Jim Cleamons and Austin Carr led a Cleveland rally in the last six minutes as the Cavaliers took a 103-90 victory over the Suns.

Cleamons had eight points and Carr six as the Cavaliers outscored the Suns, 22-9, after an 81-81 tie with 5:55 remaining.

Nets 114, Rockets 110

At Houston, guards John Williamson and Nate Archibald combined for 69 points as the New York Nets defeated the Rockets, 114-110.

Williamson was the game's high scorer with 37 points, his career high, and Archibald finished with 32.

Spurs 113, Trail Blazers 101

At San Antonio, George Gervin broke loose for 33 points to spark San Antonio to a 113-101 victory over Portland.

Gervin connected on 11 of 15 field-goal attempts and 10 of 11 free throws. At one point in the second quarter, he scored 14 consecutive points, including two free throws that put the Spurs ahead to stay with 2:22 to go in the half.

Friday's Games

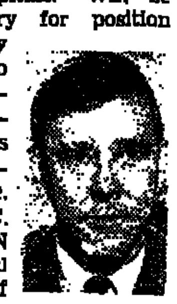
Economy Wins Match Against Italy TV Soccer

ROME, Nov. 14 (AP).—State-owned radio and television has announced the cancellation of plans for the live broadcast of Wednesday's soccer game between England and Italy to prevent mass absenteeism from work.

The broadcast was scheduled for all Italy, except Rome, where the match is to be held. It is a qualification contest toward the 1978 World Soccer cup in Argentina.

The announcement said that a tape of the game will be broadcast at 6:15 p.m. on the day of the game.



In the past, industries and public offices have reported up to 40 per cent absenteeism when major sports events were televised.

The Classified Ads

By Russell Baker

NEW YORK—SEEKS POSITION.—Urbane Man-of-World, eight years' experience in administrative posts, top contacts in Washington, Moscow, Peking, Cairo, other capitals. Will be available January for position of extraordinary responsibility. No second-rate offers please. Address C/O sources close to the Secretary of State, Washington, D.C.

Baker

FUEL BARGAIN—Beat rising oil costs. Tons of used speech texts available now, including denunciations of Washington, establishment politicians, etc. Will burn for weeks. Everything must go. Priced accordingly at 79 cents per ton. Send money order plus freight costs to Campaign Gas Fuels Inc., Plains, Ga.

CONGRATULATIONS—Always knew the Big Apple could put you over. Jimmy. Looking forward to joining you in a rousing chorus of "Moola Moola" at the president's ball. Abe Beame.

AUTHOR—Willing to write memoirs revealing hush-hush data, fascinating insights and miscellaneous information about most vital world events of past eight years. Will answer most frequently asked questions, who really prayed on knees in White House during impeachment crisis, etcetera. No publishing offer over $2 million too small to consider. Contact "H.K.", C/O officials traveling on the secretary's airplane. Dept. of State, Washington, D.C.

LOST—The Republican party, in the vicinity of 1954. When last seen, party was accompanying Sen. Joseph McCarthy and Generalissimo Chiang Kai-shek to an Indian-wrestling match with President Eisenhower. Send clues to Republican National Committee. Quickly. Please!

PERSONAL—This is to notify my friends that regardless of what they have not heard during the past four months, I am alive and well in the United States Senate. Teddy.

PROFESSOR AVAILABLE—Top Ivy League school credentials, witty and entertaining speaker, provocative academic writing style, expansive knowledge of world affairs, history, Georgetown (D.C.) parlors. Ideal for top TV commentator slot, publishing consultancy or international airline advisory position. Write: Highly placed diplomatic sources, C/O State Department, Washington, D.C.

NOTICE—I am no longer responsible for the statements of Sen. Robert Dole. Gerald Ford.

FOUND—A fully segregated church. Identifying characteristic: Astounding skill at self-camouflage. This church, though found just recently in Plains, Ga., was able to keep its nature hidden until last Oct. 31, despite being surrounded for weeks by scores of the nation's leading news reporters. Phone J.E. Carter Transition Office, Washington, D.C.

HELP WANTED—Aspiring executive needs ideas for defeating laws of economics. Special attention to ideas for cutting taxes without causing inflation, ending unemployment and providing more public services without raising taxes, similar insoluble problems. Write: J.E. Carter, Plains, Ga.

PERSONAL—Jimmy, if you will drop by AFL-CIO headquarters some evening I will tell you something you ought to know about Wall Street. George.

SOLID OPPORTUNITY—Intelligent, skilled master of international politics willing to serve as prime minister, president, king, generalissimo, junta leader for stable, wealthy, well-armed, aggressive nation in need of new leadership. Once-in-lifetime opportunity for down-at-heels countries like Britain, Italy in need of new blood. Write: Sources exceedingly close to Secretary Kissinger, State Dept., Washington, D.C. All replies confidential.

PRIZES GALORE—Members of the incoming administration, here is your chance to be the first to have a distinctive prize in your White House office. Simply finish, in 25 words or less, the sentence beginning: "The way I learned to love Washington and win the power struggle for a White House job was." Send your entry, along with a substantial sum of capital, to Hard-Nosed Brilliant Associates, Los Angeles, Calif., and we will send you a beautiful postcard-view decal of San Clemente suitable for mounting on your federal-issue water carafe. Act now before you become too hard-nosed and tough-minded for this gentle touch of sentimentality.

LONELY—Nice-looking male—father-type,—pipesmokes—likes football, checked suits, family life. Circumstances of leaving last job have led to sudden loss of many friends. Yearns for new pals. Available for guest visits to Palm Springs, Aspen, Sun Valley, Venice, Biarritz. Address: Occupant, the White House, Washington, D.C.

Smallpox in Somalia

ATLANTA, Nov. 14 (AP).—Eighteen new cases of smallpox, a disease nearly wiped out in other sections of the world, have been detected in Somalia in East Africa, the National Center for Disease Control reported.

Free from the rigid confines of compulsory routines and the subjective views of judges, (John) Curry, under the direction of (Twyla) Tharp, has constructed a seven-minute routine that he believes will capture what skating is supposed to be...

Ice-Skating as One of the Fine Arts

United Press International.

Britain's John Curry, figure-skating to a gold medal.

NEW YORK, Nov. 14 (NYT).—When John Curry first approached Twyla Tharp about breaking the ice with him, it was almost worse than preparing for an Olympic final.

"I was a bit nervous about working with her," the world and Olympic figure-skating champion said last week, recalling his meeting with the queen of choreography. "I was afraid I wouldn't be able to do the routines well enough."

Miss Tharp, who has blazed revolutionary trails in ballet and modern dance, had never been on a pair of skates.

"I was able to ask, 'Can you?'" she said, dramatizing their earliest discussions. "He said, 'Here's how.'" They were putting the polish on his routine at Madison Square Garden.

Figure skating finally has come of age in the United States. And with more skaters, rinks and clubs catering to the ambitious demands of recreation-minded Americans, the time may be right for something dramatic in the sport, such as carrying it one step beyond into the realm of performing art. Enter Curry, Miss Tharp and Superskates III, a fund-raising event for the U.S. Olympic Committee tomorrow night at the Garden.

Seven Minutes

Free from the rigid confines of compulsory routines and the subjective views of judges, Curry, under the direction of Miss Tharp, has constructed a seven-minute routine that he believes will capture what skating is supposed to be, not what is packaged into the "uncreative atmosphere" of competitions and ice shows.

The routine will begin and end on traditional curves and will include jumps and turns. But Miss Tharp's fascination with change of direction will be felt, along with her use of space and consideration for body movement.

"To skate this piece, it's like learning a whole new vocabulary," said Curry, who was associated with a classical style as an amateur. "There are elements and movements I haven't used before."

Many elements will be more subtle than dramatic, a chance for Curry to display how he feels about skating. But right-corner turns and a stress on making each move meaningful will eliminate what he feels is the tendency to create routines as "display places for tricks."

"I don't like ice shows at all," Curry said in an interview before his afternoon workout. "They're like vaudeville on ice. I don't think they use the skater well. They're aimed at a certain market and they succeed at that market. But for the skater, it's not particularly exciting. Just because a person turns professional shouldn't become the end of that person's creative ability."

Formed Group

After having swept gold medals at the Winter Olympics in Innsbruck and the world championships at Goteborg, Sweden, the 27-year-old Curry formed his own professional group. Because of his own love for dance, and a desire to develop and stretch his talent and also expand the sport's horizons, he got in touch with Miss Tharp.

They are an odd couple in an interesting way, after only three weeks together. Curry is British, has a somewhat self-effacing nature and looks like the boy next door in his navy blue pea coat. Miss Tharp, from Indiana, has been called "small, dark and intense" about her commitment toward what she calls "the artistic links between something possible and that which is beyond."

It was Miss Tharp who settled on the music for the routine, the Concerto for Trumpet in B flat by Albinoni.

"The horn related to the input of wind and the momentum of the skater," she said.

Curry's attempt to convey "what skating is all about" and a new tour headlined by Toller Cranston, the free-skating Canadian Olympian, could carry considerable long-range significance. In recent years much of the glamour in figure skating has gone to such gold-medal heroines as Peggy Fleming and Dorothy Hamill.

Figure-skating officials see a male push into the sport as similar to the belated acceptance of tennis as something more than a "sissy sport." Roy Winder, executive director of the U.S. Figure Skating Association, said last week that registered or competitive skaters had increased from 29,000 to 35,000 in the last five years and the number of clubs from 275 to 372.

The number of recreational skaters has shot up from 3 million to almost 4 million, according to Fritz Dietl, a member of the Ice Skating Institute of America.

"There are at least 500 to 600 more rinks now," said Dietl, who operates a rink in New Jersey. "And in my area alone, around Bergen County and North Jersey, we've had an increase from three to nine in the last two years."

From Figure Skating Association headquarters in Boston, Winder said:

"There's been a big upturn, particularly among the men. We may not get into the highest structure that goes with Olympic skaters, but among recreation skaters, there's a lot of them."

Curry was 7 years old when his mother took him skating for the first time; it "was love at first sight,' he says.

Supervised

"My early skating was supervised and my boots were not four sizes too large," he said. "And my mom didn't push me. Skating was the big treat of the week, something I looked forward to."

Curry believes many goal-oriented U.S. parents are too impatient and shoot for gold-medal greatness or nothing from their children by age 16.

"Skating should be enjoyable at all levels," he said. "For me, it's a total experience—mentally rewarding and aesthetically pleasing. If these qualities are not there, I wouldn't skate for very long. It would bore me."

Miss Tharp hardly needed any trips on the ice to satisfy her artistic appetite. But the sense of venturing into the unknown with a known quantity prompted her acceptance. She has been pleasure skating five times since starting the project, and says, proudly, "I can go forward very fast."

Associated Pr[ess]

Princess Marie-Astrid standing behind her father, Gr[and] Duke Jean, right, and Queen Elizabeth last Thurs[day].

PEOPLE: *Prince Charles Linked To Luxembourg Princess*

The London tabloid Sunday Mirror marked the 28th birthday of Prince Charles by linking him romantically with a European princess. The newspaper cited what it called "speculation among European royalty" that Charles plans to marry Princess Marie-Astrid, 22-year-old daughter of Grand Duke Jean, of Luxembourg. It said a state visit to the 999-square-mile duchy last week by Queen Elizabeth and Prince Philip followed by a private visit has led to renewed talk of a royal match. A possible bar to such a match could be Marie-Astrid's religion—she is Roman Catholic—and the law of England forbids a Roman Catholic or one who marries one on the throne. However, it quoted a lawyer that "only a few people in Rome might be upset" if she converted to Protestantism to marry Charles. Buckingham Palace declined to comment on the report.

In Cape Town, Miss South Africa, Cynthia Claasen, an 18-year-old colored (mixed race) beauty, has renounced her title and wants to leave the country, saying the republic disgusts her. She said she planned to leave soon to marry her white West German boyfriend Ernst Weinert. Such a marriage would be illegal under South Africa's Immorality Act, which forbids sexual relations between people of different races. The two had kept their love affair secret. "We have had to live like criminals. We have had to meet secretly at friends' homes. We cannot lead a normal life or go to a cinema or restaurant together. I am disgusted that I represented a country which makes a crime out of love," she said. Miss Claasen, who took part in the Miss Universe competition in Hong Kong earlier this year, said she would lose money by giving up her title, but wanted nothing more to do with what she te[rm]ed "sick" South Africa.

* * *

Miss Swaziland and Mauritius, meanwhile, have [with]drawn from next Thursday's [Miss] World beauty contest in Lo[ndon] on instructions from their [governments]. The contest [orga]nizer, Julia Morley, blamed [the] withdrawal on "blind preju[dice]" Sanroc, the anti-apartheid [group] which inspired the 17-n[ation] black walkout from this y[ear's] Olympic Games in Montreal, called for withdrawals.

* * *

A poll among the Frenc[h] to which personalities left [their] mark on the world during [the] last 10 years listed Pre[sident] Charles de Gaulle first and Secretary of State Henry [Kis]singer as second. Third o[n the] list of the IFOP poll for Larousse yearbook pub[lished] Saturday was the late Ch[inese] leader Mao Tse-tung, follow[ed by] deposed U.S. President Ri[chard] Nixon. Runners-up were late Spanish dictator Fra[ncisco] Franco, Soviet leader L[eonid] Brezhnev, former Israeli Pr[emier] Golda Meir, Uganda Pre[sident] Idi Amin, Cuban leader [Fidel] Castro, French President [Valéry] Giscard d'Estaing and [Pope] Paul VI.

Leonid Brezhnev with President Tito in Belgrade.

Rejecting Western Allegations

Brezhnev Denies Intention Of Interfering in Yugoslavia

By Murray Seeger

BELGRADE, Nov. 15.—Soviet Communist party chief Leonid Brezhnev moved quickly today to ... a crucial issue in an important series of talks with President Tito of Yugoslavia.

After a low-key reception in Belgrade, Mr. Brezhnev used an evening dinner party as a platform to respond to suggestions in a recent U.S. election campaign ... elsewhere in the West that the Soviet Union was preparing to invade Yugoslavia after the death of Marshal Tito, who is ... 84.

The Western leaders, Mr. Brezhnev said, "are trying to present Yugoslavia as a poor, helpless little Red Riding Hood whom the terrible, bloodthirsty wolf-aggressive Soviet Union is preparing to tear apart and swallow."

Friendly Relations

On the contrary, Mr. Brezhnev affirmed, the Soviet Union was firmly by the endeavor to strengthen and develop friendly relations with it on the basis of complete equality and mutual respect and confidence and non-interference in internal affairs."

Mr. Brezhnev's remarks seemed to catch the Yugoslavs off guard since they came openly after he and Marshal Tito had met for only two hours. The Soviet leader has made similar statements earlier but not in such colorful terms.

Arriving for the talks which could deeply influence the future of Yugoslavia, Mr. Brezhnev appeared pale and tired and was wearing his newly acquired hearing aid behind his left ear.

The health of both Communist leaders is one of the issues in the background of Mr. Brezhnev's ... visit to Yugoslavia in five years.

Mr. Brezhnev, who will be 70 next month, is considered a hard-liner moderate by the Yugoslavs. They are seeking from him a reaffirmation of a Moscow pledge made in 1955 to guarantee Yugoslavia's position as an independent, nonaligned state with its own form of decentralized Communist system. Belgrade fears a successor might not be as tractable as Mr. Brezhnev.

On the other side, the Soviet delegation apparently believes the current negotiation will be the last of its type in which Marshal Tito will participate. The elderly leader is under orders to reduce his public activities and travel.

Khrushchev Action

In his toast at an official dinner for Mr. Brezhnev, Marshal Tito emphasized the 1955 statement, issued by Nikita Khrushchev when he restored relations with the Yugoslav Communists.

The statement assured "independence, sovereignty, equality, noninterference, respect for the different paths of internal development and peculiarities of the international positions of our countries and parties," Marshal Tito said.

Continuing these principles into the future, he added, "constitutes the best guarantee for a successful development of comprehensive cooperation between our two countries for our mutual understanding and confidence."

The Yugoslavs want a new guarantee from Moscow not only because of the age and failing health of both leaders but also because they believe the Soviet Union in the last six months has

(Continued on Page 2, Col. 6)

Peking Shaken By Worst Quake Since Last July

PEKING, Nov. 15 (Reuters).—The Chinese capital was rocked tonight by the worst earthquake since last July's, but there was no immediate sign of damage or casualties.

For about 20 seconds, buildings swayed, windows rattled and wide cracks opened and closed in high-rise apartments. Thousands of Chinese grabbed their bed quilts and rushed to the freezing streets.

But there was no mass evacuation, and an hour after the shakeup the vast majority of Peking's 6 million people had returned to their homes.

EEC Plans Ties With Comecon

But It Rules Out Trading as Blocs

By David Haworth

BRUSSELS, Nov. 15 (IHT).—Common Market foreign ministers agreed here today on the first steps toward developing ties with the economic organization of the Soviet bloc, Comecon, but ruled out trade relations.

The EEC ministers were replying to a Comecon proposal for a joint cooperation agreement, first made last February. Among the steps suggested by Comecon for "working relations" between the two blocs were agreement on the exchange of information, statistics, studies and forecasts.

The EEC ministers' draft response is an extremely cautious document, according to EEC officials, because it specifically excludes trade relations between the two organizations. The EEC is insisting that such relations must be conducted through trade agreements between the EEC and each of the Comecon member nations separately. Bloc-to-bloc trade negotiations are ruled out.

Moreover, problems concerned with economic cooperation will also be reserved for bilateral discussion.

Diplomatic Recognition

As these two major items will not be part of the cooperation accord, its political significance will be slight. But, officials said, at least it is beginning. Until now, the Soviet Union has refused to give the Common Market diplomatic recognition.

Coincidentally, the EEC ministers also made another possible breakthrough in relations with the Communist world when they agreed to develop relations with Yugoslavia, which is not a Comecon member.

Early next month, the current EEC Council president, Dutch Foreign Minister Max van der Stoel, will visit Yugoslavia accompanied by a European commissioner, Finn Gundelach. Their purpose will be to institutionalize relations between Brussels and Belgrade and to improve the present nonpreferential trade arrangement that exists between the two.

They will also hope to make proposals to the Yugoslavs for stronger economic contacts—over and above the $55-million loan that the EEC already intends to give Yugoslavia.

Crosland Comment

The British foreign secretary, Anthony Crosland, commented today: "The future prosperity of Yugoslavia is of profound significance to the European community as a whole. I hope the proposed talks with Belgrade will end in a very public and very explicit agreement between us."

He added that it was his view, after a recent visit to Yugoslavia, that the Yugoslavs are determined to defend themselves whether any threat to them is political or economic. It was in this context that the Yugoslavs' desire for increased dealings with the EEC should be seen, Mr. Crosland said.

United Press International.
KEEPING THE PEACE — A Soviet-made tank of the Syrian Army, being used by the Arab peace-keeping force, rumbles into the ruins of Beirut's commercial district.

In Peace-Keeping Role

Syrian Army Takes Control of Beirut

By James F. Clarity

BEIRUT, Nov. 15 (NYT).—The Syrian Army took total control of Beirut today, forcing peace on the battle-ravaged central area of the capital and in effect ending the civil war that has killed at least 35,000 persons in 19 months.

The Syrians—officially only part of an Arab peace-keeping force but actually the overwhelmingly dominant contingent of the force and the only ones who participated significantly in today's occupation operation—met virtually no armed resistance as they began advancing toward the center of the city shortly after dawn.

The Syrians' bulldozers broke through thick earth and cement barricades, followed by their tanks and truckloads of heavily armed combat infantrymen. The Lebanese leftist-Moslem-Palestinian forces and Christian rightists, who had been shooting and shelling each other throughout the last night of the war, either disappeared or peacefully gave up control of key points on the urban front lines to the advancing Syrians.

A few fusillades of machine-gun fire and several mortar shells were aimed at the advancing troops, who returned the fire. But there were no reported casualties among either the Syrians or the retreating militiamen as a result of the exchanges of fire. A Syrian soldier was killed when one of his grenades accidently exploded. Three Lebanese civilians stepped on mines in the streets. One of the civilians reportedly died.

The advancing troops were welcomed cautiously by most of the people of Beirut who were in their path, whether Moslem or Christian.

Militarily, the Syrian operation (several hundred Sudanese and Libyan troops of a token peace-keeping force that has been largely inactive here since June helped patrol the area around the airport) was apparently near-perfect.

By noon, the Syrians had penetrated the center of Beirut from several directions on the city's edge, some previously controlled by rightists, others by leftists and Palestinians.

Key Positions

Syrian tanks and troops took positions controlling access to the radio and television stations, the central bank, the electricity generating plant and the points on the confrontation line where the heaviest fighting of the war had persisted for more than a year—the National Museum, the square near the parliament and the central market place.

The next planned phase of the Syrian occupation of Lebanon, also approved by the Arab League nations in meetings last month in Saudi Arabia and Egypt, is the control of the national highways from Beirut north to Tripoli and the Syrian border and south to Sidon and Tyre.

The Syrian occupation force is expected to stop well short of Lebanon's common border with Israel, where penetration of troops from Damascus could stir conflict neither Syria nor Israel seems to want. The Syrians have also to deal with, or connive at, the occupation of several Israeli border area towns by Christian rightist forces who captured the towns with Israeli assistance.

The Syrian force is nominally under the command of President Elias Sarkis, who was elected in May with strong Syrian support.

At nightfall, Beirut, on the 26th day of the 56th cease-fire since the war began in April of last year, was unusually quiet. There was, by 8:30 p.m., no sound of heavy machine guns, no thunder of artillery shells.

British Independence Plan Divides Nationalists at Geneva

GENEVA, Nov. 15 (NYT).—The first plenary session in 10 days failed today to break the deadlock at the conference on Rhodesia's future, as hardline nationalists continued to demand a British guarantee of independence under black majority rule by March 1, 1978.

The Patriotic Front, grouping two of the four nationalist delegations, charged that Britain would open the "sluice gates" to stalling maneuvers by the white minority regime of Prime Minister Ian Smith by making independence conditional on prior completion of constitutional and other arrangements for the changeover.

Ivor Richard, British chairman of the conference, opened today's short session by reading a statement that recalled London's position that the arrangements for a peaceful transition from white to black rule would take 15 months from the successful conclusion of the present talks.

Should the conference complete, by the end of this month, the arrangements for the biracial government that is to hold office during the interim in what is still legally a British colony, the date of independence would be March 1, 1978, he said.

But Mr. Richard assured that independence could be advanced to Dec. 1, 1977, if it proved possible to complete the necessary procedures within 12 months, as the nationalists demand.

Two nationalist leaders, Bishop Abel Muzorewa and the Rev. Ndabaningi Sithole, were prepared to put aside the independence date issue, as Mr. Richard strongly urges. The chairman, who said today that the conference has been on this issue too long already, wants to move on to the key question of the composition and function of the biracial interim government.

But Joshua Nkomo, a rival of Bishop Muzorewa for control of Rhodesia's African National Council, and Robert Mugabe, political spokesman for the guerrillas, demanded an adjournment of the meeting. Working together in their Patriotic Front, the two nationalists obtained a 24-hour adjournment because, they said, they needed time to study the British statement.

A Precise Date

The Nkomo-Mugabe team is demanding that Britain set a precise date by which it will proclaim, at the latest, Rhodesia's independence under the rule of the black majority.

While accepting March 1, 1978, as the deadline for independence, the Patriotic Front rejects the British contention that this date must be conditional on the completion of the transitional arrangements.

The leader of the white Rhodesian delegation, Foreign Minister Pieter van der Byl, reiterated today the Smith government's view that 23 months will be required to conclude these procedures.

On leaving the meeting at the Palais des Nations today, Mr. Nkomo complained to reporters that it was "quite obvious" that the British position would make possible the putting off of independence "indefinitely."

Today's meeting underscored the division among the nationalists, who are all rivals for the political leadership of Zimbabwe, the African name that an independent Rhodesia under black rule is to take.

Labor Concedes To Lords Over Bill on Dockers

LONDON, Nov. 15 (Reuters).—The Labor government tonight acknowledged that it has failed to win approval for a controversial bill on dock workers against strong opposition in Parliament.

Employment Secretary Albert Booth said the government would accept an amendment proposed by the House of Lords that greatly reduces the scope of the bill.

The legislation sought to create a five-mile coastal corridor where all cargo-handling work would go only to registered longshoremen. The amendment cuts this to half a mile, in major port areas only.

The House of Lords, where the opposition Conservatives have a majority, has been using its powers of delay and criticism against government bills in the last few weeks.

With only a slender hold on the House of Commons, Labor has just managed to overturn most amendments by the Lords but abstentions by two of its own right-wing members has weakened the dock-worker bill. This was accepted in order to salvage the remnants of the legislation.

Carter Doubtful Of Swift Decline In Unemployed

By Edward Walsh

PLAINS, Ga., Nov. 15 (WP).—President-elect Jimmy Carter said today that the American people should be prepared to tolerate an unemployment rate of 5 per cent or more through much of his first term in office.

At his second press conference since the election, Mr. Carter was asked whether his goal of an unemployment rate of 4 to 4.5 per cent by 1980 necessarily means that unemployment will be 5 to 7 per cent in the years before then.

"I would guess that is a likely prospect," he replied. The unemployment rate is now 7.9 per cent.

But Mr. Carter also said that he will not delay his plan to seek reforms in the government bureaucracy and the tax and welfare system because of the state of the economy.

On foreign policy, the President-elect gave one of his strongest statements on the issue of human rights in foreign countries, calling this an "all pervasive" consideration for the United States.

"The allocations of foreign aid and the normal friendship of our country would be determined or affected by the attitudes of those countries toward human rights," he said in a response to a question about U.S. relations with Chile and other countries with dictatorial regimes.

One of Mr. Carter's first important steps in dealing with the economy will come early next week when he will make his first post-election trip to Washington and meet with, among others, Federal Reserve Board Chairman Arthur Burns.

Change in Tenure

Mr. Carter has called repeatedly for a change in the tenure of the Fed's chairman to make it coincide with the president's term. He repeated today his intention to seek passage of legislation that would accomplish that. But when asked if he might ask Mr. Burns voluntarily "to step aside" so that he could name his own chairman, Mr. Carter said that he could not answer until after their initial meeting.

Predicting "a substantial degree of cooperation' between him and Mr. Burns, Mr. Carter said, "My first inclination is to work with him, to have him stay on."

Mr. Burns's membership on the Federal Reserve Board extends until 1984, but his tenure as chairman will end Jan. 31, 1978, at which time Mr. Carter could name a replacement. Mr. Burns has warned the incoming Carter administration that attempts to fuel the economy through increased government spending will have serious inflationary repercussions.

No details of Mr. Carter's trip to Washington were announced today, except that he will also meet with some Ford administration Cabinet officers. Mr. Carter's aides said that the President-elect is likely to be in Washington Monday and Tuesday of next week.

Mr. Carter indicated that he does not expect to meet with President Ford during his initial post-election trip.

After the press conference, aides to Mr. Carter also strongly suggested that Secretary of State Henry Kissinger will travel to Plains to meet with Mr. Carter before the President-elect's trip to Washington.

Mr. Carter today also announced his first staff appointment and it came as no surprise. He said that Jody Powell, his 33-year-old press secretary, will continue in that capacity at the White House.

Emphasizing his determination

Carter's People's Inaugural

'Everybody' Invited To Fete in Capital

By Karlyn Barker

WASHINGTON, Nov. 15 (WP).—President-elect Jimmy Carter is planning to invite 300,000 to 400,000 of his campaign workers to Washington for what he hopes will be a "people's" presidential inauguration reminiscent of Andrew Jackson's inaugural celebration 148 years ago.

Mr. Carter's Inaugural Committee will be sending out personal invitations shortly and they will go to "everybody who played any substantial role in the primaries or general election" that put their candidate in office, according to Bardyl Tirana of the committee.

The mailing of so many personal invitations is considered almost unprecedented, as is the more casual invitation that Mr. Tirana issued in Mr. Carter's name:

"The Carters want to reach out to the greatest number of people possible. We want everybody in the country, regardless of what party they belong to, to feel that they are welcome in Washington and we are making plans to properly receive as many as want to come."

A Business Suit

For his oath-taking Jan. 20, Mr. Carter will wear a business suit instead of the more traditional morning coat and top hat of his predecessors. Rosalynn Carter, his wife, will also shun elaborate fashion preparations for evening inaugural activities. She plans to wear the same ball gown she wore to Mr. Carter's inauguration as governor of Georgia five years ago.

The concept of a "people's" inauguration is in keeping with the spirit and tone of Andrew Jackson's inaugural in 1829, Mr. Tirana said. But he cautioned that Mr. Carter's planners hope to coordinate the festivities a little better than Jackson did.

When Jackson took office he invited everybody back to the White House for a celebration. About 20,000 persons took him up on his offer, and historians say that on that day the president nearly suffocated among well-wishers trying to shake his hand.

There are no plans for an open house at the Executive Mansion but Mr. Carter's inauguration planners expect to open up the city on inauguration week for what they say will be simpler, cheaper and thoroughly informal celebrations.

"President Carter will be everyone's President, and the city of Washington is everyone's capital," said Mr. Tirana, who emphasized that the Inaugural Committee will be planning a week of inaugural-linked festivities whose key events will be completely open to the public.

Traditional inaugural balls will give way to what Mr. Tirana calls a series of evening parties with "optional dress—it won't be a white tie affair."

Expected to Vote Itself Out of Existence

Cortes Begins Debate Today on Reforms

By James M. Markham

MADRID, Nov. 15 (NYT).—Spain's largely unelected, rightist parliament, which under the late Generalissimo Francisco Franco has little to do, will step to center stage this week and vote on a political reform bill that is also its own death warrant.

Madrid's hasting, somewhat self-conscious press is doing its best to invest the vote with high drama—newspapers have billed it as a "historic week"—but politicians say it is probable that the needed two-thirds of the 561 deputies will vote yes, setting the stage for elections next spring.

So confident is the government of Premier Adolfo Suarez that it has already begun to tape advertising spots for the popular referendum it plans to hold in the month on the bill, which lays the legal ground for a two-chamber, democratically elected Cortes, or parliament.

One television spot reportedly shows a thoughtful, somber man looking to faces the cameras and tells the viewers, "Inform yourself well, and then vote." He then marks a ballot, rather visible "Si"—yes—and drops it in a glass urn.

Police bodyguards have been assigned to a number of prominent Communist, Socialist and Basque separatist personalities to lessen the chances of an assassin's bullet disrupting the deliberations of the Cortes, which are scheduled to begin tomorrow.

The deputies are being given little time to commit political "hara-kiri," as Jose Maria Gil Robles, a prominent Christian Democrat, put it. The vote on the bill may come by Thursday, giving dedicated Franco followers only a short time to fulminate against the perils of "inorganic democracy."

The government wants to make sure that the vote comes before Saturday, when the rightist National Veterans' Confederation hopes to bring thousands into Madrid's Plaza de Oriente, where Franco used to address the multitudes on the merits of his own "organic" variety of democracy, to pray for his soul on the first anniversary of his death.

Veterans Rally

Grudgingly, the government has permitted the Civil War veterans to hold the rally, provided it lasts only 20 minutes and is confined to prayers, the reading of Franco's purported last message to the Spanish people and the singing of the national anthem.

"Once we have gotten [the bill] through the Cortes, 80 per cent of the work will be done," said an adviser to Mr. Suarez, adding the hope that violence or some other unexpected act will not spoil the plans.

After the Cortes vote—assuming it is a victory for the government—Mr. Suarez is expected to turn to the many-sided opposition to negotiate the terms of the elections: what kind of electoral laws will apply, who can have access to radio and television and on what terms, who can hold political rallies, and so on.

Leftist Alliance

The left-of-center opposition alliance called Democratic Coordination, which shows signs of falling apart as the elections near, has vowed to boycott the December referendum if it does not get full guarantees for clean elections.

But to many Spaniards, Democratic Coordination, which includes Communists, Socialists and leftist Christian Democrats, seems to be adopting postures that are hard to square with the political activities of its constituent parties.

In this precampaign atmosphere, threats to boycott the referendum ring a little hollow.

"Our position," said Raul Morodo, a Socialist leader and a dissenter on the boycott question, "is that this is a trap. If the opposition takes a position of voting 'no,' it is going to see its prestige fall." But, he added, "with all the means at its disposal, the government is surely going to win the referendum."

Played Tough-Sentimental Roles in Many Films

Jean Gabin, French Movie Star, Dies at 72

PARIS, Nov. 15 (Reuters).—Jean Gabin, 72, France's favorite film star, died here today of a heart attack.

Mr. Gabin's film career, in which he often played the tough guy with a sentimental streak, spanned two continents and nearly half a century. His private life included a much publicized friendship with Marlene Dietrich.

The seventh child of a modest theatrical couple, the Paris-born Mr. Gabin burst onto the screen in the mid-1930s in such roles as gangster, Spanish foreign legionnaire and working-class hero.

Perhaps his most famous role was in Jean Renoir's 1937 classic "La Grande Illusion". Mr. Gabin played a World War I French aviator held in a German prisoner-of-war camp, whose commandant was Eric von Stroheim.

Mr. Gabin's rugged looks and virility endeared him to generations of women. Many thought of him always as the colorful gangster "Pépé le Moko" in the film of the same name, set against the background of the Algiers Casbah in 1935.

In later years, Mr. Gabin was able to transfer successfully to roles as mature and elderly men.

Keystone.
Jean Gabin

His last film, a romantic comedy entitled "L'Année Sainte" (The Holy Year), cast him as an aging escaped convict disguised as a cardinal flying to Rome on a plane that is hijacked.

Other milestones in a career of more than 100 films included "La Bandera" (1935) directed by Julien Duvivier, "Quai des Brumes" (1938) directed by Marcel Carné and also starring the newly discovered Michèle Morgan, "Le Jour Se Lève" (1939), also by Marcel Carné, and "En Cas de Malheur" (1958), in which he played opposite Brigitte Bardot.

Over the last decade, Mr. Gabin made two or three films a year.

His private life was almost as varied and colorful as the roles he played on the screen. While in the United States in the late 1930s, he met Marlene Dietrich and the two were close for a decade.

Mr. Gabin was married three times. His last wife, Christiane Fournier, was at his bedside at

U.S. Again Vetoes Vietnam at UN

NEW YORK, Nov. 15 (UPI).—The United States, unswayed by appeals from 32 countries, tonight vetoed the application of Vietnam to become the 146th member of the United Nations Monday.

Ambassador William W. Scranton cast the 18th U.S. veto in UN history, displaying Washington's determination to keep Vietnam out of the world organization until Hanoi gives an accounting of 800 U.S. servicemen missing in action in the Vietnam war.

The action in the Security Council was the third time the United States had used its veto to block Vietnam's membership. The two other vetoes were cast last year.

No other member of the Council opposed entry.

Communist Defections Continue in By-Elections

Gaullists and Socialists Cite Gains in French Vote

By James Goldsborough

PARIS, Nov. 15 (IHT).—Socialists and Gaullists alike today claimed success in seven National Assembly by-elections that drew almost half a million French voters to the polls yesterday.

Both Gaullist candidates running in yesterday's first-round voting were re-elected, including former Prime Minister Jacques Chirac. In the one second-round race, in the Haute-Loire district, the Socialist candidate defeated a supporter of President Valéry Giscard d'Estaing by 50 to 49 per cent. In the last general elections, in 1973, the Giscardian had beaten the Socialist by that same margin in the Haute-Loire.

With 16 months to go before the next general elections, analysts were reluctant to read a firm national trend into yesterday's vote. But the results did confirm the Communist party's steady erosion of strength since 1973, and showed that the parties loyal to Mr. Giscard d'Estaing were not gaining ground.

Mr. Chirac's victory was especially impressive, since the former prime minister increased his total vote over 1973 despite a greater number of abstentions. The result is expected to strengthen his hand for the December Gaullist party conference, where certain party elements want a Gaullist "people's rally" established in preparation for the 1978 elections.

All four of the runoffs to be decided next Sunday will pit a member of the majority against a leftist opponent. If the trend shown yesterday holds true, the marginal victories that went to the majority in 1973 will go to the opposition. Enough of these marginal victories in 1978 could shift the balance in the National Assembly, where the majority now controls 295 of 490 seats.

L'Humanité, the Communist newspaper, was circumspect in commenting today on the elections yesterday. The French party's 22d congress last February, at which the party shed a good deal of outmoded dogma and adopted a more modernized image, had been counted on to arrest the trend of defections from Communists to Socialists first noticed in the by-elections of late 1974.

But such hopes for a Communist rebound were thwarted yesterday. The Socialists, in addition to winning the Haute-Loire runoff, scored increases of between 4 and 14 per cent across France, while the Communists recorded only one increase and six decreases in their percentages.

On the majority side, a statement by the Gaullist party today said that the results showed that the Gaullists alone were capable of "mobilizing votes" and beating the left. The statement said that the centrist vote, which Mr. Giscard d'Estaing has tried to cultivate, had become "disoriented," and that the people were now ready to join the new Gaullist rally.

The notion of another Gaullist rally not only has divided the majority, but has divided the Gaullists themselves. Mr. Chirac said yesterday that he opposed the idea, and that if the original rally—started by Gen. Charles de Gaulle to mobilize the people behind him in 1947-1948—had failed, what chance did he himself have to launch one successfully now?

The majority here has been adrift since Mr. Chirac quit the government in August and started the groundwork for what could be an attempt to unseat Mr. Giscard d'Estaing in the presidential elections in 1981. Mr. Chirac has made it clear that he wants to start campaigning for the coming municipal and legislative elections on tough, nationalist, anti-collectivist themes, while the government has taken a more moderate line.

The test of strength between the President and the Gaullists reached a point today where some Gaullists were openly saying that they would oppose Mr. Giscard d'Estaing's choice of Industry Minister Michel d'Ornano to become the first mayor of Paris next year. There will be a transfer of local powers from the national government to the city, concomitant with the installation of the mayor, who will be elected in the spring.

Another 'Rally'

Another element was added to the rivalry today when Interior Minister Michel Poniatowski, a Giscardian, announced that the non-Gaullists in the majority were about to launch their own "rally."

The proliferation of "rallies" led L'Humanité to suggest that the rivalry between Gaullists and Giscardians actually was collusion, and that there was soon to be a people's rally for almost everybody.

Meanwhile, the Socialist party was generous in its success, referring to the general "progression of the left," and avoiding anything that might annoy the Communists even more. Claude Estier, the deputy party leader, said, as did the Gaullist spokesmen, that the majority's losses were due to the defections of the centrist voters.

Kremlin Shifts Envoy to Uganda

MOSCOW, Nov. 15 (UPI).—The Soviet Union has named Yevgeni Musiiko as its new ambassador to Uganda, succeeding Andrei Zakharov, who was at the center of a row that resulted in a six-day suspension of relations between Moscow and Kampala a year ago.

Tass said today that Mr. Zakharov had been "released from his duty because he is taking another job," the nature of which was not disclosed. The news agency said Mr. Musiiko has served as counselor at the embassies in Cuba and Nigeria and most recently has held "a responsible post" at the Foreign Ministry.

The Soviet Union suspended relations with Uganda last year after Uganda's President Idi Amin charged Mr. Zakharov with "criminal meddling" in Angola's civil war.

Jean Gabin Dead at 72

(Continued from Page 1)

the American Hospital in the Paris suburb of Neuilly when he died today. They had three children.

Mr. Gabin left Hollywood in the early 1940s to enlist under his real name of Jean Moncorgé as a navy noncommissioned officer in Charles de Gaulle's Free French forces. He first served as master of arms on a merchantman plying the North Atlantic convoy route.

Later, Mr. Gabin transferred to the "fusiliers-marins" (French marines) and was a tank commander in the ranks of Gen. Philippe Leclerc's 2d Armored Division when it liberated Paris in August, 1944. He held both the Médaille Militaire and the Croix de Guerre. Several years ago, he was made an officer of the Legion of Honor in recognition of his wartime services.

Mr. Gabin was very French in his tastes and pined for home whenever he left France. Fellow actor Marcel Dalio, an old friend, told in his memoirs of Mr. Gabin brooding in a luxurious Hollywood mansion before the war.

"What's the matter, Jean? You have everything you want, fame, fortune, Marlene, but you look unhappy," Mr. Dalio told him.

"Of course, I'm unhappy. I can't get *boeuf bourguignon*," Mr. Gabin replied.

The funeral service will be held Wednesday at the Paris Père Lachaise Cemetery.

Carter Doubts Swift Gains

(Continued from Page 1)

to appoint top administration officials in "a careful, thorough and deliberate manner." Mr. Carter said that he expects personally to name about 75 administration officials. He said that he and Vice-President-elect Walter Mondale personally will interview potential appointees for a number of positions and that those being considered will be known to the public.

On other subjects, Mr. Carter:

- Refused to rule out the imposition of mandatory wage and price controls, but said that "barring a calamity," they could be avoided by "voluntary commitments" by business and labor.
- Said that if there is no new strategic arms limitation agreement by next fall, when the present agreement expires, he would ask for an extension of the existing pact. Calling the Soviet Union "the key to reduction in atomic weaponry," he repeated his call for a freeze on the production of nuclear weapons, but said that he would not unilaterally order a slowdown in the development of such weapons systems as the Cruise missile.

MiG Leaves Japan

Teaching Human Dignity, Rights

Church Missions in Rhodesia Called Source of Nationalism

By Robin Wright

SALISBURY, Rhodesia, Nov. 15 (WP).—"If it hadn't been for the church, there'd be no conference between the Smith government and the nationalists in Geneva right now," a middle-aged African teacher said.

It was a statement that Secretary of State Henry Kissinger might consider exaggerated, but it nevertheless contains a good deal of truth.

Without the church, the black nationalist movement here in Rhodesia might still be in embryonic stages, unable to exert the political power that it wields, incapable of the military pressures that it has mounted in the four-year-old guerrilla war.

The situation is reflected in the common background of the four rival black nationalist leaders: All four were taught at mission schools and sponsored for further education by their respective churches. Three have become church leaders.

Abel Muzorewa is a bishop of the United Methodist Church, the American branch. Ndabaningi Sithole is an ordained minister in the United Church of Christ. Joshua Nkomo is a lay preacher in the British branch of the Methodist Church. And Robert Mugabe, the most militant of the four, is a practicing Catholic.

Training Ground

Their religious ties are no accident of history. Church missions in Africa, especially Rhodesia, have served as a training ground for nationalism, teaching and promoting human dignity, equal rights and individual freedom.

The Rev. Ralph Dodge, the American who preceded Abel Muzorewa as Methodist bishop of southern Africa, wrote a book called "The Unpopular Missionary," in which he said: "With few exceptions, the leaders in the independence movements in the various countries of Africa have been educated, at least partially, in Christian mission schools."

The church's role as a catalyst is evident in two facts, according to Marshall Murphree, a former American Methodist missionary who now heads the University of Rhodesia's Institute of Race Relations:

- Throughout the 86-year presence of whites in Rhodesia, missionaries have provided the majority of educational facilities for Africans, and an increasingly large percentage of Africans has been brought up in the system, which teaches an awareness of their individual rights.
- The church, in taking Africans into its hierarchy, provides one of the few professional callings in which they can attain considerable prominence. It has thus attracted increasing memberships and gained the trust of the Africans.

This became even more true after World War II, when many missions adopted a new direction, "making religion indigenous again and not trying to impose the white man's culture," as one clergyman explained.

The church's strong influence on the postwar generation is apparent among guerrillas waging war on Rhodesia's whites from bases in neighboring Mozambique and Zambia. A large percentage of the guerrillas reportedly came from the various mission schools in Rhodesia's rural areas.

A top army official said at a military briefing for journalists recently that "a string of mission schools along the Rhodesia-Mozambique border were recruiting grounds for terrorists." Most of those schools are sponsored by American Methodists and Catholics.

As a result, the church-state issue has become a hot one in Rhodesia. Last month, a Catholic bishop, the Most Rev. Donald Lamont, was sentenced to 10 years' imprisonment on charges of not reporting the presence of guerrillas in Umtali, the border town that has become a favorite target of guerrillas, and for encouraging others to do the same.

Bishop Lamont had pleaded guilty. His situation, he explained in a letter to the Rhodesia Herald, had reflected a crisis of conscience for a churchman: To obey the laws of the state, which is fighting the guerrillas, or the tenets of the church, which require equal treatment of all men, including the provision of shelter or food when needed.

Crisis of Conscience

More than a dozen missionaries and nuns, including Bishop Dodge, have been expelled from Rhodesia over the last few years for activities considered by the government to be subversive.

In 1971, Bishop Muzorewa was banned from visiting Rhodesia's tribal trustlands by the government because of the impact of his "radical" sermons, which were the basis for his rise to political prominence.

Mr. Murphree, who was born in Rhodesia of Methodist missionary parents but retains his U.S. citizenship, claimed that white Rhodesians should not be concerned about the threat of a new black government leaning toward Marxism.

"Their liberation rhetoric sounds like Marxism to whites," he said, "but it sounds only like a basic appeal for human rights to the average black, nothing hysterical."

Reinforcing UN Resolution

PLO-Arab League Symposium Condemns Zionism as Dang

By Judith Miller

BAGHDAD, Nov. 15 (WP).—Delegates from 46 countries have ended a weeklong symposium in Baghdad that condemned Zionism as racist, imperialist and a danger to world peace.

The symposium was sponsored by the University of Baghdad, the Palestine Liberation Organization and the Arab League in cooperation with the Iraqi government. Notably absent were delegates from China, whose presence might have offended Soviet representatives, and Syria, the Iraqi Ba'athists' rivals.

About 20 Americans attended, among them Sen. James Abourezk, D-S.D., who is of Lebanese descent and who attacked U.S. press coverage of the Middle East, calling it demonstrably biased toward Israel.

Iraqi strongman Saddam Hussein set the tone of the meeting in an opening speech condemning Israel and Zionism as "racist."

Also indicative of the conference's spirit were several of the research paper titles: "Zionism as a Racist Ideology," "The Ideological Roots of Zionist Racism," "The Quintessential Jew," "Israel and South Africa—the Racists Allied," and "Zionism's Bonds With Racism and Neo-Colonialism and the Struggle for Peace and International Debate."

UN Resolution

The conference's goal was to reinforce the United Nations General Assembly resolution passed last year labeling Zionism as a form of racism and racial discrimination.

The symposium's ideological unanimity was guaranteed by the selection and invitation of all participants and journalists by the Iraqi government.

During the last session, a key paper was presented by Nabil Shaath, a Palestinian generally regarded as the father of the concept of the "democratic secular state," the PLO's slogan for the nation state it often says it wishes to see established in Israel's place.

Mr. Shaath said that the concept was intended as an invitation to dialogue between Palestinians and anti-Zionist Jews. He called on Arab nations to conduct themselves in a manner that would convince Jews everywhere that Arabs were seriously committed to the integration of Jewish citizens within societies free of racial discrimination. He urged Arab states to emulate Iraq by opening their doors to non-Zionist Jews and to abolish all discriminatory laws and practices against them.

Mr. Shaath said that the PLO had demonstrated its commitment to the establishment of a discrimination-free society by protecting the lives and property of Lebanese Jews during the civil war there, by fighting for the legal rights of anti-Zionist leftist Jews in Morocco and by eliminating anti-Semitic statements from PLO schoolbooks.

To Revise Covenant

He also said that the PLO Executive Committee had decided unanimously to convene its national congress to revise the organization's covenant to offer citizenship in a new Palestine to all Jews, Moslems and Christians in occupied Palestine, that is, Israel. The covenant now indicates that only those Jews who lived in Palestine before its occupation (that is, the creation of Israel in 1948) would be permitted to stay.

The 19-point declaration issued on the symposium's closing day is far less strident than the tone of the sessions. The conferees condemned Zionism as a racist "colonial settler concept," an "...shoot of 19th century imp... ism," and "a danger to the p... of the area and to world pe... The declaration, however, condemns anti-Semitism a... force that has fueled Zion... expansion.

Sen. Abraham Ribicoff, D-... who led a group of U.S. ... on a weekend visit to Cai... talks with Egyptian officia... reporters yesterday that M... dat's approach to Middle ... peace negotiations contain... constructive new elements ... to be cultivated.

"President Anwar Sadat ... he has no preconditions an... the Arabs are ready to go ... Geneva Middle East peace ... ference. Peace negotiation... not easy, but all problems ... the Middle East are open to ... tiations," Sen. Ribicoff said.

Ready for Risks

In weekend talks with the ... tors—who have already ... Israel and Jordan—Mr. Sad... that he was "ready to tak... risks for peace—but are ... raelis ready?"

Mr. Sadat asked the ... to tell President-elect Jimm... ter that Egypt wants a ... solution to the Arab-Israeli ... flict in 1977. It's time ... are ready for this and ... Israel is ready too."

Stressing that the Gene... conference remains the m... quate forum for Middl... peace talks, Mr. Sadat ... was "not asking Carter to ... our side—all I ask Carter ... before he takes his decisi... should seek our viewpoint ... he seeks Israel's."

Addressing a news conf... yesterday, Sen. Howard Bak... R-Tenn., said that after his ... to Israel and Egypt he was ... vinced that the atmosphere ... ripe for fresh Middle East ... efforts.

"Both sides want peace, ... a good time to make the ... Prospects for a broad compr... sive settlement are better ... what they were 18 months ... Sen. Baker said.

Stressing that time was a ... portant factor, Sen. Baker ... "We should move forward ... the atmosphere is appropria... the world is waiting for a ... tion."

Palestinian Participation

Sen. Ribicoff said that ... problem facing the peace p... was the question of Pales... participation at the ... peace conference.

While the Arabs have ... that they would go to G... only if the Palestine Libe... Organization were also requ... ed, Israel has openly stated ... it would not sit with the ...

"As long as the Palest... use terrorism as policy, ... [maintain] the attitude ... there is no place for Israe... cannot see how the Israelis w... accept sitting with them," ... Ribicoff said.

But, the senator said, cha... were taking place within ... PLO.

Mr. Sadat's discussions ... the senators also covered a ... quest by the Egyptian leade... U.S. military aid. "I don't k... whether Congress will agre... ask the United States for a... But I think it's an obliga... now. We are friends and ... know my policy," Mr. Sadat ... his visitors.

Questioned by newsmen, ... Ribicoff avoided the issue ... said that the entire question ... the Middle East military bal... should be one of the import... subjects at any future Is... Israeli talks.

Brezhnev Denies Intention Of Interfering in Yugoslavia

(Continued from Page 1)

been putting new pressure on its Warsaw Pact allies in Eastern Europe.

A week from now, Mr. Brezhnev is scheduled to attend a meeting of the Warsaw Pact's top political leaders in Bucharest. It is the first such meeting in two years and the first in 10 years to be scheduled in Romania, a Pact member that does not allow Soviet troops on its territory and that has taken foreign policy positions different from Moscow's.

When Mr. Brezhnev originally agreed to the Belgrade visit, which had been postponed several times, he planned to travel by train to Belgrade and Bucharest and then back to Moscow. The Yugoslavs rejected this idea since it smacked to them as an attempt by the Soviet Union to link Belgrade to the Warsaw Pact. Instead, Mr. Brezhnev arrived by plane and will return to Moscow the same way.

While the Yugoslavs do not fear a Soviet invasion when Marshal Tito passes from the scene, they do worry that internal dissension could break out among different party factions or nationalities, providing Moscow with an excuse to act as arbiter.

Yugoslav officials have emphasized that the meetings, which end Wednesday, are intra-party affairs and not government events. They have de-emphasized the visit in the official press.

Mr. Brezhnev was met at the airport by Stane Dolanc, secretary of the Yugoslav Communists, and a potential Tito successor, and was taken directly to the official palace. There were no public decorations in honor of the visitor except on the streets that his motorcade followed.

Italian Men Found To Be Getting Taller

ROME, Nov. 15 (UPI).—The average Italian male has grown 3.5 inches taller over the past century, government statisticians said.

According to military draft records, Italian males born in 1854 stood an average 5 feet 3.5 inches when they reached induction age. Those born in 1953 were an average 5 feet 7 inches at the same age.

Experts of OPEC Discuss Oil Price

VIENNA, Nov. 15 (NYT).—OPEC economic experts met here today for secret discussions on proposals to increase the price of crude oil by between 10 and 25 per cent.

OPEC officials said that member governments of the 13-nation group were advocating oil price increases as an "adjustment to world economic developments."

A decision on a new oil price structure is to be taken by the Ministers' Conference, OPEC's supreme authority, in a meeting in Qatar Dec. 15.

The body meeting at OPEC's headquarters today was the organization's Economic Committee. Meetings behind closed doors are expected to go on all week. No information on the debates will be issued.

Washington Recalls U.S. Envoy in Cyprus

NICOSIA, Nov. 15 (UPI).—Ambassador to Cyprus Will... Crawford has been recalled ... Washington for "urgent consul... tions," a U.S. Embassy spok... man said today.

The spokesman said that ... Crawford was in the Troo... Mountains in central Cyp... when he received his instructio... to go to Washington. He ... recalled suddenly for urgent co... sultations and possible rea... the spokesman said. He refu... to divulge if there was a speci... reason for the recall.

Where to find Jack Daniel's— a little help for our friends.

If you're having a difficult time finding Jack Daniel's, perhaps the list below will help. It names some of the restaurants, bars and hotels where our fine Tennessee Whiskey is served.

The demand for Jack Daniel's is great. But the supply can only be made through the slow, exacting process perfected by Mr. Jack Daniel. Each drop is mellowed through 12 feet of hard maple charcoal, then aged and watched over until it's ready to send your way. It takes time. But just one sip, we believe, will convince you that it's worth the wait.

U.S. Charges Expected for Drug Testing

Head of Agency Notes Evidence of Fraud

By Harold M. Schmeck Jr.

WASHINGTON, Nov. 15 (NYT).—A broad investigation of faults in animal testing of new drugs is leading to criminal charges against drug research laboratories and could have "ripple effects" around the world, Dr. Alexander Schmidt, chief of the Food and Drug Administration, said during an interview.

Most of the faults discovered so far by the FDA seem to reflect poor research, he said, but there has also been evidence of fraud. Animal studies are a key part of the process by which new drugs are approved for human use. If the data, supplied by the drug firms, are unreliable, Dr. Schmidt has said, it is a matter that strikes at the heart of the whole drug approval process.

Dr. Schmidt is retiring from the FDA Dec. 1 to return to the University of Illinois Medical Center in Chicago as vice-chancellor for health services.

Pursued for Years

In an interview here, he said the problem of animal test data reliability was a subject of extreme importance that the FDA has been pursuing for several years.

Several months ago, FDA investigators accused G.D. Searle & Co., one of the 10 largest drug firms in the United States, of providing the government false information concerning animal tests of two widely used drugs.

These were Flagyl, for treatment of a vaginal infection, and Aldactone, which is used to lower blood pressure. Several months ago, the FDA recommended to the Justice Department grand jury investigation of the evidence. The investigation is continuing, but the evidence has not yet been presented to a grand jury, an FDA spokesman said.

In the earlier interview, Dr. Schmidt said the FDA had made investigations, so far, of about half a dozen laboratories that do animal studies for the drug industry.

From these half-dozen investigations, he said, will come several regulatory actions, including grand jury investigations and prosecutions. The FDA has completed making recommendations to the Justice Department in one case, Dr. Schmidt said, and two others will be completed within weeks. He did not name the firms involved.

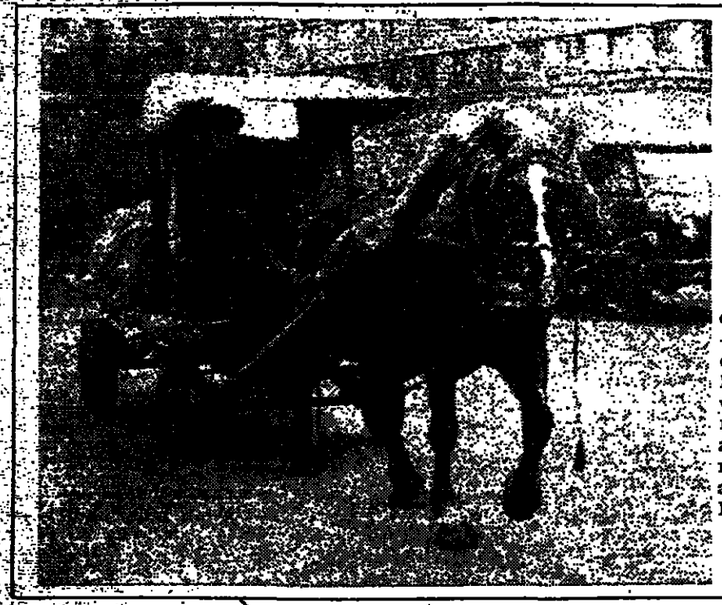
Lords May Make Permanent Home In Palm Springs

PALM SPRINGS, Calif., Nov. 15 (NYT).—President Ford is thinking seriously about buying a home and setting in this palm-lined desert resort city after he leaves office in January.

A White House official said that the President was leaning toward Palm Springs as a permanent residence because the hot, dry climate was good for Mrs. Ford who suffers from arthritis.

The President also appears to find the area congenial to his personal tastes. He is an avid golfer and Palm Springs calls itself the "golf capital of the world" with 34 courses in the immediate vicinity. Moreover, many of his friends and golfing companions, most of them wealthy businessmen, live in southern California or use Palm Springs as a vacation retreat.

The Fords have spent some of their vacation time here looking at real estate.



The President will end his week-long vacation today and return to Washington.

U.S. Ports Open To East Germans

WASHINGTON, Nov. 15 (Reuters).—East German cargo ships will be allowed to call at U.S. ports for the first time, as part of a Washington move to increase East German purchases of U.S. grain, State Department officials said last weekend.

Efforts have been made to improve trade relations between the two countries since the establishment of diplomatic ties two years ago. The United States believes that stronger economic ties would decrease East Germany's dependence on the Soviet Union.

The officials said that some ports will still remain closed to the East Germans, especially ports with important military facilities. The ports opening stems from an agreement under which East Germany will import between 1.5 million and 2 million tons of U.S. grain annually up to 1980.

GET A TRUCK —Although extremely rare, horse-drawn wagons still move materials and merchandise along Moscow streets.

Similar Illness Strikes Researcher

'Legionnaires' Disease' Continues to Baffle

By Lawrence K. Altman

PHILADELPHIA, Nov. 15 (NYT).—More than three months after the mystifying outbreak of "Legionnaires' disease" in Pennsylvania, scores of researchers around the country are still trying to find the cause, and in at least one instance one of them has fallen ill with a disease strikingly similar to the one she was investigating.

The researcher, Dr. Sheila Katz, a pathologist at Hahnemann Medical College and Hospital here, has recovered from what was diagnosed clinically as "viral pneumonia", shortly after she tested samples from one of the patients in the epidemic.

Despite extensive tests, experts have been unable to determine which virus caused her pneumonia, whether her illness was a coincidence or whether she acquired Legionnaires' disease as an occupational hazard in her laboratory.

Nevertheless, the case served to warn others about the dangers of research and to renew speculation that the disease, which killed 29 persons and sickened 151, was caused by some as yet undetected virus.

New speculation about a viral cause was raised last week by the finding of a possible new virus from a victim of the disease by New Jersey health scientists. Other speculation is that some chemical toxin might be the cause, and this week chemical infections and other theoretical causes will be discussed at a scientific symposium at the Bellevue-Stratford Hotel here sponsored by the American Lung Association. The hotel itself is the latest victim of the disease. It was announced last week that the hotel would close because occupancy rates have fallen drastically since it was publicly linked with the outbreak.

Discussing her illness, Dr. Katz said in an interview, "I cannot claim that I caught something from the specimens that I was working with because it could be a coincidence. I'm cautious and I don't want to jump to any conclusions."

Dr. Katz is just one of scores of researchers who spend at least a portion of their working week, if not full time, trying to solve one of the most perplexing outbreaks in the annals of epidemiology. Dr. Katz's studies reflect a theory that Legionnaires' disease might be psittacosis, or parrot fever, an infection caused by a virus. Among the avenues being pursued by other researchers with other theories are the following:

• At the Center for Disease Control in Atlanta, scientists are using a technique called neutron activation to test various tissue samples for the presence of metals. A stream of neutrons is bounced off a tissue and an X-ray spectrometer measures the emissions, which have different characteristics depending on the substance present in the tissue sample.

Also, the scientists are using gas and liquid chromatograph techniques to search for the characteristic behavior patterns of various organic chemicals that may be present in victims' tissues. And to test for the presence of virus particles, the researchers in Atlanta are treating lung, liver, kidney and other tissues with special fluorescent anti-body stains.

Small samples of tissue, such as blood and fecal matter, are being added to agar plates, human and monkey cell cultures, fertilized chicken eggs and newborn mice in efforts to grow some infectious agent that might be the cause of Legionnaires' disease.

• Researchers from the Pennsylvania Health Department continue to collect new samples of blood from persons who recovered from the mysterious disease. The recently collected samples are compared in the laboratory with specimens taken weeks or months ago for subtle changes in anti-body levels that could signal past exposure to the causative agent.

• In laboratories as widely separated as San Diego, Baltimore and Morgantown, W-Va., scientists are bombarding lung-tissue samples with electrons and by measuring the X-rays that are emitted are trying to identify unusual tiny particles in the lungs.

• Pathologists in about 15 laboratories throughout the country are inspecting samples from victims under microscopes, looking for unusual patterns of tissue damage that might provide a clue to the cause of the illness.

U.S. Medical Schools Oppose Law on Students From Abroad

By Gene I. Maeroff

SAN FRANCISCO, Nov. 15 (NYT).—A storm of protest is gathering at medical schools around the country in reaction to a new law under which certain federal funds would be withheld from institutions that failed to accept as transfer students Americans who have studied abroad.

The requirement, a hitherto obscure provision in the Health Professions Educational Assistance Act signed into law last month, will apparently be the focus of a major test of Washington's expanding power over higher education in the United States. Related to that issue is the sensitive question of whether applicants initially rejected by U.S. medical schools should get a second chance merely because they could afford to embark upon studies abroad.

At stake in the confrontation are tens of millions of dollars in funds and guaranteed student loans that the law says will be forfeited by medical colleges that do not agree to go along with the plan. The funds, given by the government, can be spent at the discretion of the medical schools. The amount given depends on the school's enrollment.

Growing List

"This legislation makes the secretary of Health, Education and Welfare the admissions director for the medical schools of this country," said Dr. Julius Krevans, dean of the Medical School of the University of California at San Francisco.

Medical educators, here for the annual meeting of the Association of American Medical Colleges, are rallying behind a growing list of institutions that say they may give up federal aid rather than comply with the law.

Friday, at a session attended by the deans of three-quarters of the country's 116 medical schools, unanimous approval was given to a resolution deploring "the intrusion into the academic prerogatives of the university" that the new law represents.

The resolution was introduced by Dr. Robert Berliner, the medical dean of Yale University, which recently became the first institution to declare that it would turn down its federal funds if the controversial item were not taken out of the health manpower measure.

Now, the medical deans at Indiana University, which has the nation's largest medical school, and Stanford University have recommended that their institutions, too, risk losing federal assistance rather than yield to the provision.

Spokesmen at Harvard, St. Louis, North Carolina, Northwestern and several other institutions have also expressed concern.

Intelligence Aide Who Had Faulted Gen. Brown Quits

WASHINGTON, Nov. 15 (NYT).—An Air Force Intelligence official who had publicly criticized the views of Gen. George Brown, chairman of the Joint Chiefs of Staff, resigned last week after being stripped of his special security clearances because he talked to a reporter for The New York Times.

Joseph Churba, the Air Force's senior intelligence expert for the Middle East, said in a telephone conversation that his superior, Maj. Gen. George Keegan, had told him on Monday that because of the interview, his clearances for signal and satellite intelligence had been suspended and that he was no longer of any value to the Air Force as an intelligence estimator.

As a result, Mr. Churba said, he resigned.

An Air Force spokesman confirmed the facts as outlined by Mr. Churba, but added that when Mr. Churba took the job in December, 1972, he knew that as an intelligence analyst he would not be able to speak out publicly.

On Oct. 19, Mr. Churba, in an interview with The Times, assailed a view expressed by Gen. Brown that Israel was a military burden on the United States. Mr. Churba said these views were "dangerously irresponsible" because they encouraged the Arabs and the Russians to believe that U.S. support for Israel had decreased.

U.S. Children's Shots For Swine Flu Curbed

WASHINGTON, Nov. 15 (UPI).—The Public Health Service today reported a shortage of swine-flu vaccine for children and said that, as a result, precautionary immunizations for healthy children will not be available.

Sufficient supplies exist to immunize chronically ill children, a spokesman said. He estimated that only 4 million of the more than 40 million children aged 3 to 18 could be immunized.

Landings at Dulles, Kennedy

U.S. High Court Won't Review Decision on Concorde Tests

WASHINGTON, Nov. 15 (AP).—The Supreme Court today refused to review circumstances of the government decision allowing commercial flights of the Concorde to the United States.

The justices let stand a decision by the U.S. Circuit Court of Appeals in Washington that Secretary of Transportation William Coleman jr. acted within his authority in permitting the Concorde to operate on a trial basis at two U.S. airports.

Authorities in Fairfax County, Va., and Nassau County, N.Y., seeking to stop the Concorde flights, asked the high court to review circumstances of Mr. Coleman's decision.

Mr. Coleman in February gave permission to British Airways and Air France to fly the Concorde into Dulles Airport in Virginia and Kennedy Airport in New York.

Trial Period

The secretary said his department would allow limited commercial flights from London and Paris for a 16-month trial period, during which noise levels and environmental effects would be monitored.

New York opponents of the decision thwarted landings there when the board of commissioners of the Port Authority of New York, operator of Kennedy Airport, agreed to prohibit such flights pending study of the effects felt by Dulles Airport. British Airways has filed suit in a New York federal court challenging the board's action.

Limited Concorde service has been available at Dulles since May 24, cutting by 3 1/2 hours the flying time between Dulles and Europe.

In seeking Supreme Court review, Fairfax and Nassau Counties contended that Mr. Coleman permitted the supersonic transport flights before adopting noise regulations for the aircraft as ordered by Congress in the Noise Control Act of 1972.

Nixon Role

Concorde opponents also said that evidence suggested that Mr. Coleman's decision to permit the commercial flights was influenced by pressure from the White House under former President Richard Nixon, a factor not discussed in Mr. Coleman's 61-page order.

In opposing the appeal, government attorneys argued that Mr. Coleman was free to authorize the flights despite the lack of general noise standards. They said that while certain evidence demonstrates that the Concorde flights were "an issue of political sensitivity," Mr. Coleman did not act in bad faith.

The Concorde, built jointly by Britain and France, cost about $3 billion to develop. The plane, which carries up to 100 passengers, can attain a cruising speed of 1,300 miles an hour.

Chile Held Ready To Swap Red for Moscow Inmate

COPENHAGEN, Nov. 15 (Reuters).—Chile has said it will release jailed Communist party leader Luis Corvalan in exchange for Soviet dissenter Vladimir Bukovsky, now in prison east of Moscow, the Copenhagen-based Sakharov Human Rights Committee said yesterday.

A spokesman for the committee said the organization, named after dissident Soviet physicist Andrei Sakharov, had received a letter from the Chilean government accepting an exchange proposal made to the two countries last month.

[The Soviet Embassy declined to comment, but an official said a statement on the matter could be expected in a couple of days, UPI reported.]

Columnist Told FBI Where to Pick Up Suspect

NEW YORK, Nov. 15 (NYT).—William F. Buckley jr., the columnist who became the benefactor of Edgar Smith jr., a convicted murderer who was subsequently released from prison, told federal authorities last month where they could find the former convict who was being sought on charges of attempted murder and kidnapping.

Smith was released from the state prison in Trenton, N.J., in 1971 after serving 14 years for the murder of a 15-year-old girl. While in prison, including 11 years on death row, longer than any other prisoner in U.S. history, he wrote two books claiming his innocence.

Mr. Buckley, who championed Smith's case in his syndicated column and television program, could not be reached for comment. However, a family spokesman confirmed his role in the arrest of the 42-year-old former convict.

Smith was arrested Oct. 13 in a Las Vegas hotel by FBI agents. He had been sought since Oct. 7, when he was named in a warrant issued in San Diego for kidnapping, robbing and stabbing Mrs. Lefteriva Ozhun after abducting her from a parking lot.

He is due to stand trial tomorrow in San Diego.

Sen. Sam Nunn

Sen. Dewey Bartlett

NATO Strategy Realignment Urged by Two U.S. Senators

By John W. Finney

WASHINGTON, Nov. 15 (NYT).—Two members of the Senate Armed Services Committee have urged a fundamental realignment of the strategy and forces of the North Atlantic Treaty Organization to counter what was described as the growing conventional war-making capabilities of the Soviet Union in Europe.

The NATO alliance, they said yesterday, "must undertake a fundamental enhancement of its conventional capabilities," exploiting recent technological advances to achieve a "quantum jump" in its conventional firepower.

In addition, they said, the NATO forces should improve their readiness to counter a Soviet attack launched with little warning through an "eastward repositioning" of forces and ammunition stocks.

The recommendations were contained in a statement issued by Sen. Sam Nunn, D-Ga., and Sen. Dewey Bartlett, R-Okla., on their return from a two-week trip to Europe to study the NATO forces for the Senate committee.

One of the basic conclusions reached by the two senators was that the "viability" of NATO's current strategy of "flexible response" is "now open to serious question."

The "flexible response" strategy relies upon the possible use of either conventional or nuclear power. The conventional forces would be used to blunt a Soviet attack with the threat that tactical nuclear weapons would be used if the attack is not stopped. The strategy, in turn, rests on the assumptions that the NATO alliance will have up to 23 days warning before a Soviet attack to mobilize its forces and that the war could last from 30 days to six months.

The senators questioned whether these assumptions were any longer valid. As a result of a "significant expansion" in conventional forces over the last decade, they said, the Soviet Union now has "an ability to initiate a potentially devastating invasion of Europe with as little as a few days' warning time."

With their statement, which is to be followed by a formal report to the committee, the two senators have staked out one side in what is expected to be a growing debate in Congress and the new administration over the future military strategy and posture in Europe.

Bonn to Monitor Use of Computers

BONN, Nov. 15 (Reuters).—The Bonn parliament has given final approval to a law authorizing appointment of a state commissioner to protect 60 million West Germans from the misuse of computer data banks.

The commissioner, already being referred to as "big brother's big brother," will be given a staff and power to monitor data computers when the law comes into effect on Jan. 1 of next year.

The data protection law, approved last week by the Bundesrat (upper house), was framed to allay public fears that computers will increase the power of the state at the expense of the individual.

EMERY FLIES AT THE RATE OF 55 PLANES PER HOUR.

It's hard to determine an air freight company's speed by how fast it flies.

A better way is to determine how often it flies.

Emery reserves space on key flights of practically every airline that carries freight. So instead of having a fleet of planes at our command, we have a fleet of airlines.

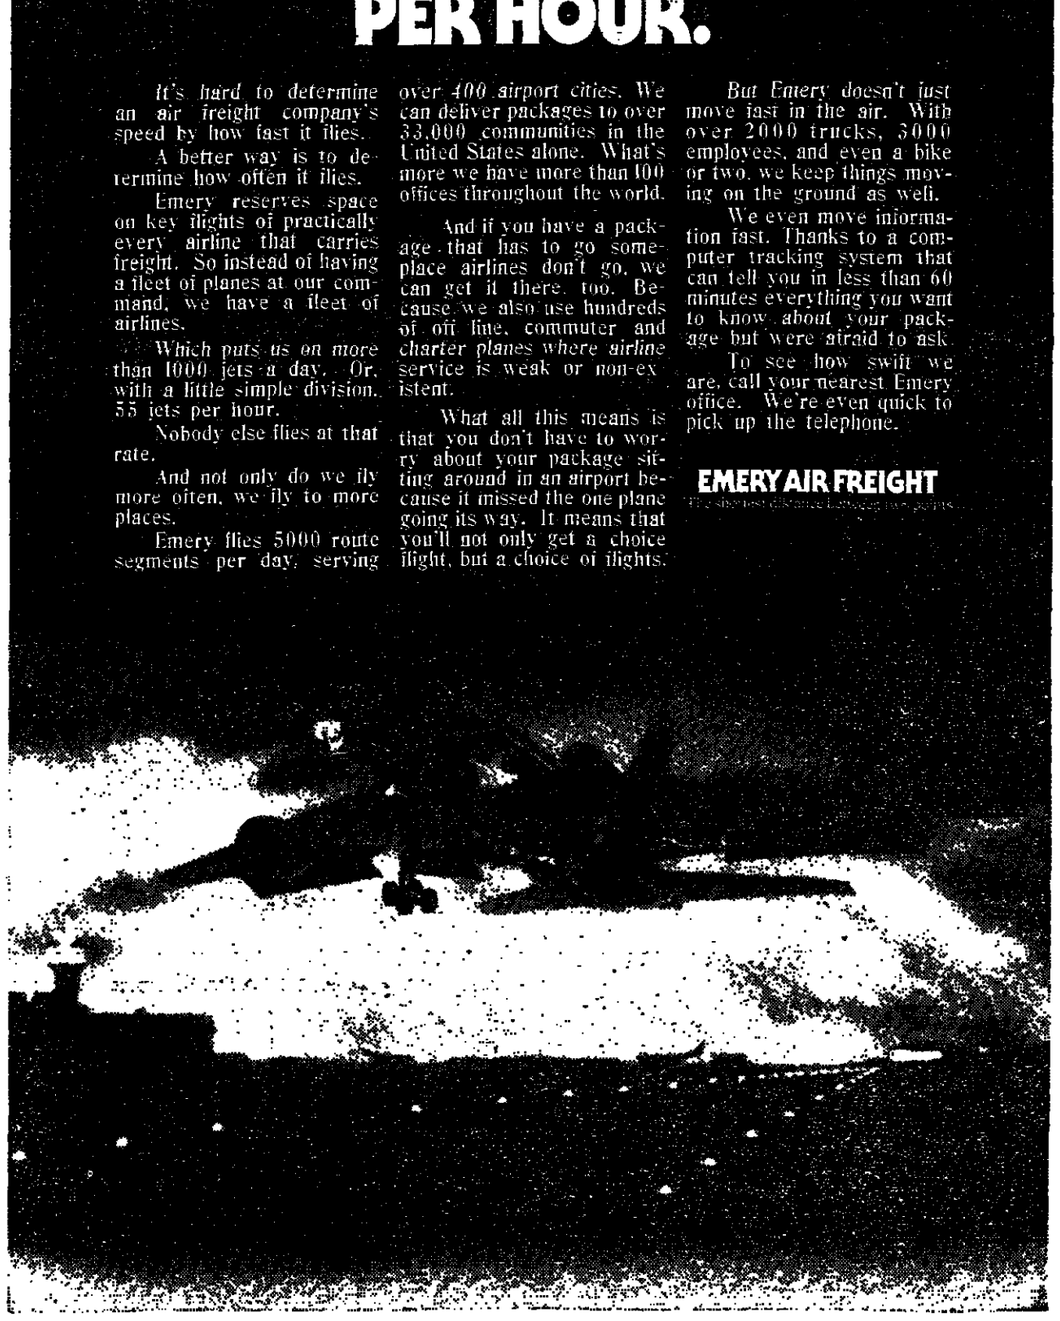
Which puts us on more than 1000 jets a day. Or, with a little simple division, 55 jets per hour.

Nobody else flies at that rate.

And not only do we fly more often, we fly to more places.

Emery flies 5000 route segments per day, serving over 400 airport cities. We can deliver packages to over 33,000 communities in the United States alone. What's more we have more than 100 offices throughout the world.

And if you have a package that has to go someplace airlines don't go, we can get it there, too. Because we also use hundreds of off line, commuter and charter planes where airline service is weak or non-existent.



What all this means is that you don't have to worry about your package sitting around in an airport because it missed the one plane going its way. It means that you'll not only get a choice flight, but a choice of flights.

But Emery doesn't just move fast in the air. With over 2000 trucks, 5000 employees, and even a bike or two, we keep things moving on the ground as well.

We even move information fast. Thanks to a computer tracking system that can tell you in less than 60 minutes everything you want to know about your package but were afraid to ask.

To see how swift we are, call your nearest Emery office. We're even quick to pick up the telephone.

President Geisel Seeks Vote of Confidence

Brazil's Regime Tested in Local Elections

By Bruce Handler

RIO DE JANEIRO, Nov. 15 (WP).—Brazilians went to the polls today to choose mayors and city councils and, although these are local elections, the vote is considered a popularity test for the military government, the fourth to rule Brazil since the armed forces overthrew a leftist regime 12 years ago.

The municipal elections also have a bearing on the larger issue of the ultimate role of democracy in Latin America's largest country.

President Ernesto Geisel, 68, a retired general, has said that he would like to return the nation slowly to democratic rule. But there is a strong feeling in the armed forces that if civilian politicians ever got political control again, the country would go Communist, become torn by political terrorism and lose its generally good standing in the international business community.

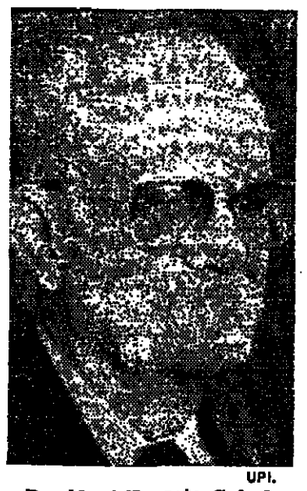
Many Brazilian generals look warily at the political and economic chaos in neighboring Argentina, where a military government returned power to civilians and then, after the internal situation deteriorated seriously, took over the government again.

Trappings of Democracy

Nevertheless, except for brief periods when courts were purged and Congress was closed, the military-run government here has maintained the institutional trappings of democracy.

Brazil has a federal Congress, state legislatures, political parties, a court system and a privately owned press. But the President has dictatorial powers at his disposal, to invoke when he wishes.

Yet no military leader has proposed the permanent installation here of a dictatorship. And although the government is structured so that the military-run system can continue for a long time, no single general can accumulate dominant power.



President Geisel has said that if civilian politicians showed that they were responsible enough to run the country some day, it would aid the return of democracy. Many civilian officeholders have proved corrupt and incompetent. The civilian majority leader in the House of Representatives, Jose Bonifacio de Andrada, has said publicly that Brazil "isn't ready yet" for full civilian rule.

'Vote of Confidence'

President Geisel himself turned today's elections into a plebiscite by repeatedly asking for a "vote of confidence in the revolution" as he campaigned for the government party, the National Renewal Alliance, known as ARENA, the acronym formed by its initials in Portuguese. He said that a big vote for ARENA candidates would show that the Brazilian people recognize the progress made under military rule.

The only legal opposition party, the Brazilian Democratic Movement, contended that the military government has managed the nation's economy poorly.

Brazil's most influential newspaper, O Estado de São Paulo, said the vote can be considered something of a referendum. But political analysts noted that Brazilians have traditionally based their votes in municipal elections on strictly local issues.

Italian Airports Close

ROME, Nov. 15 (Reuters).—Italy's airports closed tonight because of a 24-hour strike by firemen and civil aviation workers.

Voter Turnout Normal to Heavy

Quebec Separatists Seeking Gradual Transfer

By Henry Giniger

MONTREAL, Nov. 15 (NYT).—If a separatist government is elected in Quebec today, it will open talks with the federal authorities in Ottawa for the gradual transfer of sovereignty to this French-speaking Canadian province.

The prospect for a separatist government has been heightened by a legislative election in which the ruling Liberal party is expected to show a sharp drop in strength, with a corresponding upsurge for the Quebec party, the party of independence.

[The early voter turnout was reported normal to heavy and especially heavy in predominantly English-speaking districts on the west end of Montreal Island.]

For Jacques-Yvan Morin, the 45-year-old leader of the Quebec party's parliamentary group, a victory would not mean a sudden breakup of the Canadian confederation through declaration of independence by Quebec.

Independence Some Day

Mr. Morin, a scholarly looking international lawyer, said that a declaration of independence might come some day, but only after the Quebec party had exhausted all means of friendly negotiation and had received a clear mandate from the people of Quebec. He acknowledged that while the polls showed a lead for the Quebec party they showed no mandate at present for pulling Quebec out of Canada.

"We have a very flexible attitude on attaining our fundamental aim of independence," Mr. Morin said. "We are not out to break everything up in a sudden way."

A recent poll shows that among a random telephone sampling of 1,597 persons throughout the province, 29.5 per cent favor the Quebec party with only 15.9 per cent for the Liberals and 3.4 per cent for the once-powerful National Union, a conservative group.

But the same poll that showed a lead for the Quebec party also showed close to 58 per cent against independence. This paradoxical result explains the campaign strategy of the Quebec party, which Mr. Morin said consisted in attacking the Liberal party's record in office rather than promoting independence.

By the same token, the Liberal party has undertaken a strenuous campaign to warn voters against the dangers of separatism.

"We are not astonished by the 58 per cent against independence," Mr. Morin said. "That's 3 per cent less than last time. We'll progress as time goes on because independence is an inevitable process. It is like a living organism that is steadily growing toward adulthood."

In 1970, when the Quebec party ran in its first election, it won 23 per cent of the vote. In 1973, it progressed to 30 per cent of the vote. This time, while it may fall short of a majority, it is expected to make another considerable jump.

This prospect is believed to have been responsible for the drop in the Canadian dollar on the New York money market last week and for the wave of anxiety, approaching panic in some cases, that has swept the economically powerful English-speaking community of Montreal.

But Mr. Morin made it plain that independence is not for tomorrow: "We shall negotiate with the federal government on the transfer of powers one after the other. Two major fields that Quebec would seek to control quickly are social security and immigration, which are federal responsibilities at present. We expect that at some point when fundamental issues are at stake, Ottawa will say no."

Athens Students Warned Against Anti-U.S. March

ATHENS, Nov. 15 (Reuters).—The Athens police chief today warned students planning to go ahead with a banned march on the U.S. Embassy Wednesday that they would be stopped by riot police.

The march is intended as a climax to three days of demonstrations that began at Athens Polytechnic today to mark the third anniversary of a bloody attack on the campus by troops of the former military government. The assault left 34 dead and more than 1,000 injured.

The students accuse the United States of having supported the military regime, which fell in 1974.

The government banned the march on the embassy but authorized one from the Polytechnic to Athens University three miles away.

Education Minister George Rallis said over the weekend that the organizers of the demonstration had threatened to turn Athens into a city of anarchy.

Cuba to Enshrine Boat Castro Used

HAVANA, Nov. 15 (Reuters).—Granma, the yacht that brought Fidel Castro and a small group of guerrillas to Cuba 20 years ago, is to be turned into a national monument and, starting Dec. 2, will be exhibited in a special pavilion in central Havana.

Mr. Castro and 81 followers crowded aboard the 52-foot Granma, sailed from Mexico to Cuba on Nov. 24, 1956. Only a dozen of them, including the late Ernesto (Che) Guevara and Castro's brother Raul, survived early clashes with government troops.

The vessel will be on display near the marble palace of the late dictator Fulgencio Batista. Batista fled the country after 25 months of guerrilla activity by Mr. Castro and his supporters.

Carter Wins Vote 4 Miles From Russia

LITTLE DIOMEDE, Alaska, Nov. 15 (AP).—The vote is in from Little Diomede, and Jimmy Carter won, with votes to President Ford's 1.

Little Diomede is a stee rocky speck of land in t Bering Sea with about 1 residents. It lies less tha 4 miles from Big Diomede, t the larger island is on a other side of the U.S.-Russi border.

Ballots were dropped here in a package seve weeks before Election Day cause the island has no a strip. The results were out last week by radio-phone.

Pétain Backers And Foes Cause Auction Tumult

VERSAILLES, France, Nov. (UPI).—Even at an auction the souvenirs of Marshal Phi Pétain yesterday, the French mained bitter and divided over man who headed the govern of Nazi-occupied France.

The police had to be calle keep order at the Versailles tion hall when Pétain's men bills went under the ham Admirers of Pétain's World W valor shouted "hero." W War II Resistance fighters survivors of Nazi camps sco ed "traitor."

The sale was interrupted s by false bomb alerts and times by insults. Auctio Georges Blache said, "I w auction Stalin's cap, too. If ready to fight if necessary, the sale goes on."

When Pétain's World Wa medals for the Battle of Ver sold for 5,100 francs ($1,0 some cheered but a World Wa Resistance fighter cried, "Th not bad for a traitor."

When 150 souvenirs of 1939-1945 war were sold, t shook the room. The flag f Pétain's personal car went 5,300 francs. A man cried, the name of those deported the camps, to those execu Vive la France."

After the sale, police broke pro and anti-Pétain militants kept arguing on the sidewalk.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

General Manager - Marketing

Our Client, a well known international group, London-based, has substantial interests worldwide in the retail and wholesale trade and an outstanding record of profitable growth. The company markets a wide range of high quality prestige merchandise with total sales in excess of £25 million. It requires a General Manager to take responsibility for the development of the Group's business in two major product areas. The appointment will be at top level reporting to the Managing Director. Responsibilities will be strongly orientated towards marketing but candidates should be business men with international trading experience. They should also have an awareness of international trends in sophisticated consumer tastes. The appointment demands a combination of forecasting, planning and action to assist resident managers worldwide to optimise sales and profits. Successful achievement in this post can lead to exceptional career possibilities.
Some travel outside the U.K. is envisaged, therefore a second language, French or German, would be useful. Age range 30 to 45 years. A generous salary is offered, plus a company car and other usual fringe benefits.

Please write stating age, current salary and how you meet our Client's requirements, quoting reference GM/3804/IHT on both envelope and letter. Men and women are invited to apply. No information will be disclosed to our Client without permission.

Urwick, Orr & Partners Limited Baylis House, Stoke Poges Lane Slough SL1 3PF

GENERAL SALES MANAGER - EUROPE OFFSET PRESSES SALARY US DOLLARS 30 000

A young, dynamic American Offset Press Manufacturer with worldwide sales offers an attractive career opportunity to a qualified sales executive. This company possesses a product line of highest quality, well in the foreground of functional design, for which there is a substantial international market.
We are searching for an experienced sales manager who has an intimate knowledge of the printing industries as well as of the dealer networks in this area. Nationality of the executive is of no importance but an excellent knowledge of english plus at least one other continental european language is a must. General management potential will be a deciding factor in the final selection of the successful candidate.
This is a new position required as the result of the significant growth of this company. The headquarter's location for this position can be decided to suit the successful applicant.
As a leading international firm of Management Consultants retained by our client to select this executive, we undertake that no information will be released without prior consent and only after a personal interview which will be arranged promptly.
Write therefore in confidence giving full information on theoretical background, business experience, curent earnings, home address and telephone number to "EU - General Sales Manager 632" - P. LICHAU S.A., 10, rue de Louvois 75063 Paris cedex 02 who will forward

'We're Paying for It Now'

Great British Drought of '76 Gives Way to Great Downpour

By Robert B. Semple Jr.

LONDON (NYT).—The Great British drought of 1976 is over. Then again, it isn't. It depends on whom one consults, one's shoes or the government.

The drought will not easily be forgotten. It consisted of three months of uncharacteristically sunny weather that turned this green country a dull brown, ruined the government, damaged crops and made bathing a luxury and washing the car a crime.

Where do things stand now? Ankle-deep in water. "We're paying for it now," a woman said the other day as she walked for miles, her umbrella providing little meager protection against another downpour.

So Britain is Britain again—damp, unpredictable, alive, even in November with invigorated grass and optimistic flowers. But some people here are being cautious about it all, and they are the civil servants in Whitehall.

Technical Response

Although the government formally announced the end of the drought two weeks ago, the announcement was merely a technical response to the plain fact that it had rained nearly every other day in September and October.

At the same time, however, the government has yet to lift all of the emergency restrictions on water use imposed last summer. There are still some restrictions on industrial use of water.

"Why?" a sodden visitor asked John Stevens of the Department of the Environment.

"There is an area of doubt about underground sources," Mr. Stevens replied. "They took a hell of a caning."

Russell Clark, an official at the National Water Council, offered more details as he peered through his rain-splattered window. Reservoirs are mostly filled, he said, the rivers are flowing again, and areas that depend on runoff are nearly back to normal.

But areas that depend heavily on aquifers, or underground sources, are still not back to normal. These are the Thames District around London, Anglia to the east and the Southern District to the south and west.

In each case, Mr. Clark said, there is a "soil deficit" of several inches—that is, a deficit in the amount of water needed in the soil so that the water can percolate through to the underground sources that feed wells, streams and ultimately reservoirs. He was optimistic that the deficit could be made up quickly "if things keep going as they have been." London, for example, received 76 per cent more than its normal rainfall last month. But he also said that there was no cause to relax.

"It could happen again," he said, and on that point many experts are agreed. Britain has had six straight years of below-average rainfall, and some research indicates that dry summer conditions could be a pattern for the next 10 to 20 years.

Accordingly, Britain is thinking about the future. A proposal to transfer supplies in Scotland to England in future emergencies has been rejected as prohibitively expensive. But experiments are under way or under consideration involving the expansion of existing reservoirs, pumping water from around the country, using related or contiguous rivers and lakes and finding new underground supplies.

"We've also found," Mr. Stevens said, "that people are still holding consumption down by about 10 per cent below normal levels."

One reason for this is that some people may remain frightened by what they lived through. It was, for Britain, an eerie experience, a summer of joyous sunshine that grew increasingly disconcerting.

But a more obvious reason may be that when it is raining one does not need to use much water.

Associated Press.

Japanese Premier Takeo Miki waving to campaign crowd.

Japan Election Drive Opens

TOKYO, Nov. 15 (AP).—Campaigning began today for the national elections to be held Dec. 5, and opposition politicians opened their drive by accusing Premier Takeo Miki's Liberal Democratic party of being a servant to big business.

At stake is control of the House of Representatives, the seat of real power in the bicameral Diet (parliament). Membership in the House is being enlarged from 491 to 511, and the Liberal Democrats seek to increase their representation from 265 to 271, to insure their control of all House committees.

Mr. Miki opened his campaign by citing his government's price-stabilization and business-recovery efforts and pregress in the investigation into the Lockheed payoffs scandal. He said that the opposition, divided into four parties, lacks the capability of ruling.

The Lockheed scandal has shaken Mr. Miki's party, but there is a widespread belief that it may have little effect on the election's outcome.

Former Premier Kakuei Tanaka, awaiting trial on charges of accepting a bribe from Lockheed to help its airplane sales here, is expected to retain his House seat easily, as an independent. He resigned from the Liberal Democratic party after his arrest.

Former Transport Minister Tomisaburo Hashimoto and former Vice-Minister of Transport Takayuki Sato, also accused of bribery in the Lockheed case, are likewise running as independents and expected to win.

Accord Against Terrorism Adopted by Council of Europe

PARIS, Nov. 15 (NYT).—In response to deep concern over the threat of terrorist acts in such places as Ireland, the Basque country and Corsica, the Council of Europe has formulated a convention for the suppression of terrorism.

In essence the convention abolishes the legal distinction between politically motivated terrorism and ordinary crime. It stipulates automatic extradition of terrorists to the country where their act was committed or, as an alternative, prompt trial in the country where they took refuge and were caught. It also calls for collaboration in tracking them down.

One clause in the convention, however, exempts those cases where there would be "serious reasons to believe" that the request for extradition was motivated by "considerations of race, religion, nationality or political opinion."

To go into force, the convention, which was unanimously adopted last week at Strasbourg, must be ratified by at least three countries in the 19-member body. It would then be valid in their territory and would gradually be extended as other countries ratify.

Because legislation against terrorism is such a pressing need, it was widely felt here that there was every likelihood that the convention would be adopted, though it might be amended.

The Council of Europe, founded 27 years ago in the hope that it would soon grow into the government of a united Europe, still has only consultative status, but it can propose joint legislation to the members. The council has no organic link with the European Economic Community, but that organization's nine members are also members of the council.

The convention on stemming terrorism is the council's 88th. More than half have been ratified by at least three members.

Upon an initiative by Chancellor Helmut Schmidt of West Germany, the EEC members are working on joint rules for dealing with the more specific issue of suppressing the taking of hostages. A spokesman for the Council of Europe said that those rules and the convention might ultimately be linked.

The convention lists the following as acts of terrorism: hijacking; taking hostages; abduction; sequestration; the use of bombs, grenades and firearms; any infringement on the rights of diplomats and damage to public buildings. It states that no such act, attempt at such an act or complicity in it will henceforth be considered "a breach of law inspired by political motives."

Under right-of-asylum clauses in many constitutions, governments can refuse to extradite those sought for political acts by other countries. Under the convention, governments would have to extradite or try the terrorists. France appears to be reluctant to vote for the convention, because ratification would involve a change in the constitutional provision of asylum in cases of political crime. Similar problems could arise elsewhere, notably in the Scandinavian countries.

On the basis of an Irish proposal, the convention declares national criminal courts to be competent to try, judge and punish any person having committed a terrorist act on the territory of another signatory.

Spanish Regime Seems Slow To React to Rightist Violence

MADRID, Nov. 15 (NYT).—The Rafael Alberti store on Calle Tutor was damaged last weekend—another in a lengthening list of bookstores burned or bombed by rightists in the year since Francisco Franco died.

Although the government of Premier Adolfo Suarez has moved cautiously against some bastions of the far right, its seeming inability to check neo-Fascist "commandos" has become something of an embarrassment and a test of its democratizing intentions.

The "Adolf Hitler Sixth Commando of the New Order" sends death threats to liberal and leftist figures, but most of them prove empty.

"You are a Marxist bookseller and a cuckold," read a note sent to Enrique Lagunero Munoz, 50-year-old proprietor of the Rafael Alberti. "And, moreover, we are going to rob your bookstore, and also kill you, if you don't get out of Spain in a week."

Already the target of three unsuccessful assaults, the richly stocked store, favored by students from nearby Complutense University, succumbed the other night when thugs bashed in its front door and ignited a mixture of oil and gasoline. Its facade was spray-painted with anti-leftist and anti-Semitic slogans.

Scorched and Ruined

"Everything is covered with grime," said a doleful woman employee of the store, threading past a carbonized cash register, two impassive policemen in gray, a cluster of soft-spoken sympathizers and thousands of scorched, watersoaked, ruined books. "We put up five plates of glass, but then they came through the door."

Book-burning by rightist extremists has been going on for years in Spain, but in the year since Franco died the pace has picked up, along with the sending of death notes and 2 a.m. anonymous phone calls. On the day the Rafael Alberti was burned, a bookstore in Valencia was also attacked.

It has become increasingly difficult for bookstore owners to get insurance and some policies have been canceled outright. "The companies treat us as if we were delinquent," said Mr. Lagunero, who opened the store a year ago, naming it, somewhat provocatively, after a celebrated Communist poet who lives in exile in Italy.

After the latest attacks, the National Association of Publishers issued an angry protest against the "systematic activity of armed groups that have been operating with impunity for many years without, to our knowledge, the arrest of a single member."

Arrests Reported

Late Wednesday afternoon, however, the police were reported to have apprehended four men believed to be responsible for the early-morning attack on the Rafael Alberti and a number of other bookstores.

In "pre-democratic" Spain, leftist radicals are rounded up as "suspects," but rightists are almost never arrested, giving rise to speculation that they have links to sympathizers in the police. Last month, after the murder by leftist separatists of a San Sebastian politician, "uncontrolled elements," as the rightists are euphemistically known, spread unchecked terror in the Basque country.

Two weeks ago, a group of plainclothes policemen in Barcelona assaulted journalists and a lawyer after the trial of five police inspectors accused of torture. Four of the inspectors were given perfunctory jail sentences.

Even so, the government has begun to move cautiously against bastions of the right. Col. Federico Quintero, the hard-line police chief of Madrid, has been removed.

And, as part of a wider effort to assert civilian control over the "forces of order," the widely feared Social Political Brigade—the closest thing Spain has to a political police—is slowly being dismantled.

There have also been persistent reports of plans to withdraw the stern Civil Guard from Basque cities and towns, where it is viewed as an occupying force.

Within the police force, the government's moves have received some timid endorsements. Groups of policemen in the Canary Islands and the northeastern city of Zaragoza have issued anonymous demands for a "depoliticization" of their work.

Absentee Ballot Survey

The International Herald Tribune is making a survey of overseas absentee ballots in the recent U.S. presidential elections. Readers who asked for such ballots but did not receive them are asked to write the IHT, giving their names and the counties and states involved.

India Parliament Expels a Leader

NEW DELHI, Nov. 15 (AP).—Subramaniam Swamy, a rightist opposition leader who has fled to the West, was expelled from the Indian Parliament today for alleged misconduct and subversive activity.

In the first such action in India's 29 years of independence, the upper house by voice vote passed a motion expelling the 36-year-old former Harvard University economics lecturer for conduct "derogatory to the dignity of the House and its members and inconsistent with the standards" of Parliament.

The motion was based on a committee investigation that found Mr. Swamy guilty of evading the law, spreading anti-India propaganda and traveling on a passport that had been ordered impounded by the government.

Mr. Swamy, whose present whereabouts are uncertain, has been accused by members of the ruling Congress party and the pro-Mocow Communist party of having links to the CIA.

Monkey Virus Patient Only Has Type of Flu

LONDON, Nov. 15 (UPI).—A biological warfare researcher who might have been exposed to a type of green monkey disease probably has something far less exotic and dangerous—influenza—doctors said today.

They said Geoffrey Platt, 42, would probably be allowed to go outside his hospital isolation tent and speak with his wife, Eileen, by telephone soon. Mr. Platt was hospitalized Thursday with fever and other symptoms after apparent exposure to the virus of the so-called green monkey disease, which recently killed hundreds of persons in Africa.

Istanbul U. Closed

ANKARA, Nov. 15 (AP).—Istanbul University, one of Turkey's biggest, has suspended classes indefinitely due to campus violence, it was announced.

India Parliament Ends Action Delaying Vote

NEW DELHI, Nov. 15 (AP).—The Indian Parliament has completed final passage of a bill to postpone national elections for the second time since Prime Minister Indira Gandhi proclaimed a state of emergency 17 months ago.

The upper house, over limited but vocal opposition, approved by voice vote a measure extending the life of the current Parliament for another year. The lower house approved the bill earlier.

Details Postpone U.S. Bid to Oust 3 Alleged Ex-Nazis

NEW YORK, Nov. 15 (AP).—Three elderly Eastern European immigrants went to court today for the first time in the government's efforts to deport them for lying about alleged collaboration with the Nazis in the deaths of thousands of Jews during World War II.

But courtroom procedures quickly delayed any testimony, which is expected to include statements from those who suffered under Nazi torture during the war.

A hearing involving Bronius Kaminskas, 74, of Hartford, Conn., was delayed until Jan. 25 to allow prosecution and defense more time to prepare their cases.

A similar hearing for Boleslavs Maikovskis, 72, of Mineola, N.Y., was put off two weeks, with the government ordered to define its allegations.

A hearing for Karlis Detlavs, 61, of Baltimore was also continued and prosecution and defense officials were told to confer on a date. Through an attorney, Mr. Detlavs denied he had concealed his wartime activities in order to enter the United States as a resident alien. The proceedings against Mr. Kaminskas, Mr. Maikovskis and Mr. Detlavs were the first attempt by the Immigration and Naturalization Service to try alleged World War II criminals.

Paris Court Refuses To Extradite 4 to U.S.

PARIS, Nov. 15 (UPI).—An appeals court today refused to extradite four Americans to the United States to face charges of hijacking a U.S. aircraft to Algiers in 1972.

The four, George Brown, Joyce Herman and Jean and Melvyn McNair, will consequently answer the charges in a trial in French courts. The court ruled that the hijacking was a "political act" and therefore the four will not be sent to the United States for trial.

Omens in Corrèze

The victory of Jacques Chirac in the first round of a parliamentary by-election in Corrèze, in the heart of France, has implications that go beyond a seat and a vote in the National Assembly. President Giscard d'Estaing's former prime minister is now officially back in politics, and the lines are being drawn for the impending general election—scheduled for the spring of 1978.

Those lines—at least in the center and right areas which both the President and *Chirac chiefly represent*—are still hazy. Chirac, by first splitting the Gaullist party, was a major factor in the former's narrow victory over the Socialist-Communist candidacy of François Mitterrand two years ago. Now the polls reflect a movement among the French voters toward the left, a result that may be largely attributed to stagflation in the French economy. How the right and center are to meet this threat, and with what candidates, is the crucial present problem of French politics.

* * *

It is one that is complicated by the numerous upheavals that have afflicted the French parties of the right and center under the Fourth and Fifth Republics, largely because *of the impact of* Charles de Gaulle's personality and its passing with his death.

Now President Giscard wants to do what U.S. Republican moderates have attempted in past U.S. elections—win over those French liberals who are not ready to go all the way with the Mitterrand coalition. And his former prime minister hopes to broaden the Gaullist party into a mass movement of the right. His victory in Corrèze is one step: a Gaullist convention next month will be another. Presumably, Chirac will be able to lead the Gaullists; the question is whether this will cause Giscard d'Estaing's supporters to fall away from their present uncertain union with the Gaullists in the "presidential majority" in the Assembly, and split the right and center voters in the general election.

If so, there is little hope of defeating the Socialist-Communist alliance, which is growing in strength. And the success of that alliance would pose very serious problems for France. And raise equally serious questions among France's friends and allies. After Corrèze, the world will watch with great attention what Jacques Chirac does amid the great uncertainties of French politics.

Needed: An Economic Summit

When President-elect Carter assumes the presidency in January, his first and most crucial decisions will be how to resolve economic problems—both domestic and international. During the campaign, his attention was inevitably focused on domestic unemployment and inflation. But attention to the international economic and monetary situation is at least as urgent. For, if swift action is not taken to rescue many weak and heavily indebted nations, world trade and the U.S. economy itself could be severely affected.

Most nations, both developed and developing, are still struggling to recover from the sharp world recession of 1974–75 and the deep balance-of-payments deficits into which they were thrust, largely by the quintupling of oil prices by the Organization of Petroleum Exporting Countries.

The global problems of unemployment, inflation and payments disequilibrium are still acute—and are likely to be intensified if there is another oil price hike by OPEC next month. Admittedly, the world economy took the quintupling of oil prices in the past three years better than some economists feared. The recycling of petrodollars was carried through, in large measure, by private banking institutions in the major Western countries. But private banks cannot go on indefinitely lending to the weak countries. Many of the deficit countries have become too risky for further extensions of loans by private commercial banks.

This situation, so full of peril for the entire world, can be resolved only if the United States provides the leadership needed to head off another crisis—one that could be even more damaging than was the slump of 1974–75.

The new U.S. President could quickly establish his understanding of the gravity of the international economic problem and of the need for collective action by calling a summit conference of the leaders of this country's major allies after he takes office.

Such a conference would have several aims. One would be to persuade West Germany and Japan to move in concert with the United States in expanding their economies more rapidly. Those three countries are in the best position to go forward faster, without undue risk of inflation or payments deficit, in order to lead the world economy back to prosperity. Such countries as Britain, Italy and France could be expected to join the United States in urging the conservative West Germans and Japanese to accelerate their pace for the common welfare.

A second aim of the summit would be to forestall a wave of protectionism that might be touched off by nations seeking to safeguard their dwindling reserves and falling currencies, and to protect the jobs of workers at home. If trade barriers were to spread, they could plunge all nations into a deeper slump.

* * *

In addition, a summit meeting might agree on a common plan for more official financial support to the most endangered countries, both rich and poor. Such a plan could be best implemented through international bodies, especially the International Monetary Fund. But the leadership for a new multilateral financial effort would have to come from the United States and its principal allies. It would be in their enlightened self-interest to prevent a devastating blow to their private financial institutions and to *their domestic economies that could result* from financial defaults by other nations. It would serve the self-interest of the oil-producing countries to avoid intensifying the dangers of such a collapse—and to provide more financial aid to the weak—if only to protect the market for their oil.

But the United States and its allies cannot wait for enlightenment to guide OPEC. It is up to Carter to take the lead, in behalf of all nations as much as of the United States.

Help for Mr. Soares

It was inevitable that Portugal's first democratically elected government in half a century would have to cope simultaneously with two burdens: tidying up after more than two years of wildly erratic and costly efforts at social and economic reform, much of it dictated by the Communist party and its allies: and laying the foundation for Portugal's long-term political and economic regeneration and modernization.

Premier Mario Soares has now resolutely tackled one task critical for both the long and the short run: overhaul of the drastic land distribution program launched in 1975. Rural workers seized hundreds of thousands of acres with the encouragement of a Communist-dominated interim government, which "legalized" the occupations. Soares has now replaced a left-wing Socialist agriculture minister opposed to moderating the program.

Soares won decisive support for his pragmatic and gradualist policies from the Socialist party congress, promising to continue the agricultural reform program while correcting its "excesses and abuses." But a left-wing faction opposing moderation in farm policy, as well as government actions to restore factory discipline and impose wage restraint, managed to win nearly a fourth of the seats on the party's national commission. This display of left-wing disaffection from the government points up one of Soares's constant problems.

In the elections in April, the Socialists emerged as the biggest party but captured only 106 of 263 seats in the National Assembly. Soares nonetheless chose to form a minority government, rather than trying for a coalition with the Popular Democrats, who finished second and subsequently changed their name to the Social Democratic party. The Social Democrats have considerably more affinity with Soares's present course than does his own Socialist left wing.

The name change ought to make easier a coalition between these two left-of-center reform parties; and this tandem could command a robust assembly majority, even if it provoked some Socialist defections. It could give fresh momentum to an attack on staggering problems; 20 per cent unemployment, raging inflation, and a 1976 balance-of-payments deficit of $1.5 billion.

It may be politically impossible for Soares and Francisco Sa Carneiro of the Social Democrats to move toward each other before the local elections next month. But after that, in the interest of shoring up the democratic system for which both men fought courageously through the Salazar and Caetano dictatorships, they should find it possible to make the effort.

PARIS.—"The popularity of golf in America has already made it the second sport, and if it continues at the rate it has been going it will replace baseball as the national sport in a very few years," declared A.G. Spaulding, president of A.G. Spaulding and Co., manufacturers of sporting goods, who is in Paris on a visit combining both business and pleasure. Who knows, he might be right.

'I'll Get the Hang of It Yet!'

Carter and Andy Young's Future

By Jonathan Power

LONDON.—Jimmy Carter, when asked during the campaign if there was one person to whom he could turn and say thanks if he should win the presidency, said, "Yes, just one, Andy Young."

I first met Rep. Andrew Young, D-Ga., in Chicago in 1966 when as Dr. Martin Luther King jr's chief aide he was leading open-housing marches into the white heartland of Chicago. The newsreels are still around for anyone who wants to see the remarkable sight of an absolutely controlled and tranquil Dr. King and Andy Young walking through a stone-throwing mob of white hooligans. For six years Young was Dr. King's executive director. Wherever Dr. King was, so was he—counseling, negotiating, pushing. A man of quite extraordinary Christian vision and gentleness, yet of rock-hard purpose.

It took Young a good two years to recover from Dr. King's death. And then he made the decision to run for Congress. He won his seat in 1972—one of the first blacks to be elected from the South since Reconstruction. More than that, he won in a majority white constituency. He gained 26 per cent of the white voters in the Fifth Congressional District of Atlanta. He even outpolled George McGovern, the presidential candidate, among the white voters.

Rare Abilities

But this is one of Young's characteristics—he has that rare ability not to make enemies. He impresses both the white right and the black left. Stokely Carmichael once told me that if Young had succeeded Dr. King, he would have been prepared to work with him. And Mr. Carter, back in March, 1973, when he barely knew Young, said that he was "one of the finest men I know" and ventured he wouldn't be surprised to see him become vice-president.

As it happened, in that interview with Carter, I broke the journalist's rule never to reveal a confidence. I told Carter that Young considered him "very conservative, ideologically ignorant but with a heart in the right place." I only publicize the anecdote because times have changed. Young now considers Carter the best hope to further the cause of U.S. blacks. And Carter took the criticism so keenly that from then on he regularly sought out Young and made him his friend.

When it came to the critical Florida primary, the friendship paid off. Still not without doubts, Young decided to throw his immense weight and prestige behind Carter. That brought most, if not all, of the old Southern civil rights coalition along, including Dr. King's father, Atlanta Mayor Maynard Jackson and Vernon Jordan, director of the National Urban League. Young not only got 75,000 black Florida votes out for Carter: he also helped persuade the other Democratic contenders, bar Sen. Jackson, to stay out of the primary. Carter defeated Wallace in Florida and emerged as the voice of the new South. Again in Michigan, Carter's narrow triumph over Morris Udall was based on the black vote.

Carter now has made Young one of his inner circle. Frequently called to Plains, Ga., during the campaign, he was regularly asked to comment on drafts of speeches and he helped shape policy on such issues as southern Africa and national health care. One highly placed Carter foreign policy adviser says the President-elect respects him so highly because he has the "right combination of energy, vitality, realism and idealism"—which in fact sums up Andrew Young exactly.

The idealism comes through when Young talks about the South, which he now sees poised on the edge of an upsurge in creativity and harmony. Why does he feel this? "Because the South is deeply religious. It always had a guilt feeling about its racial attitudes. White Southerners knew way down deep it was wrong . . . it was the system that corrupted. Tradition ran the system. Fear ran the system."

And the realism? "Any effort to help the black man will fail if it is approached as a racial problem. On one point we are fortunate: There are more than 50 million white Americans who share the same economics-related problems of blacks today. Mass transit is not a great race issue, but nothing is going to do more to open up the central city than to provide adequate transportation for blacks. People forget that one of the causes of the Watts riots was that there was only one bus line from Watts to the area of economic opportunity in Los Angeles."

Young, who shares much the same religious convictions as Carter, believes the President-elect is "very vulnerable morally." If the issue is just, and if the books can be balanced, Carter will respond, he argues. This is why Young is pushing hard on southern Africa. Already Carter is publicly committed to majority rule in South Africa. Young wants to see him using the economic weapon to bring this about. Only this, he believes, can short-circuit a long-drawn-out race war. Young is confident that, given the enormous economic interests the United States has in South Africa, the leverage, if used, could be devastatingly effective.

Has a Notion

Is Young likely to end up in Carter's cabinet? Young does not think so. "My role is personal friendship," he answers. "I have a notion you choose between position and policy. If you take a position you're locked into the cabinet and its day-to-day administrative machine. Whereas from outside I can have an influence on policy across the board—foreign affairs, welfare, etc."

Yet when pushed, Young concedes laughing there's one job that would tempt him: If Carter asked him to be responsible for sorting out southern Africa.

The job could hardly be put in better hands.

Letters

Double Taxation

In response to the letter of Robin Cody (IHT, Nov. 9) on the subject of taxation of Americans residing outside the United States, may I say that he has simply missed the point. I do not earn $50,000 a year, but, even if I did, I see no reason for "contributing significantly to the U.S. Treasury."

I pay my taxes in full here, which is a perfectly reasonable thing to do, since I use French roads, inhabit an apartment here, drive a car in France, and provision my kitchen. Under the previous law, there was at least enough leeway to allow an American resident in France the possibility of laying off all the taxes one pays in a year in TVA, without having to itemize them. Under the present law, one won't even be able to categorize as "taxes paid" the French tax on a liter of gasoline—a solution that is readily available to U.S. citizens at home.

If there is going to be a second Tea Party, then count me in. It is really not a question of earning $50,000 a year; it is much more that of double taxation, wherever it is encountered.

BARBARA BLAHA.
Neuilly-sur-Seine, France.

Britain's Plight

I submit the only way out for Britain is to declare war on the United States, fight fiercely, and, win or lose, grab the money and run before the Vietnamese get it all.

GEOFFREY BOCCA.

South African Tinderbox

'In the Image of God'

By Anthony Lewis

BOSTON.—With all its injustice and tension, South Africa is a deeply appealing country. The visitor is moved by the beauty of the land and, especially, by a sympathetic emotional quality in the people, white and black.

When I was there last year, one of the most impressive persons I met was Sally Motlana, a black woman, 47 years old, who ran a general store in Soweto. Mrs. Motlana is a profoundly religious person—that comes through at once. She is on the Council of the Anglican Diocese of Johannesburg and the All Africa Conference of Churches. And when she speaks, there is a power of conviction in her voice.

"The Bible teaches me that I am made in the image of God," she said to me. "I believe that—I honestly believe that—and I don't see how other Christians can discriminate against me. Then they must teach me again, and tell me I am not made by God, and teach me who did make me."

Goes Abroad

Her church work took her to other countries in Africa. There she saw for the first time, as she put it, "how people can live together." In 1975, she made a visit to the United States, arranged by the State Department. I saw her soon after her return to Soweto.

"When you ask for your rights," she said, "people say you are anti-white. I'm not anti-anybody. People have to live together.

"But you can't expect us to live on 14 per cent of the land." (By law, 86 per cent of South Africa is reserved for whites, who make up 18 per cent of the population.)

"You can't expect us to be happy when we are moved from place to place like furniture." (Blacks are periodically transported from "white areas," where they may have lived all their lives, to desolate regions where there are no jobs or public facilities.)

"We want to be treated as human beings."

Now in Prison

The reason for recalling Mrs. Motlana's words is that she is now in prison. The security police arrested her last month under one of the armory of South African laws that allow the government to detain anyone indefinitely—without charges, without explanation.

The arrest of Sally Motlana, for reasons she is not allowed to hear, tells me that "law" in South Africa has become a perverted mockery of itself. In a state where Sally Motlana is imprisoned, no one is free.

Mrs. Motlana is of course a symbol of a larger phenome Since the troubles began Soweto last June, more than persons have been detained on charge under the ... security laws. They in Roman Catholic and Prote churchmen, a renowned so gist, a high school principal tors. One of the last is Motlana's husband, Dr. N Harrison Motlana, a leading tor in Soweto and a memb its Black Parents Associati

Press Is Curbed

Fifteen journalists have detained, among them two who provided most of the facts on the Soweto riots ports for the courageous daily, the World. The ment has made clear that not want the truth publish September, the Christian tute of South Africa put comprehensive report on record of police action und security laws; 10 days la report was banned.

But what has all this with us? Official inhum and the corruption of la common enough in the wor day, after all, and the States cannot reform ma But the United States is n ably involved in South it has interests and it h sponsibility.

The South African gover urgently seeks U.S. suppor argues that it stands for South Africa, a bastion democracy against Communis has tried to buy more tim white supremacy at home, cepting the idea of chan Rhodesia and South-West and by bringing the States into those problems.

Played the Game

Secretary of State Kis has essentially played the African game, using U.S. ence only on the margins on the crucial questions of in South Africa itself. He spoken against racism—be lowed South Africans to that the United States really concerned about problem.

But we have to be tau for reasons of self-interest other. South Africa is on way to an explosion that among much graver hum fects, damage U.S. economi strategic interests. Jimmy ter, with his background, to understand that there escape from the central of race in South Africa.

As Sally Motlana said ago, speaking as if she ... soning with the white country: "Look at me. I'm going to stay with yo ten to me."

In Lebanon, Logic Has Prevail

By Joseph Kraft

WASHINGTON—Logic, for once, has prevailed in Araby. The Lebanese civil war has ended in a natural coalition of Syria, Egypt and Saudi Arabia with Jordan as a kind of junior partner, and the bomb-throwing Palestinians and their supporters way down in importance.

The new coalition could become a base for making war more effectively against Israel. But, for perhaps the next two years, the Israelis and their friends in this country have an extraordinary opening for peaceful diplomacy on a steps-by-steps basis.

The Palestinians are the key to analysis of what has happened. They are a hard-working and highly educated people who feel dispossessed from territory now occupied by Israel. They have created various organizations—notably the Palestine Liberation Organization—which act as ginger groups using tensions within the Arab world to provoke trouble with Israel.

Fertile Ground

Precisely because they are troublemakers, the Palestinians have long since been curbed in their internal actions by most Arab states. Egypt never gave them free play. In Syria, the Palestinians were co-opted into a force, the Saiqua, run by the Syrian Army. Jordan squashed the PLO during a bloody civil war in 1970.

Lebanon, however, remained as fertile ground for the PLO, for the government was intrinsically weak because of the need to balance between the Moslem and Christian populations. With the outbreak of civil war between Moslem and Christian communities, the outlook seemed particularly good for the PLO.

The rest of the Arab world, moreover, was divided—with Syria and most other countries highly critical of the unilateral settlement made by Egypt with Israel in the Sinai Peninsula. So it looked as though the PLO would be able to expand its power in the country and make increasing use of the southern border lands for raids against Israel.

But President Assad of Syria saw an opening and moved. By a series of extraordinarily adroit actions he made good his gamble.

As a result, the PLO has now been crushed in Lebanon. Its supporters in Iraq, Libya, Algeria and the Soviet Union have lost influence. Egypt and Syria, with a little help from Saudi Arabia, have buried the hatchet. King Hussein of Jordan, who had been an outcast among Arab nations after the fight with the PLO, has been rehabilitated.

Peace Openings

The openings for peace are obvious. In return for movement away from the state of war, Israel can proceed to negotiate with Syria for further pullback from the Golan Heights, with King Hussein for further pullback from territories west of the Jordan River, and with Egypt for further disengagement on the Sinai front.

The breakdown that followed the last agreement with Egypt suggests that negotiations with leading Arabs, not as a one Arab state at a time run the tactic for improving their risk of being shot down by all tion against Israel.

other Arab states. But that not argue for a full-dress G conference where the PLO s Russians, acting as the lawyer, would once more ge the act in a big way. O contrary, it suggests the n of combining simultaneous eral negotiations—with Egyp Syria, for example, or Syri Jordan; or Egypt and J Instead of step-by-step, di plomacy would be steps-by-

The weight of responsibili making the most of the portunity now falls on Even though elections—and heightened internal tensions in the offing, the Israelis to be generous and farsigh in advancing proposals for negotiations, especially in the two years when they are su of a decisive military adva

Israeli Fears

Britain's Best-Selling Aristocrats

By Judith Weinraub

LONDON (IHT)—Francis Aungier Pakenham, the 7th Earl Longford, is a slightly rumpled, long author, social reformer and publisher who is known to the every newspaper reader in Britain as Lord Porn, after a 1972 investigation into pornography he led in the House of Lords. To his delight, he is viewed here as a moral force and something of an eccentric.

His wife, Elizabeth, is a trim, distinguished woman of immense charm who, after combining an political career with family and seven children, has written several best-selling historical studies, most notably one on Victoria and a two-volume study of the Duke of Wellington, one of Britain's most prominent aristocratic authors, show no signs of letting up. Of their two latest books to come out, Lord Longford's biography of President John F. Kennedy, the first in Britain, and Lady Longford's is a biography of Lord Byron.

And their eldest daughter, Lady Antonia Fraser, the author of biographies of Mary Queen of Scots and Oliver Cromwell, is no stranger to the best-seller lists either. After a tumultuous year, when her involvement in the breakup of the marriage of Harold Pinter and Vivien Merchant made frequent headlines here, she has just brought out an anthology of illustrious love letters.

Other Children

In fact, the family is something of a writing industry. The Longfords' eldest son, Thomas, is working on a history of the Boer War. Their daughter Judith writes poetry, and their daughter Rachel has written several novels. People talk about the literary Longfords.

"When you hear slogans like that, you think who are they, and then you say, oh, goodness, it's us," said Lady Longford one recent rainy day in the smallish Chelsea apartment where the Longfords live during the week. "There must be something in it."

The family writers also include Lord Longford's late brother Edward, who wrote plays for the Dublin theater, and Edward's wife, Christine, who writes novels and plays, his sister Mary Clive (novels, autobiography and a biography of Edward IV), his sister Violet Powell (autobiography), who is married to the novelist Anthony Powell, and his late sister Julia (short stories).

"It doesn't seem odd to me that so many of our children are writers," said Lady Longford. "If Frank writes and I write, it's obvious that some of our children will.

'Bookishly'

"They were brought up very bookishly. The second I could, I stuffed books into their Christmas stockings. And I always read aloud to them, until they were well into the double figures. I'd take several children at a time and read the ordinary things—the classics, Dickens and one or two Scotts."

Lady Longford wrote her first big book ("Victoria R.") when she was 53 years old. "I adored having babies," she said. "I wasn't against the process. I had no urge to write. I did politics intermittently, and after all I had gone to Oxford. Higher education for women was a tradition in our family.

"But when our youngest was about 3, I started doing journalism. The children were spending more and more time at school. I'd been brought up with a typical professional outlook. It wasn't the least bit upper class. One's duty was to earn one's living, and we brought up our children the same way."

Once she got going, the books continued in rapid succession, and the people she wrote about began to inhabit her personal life. "I think about my characters a lot," said Lady Longford, surrounded by pictures of Victoria and the Duke of Wellington.

"I lie in the bath, and think why did they do this. I would never write about someone I didn't like. It would be too painful.

Attentive

"When I was working on Queen Victoria, I did become quite interested in her problems—a monarch with a large family and no husband. I felt I understood her better than she had been before. And Frank said I became very attentive to his health and needs when I reached the death scene of her husband, Prince Albert."

Lord Longford is convinced that his wife's example is the reason the children write. "They always saw her writing," said the 70-year-old peer, talking in his office near the British Museum.

"Writing has only been a subsidiary activity for me," said Lord Longford, who has written 11 books, including one on Jesus and one on Abraham Lincoln. "It was not my vocation. Deep down I always thought I'd have to go to an office to earn my living. Now that I am elderly, to say the least, writing seems an appropriate activity, but it wouldn't have been when I was a young man."

Lord Longford's own books have grown out of the subjects that concern him passionately. "Ireland, religion, crime, autobiographies and America," he said, ticking them off on his fingers. "And I like the autobiographies least."

First Book

He is particularly proud of his first book, "Peace by Ordeal," a highly regarded account of the Irish treaty of 1921, and of a 1969 study of humility. "I do get great pleasure from having worked that one out," he said.

In his current offering, titled "Kennedy" (Weidenfeld and Nicolson), Lord Longford, who is considered Anglo-Irish aristocracy rather than British, found a subject that combined several of his interests—Ireland, America and religion.

"I was fascinated first because Kennedy was a Catholic who had at last broken through, and that intrigued me as a Catholic convert. And I've always been interested in American history. For me it's romantic."

Although Lord Longford considers his primary contribution to

Lord Longford
... 'Lord Porn'.

have been in the field of social work—he has been involved extensively in the problems of disadvantaged people and ex-prisoners—he is perhaps best known in Britain for his tireless crusade against pornography.

So how does he feel about the late President's recently publicized sexual behavior? "I suppose I'd have to mark it up as a debit," admitted Lord Longford reluctantly. "I am regarded as rather a puritan here you know. But other people have other weaknesses. I think it was an expression of his agony. It is generally accepted now that he had Addison's disease and he must have been in constant pain."

Besides his role as chairman of a prestigious publishing house, his writing, and his unswerving commitment to social causes—he has now added the problem of battered wives and the Northern Irish peace movement to his roster—Lord Longford manages to go to the House of Lords whenever it is in session. "You get £13.10 a day for going, and you can't ignore that side of things. We're not a rich family," he said cheerfully.

New Beaujolais Arrives, High in Quality and Price

By Jon Winroth

PARIS, Nov. 15 (IHT).—New Beaujolais went on sale today, the official release date, in bistros, wine stores and restaurants throughout France and the world. The 1976 crop was a large one of very good quality. The problem—and it is getting out of hand—is the price, up at least 20 per cent over last year's wine.

Beaujolais is the world's current wine craze. Some 170,000 hectoliters of new Beaujolais and Beaujolais-Villages have been released for sale between now and Dec. 15. But as with the Bordeaux boom of 1970-73, price has nothing to do with quality, only with a *supposedly insatiable demand*. The Bordeaux bubble burst in 1974; Beaujolais may well be heading for a similar bust.

After the record crop of 1973 and another large crop in 1974, prices were soaring. They did not come down when 1975 produced a small harvest of harsh, tannic wines, completely lacking the light fruitiness for which Beaujolais is famous.

This year's crop is another large one, perhaps as many as 1.1 million hectoliters, and of fine quality. If acidity tends to be a trifle low, there is good color, plenty of natural alcohol, smoothness and fruitiness. But bulk prices are on the order of 1,200 to 1,300 francs the 316-liter *pièce* for plain Beaujolais (as opposed to 950 to 1,000 francs last year).

That will put the new wine, at retail prices, at about 11 or 12 francs the bottle. The *crus* will retail at around 16 to 18 francs the bottle. I hate to think what they will go for in restaurants, after recently seeing certain 1975 Beaujolais *crus* at 42 francs the bottle in an otherwise not particularly expensive bistro. This may be a record, but yesterday's record tends to become today's standard, especially during wine booms.

For a taste of the new Beaujolais, at as reasonable a price for the quality as you are likely to find, here are a few bistros where it is sold by the glass (and by the bottle to take home, as indicated):

- La Bienfaisance, a bistro on the corner of Rue de la Bienfaisance and Rue Miromesnil, Paris-8.
- Le Rallye, a café-wine store at 6 Rue Daguerre, Paris 14.
- Le Petit Bacchus, a café-wine store at 13 Rue du Cherche-Midi, Paris 6.
- Au Sauvignon, a café on the corner of Rue des Saints-Pères and Rue de Sèvres, Paris 6.

OPERA IN LONDON

Adding Up a Revival

By Henry Pleasants

LONDON, Nov. 15 (IHT).—The Royal Opera's revival of Sir William Walton's "Troilus and Cressida," in a new production by Colin Graham, restores to the repertoire that rarest of rarities, a modern opera that gives singers something to sing, the orchestra something to play and the listener an evening of musical music.

If it does not make for an especially moving evening, the fault lies with the late Christopher Hassall's libretto, which waits until the last act to provide situations of any tension. There is much in the score to remind the operagoer that, with his music for "Henry V," "Richard III" and "Hamlet," Sir William established himself as one of the finest film composers of the century, and to leave him regretting that in "Troilus and Cressida" he was setting Hassall and not Shakespeare.

For this production, Sir William has done some judicious editing and revised the music of Cressida, originally composed for Elisabeth Schwarzkopf, to accommodate the mezzo-soprano of Dame Janet Baker. And it is Dame Janet's superb presence and singing that makes this a memorable rather than a merely enjoyable experience. She is stoutly and resonantly partnered by Richard Cassily as Troilus. A masterly characterization of the devious Pandarus is contributed by Gerald English.

Lawrence Foster, filling in for an indisposed André Previn, and the Royal Opera Orchestra gave a vivid account of Sir William's rich and richly instrumented score at Friday's premiere. The stage designs by Christopher Morley and Ann Curtis are rather too spare.

What it all adds up to is Dame Janet Baker singing Sir William Walton—and that makes a tidy sum.

Paris Fashion Scholarships for U.S.

By Hebe Dorsey

PARIS, Nov. 15 (IHT).—For the first time, French couture houses are going to give scholarships to American fashion students.

The idea originated with Jacques Rouet, director of the house of Dior, who said: "I think French couture owes a debt of gratitude to the United States. We have been doing business over there for quite a long time and it has been a one-way sort of business. I am glad that I have been followed by several of my colleagues."

The $5,000 scholarships are being awarded by Dior, Grès, Lanvin, Cardin and Saint Laurent. There will be one scholarship a year for at least five years. The objective is to help American students complete their training with an eight-month course at the fashion school of the Chambre Syndicale (45 Rue Saint Roch, 1st).

They will get instruction in art and fashion illustration, fashion design, basic design and history of costume) plus technical training (cutting, draping, construction).

The program will be completed by visits to museums, exhibitions and fashion shows.

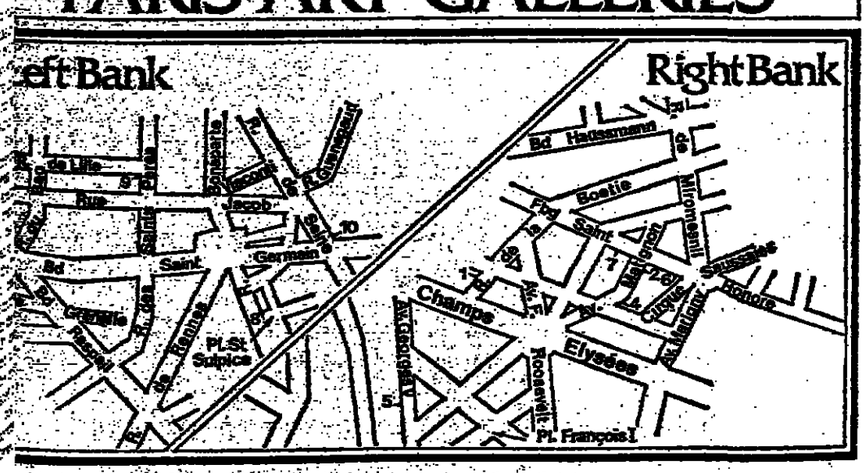
"We also want these young people to know that they'll have friends in Paris," Mr. Rouet added.

Exam and Sketches

The students, chosen from some 15 American fashion schools (including the Fashion Institute of Technology and Parsons School of Design), will have to submit two sketches (based on given themes, one of which being "A Thousand and One Nights") and a technical exam. All entries must be in by Jan. 1. Each school can enter as many as five students.

Their work will be submitted to an American fashion jury composed of editors, designers, store presidents and such fashion luminaries as Diana Vreeland, ex-editor of American Vogue. Announcement of the jury's selection will be made before April 1.

This private goodwill gesture is being followed up by the French government, which helps the Chambre Syndicale to promote French deluxe industries. "At the request of the Elysée Palace, we are going to hold a fashion show next Saturday in Los Angeles," said Jacques Moucher, president of the Chambre.



The show will be tied into the Gala de l'Union des Artistes, a charity show and a yearly Parisian event. The show consists of circus-type acts by well-known actors (the profits go to the French home for aging actors).

One hundred and forty people will be aboard the charter plane next Wednesday, heading for Los Angeles. But Mrs. Valéry Giscard d'Estaing, who was to preside over the gala, won't be among them, for protocol reasons. The French President's wife has been to the United States twice this year.

Taking her place will be Culture Minister Françoise Giroud, Mrs. Raymond Barre (the French Premier's wife) and Valerie-Anne, eldest daughter of the French President.

Behind the fashion frills, there is also a strong desire on the part of the French to keep moving in on a profitable market. The United States is France's second most important export market (after Europe).

FRENCH NEWSVENDOR SELLS BUSINESS CONSULTANCY

In France, as in 120 other countries around the world, a great many executives buy a daily business consultancy—the Financial Times, Europe's business newspaper—to monitor significant market movements.

These are the executives whose decisions may make or break a company. These are the readers who refer to their Financial Times not merely as their business newspaper but also as their business consultancy. The Financial Times gives them the best world-wide business information available. Concisely, factually and with unbiased comment. And, moreover, it provides, editorially, 32%* more international political, economic and commercial information than any other English language daily newspaper printed in Europe.

It takes an exceptional international network of correspondents to maintain this volume and quality of reporting. But that is what strategy-planning businessmen throughout the world expect of the Financial Times. And that is what they get. Plus foresight and insight of course. Hindsight we leave to the historians.

Consult the Financial Times, free of charge.
We invite you to consult, assess and judge the Financial Times daily for a fortnight. Without charge. Without obligation. Just complete the coupon below and put the Financial Times to work.

*Content analysis of five newspapers. Research Services International, August 1976.

...ader Group Charges IRS ...its Down on Audits of Firms

By Eileen Shanahan

...ASHINGTON, Nov. 15 (NYT). ...public-interest law group ...ed yesterday that there had ...a "startling plunge" in the ...er of audits of large corpora- ...tune by the Internal Reve- ...Service and that the decline ...ese audits had cost the gov- ...ent at least $1.5 billion in ...llected taxes in 1975.

...e charge was made by the ...Reform Research Group, an ...ization founded by Ralph ...r organization.

...releasing its findings on au- ...of large companies, the re- ...h group said that the IRS ...refused to comment on them, ...agency also failed to respond ...request for comment from ...New York Times.

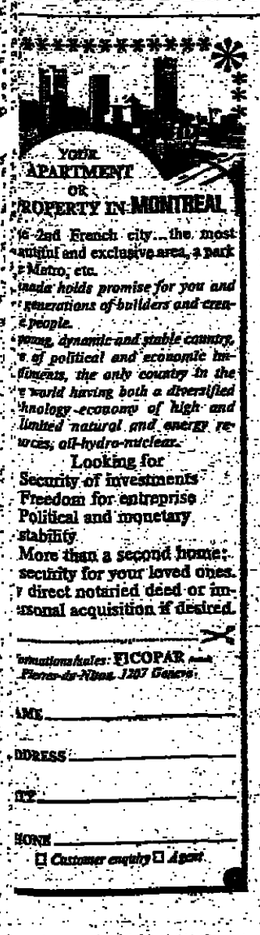
...e research group's study of ...audit practices in 1972 and 1975 found that there had been a 33-per-cent decline between 1972 and 1975 in the percentage of the largest corporations (those with assets of $100 million and more) audited by the IRS.

In the next-to-largest-size class, corporations with assets of $50 million to $100 million, there was a 50-per-cent decline in the proportion of audits, the study showed.

There was a decline in the percentage of companies audited in 1975, compared with 1972, in every group classified by the IRS as "large," a category that begins with corporations having $1 million to $5 million in assets.

The study also found that the IRS increased the proportion of audits of small corporations—these are defined as companies with under $1 million in assets—by 32 per cent.

The auditing drive against smaller companies "appears to result from a special drive launched against small corporations in 1975 after IRS studies showed they had a low level of 'voluntary compliance'" with the tax laws, the group said.



The change in auditing emphasis cost the government such large amounts of uncollected tax, according to the study, because the dollar yield from the audits of smaller companies was small and the potential yield from audits of larger companies was large.

The one policy the reform group found to compliment in recent IRS procedures was that "big firms which are tapped for audit apparently get a closer look now than they have in the past." The average additional tax payment recommended by the auditors increased in 1975 for every group of large corporations except those in the $1-million to $5-million class.

Six Nations in Pact On Phosphate Cartel

DAKAR, Senegal, Nov. 15 (AP). —Six Mideast and African nations which dominate world phosphate production agreed at a meeting here to form an association to determine what overall tonnage should be marketed annually, at what price, and how individual quotas should be fixed.

Morocco, Tunisia, Algeria, Togo, Senegal and Jordan took part in the meeting. They are to meet again before Nov. 25 to register formal governmental agreement to the scheme.

...s 2nd French city... the most ...autiful and exclusive area, a park ...Metro, etc. ...nada holds promise for you and ...enerations of builders and crea- ...e people. ...young, dynamic and stable country, ...e of political and economic in- ...fluences, the only country in the ...world having both a diversified ...chnology-economy of high and ...limited natural and energy re- ...urces, all-hydro-nuclear.

FINANCIAL NEWS AND NOTES

CGE Predicts Higher Earnings

Cie Générale d'Electricité (CGE), the French electrical and electronic concern, expects to post net earnings of about 115 million francs (about $23 million) this year, compared with 103.5 million in 1975. The company also expects to "substantially" increase its dividend payout. It paid a net dividend of 17.30 francs last year. In a letter to shareholders, president Ambroise Roux says he expects the group's consolidated earnings to rise above 250 million francs from 141 million in 1975. Net consolidated turnover this year should be about 16 per cent higher than last year's 17.44 billion francs.

Monsanto Sees Lower Earnings

Monsanto will probably report fourth-quarter earnings lower than the $78.7 million, or $2.20 per share, net income posted for the fourth quarter of 1975, says Richard O'Sullivan, vice-president and treasurer. This would mean overall earnings for the year—although they are expected to be at a record high—would fall short of the $11 per share projected by some Wall Street securities analysts. Mr. O'Sullivan says the company's textile unit, which reported an operating loss of $49.1 million in 1975, continued to suffer from depressed chemical fiber demand. He says that Monsanto does not anticipate any upturn in polyester demand in the fourth quarter but looks for recovery sometime next year after new products lines make polyester more attractive to consumers.

Sears to Sell Belgian Unit

Sears, Roebuck & Co. plans to dispose of its Belgian retail subsidiary, Galéries Anspach, after four years of ownership. The nine-store Anspach chain, which also operates two Belgian shopping centers, had a net loss of $11.2 million last year on sales of $66.5 million. A Sears spokesman says that exploratory "discussions" are going on between Sears and a European group that might lead to a sale of Anspach. In 1974, the Belgian company lost $23.8 million. In its recent annual report, Sears said that 1975 expenses at Anspach "continued to increase as a result of inflation while profits were restricted by price controls making improvement in operating profits difficult" Sears notes that its stores in Spain, which bear the Sears name, were profitable, having earned $3 million last year on sales of $65 million.

Rohm & Haas to End Fibers Output

Rohm & Haas intends to dispose of its synthetic fibers business in the United States and Brazil because of continuing losses in these operations and the "pessimistic outlook for polyester filament." Fibers account for approximately 9 per cent of Rohm & Haas's sales. Vincent Gregory, president, says the polyester filament plant in Fayetteville, N.C., and texturing plant in Scranton, Pa., will be closed by the end of the year and approximately 700 employees will lose their jobs. The carpet nylon plant at Fayetteville and the fibers operations in Brazil will continue to operate until a buyer can be found. Mr. Gregory says that discussions have been started with some preliminary buyers but no accord has been concluded. The net book value of the assets to be disposed of, including working capital and goodwill, is $182 million. The proposed disposition of the fibers business will result in an estimated write-down of about $40 million at the end of 1976, the company says. The company estimates that its fibers operations will experience losses equivalent to $1.50 a share.

U.S. Oil Firms Approve Merger

The boards of Getty Oil Co., Mission Corp. and Skelly Oil Co. have approved the terms of a previously announced merger of Mission and Skelly into Getty. The merger agreement is subject to approval of shareholders of the three companies at special meetings to be held Jan. 25. If approvals are obtained, the merger is expected to become effective Jan. 31. Shareholders of record on Nov. 24 will be entitled to vote at the special meetings. Getty Oil will issue to minority interests of Mission 1.4771 shares of Getty common for each share of Mission common and to minority interests of Skelly, 0.5875 share of Getty common for each share of Skelly.

GM Rebate Seen Boosting Subcompacts

Reduction of $200 May Help Cut Stocks

By Robert Metz

NEW YORK, Nov. 15 (NYT).—General Motors Corp. took Wall Street and the rest of the auto industry by surprise last week in announcing $200 rebates on subcompact Vegas, Astres and Chevettes.

Several auto analysts reached for comment said that the rebates, good until next Jan. 10, represented a positive move for General Motors.

Arvid Jouppi, a consultant specializing in automobile economics, said that the rebates should spark demand sufficiently to allow GM's subcompact plants to operate at "decent levels," presumably making profits.

General Motors, which produces more than half of all cars made in this country, tries to maintain 60-day supplies for all its cars. It had supplies twice that large in all three subcompacts.

Mr. Jouppi expects strong sales next year. "We had a 7.05-million domestic car market in 1975 and I expect 8.8 million units in 1976," he said. "I think that the market for domestic cars will grow to 10.6 million in 1977."

General Motors has two major plants devoted to subcompact-car production. Both were converted from large-car production and now, it turns out, auto purchasers are reverting to their long-time preference for the large car.

GM's rebates were the worst possible news for troubled American Motors. The rebates neutralize a recent $253 price cut on American Motors's Gremlin models, where the No. 4 auto producer's sales are concentrated.

Shares of the Big Three automakers are within a few points of their year's highs, and Wall Street expects further price advances as well as dividend increases.

Like GM, Ford has a surplus of its subcompact car, the Pinto, but a five-week strike helped reduce its inventory to a manageable 80-day supply. Ford could follow suit with rebates of its own, but so far the rebates are limited to the subcompacts. Chrysler produces no subcompact cars.

Carter Statement Cited

Dow Average Gains 7.7 Points After Price Rally at Midday

NEW YORK, Nov. 15 (IHT).—New York Stock Exchange prices closed narrowly higher in moderate trading today.

The Dow Jones industrial average was up 7.73 at 935.42, and volume totaled 16.71 million shares, compared with 15.6 million on Friday.

Advancing and declining issues were almost evenly split during the day, with advances outnumbering declines by about 800 to 570 at the close.

Stocks opened lower on news that September business inventories rose while business sales declined.

Although the news was viewed as further evidence of a slowing in the nation's economy, brokers say the report was anticipated and traders accepted it much in stride.

By midday, stocks reversed course and turned narrowly higher on what many analysts believe was internal considerations following the market's steep slide since the election.

Late in the day, the market rallied, brokers say, following President-elect Carter's statement that he hopes to avoid wage-price controls.

Among the most actively traded stocks, Sprague Electric rose 6 3/4 to 19 5/8 following announcement that General Cable is tendering for all of Sprague shares at $19.50 a share. General Cable gained 1/4 to 10 1/8.

Also active were General Motors, up 3/4 at 88 1/4, and Chrysler, up 3/4 at 18 5/8. Both companies reported higher early November car sales.

IBM rose 3 1/4 to 264 1/2, Stauffer Chemical 1 1/8 to 44 5/8, Halliburton 1 5/8 to 63 3/8 and Tektronix 1 1/4 to 59 3/4.

Addressograph-Multigraph was up 1/4 to 10 1/8 after settling a suit with Xerox alleging patent infringement and monopolistic practices. Xerox, which made a $1-million one-time payment as part of the settlement, rose 1 1/8 to 58 3/8.

Copper Range, a take-over candidate, did not trade today. It was last quoted at 19 1/2.

Eastman Kodak, which announced introduction of a new computer output microfilm unit, rose 1 5/8 at 86 3/8.

Gold issues were mixed, with Rosario Resources gaining 1/2 to 25 but Homestake Mining giving up 5/8 to 36 1/2.

On the downside, Getty Oil surrendered 5/8 to 182 1/4 and Centronics 3/4 to 24.

Sony fell 1 1/2 to 7 3/4. The company is being sued by Disney Productions and an MCA unit for alleged infringement of copyrights. Disney gained 3/4 to 45 1/4 while MCA lost 1/8 to 34 3/4.

Prices on the American Stock Exchange closed lower in moderate trading. The Amex index delined 0.16 to 98.39.

Soybean futures fell more than 23 cents a bushel on the Chicago Board of Trade and, except for wheat, dragged most of the other commodities lower.

Wheat futures were up 6 cents on good demand. Soybean meal fell the limit of 100 points while soybean meal lost $3.50 a ton. Oats were down 3 1/2 cents and corn nearly 3.

The selling of soybean futures followed a mixed opening and was set off largely by a quick downturn in soy oil prices. Commission house brokers began selling oil when stop-loss levels had been touched and prices quickly declined. Meal followed.

A factor in the weakness of the complex was a lack of sustained demand. Some selling also was influenced by an Agriculture Department statement that 10 per cent more acreage could be devoted to soybeans in 1977 than the near-50 million acres this year.

Inventories Rise in U.S. During Month

$2.6-Billion Gain Shown in Report

WASHINGTON, Nov. 15 (AP).—Manufacturers and merchants expanded their stocks of goods and raw materials by $2.6 billion for the second consecutive monthly increase during September, the government said today.

The Department of Commerce said inventories were up $2.6 billion to a seasonally adjusted $285.5 billion—the second-biggest increase since a $4-billion advance in December, 1974. Inventories increased $2.4 billion in August this year.

The continued strong rise in inventories means workers are being kept busy restocking goods and materials as well as satisfying sales demands. But if inventories get too big, factories and retail outlets might cut back, exerting a dampening influence on the economy.

The September accumulation of stocks apparently was partially involuntary, because sales slipped 0.5 per cent. During August, sales climbed 0.8 per cent.

Sales at the retail level have been virtually flat for the past four months. The latest shift means stock backlogs rose during September relative to the volume of sales.

The Commerce Department said businesses held inventories worth $1.51 for every $1 worth of sales during September, up from $1.49 in August, but below $1.54 during September last year.

Stimulation Effort Seen Failing

Banks Criticize Tokyo's Economic Program

TOKYO, Nov. 15 (AP-DJ).—A seven-point program to stimulate the economy approved by the Japanese government (IHT Nov. 13-14) will probably have little or no effect on this nation's sluggish recovery, economists said today.

The government simply does not have the money to carry out an effective program of economic stimulation, the economists agreed. Moreover, any genuine reflationary program would have to include measures that the government appears unable or unwilling to take.

The economists at major commercial banks in Japan appear to disagree over the actual state of the economic recovery, but they were agreed on the following basic points:

- The government program of extending loans and other official financing, as well as speeding up public investment spending, would have to be about double the aggregate 1-trillion-yen ($3.45 billion) package agreed on before having any stimulative effects on the economy.
- Much of the government program, including additional loans to housing projects and more spending on national railways and telephone and telegraph agency projects, represent either taking 1977 allocations for use now, or money that had already been projected for use this year but was delayed.
- Any genuine recovery program would have to include an income tax cut, implementation of a capital investments tax credit to boost plant and equipment investment, and a boost in money supply growth accompanied by possible reductions in the official discount rate.

May Help a Bit

The economic research department of Sumitomo Bank said the measures decided last week may help keep the economy from falling further into the doldrums, but will have almost no positive effect. The only actual stimulative money involved in the program is an increase in loans to housing projects of 81 million yen this year. This will be taken out of next year's allocations, however, the bank economists note.

The government lacks money for use in stimulative programs. The government's schedule of national bond issues for 1976 will reach 7.275 trillion yen, an amount that cannot be increased, bank economists agreed.

"The government announced their new package because they had to announce something, but the impact will be minor. There isn't enough money involved to make the package anything more than a token gesture of government intentions," an economist at Bank of Tokyo commented.

The government still expects to maintain the "real" annual growth of the gross national product at the officially forecast 5.6-per-cent level.

Sumitomo Bank's research department said, however, that it will be difficult to maintain the rate of growth that was achieved earlier in the year and forecast that the GNP in the last quarter of 1976 could possibly fall into negative growth, thus bringing the overall expansion for the year down to 2 or 3 per cent.

Orders Rise In Germany

FRANKFURT, Nov. 15 (Reuters).—Demand for West German industrial products is rising, the Bundesbank reported today.

September's new orders rose a seasonally adjusted 2 per cent over August and were 18.5 per cent above the year-ago level. In value terms, September orders were 11 per cent above the average for first-half 1976 and 9 per cent higher in volume terms.

Domestic orders showed a clear rise in September, especially for capital and consumer goods. But in the raw material and producer goods sectors, orders for the chemical industry again rose sharply but this failed to counter a drop in the steel industry's domestic orders.

The fall in domestic steel orders is connected with the increase in imports, the bank said.

The Bundesbank also said that production is reviving after the summer decline. September's production figures, seasonally adjusted, topped July and August but remained below May and June.

In another report, the Bundesbank said that the central bank money stock grew at a seasonally adjusted annual rate of 10.4 per cent in the six months to end-October while in the five months from June to October the growth rate was 11.5 per cent.

In September, the bank reported the money stock expanded at an annual rate of 6 per cent over the first eight months this year.

Banking sources, noting that the money stock rose only 4.8 per cent between last December and May, said it looks certain that this indicator will show an average annual 1976 growth of 9 per cent compared with the Bundesbank's target of 8 per cent.

Union Fails to Get Man on Chrysler Board

By A.H. Raskin

NEW YORK, Nov. 15 (NYT).—The first attempt by a major American union to put blue-collar representatives in corporate board rooms has ended in total failure. The tentative contract just agreed upon by the United Automobile Workers and Chrysler Corp. contains no concession on the union's original bargaining request that two unionists be added to the Chrysler board.

Despite this rebuff for union involvement in industrial policy-making at the top executive level, however, both sides emerged from the contract negotiations with plans for intensified cooperation in experiments aimed at heightening worker involvement in job design and job enrichment at the plant level.

The Detroit developments strengthened the belief long held by most experts in American labor-management relations that co-determination on the West German model—a practice under which large companies are obliged to assign half the seats on their supervisory boards to worker representatives—would be extremely slow in coming to this country.

Indeed, there remains widespread hostility among both union and business leaders toward modifying the traditional lines of managerial authority even on projects designed to give workers a larger voice in matters affecting the quality of work life.

Douglas Fraser, international vice-president in charge of the union's Chrysler department, had been the principal proponent of the move for putting unionists on the company board. The demand was based on a proposal Chrysler itself had made to the 54 unions at its financially distressed U.K. affiliate more than a year ago.

"We got zero on that issue," Mr. Fraser said after the settlement. "I have to admit that I saw no enthusiasm for the demand even on our own union committee. The whole venture falls in the category of planting a seed.

"But we did establish better procedures for moving ahead on joint projects in contract enrichment, and we have some preliminary findings made for us by University of Michigan researchers on worker and supervisor attitudes that give us a base for real progress."

U.S. Economists Call for Tax Cut

WASHINGTON, Nov. 15 (Reuters).—Three economists said today the U.S. economy needs a quick tax cut ranging up to $15 billion.

Advocating tax reductions were Henry Kaufman, a partner of Salomon Brothers, Harvard University professor Benjamin Friedman, and Allan Meltzer of Carnegie Mellon University in Pittsburgh.

Mr. Kaufman proposed a one or two-shot tax rebate of about $8 billion in the first or second quarter of next year to stimulate business activity and strengthen consumer purchasing power.

Prof. Friedman said there should be a tax cut, and or stimulus through federal spending of $10 billion to $15 billion.

Prof. Meltzer said there should be an across-the-board tax cut for both individuals and businesses of $10 billion to $12 billion.

Du Pont Extra Dividend

WILMINGTON, Del., Nov. 15 (Reuters).—Du Pont Co. directors today declared a year-end extra dividend of 50 cents. This, plus the regular $1.25-per-share dividend will be paid Dec. 14 to holders of record Nov. 23. This brings dividends for the year to $5.25 as against $4.25 in 1975, Du Pont said.

Foreigners Sell Record Value Of Stocks in U.S. in Quarter

WASHINGTON, Nov. 15 (UPI).—Foreigners attracted by declining interest rates sold a record $3.2 billion in securities, bonds and other new financial issues in the United States during the third quarter, the Commerce Department said today.

It said the unprecedented volume of new issues accounted for a $2.8-billion net gain in U.S. purchases of foreign securities, double the increase in the second quarter.

The Philippines and Canadian provinces were the largest of the new investment vehicles offered in the quarter.

The department also said foreign official assets in the United States increased $1.2 billion, down from a $3.2-billion increase in the second quarter. The department attributed this to reduced U.S. investment by members of the Organization of Petroleum Exporting Countries (OPEC) and weakness in the economies of non-oil less developed countries.

Foreign purchases of U.S. stocks, meanwhile, declined for the third consecutive quarter to $78 million from $160 million during the previous quarter. Foreign purchases of U.S. securities registered a record $2.5 billion last year.

In other international finances, the Commerce Department said loans and other claims on foreigners by U.S. banks climbed $2.6 billion—off from $4.7 billion in the second quarter.

U.S. bank lending overseas had been expected to fall off this year, but has been continuing at last year's strong pace, largely on the strength of heavy borrowing by developing nations pinched by inflation and slack demand for their raw materials.

Who looks after your
INVESTMENT SECURITIES
When you don't do so yourself?

—Who keeps a very close eye on the market quotations of your stocks and shares, so that you can not only buy at a favourable price but also sell when appropriate?
—Who helps you to pick out securities when their selection calls for accurate knowledge and judgment?
If you are in a position to invest on the international stock markets our specialized services can help you and advise you.
—As one of our customers, you will have the benefit of accurate information concerning the securities you should buy, sell or retain.
—Sogefinance S.A. selects securities in the light of the relevant circumstances and of the situation and age of the customer.
—We select only first-class securities which are competitive throughout the entire world.
—We keep you regularly informed of our views concerning the economy, the stock markets and your securities. The final decisions rest with you. If our services are of interest to you, please complete and return the coupon below. Sogefinance, founded in 1952—already 24 years—does not accept either funds or securities on deposit—it manages portfolios in all banks, throughout the world.

ENDESA - CHILE
220 KV NORTH TRANSMISSION LINE PROJECT
PREQUALIFICATION OF CHILEAN AND FOREIGN TENDERERS

The Empresa Nacional de Electricidad S.A. (ENDESA) intends to invite tenders for the construction and equipment supply of the 220 kv north transmission line project at the beginning of 1977.
The project is located along approximately 630 km north of Santiago, Chile.
The following should be the intended contracts:
LN-1: Supply and construction of the Cerro Navia-Pan de Azucar 220 kv transmission line (Santiago-La Serena, approx. 498 km), double circuit, including Cerro Navia control building and switchyard civil works, and equipment installation.
LN-2: Supply and construction of the Pan de Azucar-Maitencillo 220 kv transmission line (La Serena-Vallenar, approx. 200 km) single circuit, including Pan de Azucar switchyard civil works, Maitencillo switchyard and control building civil works, equipment installation and supply of the equipment for switchyards and control buildings at Cerro Navia, Pan de Azucar and Maitencillo.
The contractors will also be required to finance the cost of designs, equipment, materials, manufactures and works included in the corresponding contract.
Foreign contractors must participate for the construction works in joint ventures with technical and managerial participation of Chilean contractors registered in ENDESA'S contractors register. The project must be completed during the first half of 1980. Specifications and drawings will be given only to those who will submit the complete prequalification information required with supporting evidence of having successfully completed works of a similar nature and can demonstrate that they have the resources, experience and organization to carry out the works.
Prequalifications requirements are available from November 22nd, 1976, on application to:
Mr. Luis Court, Castilla 1392, Santiago de Chile.
Price: 600 Chilean Pesos(U.S. 5.40).
Prequalification requirements may be obtained by post (send money order) or at Santa Rosa 76, Santiago de Chile, from 9 a.m. to 11:30 a.m. Monday to Friday.
Deadline for receiving the completed questionnaire is January 18th, 1977.

We know your part of the world.

To reach the *international* European businessman, use an *international* European newspaper.

When Europe is your advertising target, the International Herald Tribune is your advertising medium.
Here's why.
The businessmen who make up Europe's most important audience are increasingly multi-national. They work across borders. They buy and sell across borders. And they travel a lot.
Because *they* think internationally, they appreciate a newspaper that does too.
That's why, more and more, they rely on the one newspaper that meets their needs. That's edited from an international rather than a national point of view. That's readily available no matter where they are. A newspaper they can turn to for a clear, concise summary of what happened yesterday in the worlds of finance, commerce, politics and the arts.
We have facts and figures to substantiate this:
1. Brand new research, conducted throughout Europe by an independent, London-based firm, that proves we reach the most affluent, influential business audience in Europe.
2. Audited circulation figures showing exactly how many copies of the International Herald Tribune go to each country in Europe. No one of them accounts for as much as 20% of the total, no one of them can be considered the Herald Tribune "home" country.
3. An editorial product that matches its readers' interests. Compare any copy of the International Herald Tribune with that of any other European newspaper and you'll see at a glance which is the *International* newspaper.

International Herald Tribune
Europe's only international daily newspaper.

Options?
Listen.

The option market offers both conservative and speculative investors a wide range of market strategies. For the conservative investor, the selling of options against stock you now own or may want to own can offer an additional yield on investment. In addition, it can offer you protection of equity positions and act as a partial hedge against inflation. Those investors wishing to speculate may be attracted by the leverage and predetermined dollar risks of option buying also available in this market place.

E.F. Hutton has been a major participant in the listed option market since its inception. And we have established many services which can help investors develop appropriate option strategies including an options advisory service, daily option commentary available through our Account Executives, and theoretical option price computer models.

For a copy of our latest bimonthly Options Research Report, write us at Box 444, New York, N.Y. 10004. We will enclose an Options Clearing Operation Prospectus to help you determine the inherent risks and potential rewards of options trading.

EF Hutton

BOOKS

THE BRIC-A-BRAC MAN
By Russell H. Greenan. Random House. 211 pp. $7.

MAGIC
By William Goldman. Delacorte. 243 pp. $7.

Reviewed by Christopher Lehmann-Haupt

WHAT is so special about a Russell H. Greenan extravaganza? I wish it were time to celebrate his gift for the joyfully sinister and macabre, and to toast the charmingly nihilistic thieves, swindlers and murderers that have sported in his first five novels—"It Happened in Boston?," "Nightmare," "The Queen of America," "The Secret Life of Algernon Pendleton" and "Heart of Gold." I get the feeling that through some oversight or taxonomical confusion (Mr. Greenan's books are difficult to classify, therefore hard to explain), not enough readers are aware of what delightful fun he is poking at the notion that human beings are superior to skunk cabbages.

But it is not the suitable time for celebration, because for one thing Mr. Greenan will probably write plenty more of his extravaganzas before he's finished. For another thing, we have before us today the latest specific example of his work—"The Bric-a-Brac Man," about Arnold Hopkins, a small-time Boston antiques dealer who is forced by a turn of ill fortune from a profession of chicanery into a life of crime, crime being, in Arnold's opinion, "really only business carried on by other means."

Poor Arnold Hopkins. He is really more swindled against than swindling, which is why we grow fond of him in the first place. It's not his fault that he can't cover a bad check for $800 he has passed to a widow for $7,000 worth of Japanese ivory netsukes: Who thought both the $7,000 and the netsukes would disappear when a prospective customer is killed in a mysterious accident? All Arnold wants is to get far enough ahead in the game to open a little antiques shop on Harvard Square. So we can hardly condemn him for accepting a proposal to do a little second-story work from his friend Barney Slocum, who is so *au courant* when it comes to antiques and language that he knows where all of Boston's marketable knick-knacks reside, and uses expressions such as "hopefully," "between you and I," and "at this moment in time." We don't even blame Arnold for selling his soul to a madman who claims to be the devil. Anything goes in the bric-a-brac trade, and Arnold's soul is surely bric-a-brac.

Once Mr. Greenan has us hooked on Arnold's problem, he seeds his story with the most bewildering set of clues to its resolution. Why does Arnold have a cousin who is an identical replica of Arnold? Why is this cousin good at karate? Why does he want Arnold to burglarize the mansion of three sisters who never go out of doors without covering their faces with veils? And how are we to distinguish the pertinent clues from what may merely be Greenan whimsy—for instance, the presence in the story of René Beauchamp, who runs himself ragged every day dusting and mopping his collection of dollhouses, or of Barney Slocum's wife, who is part in gonistic mood" ever attends the opera wished to, we can these questions until page of "The Bric- And one doesn't wi Mr. Greenan's surp much fun.

To appreciate fu Mr. Greenan is a atmosphere in which figured ladies and murderers are not n but amusing, one nee such a book as Willia "Magic," the 10th and by the writer who is k known at the momen written the book and for "Marathon Man."

Like "The Bric-a- "Magic" is extremel begins with excerpts a nal written by a chim Pats, who, it later a ventriloquist's dum still later turns out keep a journal becau other half of the s schizoid personality.

"Magic" is also fas We know something is going to happen so the time because there prologue in which tracking deer in th comes upon a cabi somebody or something ing. And Mr. Gold his plot so as to keep between puzzlement a tion.

But when "Magic" said digested, it leav taste except for its It seems to have been no other purpose this —and unlike good m crets are all too appar performance is over. farther away one get Bric-a-Brac Man" its special atmosphere sti might even argue that an is saying somethin about antiquity and it corruption. But that wax ponderous over a is the very opposite.

BRIDGE — By Alan T

In a light-hearted mood, South introduced a psychic bid of one spade when his partner's opening bid of one diamond was doubled on the diagramed deal. This is an old idea, aimed at talking the opponents out of a likely spade contract. It has fallen into disuse because experienced opponents can expose the situation without too much difficulty, usually by an immediate double, while the psychic bidder's partner may take him seriously with unfortunate results.

Not unnaturally, North raised to four spades when West did not choose to bid his clubs, and South had to suffer the consequences of his own frivolity.

East was for some reason unable to read his partner's opening heart lead as a singleton. He won with the ace and carelessly returned the nine, neglecting the obvious necessity to play the queen and pin the remaining honor in the dummy. He was astonished to see his partner ruff after declarer played low.

South had to decide whether West had made an unusual lead of the four from Q-4 doubleton, or East had foolishly returned the nine from Q-9, and had reached the correct conclusion.

West was still in the dark about the heart suit, although he might have suspected the South's bid suggested five spades, and East double at least three, a total of 15 cards in the

West should now have to clubs, but he made an native shift to a low South won with the ace my, cashed two spade and ruffed a diamond. heart w ner, throwing singleton club, and l over.

Sooner or later East score a trump trick, the and last trick for the de who were left to argue their relative culpability disaster.

Associated Press.
Miami's Benny Malone evades Pittsburgh's Andy Russell.

It was the first time that the Steelers had defeated the Dolphins in four games, including a preseason contest.

The Dolphins scored in the third quarter on a 45-yard field goal by Garo Yepremian. The Steelers went 78 yards to score their winning touchdown and 86 for their first touchdown, which was made in the second quarter on a 21-yard run by Harris.

Bradshaw was injured as he unloaded an incomplete pass in the face of a pass rush by reserve tackle Don Reese of the Dolphins. Reese's lunge carried him into the quarterback after he had released the ball and Reese rolled Bradshaw over when they went down as defensive end Joe Jones of the Browns had on Oct. 10, when Bradshaw was sidelined with back and neck injuries.

Bradshaw was taken to a hospital for X-rays almost immediately and watched the game on television while waiting for the news. The X-rays were negative.

Broncos 17, Chargers 0

At San Diego, Rick Upchurch caught a 59-yard pass from Steve Ramsey for a touchdown and set up a field goal with a 28-yard punt return to lead Denver to a 17-0 victory over the Chargers.

Denver stayed in second place in the AFC's Western Division with a 6-4 record and the Chargers remained in third, 4-6, despite losing their fourth straight.

Denver scored its first touchdown after safety Steve Foley intercepted San Diego quarterback Dan Fouts's pass and returned it five yards to the Broncos' 22-yard line.

Raiders 21, Chiefs 10

At Oakland, Ken Stabler, the NFL's most successful quarterback this season, threw touchdown passes to Fred Biletnikoff and Dave Casper to lead the Raiders to a 21-10 victory over Kansas City.

The two touchdown passes gave Stabler 20 for the season, tops in the league, as the Raiders won their ninth game against a single loss.

Stabler's pass to Biletnikoff covered 32 yards for a 7-0 lead in the first quarter and his scoring throw to Casper was for 22 yards. Casper's touchdown came midway through the third quarter, when the Raiders took a 21-7 lead.

Rams Beaten By Field Goal

By Leonard Koppett

LOS ANGELES, Nov. 15 (NYT).—The Los Angeles Rams, who tried to solve their quarterback problem by starting Pat Haden, found themselves unable yesterday to solve another kind of quarterback problem—the opposing quarterback. Jim Hart, with a sensational second-half performance, guided the St. Louis Cardinals to a 30-28 victory achieved by Jim Bakken's third field goal of the game with just four seconds to play.

The victory greatly strengthened Cardinal hopes of reaching the playoffs, and left those of the Rams still in jeopardy. It also stunned most of the 64,698 ticket-buyers at the Coliseum.

Now 8-2 behind Dallas, which is 8-1 with a game against Buffalo tonight, the Cards are pretty sure of getting the wild-card berth in the National Conference even if they can't overtake Dallas for the Eastern Division title.

As for the Rams, they'll have a showdown with the 49ers next week in San Francisco. They have a 6-3-1 record (the tie with Minnesota), and will have to cling to first place to make the playoffs.

In choosing Haden over James Harris and Ron Jaworski, coach Chuck Knox was turning to his least experienced but most popular leader. Haden had been a star, on this field, at the University of Southern California before moving on to the World Football League and to Oxford (as a Rhodes scholar), and he had played earlier this season when the other two quarterbacks were hurt.

Offensively, things worked out all right, as Haden completed 10 of 17 for 173 yards, including a 65-yard strike to Harold Jackson for a 14-6 halftime lead. And he himself scored what might have been the winning touchdown on a five-yard scramble for a 28-20 lead with less than 10 minutes to play.

But he also threw a first-down, end-zone interception in the first half, and couldn't get that one extra first down that the Rams needed in the last two minutes to protect a 28-27 lead.

Hart, however, simply upstaged him. In the second half, the Cardinal quarterback hit 13 of 16 attempts for 229 yards, and two of the incompletions were on purpose, to stop the clock in the closing seconds. Seven of the 13 were caught by Ike Harris, but the one that made it all possible was a 25-yard touchdown pass to J.V. Cain with 4:33 to go, reducing the margin to one point and creating the opportunity for Bakken.

Almost lost in the shuffle was a 90-yard kickoff return for a touchdown by Cullen Bryant, opening the second half. This made the score 21-6 and should have given the Rams control of the game. But the celebrated offensive line of the Cardinals outplayed the celebrated defense of the Rams the rest of the way.

From Wire Dispatches

Hazards of Rhodesia, Or Golf in the Roar

SALISBURY, Rhodesia, Nov. 11.—The definition of a hazard as defined in "The Rules of Golf," copyrighted by the Royal and Ancient Golf Club of St. Andrews in Scotland, may need revision for the Elephant Hills Country Club.

The course in Victoria Falls, half a mile from the Zambesi River—scene of the Southern Sun Victoria Golf Classic, which ended yesterday—had warthogs on the greens, buffalo on the fairway, a crocodile near the eighth hole and the threat of guerrillas lurking in the bush.

The local rules note that if a player is chased by an elephant, "he shall be allowed to return to his ball, which shall be played as it lies, whether or not the animal had trodden thereon."

Or, "if a player's ball lands in the droppings of an animal, such a ball may be cleaned and dropped within two club lengths, without penalty."

The tournament, which drew 38 professionals and amateurs, was almost called off because of guerrillas infiltrating from nearby Zambia. But Rhodesian golf pros Simon Hobday and Donald Gammon persuaded others to take part.

Sudden Death

British professional Nick Job was the victor yesterday in a sudden-death playoff. He scored a birdie to the par of South African pro Andries Oosthuizen on the first hole playoff. Both players had been tied at 293.

The classic was called off about two weeks ago after guerrillas attacked a motel on the outskirts of Victoria Falls, killing one person and wounding two others.

On several occasions warthogs trotted across the greens. A small herd of buffalo ignored cries of "fore" and ambled unconcerned along one of the fairways.

Security at the luxurious Elephant Hills Country Club was tight, with army patrols keeping watch on the Zambezi River, which marks a boundary of the course. The other boundary is a nature preserve, which explains why golfers are permitted to replace a ball without penalty if it falls into impossible lies, such as an elephant's footprint.

The rules state that if a player's ball hits a running warthog, it does not "entitle the player to replay the shot, except when it strikes the tail, when it shall be deemed to have struck a miniature moving flagpole."

If a ball comes to rest within a tail's distance of a sleeping buffalo, "it may be removed and dropped no nearer the hole and without penalty." More than a tail length, the ball shall be played as it lies.

If a baboon picks up a ball, "the player shall be allowed to strike another ball. He shall also be allocated a time of no more than three minutes in which to retrieve his ball without penalty."

Those who took part reported seeing hippos, elephants and even a lion. Relatively tame animals were common everywhere along the course, but golfers were especially wary of a six-foot-long crocodile in a water trap close to the eighth green.

No one was reported injured.

Winningest Team in NBA

Cavaliers Edge Lakers on Shot in Last Seconds

INGLEWOOD, Calif., Nov. 15 (UPI).—The Cleveland Cavaliers, the winningest team in the NBA, does not have a player who ranks among the league's top 20 scoring leaders. Nor does it have a player who ranks in the top 10 in rebounds, assists, steals or field-goal percentage.

You get the idea, then, that the Cavaliers, who have blazed to 11 victories in 13 games, are team performers rather than individual stars.

Enter Clarence (Foots) Walker, who usually only plays about seven or eight minutes a game, but who put the finishing touches on the Los Angeles Lakers last night for a 97-95 victory.

With three seconds left in the game, Walker faked out Kareem Abdul-Jabbar by driving the lane with an option to pass the ball and scooped it into the basket for the winning points and his only goal of the game.

"It's my job to create some things on the court—to get our guys fired up," Walker said.

Of his game-winning shot, Walker said, "I knew Kareem was there, but I had an option. I could have passed to Jim Chones if Kareem came to me, but he didn't and I made the shot."

Squandered Lead

For the Lakers, it was their seventh loss in a game decided by five points or less, and the third time they have squandered a sizable lead in the fourth period.

In the largely defensive game, the Lakers commanded a 13-point lead with nine minutes to go when Chones and Austin Carr combined for 19 points in the period as the Cavs outscored Los Angeles, 29-20.

"The thing that kills us is our ball handling," said Laker coach Jerry West. "It's simply atrocious. It's a disgrace we lost this game because we were unable to pass the ball to one another.

"The same people are making mistakes. It's something we work on in practice but you cannot coach this. Why our guys make passes when the pass isn't there is beyond me."

Chones finished with 23 points and Carr 14 as the Cavaliers moved 3 1/2 games ahead of New Orleans in the NBA's Central Division.

Sonics 121, Pacers 118

At Seattle, Slick Watts scored 25 points and had 15 assists to lead the SuperSonics to their 23d consecutive home-court victory, a 121-118 triumph over Indiana.

Billy Knight had kept the Pacers in the game, scoring 17 of his game-high 37 points in the fourth quarter, as Indiana cut a 12-point deficit to one point with nine seconds left.

Seattle then tried to run out the clock and Indiana fouled center Tom Burleson, who converted two free throws for the Sonics' margin of victory.

Forward Bruce Seals had 21 points and 11 rebounds for Seattle, and forward Mike Bantom came off the bench to contribute 17 points.

Pistons 104, Bucks 83

At Milwaukee, Chris Ford, who was in and out of a Milwaukee hospital twice because of stomach cramps, scored 18 of his 20 points in the first half to lead Detroit to its sixth straight victory, a 104-83 triumph over the Bucks.

Ford, who became ill shortly after arriving with the team Saturday night, hit five baskets in the first quarter, all from long range, as Detroit took a 29-21 lead. He continued his long-range shooting with four more baskets in the second quarter.

Kevin Porter added 18 points for Detroit and Howard Porter 15, while rookie Alex English had a season high of 21 to lead Milwaukee. The Bucks' Gary Brokaw added 18.

In NHL Action

Black Hawks Beat Kings on 50-Foot Goal

CHICAGO, Nov. 15 (UPI).—Black Hawk defenseman Phil Russell says he thinks teammate Grant Mulvey actually put in the goal that gave Chicago a 5-4 victory over Los Angeles last night, although Russell was credited with the 50-foot shot.

"I honestly think the puck was ticked in by Mulvey, but he's such a big friendly guy he wouldn't say 'boo,'" Russell said.

Coach Billy Reay and Chicago fans were just glad that the shot went in the net.

"We didn't beat the Kings on our ice last year, so it was a pleasure to see Phil Russell's shot beat them tonight," Reay said. "I can't remember the last time we went through a game without a penalty, but that helps a lot.

"The Kings worked hard; they're good skaters and they had a lead, but I'd have to say Alain Daigle's late second-period goal was the key," Reay said.

Los Angeles took a 4-3 lead on goals by Mike Murphy, Marcel Dionne and Tommy Williams, but Daigle converted Pit Martin's centering pass to tie it up with only two minutes left in the second period.

The victory gave Chicago a two-point bulge over idle St. Louis in the Smythe Division.

Barons 3, Capitals 2

At Landover, Md., Mike Christie's goal 15 seconds into the third period lifted Cleveland to a 3-2 victory over Washington.

Christie's goal was the first for the defenseman this season and came after the teams had played a scoreless second period.

Wayne Merrick had put Cleveland in front 1-0 at 5:39 of the first period, but rookie Doug Patey and Bob Sirois countered with goals to give Washington a 2-1 advantage.

Sabres 4, North Stars 4

At Buffalo, Craig Ramsay's shot from in front of the net deflected off Minnesota goaltender Pete Lopresti for a score with less than eight minutes left in the game to give the Sabres a 4-4 tie with Minnesota.

Ramsay's goal, on a power play, came after a feed from Richard Martin. It deflected off Lopresti high into the air and the goaltender couldn't find it until it fell behind him and bounced into the net.

Bruins 5, Rockies 3

At Boston, Peter McNab scored two goals, including the game-winner, and added an assist, leading the streaking Bruins to a come-from-behind 5-3 victory over Colorado.

McNab's goals, giving him 17 in as many games, stretched Boston's unbeaten streak to five and increased its lead over Buffalo to seven points in the Adams Division.

With Colorado leading, 3-2, on two goals by Paul Gardner, Bobby Schmautz took a pass from McNab and tied it at 2:47 of the final period on a 40-foot wrist shot that beat a screened Michel Plasse high to his glove side.

Penguins 5, Rangers 1

At New York, second-period goals by Pierre Larouche, Wayne Bianchin and Jean Pronovost lifted Pittsburgh to a 5-1 victory over the Rangers, who lost their seventh consecutive home game.

The losing streak breaks a club record of six set during the 1945-47 season. The Penguins, playing wide-open hockey, jumped to a first-period lead on goals by Ron Stackhouse and Rick Kehoe.

With 17-Game Winning Streak

utgers Likely to Get Bowl Berth

Bordon S. White Jr.

ORK, Nov. 15 (NYT).—victory Saturday night ine, 29-20, in the New Superdome extended the current major-college streak to 17 games and assured the Scarlet of a bowl game.

, which met Princeton ist intercollegiate foot- in 1869, has never been t game, but this 17-game streak is the longest in s's 108 years of football. Frank Burns's team beats n the season finale Sat- New Brunswick, N.J., it s only the third unde- ason for Rutgers foot- ers's previous undefeat- his were 1876, when the Knights beat Stevens Tech only game, and 1961, gers had a 9-0 mark.

m from New Orleans , Burns said:

s a completely different laying indoors. I can't k. But it was different." id that before the game he had been approached emissaries of the Tange- wl and that, after the ach Bowl officials talk- . The Rutgers coach said stood that Sun Bowl ld also been at the e game.

s will probably receive ept a Peach Bowl bid , if it beats Colgate for regular season. Rutgers ost since the fourth game ason, when it bowed to 34-20.

Perfect Records

undefeated and untied ent into action Saturday, four got through with fect records intact. Col- beaten, not unexpected- ray, 29-13, for the Red first loss. Southwestern s was edged by North- Louisiana, 7-3, after the ajuns had won their first nes. This left Rutgers, h, Texas Tech and Mary- defeated and untied

ept its perfect mark by ing mistakes more than irginia's attacks, as the s, who lost five fumbles Mountaineers, triumphed . Tony Dorsett picked up s to increase a number of ning records he has es- l this season and enhance nces for the Heisman

But the exciting Pitt got a bit too excited and nd this cost him a chance Archie Griffin's college rushing for 200 yards or 33 varsity games.

ett, who had 31 varsity with more than 200 yards , was thrown out of the ith 29 seconds remaining had picked up two yards. not like the way he was a gang of West Virginia and came up swinging. s punches ignited a free- for-all that was quickly broken up by coaches and police officers. The officials ordered Dorsett out and charged both teams with unsportsmanlike conduct, which automatically nullified the play and Dorsett's two-yard gain.

So, instead of 201 or more yards rushing, Dorsett had to settle for 199. He still has 31 games with 200 or more yards rushing and only one regular-season game left in his career.

Bowl Berth

Pittsburgh now seems headed for the Sugar Bowl, where the Panthers would play Georgia on Jan. 1. The Bulldogs assured themselves of the Southeastern Conference title and the resulting host's berth at the Sugar Bowl by beating Auburn, 28-0. Although the Orange Bowl is still in the running, the feeling was strong in Pittsburgh this weekend that the Panthers would accept the New Orleans trip.

Al Romano, the all-America middle guard on Pitt's fine defense, said he wanted to go to the Sugar Bowl. In fact, he said he was trying hard to convince the 10 Miami natives on the Pitt team that "you can go home any time, but maybe this will be your only chance in a lifetime to get to New Orleans."

Texas Tech easily beat Southern Methodist, 34-7, to keep a perfect record, and Maryland had little trouble beating Clemson, 20-0, to extend the Terps' mark to 10-0. These two winners will be in bowl games, with Texas Tech in the Cotton Bowl if it continues this way and wins the title in the Southwest Athletic Conference. If Pitt selects the Sugar Bowl, Maryland should be a good Orange Bowl candidate.

The Big-Eight Conference champion acts as the Orange Bowl host, and that presents a problem. After another surprise Saturday in that league, five teams are tied for the lead with Big-Eight records of 4-2. These are Oklahoma, Nebraska, Iowa State, Colorado and Oklahoma State. The shock was Iowa State's 37-28 triumph over Nebraska. One thing is certain: Unless the Orange Bowl gets Pittsburgh, it will have two of the lowest-ranked teams in its history.

Penn State, meanwhile, kept alive the possibility of a bowl invitation by defeating Miami of Florida, 21-7.

Division Playoffs

C.W. Post lost to Lehigh, 17-10, but still received a bid for the first round of the National Collegiate Athletic Association's Division III playoffs. The Pioneers will play Towson State of Maryland this Saturday at Brookville on Long Island.

While all these big and small teams think of and plan for post-season games, the eight Ivy League teams are finished. For the first time in the league's history, Brown won a piece of the title, by beating Columbia, 28-17, with two fourth-quarter touchdowns. These Bruins could not quite gain the title outright, because Yale beat Harvard, 21-7, to share the crown. Brown beat Yale in the opening game of the season, but the Bruins slipped on a day of heavy rain and lost to Pennsylvania in their fourth game of the season. Pennsylvania managed only two other victories this year and finished by losing to Cornell.

Bills Seek Confidence-Builder As Cowboys Head for a Title

IRVING, Texas, Nov. 15 (UPI).—The Buffalo Bills came to Texas yesterday and found snow awaiting them. But the Dallas Cowboys hope to warm things up for the visitors when the two clubs meet tonight.

A rare November snowstorm blitzed north Texas during the weekend and, when the Cowboys went out for a brief practice session, they had to romp around the edges of a two-inch snowfall that drifted down through the roof of Texas Stadium.

It will be chilly but the precipitation is expected to end by the time the Cowboys and Bills meet.

Art Buchwald

The People Speak

WASHINGTON—Not everyone was running for president of the United States this year. I have a friend named Jerry Altshuler who ran for county clerk in Oklahoma City. A county clerk, as I understand it, is in charge of recording records, deeds, births, deaths and legal papers that must be filed in the county courthouse. It is not a very glamorous job, nor does it pay very well. But Jerry, as a good citizen, decided to run for it anyway, if for nothing else than to prove to himself he could get elected to something.

Buchwald

He formed a committee consisting mostly of relatives, raised a few thousand dollars through friends and started his campaign.

What Jerry wasn't prepared for was the citizenry of Oklahoma City, who were not too concerned with how good he was at county clerking but wanted to know where he stood on the issues.

"How do you feel about abortion?" was one of the first questions Jerry was asked at a church meeting.

He responded, "The county clerk's office will not be concerned with abortion. I believe abortion is a matter between a woman and her congressman, her senator, her doctor, her church and the Supreme Court of the United States."

He was loudly booed.

"What do you plan to do about unemployment?" a union man asked him at a rally.

"As county clerk I will keep accurate records of all unemployment in the area."

He was booed again.

Jerry found himself in front of an ethnic group and a man in the audience stood up and said, "What will you do if the Soviet Union invades Yugoslavia?"

It was a question that his campaign manager had not prepared him for. He said off the top of his head, "I would immediately notify someone at the Pentagon."

This did not satisfy his audience. "Why should you tip your hand to the Soviets as to what you would do?"

"There isn't much the county clerk of Oklahoma City can do if the Soviets invade Yugoslavia," Jerry protested.

He was booed again.

Jerry had a meeting with his staff members who were worried that he had put himself on the defensive. They concluded that he had to put forward an affirmative program that would win the hearts and minds of the people of Oklahoma City. They suggested that he promise, if elected, that he would institute a new computerized system in the county recorder's office and microfilm all outdated files to save space and the taxpayers' money.

He presented his plan at a news conference covered by one reporter from a weekly paper. Then Jerry opened the conference to questions.

The reporter asked, "How do you feel about nuclear energy?"

"That's not my department," Jerry responded tersely.

"Then you refuse to take a stand on all environmental issues?" the reporter said.

"My staff is now working on a position paper on that," Jerry replied, "and it will be released next week."

"What about the Panama Canal?"

"I promise that as long as I am county clerk of Oklahoma City the Panama Canal will remain a part of the United States."

The headline in the next edition of the weekly paper read: "Altshuler Refuses to Discuss Soviet Wheat Embargo."

I wish I could tell you that Jerry won his election for county clerk. But he lost, as did so many other people in this election. He wrote me, "I don't know if it was the abortion issue or my stand on Yugoslavia or the Panama Canal. But when you're running for county clerk I guess the electorate expects you to be all things to all people. The people have spoken. I shall now retire to private life and only pray that the legal papers of this great county for the next four years will be filed in alphabetical order."

U.S. Agency Proposes Wine Labeling Rules

WASHINGTON, Nov. 15 (UPI). —The government has proposed a new truth-in-labeling regulation for U.S.-made wine, featuring a government seal, the month and year of bottling and specifications for the types of grapes that can be used.

Officials of the Bureau of Alcohol, Tobacco and Firearms will hold hearings on the proposal.

'I was worried that students were going through here and coming out without any common structure of education... The world has become a Tower of Babel in which we have lost the possibility of common discourse and shared values.'

Harvard Seeks the Common Denominator

By Edward B. Fiske

NEW YORK (NYT).—Two years ago Henry Rosovsky, dean of the faculty of arts and sciences at Harvard University, issued a widely publicized appeal for the reformation of undergraduate education.

"At the moment, to be an educated man or woman doesn't mean anything," he wrote. "It may mean that you've designed your own curriculum; it may mean that you know all about urban this or rural that. But there is no common denominator."

Last week Harvard took a step toward the first major overhaul of its liberal arts program since the famous "Education in a Free Society" report in 1945 laid the groundwork for Harvard's "general education" program.

In a 19-page annual report to his faculty, Dean Rosovsky described his ideas on how to restore what he termed in an interview "the possibility of common discourse among educated people."

Simultaneously, a faculty task force on core curriculum released its own proposals on how to translate these goals into curriculum offerings.

Requirements

The documents come at a time when virtually every major liberal arts college is re-examining its curriculum. Many of them that abandoned "generalization" requirements in the 1960s are restoring them. Those that retained strict requirements are asking new questions about their content.

The debate over the nature of a modern liberal arts education promises to be one of the major issues in U.S. higher education for the next year or two.

Most of the general dissatisfaction with liberal arts curriculum today develops from the erosion of "general education" requirements. These requirements normally mean that, to graduate, a student must take a certain number of courses each in the humanities, the social sciences and the natural sciences.

Although there were major exceptions, such as Columbia and Princeton Universities, many schools abandoned or greatly eased these rules under pressure from students seeking more freedom. Harvard maintained its "general education" program in principle but allowed students so many options for meeting requirements that they virtually lost their meaning.

"An educational nutritionist would say that we were no longer requiring a balanced diet," said James Wright, professor of government who was chairman of the task force.

In his report to the faculty, Dean Rosovsky locates the problem not so much in pressures by students or the general proliferation of knowledge as in the deliberate decision of the university in the postwar period to broaden its constituency.

"At a time when it is fashionable to mock the real achievements of American democracy," Dean Rosovsky writes, "it may be worth stressing that Harvard and other 'elite' institutions transformed themselves as a consequence of deliberate policies: providing generous scholarships, recruiting nationally in public and private schools, and—not least important—awarding faculty positions solely on the basis of academic merit."

The social consequence of this decision, Dean Rosovsky argues, was the destruction of the homogeneity that once marked elite institutions.

"Inevitably," he says, "the concept of a 'typical Harvard student' has become almost meaningless." Another consequence of this and other trends, though, has been the loss of common academic objectives.

"I was worried that students were going through here and coming out without any common structure of education," Dean Rosovsky said in an interview. "The world has become a Tower of Babel in which we have lost the possibility of common discourse and shared values."

Precision

In his report, which brings together the ideas of seven faculty groups that have been studying these issues since his letter in 1974, Dean Rosovsky offers half a dozen principles for re-establishing "a common basis for intellectual discourse."

Some are traditional and were never seriously challenged, even in the 1960s. For example, he says that an educated person "must be able to communicate with precision, cogency and force."

Likewise, he or she "should have achieved depth in some field of knowledge" and should have a "critical appreciation of the ways in which we gain knowledge and understanding of the universe, of society and of ourselves."

This means, in terms of curriculum requirements, that an educated person should have an "informed acquaintance" with the following:

- "The mathematical and experimental methods" of the natural sciences,
- The "main forms of analysis" and the "historical and quantitative techniques" used in modern social sciences,
- "Some of the important scholarly, literary and artistic achievements of the past" and
- "The major religious and philosophical conceptions of man."

Other principles, however, were not part of earlier definitions of liberal education and reflect what Dean Rosovsky sees as the particular needs of the world today. The most frequent criticism of the "general education" of the past was that, however broad it might have been in terms of disciplines, it still operated within the parameters of the classical Western culture.

Dean Rosovsky's report and the ideas of the various study groups now go to the faculty of arts and sciences for consideration, and the debate over any major curricular changes is expected to last at least a year.

SHARING A BIRTHDAY—Pauline Mehring and Mamie Eisenhower Sunday in Gettysburg, Pa. The widow of President Dwight Eisenhower turned 80; Pauline turned 9.

PEOPLE: Austrian Hang-Glider Lost at Kilimanjaro

Charter planes and helicopters were searching Monday for an Austrian who tried to hang-glide off Mount Kilimanjaro Friday. Hubert Knehr, 38, launched himself from the summit of the 19,340-foot mountain, intending to glide down into the grounds of the Kilimanjaro Christian Medical Center in Moshi, Tanzania, but winds blew him off course. The Austrian Embassy in Nairobi chartered two planes and a helicopter to help in the search.

* * *

George Burns, the octogenarian singer and comedian, was living it up—that's the title of his just-published autobiography—at a 21 Club luncheon the other day and promoting his television special to be seen in December. "My show follows Bing Crosby's," said Burns. "We have a deal. He doesn't sing 'Red Rose Rag' and I don't fool around with 'White Christmas.'" About passing the 80-year-old mark, Burns said: "I don't believe in getting old—that's for young people. But the nice thing about growing old is you can't get sick anymore—you've had everything."

The other day actor Bill Holden was talking with Guy Flatley of The New York Times about his role in "Network," a new film about television, and a it feels to be going in is an inevitable proces said. "I surely wouldn grow younger. The old come, the more you k bank account of kno much richer. In Ne described as a crazy aged man, and I can't truth of that. It's not description."

And meanwhile, actr Lenya was talking to John Carry. She has n content to "sit back a royalties the way so ma do," she said. Miss L of the late Kurt Wei talent for the present, "All those actors and who say, 'I'm 53!' Th then think it's an ac I think they act like said. She is 77 and sho in the film version Tough."

Expected to Top $4.2 Billion in '76

EC to Japan: Cut Trade Bulge by Dec. 1

BRUSSELS, Nov. 16 (AP)—The European Economic Community [illegible] intended to take action [illegible] huge flow of Japanese goods into the EEC's nine countries unless Tokyo acts [illegible] the rapidly increasing [illegible] by the end of this month, Japan's Deputy Foreign Minister Sunroku Yoshino told newsmen here today.

He said the ultimatum was given to him at a working luncheon by Finn Olav Gundelach, the Common Market Commission's acting external relations commissioner.

According to the EEC's calculations, the nine member states' trade deficit is expected to reach more than $4.2 billion this year—more than twice the 1974 figure.

Mr. Yoshino said he had contacted the Tokyo government and was returning home immediately to report on the case, which he warned "could lead to a dangerous crisis."

The Japanese official said Mr. Gundelach demanded that Tokyo should commit itself by the end of this month to "more or less" restrict car exports, namely to Britain, to organize talks between European and Japanese industries on shipbuilders' shares in the international market and to take measures to allow increased imports from the Common Market, notably foodstuffs.

Mr. Gundelach, according to Mr. Yoshino, said that restrictive trade measures by Common Market industries badly battered by Japanese exports could not be prevented any longer if the European demands are not met by the time the nine countries' heads of state hold a summit meeting in The Hague on Nov. 29-30.

Three Points

An official Common Market statement on the outcome of the two-day, semiannual Japan-EEC talks is expected to be issued tomorrow. Common Market officials limited their comments today to saying that no major progress had been achieved in the talks and that the problem would be referred to The Hague summit meeting.

The Japanese hope to glean a 6.5-million-ton share of the projected 12-million-ton shipbuilding market in 1980. The Europeans consider this share far too large.

In his talks with Manfred Caspari, deputy director-general of the EEC Commission's external relations department, Mr. Yoshino insisted that discussions on the shipbuilding industry had to wait until a meeting of the Organisation for Economic Coperation and Development in Paris next month.

The Europeans say the problem is too important to set aside until then.

U.S. Residents Face New French Tax

Bill Would End Exemption on Income Earned Abroad

By James Goldsborough

PARIS, Nov. 16 (IHT)—A tax struggle among the U.S. and French governments, French and U.S. trade associations and the U.S. community in France is now under way that could have far-reaching effects on U.S. business interests abroad.

The struggle is over a tax bill that is to be considered by the National assembly in the next few weeks. The bill, essentially aimed at simplifying taxes for residents residing outside France, has a rider that will tax foreigners living in France liable for French taxes on their worldwide income, instead of on income earned in France. A similar bill came up in Britain two years ago. It created such an uproar among foreigners residing there, including the U.S. oil billionaire Jean-Paul Getty, who threatened to leave the country, that the bill was dropped.

The same outcry has begun here. Businessmen working for multinational corporations and professional men, who will be the hardest hit, have begun an active campaign against the bill, calling it discriminatory, unfair and uneconomic. They charge that it will send multinational corporations out of the country and force many U.S. residents here to leave.

Basis of Nationality

Because of a peculiarity in the U.S. tax system, the French tax rider will affect only Americans. The United States, unlike any other major industrial nation, taxes its citizens on the basis of nationality, not of residence.

Historically, Americans have been required to pay taxes no matter where they lived for the privilege of holding a U.S. passport; they paid a U.S. tax in addition to taxes they were paying in their country of residence. This tax obligation on nonresident Americans was increased in the tax revision bill signed by President Ford last month.

The rider to the French tax bill calls for the repeal of Article 164 of the French tax code. Article 164, negotiated with the U.S. government 40 years ago, exempts foreigners in France from paying French taxes on non-French income already taxed on the basis of nationality. In other words, it is an exemption for Americans.

The intent of the general French bill to which Article 164 is attached is to define notions such as "domicile" and "residence" for Frenchmen living outside France, so they are sure to be exempt here for taxes they have paid to their country of residence. It is part of a general program within the European Economic Community countries to harmonize taxation. French tax experts argue that logic also requires the repeal of Article 164. Persons should be taxed on the basis of residence, not nationality.

"We cannot have two different systems, one for Frenchmen abroad and another for Americans in France," said Etienne Kerlan, assistant director of taxation at the Finance Ministry. "In addition," he said, "U.S. law grants no special favors for Frenchmen in America. If Americans abroad find themselves in a special situation, it is not up to the French tax code to take account of it, but the U.S. code."

Americans here argue that repeal of Article 164 will create

Associated Press.

WHOOPING IT UP — Supporters of the Quebec party ride through Montreal to celebrate the election results.

Separatists Win Overwhelmingly In Quebec Voting

MONTREAL, Nov. 16 (Reuters).—Canada faced problems concerning its future unity today after an overwhelming election victory in Quebec Province yesterday by a nationalist party that wants eventual independence for the French-speaking territory.

However, the poor record of Canada's governing Liberal party seemed to have played a major role in the triumph of the French-Canadian nationalists in Quebec.

The separatist Quebec party, led by René Levesque, trounced the Liberal party of Premier Robert Bourassa, capturing an absolute majority in the local parliament. About half the members of the Liberal Cabinet were defeated in their own constituencies.

The Quebec party, with deep roots in rural areas and small towns, is pledged to hold a referendum on independence within two years.

Mr. Levesque has said that the province of more than 6 million inhabitants—more than a quarter of the Canadian population—would not break with English-speaking Canada unless a majority voted to do so.

A recent opinion poll showed that only about 18 per cent of the Quebec population favored independence.

Deposits Transferred

In Montreal, foreign exchange dealers said that some Canadian dollar deposits in Quebec were being transferred to other provinces.

The Bank of Canada supported the dollar, which rose to 102.9 cents to the U.S. dollar in confused trading here after dropping sharply in the aftermath of the Quebec election.

Victory for the separatist Quebec party underscored a long-standing gulf between the French and English speakers in Canada.

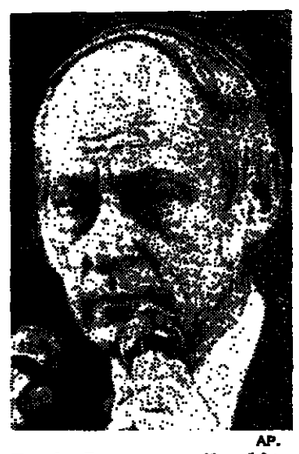
Conceding defeat, Premier Bourassa said: "Being very frank, it's hard not to be worried about the future of Quebec. But we have got to be calm. The future of 6 million Québecois is involved."

Canadian Prime Minister Pierre Trudeau, long a foe of the separation of Quebec, issued a brief statement in Ottawa saying:

"I am confident that Québecois will continue to reject separatism because they still believe their destiny is linked with an indivisible Canada."

Never Expected

Mr. Levesque told cheering supporters at a Montreal arena today: "We hoped with all our hearts that this would happen. But we never expected it would happen this soon."



He stressed his party's commitment to holding a referendum on independence and to declaring a separate Quebec only if the referendum result was a clear mandate for independence.

The separatist leader played down the independence issue during the election campaign. Instead, he focused on the Liberal government's record and concrete issues such as a 10-per-cent rate of unemployment, chronic strikes in both private industry and the public sector, high taxes and general government inefficiency.

The result of the vote gave his party 66 seats in the 110-seat Quebec National Assembly, a gain of 60 seats and 10 more than Mr. Levesque needs to form a majority.

The Liberals suffered a drop

U.S. Newsman in U.K. Ordered Ousted as 'Security' Threat

By Peter Kilborn

LONDON, Nov. 16 (NYT).—The British government today ordered a U.S. investigative reporter for a London newspaper to leave the country on unspecified grounds that he is a threat to national security. British and U.S. officials here could recall no precedent for such an action against a foreign-born journalist.

The reporter is Mark Hosenball, 25, who has lived here about six years and has worked for the tabloid Evening Standard since July. His editor, Charles Wintour, called Mr. Hosenball "a most diligent, prolific, and intelligent reporter," and said he had hired him over 100 applicants.

At a news conference this evening, Mr. Hosenball speculated that stories he wrote for his previous employer, Time Out magazine, could have provoked the deportation notice. He published reports there about a vital defense communications center, on the troubles in Northern Ireland, and on the CIA.

In one story he listed names of CIA agents operating in Britain. In December, after publication of a similar list by an English-language newspaper in Athens, the chief agent there, Richard Welch, was shot and killed.

Mr. Hosenball's CIA reports, however, appeared more than a year ago, and over that period he said he had never been approached by government officials. A U.S. Embassy spokesman added that he knew of no U.S. pressure on Britain to discipline Mr. Hosenball.

The Home Office said the reporter was being asked to leave Britain within 14 days under terms of a five-year-old immigration act. The office cited a section of the act allowing deportation of foreigners when their presence in Britain is incompatible with the public good.

A spokesman said further that Mr. Hosenball had obtained information that was harmful to the security of Britain. But he did not say what information had been obtained or even whether it had been published. Mr. Hosenball said he did not know what information the office was referring to.

Mr. Hosenball said he had attended the University of Pennsylvania, that he first came to Britain on an English-Speaking Union scholarship, and that he spent three years at Trinity College, Dublin. He said he was born in Cleveland and that his parents currently live in Washington, D.C.

He said he would appeal the deportation order, an action he must take soon to stay within its 14-day deadline for leaving the country. Such appeals, which are heard by an independent three-man board, are rarely successful.

Rightists Assail Reform Plan in Cortes Debate

MADRID, Nov. 16 (AP)—[illegible]'s ultra-conservative Cortes (parliament) began a crucial [illegible] today on Premier Adolfo [illegible]'s political reform plan with [illegible] rightists assailing the government's proposals.

[illegible] leaders for the government, [illegible] is expected to win approval [illegible] the plan from the parliament, [illegible] said that change was obligatory after rule by the extreme [illegible].

"This draft law means a decisive change in our political life [illegible] we must begin the future [illegible] in optimism, without rancor [illegible] the past and without forgetting we have an obligation [illegible] the present and future," [illegible] Raul Primo de Rivera told the [illegible]ers in opening the debate for the government.

Mr. Primo de Rivera, the [illegible]hew of Jose Antonio Primo de Rivera, the founder of the [illegible]ist Falange party that helped the late Generalissimo Francisco Franco rule Spain for nearly four decades, was given only [illegible] applause by the deputies, but extreme rightist Blas [illegible] received heavier applause [illegible]r declaring the government's proposals were unconstitutional [illegible] meant "liquidation of [illegible]nco's works."

[illegible]leging the government's [illegible]m to call free parliamentary [illegible]ions next year would lead [illegible] Marxism, deputy Jose Maria [illegible]ndez called the proposals "criminal political castration of future generations."

He said Mr. Suarez's reform represented ideas opposed to those for which Gen. Franco began his army uprising that started the nation's civil war in 1936.

Parliament President Torcuato Fernandez Miranda, appointed by King Juan Carlos and a supporter of Mr. Suarez's reforms, turned down a request from Mr. Pinar for an immediate vote on sending the reform program back to the government.

Mr. Pinar also challenged the parliament president, asking him to step down and let one of the parliament's vice-presidents preside. He said Mr. Fernandez Miranda had violated his neutrality.

Recess Is Called

The Cortes president refused and recessed the session until tomorrow.

Before the debate began, government officials predicted that Mr. Suarez would win the necessary two-thirds approval from the Cortes.

In addition to opposition in the parliament itself, the right has orchestrated an anti-reform propaganda campaign in the streets with leaflets and wall graffiti.

The parliament building was under heavy police security and political leaders from both the left and right were being guarded by policemen as the 531-member assembly met in urgent session to discuss Mr. Suarez's plan.

The issue was considered a critical test for democratic reform a year after the death of Gen. Franco.

Government sources said Mr. Suarez may win approval by a margin of perhaps 50 votes when the issue comes to a final vote Thursday or Friday.

But the outcome is by no means a certainty. A parliamentary group of 60 deputies, led by former Foreign Minister Laureano Lopez Rodo, threatened to abstain unless the government altered its plan to have the parliamentary elections based on proportional representation.

Mr. Lopez Rodo said his backers want a rule that will give the most seats to the party winning the most seats in the elections Mr. Suarez has promised for next summer.

If approved, the reform would

(Continued on Page 2, Col. 8)

Also Hopes to See Carter

Andreotti May Visit U.S. to Seek Loan

By Alvin Shuster

ROME, Nov. 16 (NYT).—Premier Giulio Andreotti is planning a trip to Washington next month to seek aid and is hoping to sound out advisers to the incoming administration of Jimmy Carter on policy toward Italy and the Communist party here.

The visit would be at the invitation of President Ford. But there were suggestions tonight that the Premier was also trying to arrange meetings with Mr. Carter's aides on foreign affairs and perhaps even with the President-elect himself.

No official announcement has been made yet but one is expected soon.

A meeting with Mr. Carter would be a coup for Mr. Andreotti, whose minority government of Christian Democrats is faced with serious economic and political problems. If the meeting is arranged, the Italian would become the first leader of a foreign country to see the President-elect and it would undoubtedly bolster his image at home.

Knocking on the Door

The problems of Italy, with a Communist party knocking on the door of government, are among the crucial issues of foreign policy facing the incoming administration. Secretary of State Henry Kissinger has warned that any sharing of power with the Communists in the Cabinet would lead to a reassessment of relations between the United States and Italy, a partner in NATO.

Mr. Carter has criticized Mr. Kissinger's choice of phrases, but has made it clear that he, too, would not like to see Communists enter the Italian government. He has also said that, while the decision on sharing power was up to the Italian people, a role in the Cabinet for Communists would be a "mechanism for subversion of the strength" of the alliance.

If Mr. Andreotti goes to Washington, as now planned, he would be expected to explain the present role of the Communists, who hold important posts in Parliament and who are keeping the government in power by ab-

U.S. F-4 Crash Kills 2

SPANGDAHLEM, West Germany, Nov. 16 (UPI).—A U.S. Air Force F-4 Phantom jet crashed last night, killing its two occupants, an Air Force spokesman said.

No Longer Demands 'All of Palestine'

PLO Backs UN Plan to Set Up Arab State in Left Bank, Gaza

UNITED NATIONS, N.Y., Nov. 16 (AP).—An official of the Palestine Liberation Organization expressed support in the General Assembly yesterday for a plan looking toward "the establishment of an independent Palestinian entity" in the West Bank and the Gaza Strip, now occupied by Israel.

Farouk Kaddoumi, director of the PLO's Political Committee, said his organization supports the principles outlined in a committee report setting out the plan. He said the report emphasized the Palestinians' inalienable rights, including their right to establishment of their own state.

Mr. Kaddoumi, speaking in the assembly's annual Palestine debate, did not repeat the demand he made a year ago for "a secular democratic state in all of Palestine."

PLO Demands

The report of the committee on "the exercise of the inalienable rights of the Palestinian people" calls for the return to the West Bank and the Gaza Strip of Palestinians displaced when Israel seized those territories from Jordan and Israel in the 1967 Arab-Israeli war; Israeli withdrawal from both areas by June 1; a UN handover of the areas to the PLO; establishment of an independent Palestinian entity there, and later the return or compensation of all Palestinians displaced in 1948 by what Israel calls its war of independence.

The recommendations, already endorsed by 81 nonaligned members of the UN at a summit conference in August at Colombo, Sri Lanka, is sure of enough votes for adoption in the assembly. The trouble with the plan is that it envisages Security Council action on some details, like getting Israel out of the occupied territories. The United States vetoed it when it came up in the council last June.

U.S. Senators in Cairo

CAIRO, Nov. 16 (WP).—Three members of a U.S. Senate delegation touring the Middle East met Sunday night in Cairo with a representative of the Palestine Liberation Organization. Sens. Robert Griffin, R-Mich., John Glenn, D-Ohio, and Paul Laxalt, R-Nev., held an hourlong discussion at the Cairo Hilton with Basel Aqi, a PLO representative currently living in London.

According to informed sources, the meeting covered a wide range of topics relating to Palestinian aspirations and the PLO's willingness to participate in negotiations for a comprehensive settlement of the Arab-Israeli conflict.

Sources said Mr. Aqi had been "far tougher" in his attitude toward such negotiations than Egyptian President Anwar Sadat.

Venezuela to Break S. Africa Trade Link

UNITED NATIONS, N.Y., Nov. 16 (Reuters).—President Carlos Andres Perez of Venezuela said today that he had ordered the breaking off of his country's commercial relations with South Africa.

He told the UN General Assembly his oil-exporting nation had not done all it should to affirm by deed its opposition to the "horrible situation" created by South Africa's apartheid policy.

How Ambiguous Kissinger Note Won Smith Backing for Plan

By Bernard Gwertzman

WASHINGTON, Nov. 16 (NYT)—[illegible]rucial to acceptance by the [illegible]desian government of the [illegible]-plan for black-majority rule [illegible] an ambiguous message from [illegible]cretary of State Henry Kissin[illegible] that suggested that black [illegible]ders had agreed to a Rhode[illegible]n proposal that would allow [illegible]tes to retain the defense and [illegible]ice ministries in an interim [illegible]vernment.

[illegible]s a result of the secret mes[illegible]s of Sept. 21—shown recently [illegible] The New York Times—

Two black hardliners at Geneva demand definite date for transfer of power. Story Page 4.

[illegible]me Minister Ian Smith was [illegible]s to muster his party's support for the five-point package [illegible] he had earlier told Mr. [illegible]singer and Prime Minister [illegible]hn Vorster of South Africa [illegible] "my own suicide note."

On Sept. 19, Mr. Kissinger had [illegible]nded Mr. Smith the five-point [illegible]an and said he had to accept [illegible] or face isolation in his war [illegible]ainst black guerrilla forces. In [illegible]hat hours of desperate bar[illegible]ining, Mr. Smith persuaded [illegible]r. Kissinger to seek black [illegible]onference in a guarantee that the [illegible]fense and police portfolios [illegible]uld remain white during the transition period before an independent black Rhodesia was formed.

Without that guarantee, Mr. Smith told Mr. Kissinger and Mr. Vorster, he could not be sure he could "sell" the rest of the Kissinger plan, which included a call for majority rule in two years, a constitution to be worked out by an interim government and British legal sanction for Rhodesian independence.

On Sept. 21, Mr. Kissinger sent a message to Mr. Smith from Dar es Salaam saying that on the basis of discussions with black leaders in Lusaka, Zambia, and Dar es Salaam, he believed the provisions for the white defense and police ministers "can be added" to the five points.

It was an ambiguously worded instruction in a longer message and did not specifically say the black leaders had accepted the proposal, but it did leave that impression in both Pretoria and Salisbury, Rhodesia.

Almost as soon as Mr. Smith made his speech on Sept. 24 and said the ministers of defense and police "would be white," it was denounced by black leaders. With the Rhodesian talks in Geneva floundering, the issue has remained controversial.

In essence, the issue has come down to who has told the truth.

Ian Smith

Mr. Smith has said he agreed to the five-point plan he made public because he had received assurances from Mr. Kissinger that the black leaders had accepted the whole package, including Mr. Smith's additions on the white ministers. In his view, either the blacks have reneged or Mr. Kissinger has misled him.

The blacks, such as President Julius Nyerere of Tanzania, insist that they did not give their approval to the details of the five-point plan, only to the general thrust of majority rule in two years, leaving it to Britain to work out details later with black and white Rhodesians. They say they would have rejected the proposal for white ministers.

On Oct. 24, Mr. Kissinger said on television that "I think everybody is telling the truth." Other Americans have said the black leaders raised no specific objections and so this was interpreted as approving the five-point plan as read by Mr. Smith.

The New York Times has spent several weeks looking into the issue.

Complicated Picture

What emerges is a complicated picture in which Mr. Kissinger, in what appears to have been his final major negotiating mission, felt that an almost historic opportunity had unexpectedly arisen to settle the Rhodesian question through diplomacy, and that to facilitate the process he chose to be ambiguous when candor might have risked failure.

Central to that diplomacy were his meetings with Mr. Smith in Pretoria on Sunday, Sept. 19, and the cable traffic from Mr. Kissinger to Mr. Smith on Sept. 21.

After months of intense diplomatic efforts in collaboration with Britain, Mr. Kissinger had succeeded, with the aid of Mr. Vorster, in getting Mr. Smith to the point where he was under considerable pressure to accept the principle of black majority rule in two years or face economic and possibly military disaster from the expanding guerrilla war against his minority regime.

Mr. Kissinger met with Mr. Vorster in Zurich from Sept. 4 to 6 and they agreed on some proposals—cleared with the black "front-line" Presidents—that Mr Vorster would ask Mr. Smith to accept publicly. In Zurich, Mr. Vorster for the first time urged Mr. Kissinger to meet with Mr. Smith to insure success.

Since Mr. Smith was regarded as "tricky" and "unreliable" by blacks—and indeed by the British, who had charged him with a series of deceptions since Rhodesia's declaration of "independence" in 1965—Mr. Kissinger at first refused.

But as he set out on Sept. 13 on his African mission that was to culminate in Pretoria, Mr. Kissinger concluded privately that he would almost inevitably have to confer with Mr. Smith.

In Dar es Salaam, Mr. Nyerere was not optimistic that Mr. Smith would agree to majority rule in two years and said so in a press conference. In Lusaka, President Kenneth Kaunda was

Anathema to Professional Military Men

Soldiers' Unions Active in NATO Armies

By Don Cook

PARIS, Nov. 16.—Although many professional military men abhor the idea, trade unions have become increasingly active in European armies that provide troops for the North Atlantic Treaty Organization.

In West Germany, almost half of the Bundeswehr's men pay dues to a soldiers' union.

In the Netherlands, two-thirds of the enlisted men, noncommissioned officers included, belong to trade unions.

In Denmark, all army conscripts and regulars are represented by a soldiers' association.

In Norway, the Defense Ministry will conduct a referendum among servicemen next year to determine whether they want to replace a system of consultation with a full-fledged union.

Col. Gottfried Jekat, director of personnel management at the West German Defense Ministry, described the attitude toward military unions in his country:

"The German armed forces in the past were too isolated from society. One of the benefits of losing [World War II] was that we could start from a completely new base. And the existence of a strong trade union in our military forces today goes a long way toward establishing a connection between the army and the people."

Socialization of Society

C.L.J. van Lent, the Netherlands' secretary of state for defense personnel, put it this way:

"Socialization throughout society does not stop at the barracks gate. The armed forces are one of the organizations in society to which the process of socialization applies. It also is in the interest of the armed forces."

Britain and France have kept unions out of the military, although efforts have been made to penetrate the services in both countries, notably in France.

U.S. officers, like the British and French, are not anxious to see trade unions introduced into the U.S. Army. Yet some concede that the system has not impaired the military efficiency of the German Army.

Discussions in various NATO capitals indicate that, in some armies at least, trade unionism works, and that each country's system and experience are a reflection of its own national character, temperament and political traditions.

Here is what was found in a survey of military unions in three NATO countries.

West Germany—The right to join a military trade union was taken for granted when the Bundeswehr was revived in 1955. The minister of defense at the time was Theodor Blank, a trade union leader.

Today, there are two trade unions, both fully recognized by the Defense Ministry. Officers, enlisted regulars and conscripts join either without distinction.

Politically Oriented

One of the unions is the servicemen's branch of the Public Services, Transport and Traffic Union. It is affiliated with the West German Trade Union Federation and is politically oriented but has fewer than 4,000 members in the armed forces.

The other, larger union is the Deutsche Bundeswehrverband (DBV), which has about 200,000 members who pay dues of $1.75 a month. About 40,000 of its members are officers, as is its head, army Col. Heinz Vollandt.

Like any other union, the DBV represents its membership in negotiations on wages and conditions of employment. It is nonpolitical and nonreligious, does not interfere in military matters and has no right to strike, which by German law is forbidden to public employees.

Each barracks or other military unit elects a trade union representative and each unit has an ombudsman, who is consulted in disciplinary cases before punishment is imposed. The ombudsman also provides a direct channel to the commanding officer for complaints concerning requests for special leave, food and other matters involving unit welfare.

Of the 200,000 military union members, about 100 are detached from duty to conduct DBV business. The ombudsmen, who can be of any rank, are on duty with their units.

"We feel strongly that the efficiency of our forces has been enhanced rather than inhibited by the system," Col. Jekat said. "First of all, it means that problems are being dealt with constantly at local levels before they build up and solutions are being worked out down the line. Situations which might take months to untangle get worked out readily and easily."

The Netherlands—Trade unions are a tradition, of sorts, in the Dutch military. They go back to the turn of the century, when associations of officers and noncommissioned officers were formed in the army. They began as little more than welfare and social groups but gradually took on the character of trade unions.

11 Service Unions

Today, there are 11 unions in the services, 10 of them representing officers and noncoms in the three branches of the service, plus the Vereiniging Van Dienstplichtig Militairen (VVDM), the conscripts' trade union. About 60 per cent of the 60,000 conscripts pay dues of $1 a month to the VVDM.

Twice a year, there are regular meetings at the 100 or so Dutch Army barracks, air bases and other defense installations to elect local union committees. From these committees a national head is elected.

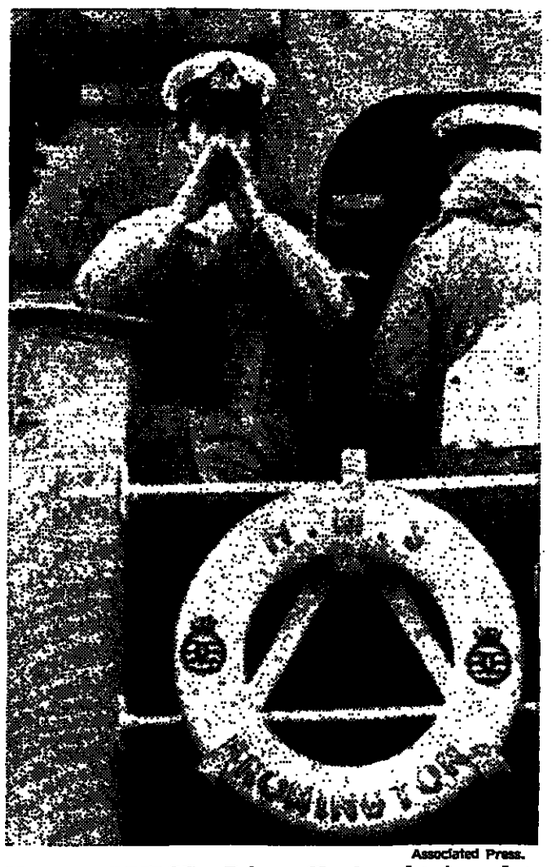
Twice a month, the VVDM chief, currently Sgt. Theo de Roos, a 23-year-old conscript, goes to The Hague to meet with senior officers and state secretaries at the Ministry of Defense. Present also are the other union heads. Discussions deal not only with specific problems but also with broad budgetary matters.

The Dutch unions also have no right to strike. Currently, according to Sgt. de Roos, the VVDM is pushing for a reduction in the price a soldier pays for quartering in older barracks, free rail travel within the country and the abolition of a commanding officer's right to order detention punishment.

Personality Matter

"The older officers," Sgt. de Roos said, "may not like the fact that we have a union, but the younger officers generally do, an deverybody accepts the situation. It's a matter of personality, like most things in the military.

"Some understand it and know how to work with it better than others. It was mainly as a result of our demands that the Ministry of Defense approved mess hall improvements. The officers tried, but they couldn't get results, and they were very happy when our pressure did it."



But officers are still in command and no soldier can refuse mand and no soldier can refuse to obey orders.

Denmark—There are no fewer than 35 different unions in the Danish armed forces. All but 2 per cent of the officers belong to a union and draftees elect "conscripted privates' representatives" who sit on a board that deals with the Defense Ministry.

Union activities are low-key in comparison with the situation in other countries.

"Our unions are entirely nonpolitical and intend to stay that way," said Col. Juel Pedersen, representative of an officers' union. "The right to strike? We've never even considered it, but I would assume that government employees do not have the right to strike."

Moves Viewed Only as Propaganda Ploy

Arabs' Diplomatic Momentum Is Acknowledged by Israelis

By William E. Farrell

JERUSALEM, Nov. 16 (NYT)—Israeli government officials are reluctantly conceding the effectiveness of recent Arab diplomatic and political moves in the Middle East.

These officials describe the Arab moves as skillful propaganda maneuvers, however, rather than as sincere efforts to end the state of war between Israel and its Arab neighbors.

Thus, at the risk of once again being labeled intransigent by members of the international community, Israel is sticking to its repeatedly enunciated position of not making major concessions regarding its occupation of Arab territories for something less than solid guarantees of an end of the protracted state of war.

The Arabs' most recent effort to build up international support for their position involves, in the Israeli view, the proliferation of reports that the Palestine Liberation Organization has softened its anti-Israel stand.

Israeli Sources

Some of these reports have emanated from prominent Israelis who are not officeholders. But Foreign Ministry officials dismiss them as merely another propaganda ploy in the Arab effort to create a new climate that will favor them when, and if, new Mideast negotiations are held.

A Foreign Ministry official said the PLO reports were part of an Arab move "preparing grounds for a political initiative vis-à-vis Israel." Another official also dismissed them, saying that "there is no outward sign of change" in the PLO's posture toward this country.

"Terrorist groups still organize on the West Bank, PLO leader Yassir Arafat has not renounced terrorist tactics and the Palestinian covenant has not been amended to delete the PLO contention that the Jews have no right to a state of their own," this official said.

The Arab moves on the diplomatic and political front, particularly since the recent Riyadh conference worked out the essentials for a Lebanese cease-fire, are causing officials here concern.

"We're losing points," an Israeli official said. Referring to recent Arab diplomatic ploys, he added: "For the first time in 28 years, they're doing it properly."

Initiative Lost

Several officials pointed to a number of developments spurred by the Arab world that have put Israel "in the business of reacting," as one Israeli phrased it.

First there was the UN Security Council declaration last week criticizing Israel's administration of the Arab territories it has occupied since the 1967 war. The Security Council hearings were held at the request of Egypt.

There was anger and chagrin here that the United States joined in the declaration, which expressed "grave anxiety and dismay over the present serious situation in the occupied territories as a result of continued Israeli occupation."

Another Arab-induced move originated with Egypt's President Anwar Sadat, who informed a delegation of U.S. congressmen that he was willing to go to a Geneva conference without preconditions and with an open agenda.

The congressmen, who also visited this country, were told by Prime Minister Yitzhak Rabin: "Israel is ready for immediate dialogue with Egypt if President Sadat is truly interested in a peace agreement."

Established Channels

"There are well lubricated diplomatic channels that could be used" to initiate a move toward the peace table, another Israeli official said, instead of making conduits of U.S. politicians not necessarily versed in the nuances of foreign policy in the Mideast. He added that he knew of no new Arab initiatives being made through these channels.

The official said Israel was currently in a position of responding and could do little in the way of initiating except to reiterate its previous conditions for an Israeli-Arab conference. These include a resumption of the talks in Geneva with the original participants, thus excluding the PLO, and a requirement that the talks be aimed "at the end of the state of war."

Some Israeli government leaders feel that no substantive moves toward peace talks can be made until the new administration of Jimmy Carter takes office in Washington in January.

"In the coming months we look for a propaganda battering," an Israeli official said, adding: "The pressure on Israel to negotiate does not scare us."

Sharon Asks Wider Talks

TEL AVIV, Nov. 16 (UPI).—Former Gen. Ariel Sharon, who yesterday quit the Likud opposition bloc, urged today that the Israeli government talk with the Palestinians about a Middle East settlement.

"Look, we talked with the Germans after they exterminated 6 million of our brethren, we talked with Syria after they tortured our prisoners; why shouldn't we talk with the Palestinians?" Mr. Sharon said at a news conference.

"We should talk to all the Arabs together," he said. "We don't have to exclude anyone."

Mr. Sharon, 48, a hero of the 1973 Mideast war, said he quit the Likud bloc to form an independent ticket because of the rightist group's reluctance to work for electoral reforms before general elections a year from now. After the 1973 war, he was elected to parliament, but left to become a military adviser to Prime Minister Rabin. He quit that post in March.

2 Palestinians Given Life Terms in Turkey

ISTANBUL, Nov. 16 (AP).—A Turkish criminal court today sentenced to death two Palestinian guerrillas for the murder of four El Al passengers at Istanbul airport last August, but later commuted the sentences to life imprisonment.

Two Israelis, an American and a Japanese were killed in the attack Aug. 11, and 22 people were injured after the guerrillas opened fire on the passengers before they boarded the plane.

Ariel Sharon

A Visit to U.S. Is Planned By Andreotti

(Continued from Page 1)

staining on crucial votes. Andreotti, who took over the of Premier after the June tions, has been consulting quently with Communist offic on various policies, particul on an evolving austerity gram.

Apart from seeking the vi of the incoming administrat the 57-year-old Italian le would look for support from Ford administration on econo and financial help. Italy is the market now for more t $1 billion from the Internati Monetary Fund, but it also wa some bilateral aid from United States.

Economic Stability

Given the urgency of the re here, Italy cannot wait for new administration to come office Jan. 20. At present, Wa ington is disposed to help a bilateral agreement but a afterthe terms for econo stability are agreed to betwe Rome and the IMF.

To return from Washing with some commitment on would also help Mr. Andre demonstrate to voters that Christian Democrats are able to muster friends in h places, underscoring the imp tance of Washington ties.

This would all fit with Andreotti's efforts to por himself as an energetic Prem intent on solving Italy's m problems, including an inflat rate of just under 20 per c a growing balance-of-payme deficit and little success in co ing rising wage costs.

Andreotti Adviser

Some of the arrangements the planned trip were made week by one of Mr. Andreo closest advisers, Rinaldo Os the foreign trade minister former director-general of Bank of Italy. Mr. Ossola in Washington last week and with men who are advising Carter.

The assumption here was t Mr. Andreotti would not go ah with his journey if he were meet only with outgoing lead Moreover, it would appear t the trip would require some deg of coordination between the F administration and Mr. Carte advisers.

The message from both Ford and Carter camps is expected to emphasize the need more economic austerity and more efforts by the Christi Democrats to renew themselves the struggle to keep the Co munists from Cabinet seats. it is, Communist influence Italy is growing because of party's parliamentary power its influence over the tr unions, whose support would vital in achieving economic stab ity.

Mr. Andreotti has not been ha ing an easy time since he beca Premier. The austerity progr is moving slowly, the economy worsening and internal fighti among the Christian Democra is reviving.

U.S. Residents in France Face New Tax

(Continued from Page 1)

situations similar to that of Swedish writer Astrid Lindgren, who received a tax bill amounting to 102 per cent of her income. Several tax models have been worked out by lawyers to show that without Article 164, certain kinds of U.S. income received by residents here will be taxed at more than 100 per cent.

In addition, they say, some kinds of deductions now allowed under U.S. law, for example on income from municipal bonds, retirement plans and deferred compensation programs, now will be taxed by the French alone, disrupting carefully worked out savings programs.

Harmful Timing

For many of these Americans, the French timing is particularly harmful. Many of them will be paying sharply increased U.S. taxes under the provisions of the revised tax law. With the French changes added to this, there is a strong feeling in the U.S. community here of an official tax conspiracy to drive Americans home.

A memorandum put out in the U.S. community here lists some of the worst foreseen consequences of the bill: In addition to double and in many cases exhorbitant taxation, the memorandum says, there will be an exodus of Americans from France with the risk of failure by U.S.-supported institutions such as the American Hospital and the American Library. It points out that some French institutions, such as the Louvre and the Palais de Versailles, also receive heavy U.S. contributions. The memorandum says that there will also be a departure of many of the some 100 U.S. corporations with headquarters in France.

The French government, however, appears determined to pass the bill. It is supported at the highest levels. Moreover, officials here are hinting that the purpose of the bill is to get at tax fraud. "There have been too many abuses," Mr. Kerlan says. Cases are mentioned of employees of far-flung multinationals who declare minimal taxes in several countries on enormous incomes. Officials also point to U.S. congressional exposure of illegal bribes paid by the multinationals to businessmen around the world.

Defeated in Senate

The French bill came before the French Senate last month, and the Senate, by a vote of 112 to 87, defeated the government, voting to keep Article 164. A coalition of senators accused the government of "surreptitiously" inserting an anti-U.S. provision into a general tax bill. The Senate action, however, cannot block the National Assembly, which has the final say, under the French system.

The Senate debate laid out the issues clearly. Two senators in particular, Gustave Héon and Etienne Dailly, argued that repeal of Article 164 would have a harmful effect on the French economy. Both men pointed out that the French government, under the auspices of DATAR, an official organization promoting development of the French provinces, had been attracting multinational firms away from other countries by arguing the advantages of Article 164. Mr. Dailly revealed that DATAR had officially protested the government position on Article 164.

"I am mayor of Nemours," Mr. Dailly told the Senate during the debate. "Two U.S. companies have just established themselves in my city. Just this morning, they told me again, 'You shouldn't have made us come if you were going to do this to us. We would have gone to Belgium instead.'"

Favorable Provisions

Mr. Dailly pointed out that countries such as Belgium and Britain had refused measures such as France was planning. It also was pointed out that West Germany had tax provisions favorable to foreign residents of that country.

The government, represented by Christian Poncelet, the deputy finance minister, said that repeal of Article 164 would not lead to double taxation because U.S.-French tax conventions allow direct taxes paid to one nation to be credited against the bill due another. U.S. tax experts, however, dispute this, and argue that the tax credits will only offset a small part of the total taxes due. Indirect taxes such as the value-added tax paid throughout the European Community are not given tax credit by the United States.

Another senator, Francis Palmero, told Mr. Poncelet that, with DATAR's support, his region, the Midi, was attracting U.S. firms for a new scientific center. "We succeeded in bringing IBM and Texas Instruments," said Mr. Palmero. "This must not be blocked through your ill-considered decisions."

At one point, when Mr. Poncelet told the senators that DATAR had never solicited U.S. firms here by advertising the virtues of Article 164, Mr. Dailly produced several DATAR brochures contradicting the minister. "I find it annoying." Mr. Dailly said, "that you bring U.S. firms here by arguing fiscal advantages, and then unilaterally take the decision that will eliminate them."

At another point, the debate became ideological. Mr. Poncelet was arguing that the French measure was aimed primarily at rich Americans living in France off unearned income and paying little tax to anybody. Mr. Dailly, who is president of the Senate's France-United States friendship association, attacked this:

"You are aiming at two kinds of Americans," he said. "One kind is those who live in France without working, who come here to live and spend their money. Why in the devil to you want to chase them out? Why should Americans be the only ones who have to leave the Côte d'Azur where they enjoy living and help the economy? What is your justification?" The second group, said Mr. Dailly, were those Americans working in France who would leave. "This is not desirable for our economy," he said.

A final argument was made by Maurice Schumann, a minister under Presidents de Gaulle and Pompidou. Pointing out that the present dispositions had endured throughout the Gaullist years and that "Gen. de Gaulle was never suspected of unconditional Americanophilia," Mr. Schumann said that the government's present policy was basically right, but politically and diplomatically wrong. He urged it to proceed.

New Convention

This week, in Paris, negotiations have begun between French and U.S. officials on a new tax convention to replace the current 1967 tax convention. During the Senate debate, the government was urged to hold up on repeal of Article 164, while awaiting the outcome of the negotiations. The government refused.

Americans here have indicated frankly that they do not understand the French motivation. They said that the French have had plenty of opportunity to discuss Article 164 in past years, yet never brought it up—leading to the Senate's charges of "surreptitious" behavior. To this, Mr. Kerlan, of the French tax ministry, replies, "We indicated as far back as 1965 that we wanted to eliminate Article 164, that it is not justified anymore." U.S. officials, however, said that there is no record of any such French indication being expressed.

U.S. System Faulted

Americans concede that the French are right in stating that it is the U.S. tax system that creates the problems. They add, however, that there is no chance that Congress will ever change what has been historical tax practice and that it is necessary for the United States' business partners to take account of this.

They also concede that this will be a bad year for the multinational corporations. Following years of lobbying against the U.S. tax revision bill in order to protect U.S. residents abroad, the lobby finally gave up this year. Congress passed measures that will raise taxes for U.S. overseas residents. The multinationals, however, got some compensation in new tax deferrals and credits that Congress will allow them.

But not just the multinationals and the rich will be hurt by repeal of Article 164, say the U.S. lawyers. "The French see this as attacking the rich, the good-for-nothings down on the Riviera," said one. "But this will affect everybody. It is a hell of a thing for a person who has been building up his retirement income for 30 years based on U.S. tax provisions to suddenly have everything turned upside down."

Quebec Separatists Win Overwhelmingly in Elections

(Continued from Page 1)

from 96 seats to 27. A third party, the National Union, cut heavily into the Liberal vote, capturing 11 seats.

Two seats were won by candidates of minor parties, and four results were still in doubt early today. The Quebec party was leading in three of these and the Liberals in one.

Paris Cautious

PARIS, Nov. 16 (Reuters).—A decade after Gen. de Gaulle inflamed separatist passions in Quebec, France gave a generally cautious welcome today to the pro-independence party's election triumph in Quebec.

Both the Elysée presidential palace and the Foreign Ministry declined to make any formal comment. Government officials expressed great surprise at the size of the Quebec party's success.

But in contrast to the low-key official reaction, the Gaullist party, UDR, hailed the Quebec party's victory as "the affirmation by vote of the French fact of life in Canada."

Gaullist leader Yves Guena said: "The UDR takes this opportunity to underline the far-sightedness of Gen. de Gaulle, who launched the famous phrase 'Vive le Québec Libre!' (Long Live Free Quebec) in July, 1967, and in so doing expressed not only a prophetic vision but contributed to the advance of history."

The government's muted reaction was presumably dictated by the desire to avoid any possible offense to the Canadian federal government in Ottawa, with which good relations were restored after the tension caused by De Gaulle's 1967 trip to Quebec.

U.S. Again Vetoes Vietnam at UN

NEW YORK, Nov. 15 (UPI).—The United States, unswayed by appeals from 32 countries, tonight vetoed the application of Vietnam to become the 146th member of the United Nations Monday.

Ambassador William W. Scranton cast the 18th U.S. veto in UN history, displaying Washington's determination to keep Vietnam out of the world organization until Hanoi gives an accounting of 800 U.S. servicemen missing in action in the Vietnam war.

The action in the Security Council was the third time the United States had used its veto to block Vietnam's membership. The two other vetoes were cast last year.

No other member of the Council opposed entry.

(From yesterday's late editions.)

Correction

PARIS, Nov. 16 (IHT).—It is former Prime Minister Jacques Chaban-Delmas who is opposing Gaullist party plans for a "people's rally" to mobilize Frenchmen behind the government for the next elections. A transposition in yesterday's editions had former Prime Minister Jacques Chirac opposing the plans. Mr. Chirac is architect of the project.

HILTON INTERNATIONAL

ORLY AIRPORT HILTON
Orly Hilton is the only large, first-class hotel in the airport. Fully air-conditioned and soundproofed, it offers Hilton standards of comfort and service at much lower rates than the city centre hotels. Excellent conference and meeting facilities are available.

SCHIPHOL AIRPORT HILTON
This is the only major hotel inside the airport. Serving Amsterdam, The Hague and Rotterdam, it combines superb facilities with a cosy, Dutch atmosphere, while fully air-conditioned and soundproofed rooms ensure guests a good night's rest.

ZURICH HILTON
Only five minutes from the international airport and 15 minutes from the city centre, both by free hotel-bus, the Zurich Hilton stands on a lovely wooded hillside in a Swiss dairy farm. Fully air-conditioned and soundproofed, this is an hotel with a holiday atmosphere.

For reservations, contact your travel agent, any Hilton hotel or Hilton Reservation Service office. Alive? Spy? Double-Agent?

Suit by Nephew Revives ...tery of Missing Professor

By William Endicott

...R, Nov. 16.—It ha...been ... seven years ... since ... had a quiet dinner ... of friends in nearby ... said his good-byes, ...alone and vanished. ...n associate profes... history at the ... Colorado, had con... earlier that he ...was being followed. ...viously that the life ...ment agent is "10 ... government agent? ...agent? Is he dead, or ...well in Eastern Eu...

...e questions were ...ain here in the last few ... a result of an effort ...Riha's nephew, Zdenek ...to have his uncle de...ally dead. This has ...a suit seeking infor...rom the Central Intel...gency and resurrected ...e case.

...ed together through in...court records and news...ippings, the story ma...ny hints of foreign in...volving the CIA, the ...suicide, cyanide poison...gery and the interven...a U.S. senator.

...e a strong feeling," ...ny said, "that my uncle ...ived one way or the ...ith some intelligence ...ecause he was an expert ...n Russian history."

...IA, FBI Denials

...gh the CIA has ad...t once had a "general ...elligence interest" in ..., the agency denied he ...r an agent. The FBI ...denied he ever was in ...oy.

...ve of Czechoslovakia, Mr. ...me to the United States ...was 17. When he dis... on March 15, 1969, he ...

...ast person reported to ...n Mr. Riha was Galva...ium, an ex-convict who ...y had convinced the ...r she was an officer in ...litary intelligence who could help him get his nephew, Mr. Cerveny, into the United States.

Mr. Riha and Mrs. Tannenbaum apparently met in late 1968. Mr. Cerveny had fled from Prague and in late 1968 he was *admitted* to the United States.

After Mr. Riha's disappearance, Mrs. Tannenbaum told the Denver Post he had gone to Montreal because of domestic troubles. He and is wife, Hana, were in the process of getting a divorce.

Forgery and Poisoning

Early in 1970, Mrs. Tannenbaum was charged with forging Mr. Riha's signature on a check and other documents. She was also charged with forging a name on the will of another friend—a plastics manufacturer who died of cyanide poisoning.

She was declared legally insane after a hearing in Boulder and committed to the Colorado State Hospital in Pueblo, where eight months later she committed suicide by swallowing cyanide.

Before she died, hospital authorities reported, she said: "I didn't kill him [Mr. Riha]. That son of a bitch—he's in Russia. He just made it.'

Mr. Cerveny's attorney, Martin Buckley, said his theory of the case is that Mrs. Tannenbaum did kill Mr. Riha, "but I have no evidence of that." Mr. Cerveny said he is convinced she was working for either the FBI or the CIA. Both agencies have denied any involvement with her.

Not long after Mr. Riha vanished, the former president of the University of Colorado, Dr. Joseph Smiley, said he had been given assurances by reliable federal sources that Mr. Riha was "alive and well" but was pledged not to reveal the sources.

Court documents show that an FBI agent in Denver at the time told a CIA agent, "Calm this thing down. Get out to the press that Riha is alive and well."

Sighting Reported

At the request of the Denver Post, Sen. Gary Hart, D-Colo., brought up Mr. Riha's disappearance last year as the Senate Select Committee on Intelligence Activities was questioning the CIA's former chief of counter-intelligence, James Angleton, and a former director of the FBI's intelligence division, Charles Brennan.

Mr. Angleton furnished a CIA memorandum concerning a "possible sighting of Riha in Czechoslovakia in 1973."

The agency admitted that in 1958 it had considered using Mr. Riha as a source while he was an exchange student at the University of Moscow but claimed that he was never employed by the CIA and never reported to the agency.

On the basis of information received by the Senate committee, Sen. Hart concluded that "Riha is, most probably, living somewhere today in Eastern Europe, possibly Czechoslovakia. Why he left the U.S. remains unclear. Personal reasons were probably the basis for his decision to leave."

Here the mystery might have ended had not Mr. Cerveny sought to establish Mr. Riha's death after the legal seven years' absence, so his estate could be submitted to probate court.

HEAVY ON THE MAYO—Libby Thomas, a 23-year-old Texan, won a hamburger eating contest in that state, vanquishing seven men as she put away 13 burgers in an hour and a half. Her secret? She warmed up before the contest by eating 13 tuna fish sandwiches and two cakes. She weighs 120 pounds.

Man Doomed to Firing Squad Tries Suicide in Utah Prison

SALT LAKE CITY, Nov. 16 (AP).—Gary Mark Gilmore, 35, a convicted murderer under sentence to die before a firing squad, attempted to take his life with a drug overdose today, prison authorities said. At her home, his girl friend also apparently took a drug overdose, police reported.

Medical aides brought Gilmore "back to life," according to a health technician at the Utah State Prison. The prisoner was later listed in serious condition at a hospital, but authorities there said he was expected to pull through.

The condemned man's girl friend, Nicole Barrett, was found unconscious in her apartment, Springville police said, adding that a drug overdose was thought to be responsible. Mrs. Barrett, 20, was in critical condition at Utah Valley Hospital in Provo, a spokesman there said.

The development came one day before Gilmore was scheduled to appear before the Utah board of pardons for a decision on whether it would commute his death sentence to a lesser penalty.

Board chairman George Latimer said that if Gilmore is unable to appear as scheduled, his case will not be considered until the board's next meeting Dec. 8.

Gilmore, sentenced to death for killing a motel clerk during a robbery, was found unconscious in his cell, the prison medical worker, Tom Anguay, reported.

Mr. Anguay said he did not know what kind of drug was used but he added that Gilmore has been receiving medication.

He reported that the prisoner regained consciousness after treatment but did not say anything.

Warden Sam Smith said that Gilmore was not breathing properly when he was discovered under a special surveillance system set up to keep watch on him.

Dr. Al Roe, the prison's psychologist, said he had predicted that Gilmore would attempt suicide. The warden had said before today that authorities were taking precautions against a suicide attempt, but he declined to discuss them. Gilmore had been scheduled to face the firing squad yesterday, but the governor delayed his execution.

Mrs. Barrett has been going from her Springville home to the prison daily to visit Gilmore.

She was warned yesterday at the prison that she was known to have purchased sleeping pills on prescription and must not bring them to the prison, an official said. He added that she was searched by a matron before each of her visits and that Gilmore was searched before and after each visit.

Awaiting OPEC Price Decision

EEC Hesitates on North-South Concessions

By David Haworth

BRUSSELS, Nov. 16 (IHT).—No major concessions will be made to the developing nations in the so-called North-South dialogue until it is clear what oil price increases the Organization of Petroleum Exporting Countries is to decide next month.

This was the broad agreement that emerged today from prolonged—and confidential—discussions here by Common Market foreign affairs ministers.

Committee work on the North-South dialogue, in which the EEC, the United States and Japan are talking with oil and raw material producers, resumes next week.

The ministers were at pains to reach a consensus about the European Economic Community's posture in the next round of talks.

For obvious reasons they were secretive about the extent of agreement reached—not wishing to show their hand before the final ministerial North-South conference which is set for Dec. 15.

Question of Debts

During that session the question of the debts of the developing nations will figure prominently. The EEC ministers have agreed that debt settlements should be discussed country-by-country. A uniform policy line was specifically ruled out.

Today's meeting was somewhat difficult because the North-South dialogue resumes before the next OPEC meeting is scheduled.

Any oil-price increase settled by OPEC is bound to have a crucial bearing on future relations between the industrialized and developing nations. Not knowing its extent is preventing the EEC for the moment from launching a new initiative.

For that reason the EEC would welcome a postponement of the next North-South talks, but is not prepared to ask for one just yet. Such a request, EEC officials said, is more likely to emerge from the next EEC summit meeting scheduled Nov. 29 in The Hague.

The ministers agreed that the summit parley should decide on a European policy on raw materials—including whether a fund should be established to finance raw material reserves of particular value to the industrialized West.

Briefly turning to another *question, fishing, the council* heard a report from EEC commissioner Finn Olav Gundelach on his talks last week with Iceland about reciprocal fishing rights with Britain and West Germany.

He said there should be no difficulty in negotiating interim arrangements for British and German trawlers after the present agreement expires Dec. 1 and before a new treaty is signed.

House Unit Hiring 170 for Kennedy, King Inquiries

WASHINGTON, Nov. 16 (AP).—A House Committee will hire 170 investigators for its probe of the assassinations of President John Kennedy and Dr. Martin Luther King jr.

Committee counsel Richard Sprague said yesterday the 170 persons he plans to hire "is a small figure" for investigating the two murders. By comparison, Mr. Sprague said, the Warren Commission had 83 aides of its own, 150 FBI agents, 60 Secret Service agents and the help of the CIA and the Internal Revenue Service in its probe of Mr. Kennedy's slaying.

The Senate Watergate Committee and the Senate Select Committee on Intelligence Activities, which both conducted large-scale investigations in the recent past, had only about 100 members on each staff.

The panel also agreed to form *two subcommittees, one headed* by Rep. Richardson Preyer, D-N.C., to investigate Mr. Kennedy's killing, and the other headed by delegate Walter Faumtroy, D-D.C., to probe Dr. King's death.

The committee will also subpoena an FBI memorandum indicating that Lee Harvey Oswald told Cuban officials he planned to kill Mr. Kennedy, the chairman, Thomas Downing, D-Va., said.

Javits Warns About Reds, NATO Links

WILLIAMSBURG, Va., Nov. 16 (UPI).—The United States could not share *military secrets* with any European nation that includes a "significant element" of Communists in its Cabinet, Sen. Jacob Javits, R-N.Y., told the North Atlantic Assembly yesterday.

Sen. Javits, head of the U.S. delegation to the meeting here, also warned that the United States could be "dragged into a depression" if the British, Italian or French economies collapse.

He accused oil-producing nations of "bankrupting developing countries" and said an oil price increase would "have a very deleterious impact" on industrialized nations.

Sen. Javits told reporters he emphasized all those points in a *meeting of the Political Committee* of the association, the interparliamentary arm of NATO. The association is holding its 22d annual meeting here.

Question on Impact

He was asked specifically what impact Communist participation in an Italian or French government would have upon NATO.

"I do not see that that will stop economic cooperation or any other *kind of relationship, but I do* think it will directly affect the military," Sen. Javits said.

"And may I say, too, that we should do nothing in my judgment about how that country intends to organize its own government," he said. "That's its business, and we have no right to interfere in that."

But he added, "Every country should know . . . that our country will not be able to be in a military alliance with a country a significant element of whose Cabinet is Communist."

He said he believed "public opinion in our country and congressional opinion would be against sharing military secrets."

The luxury cigarette with American flavor
PHILIP MORRIS International

The Martini Dry, the whole Martini Dry, and nothing but the Martini Dry.
Ladies and gentlemen of the jury. Please examine the facts.
Martini & Rossi Extra Dry, is a drink with an unequalled taste. Light, clean, dry – with a definite hint of spiciness about it.
A taste that's absolutely perfect on its own with ice and a twist of lemon.
As to the propriety of mixing it with gin, vodka or soda, to make a host of interesting combinations...well, you must be the judge of that. Case rests.
Martini & Rossi Extra Dry. The right one just by itself. MARTINI EXTRA DRY

Fraternal Problem

A Greek Custom, Favoritism, In Disfavor With Caramanlis

By Steven V. Roberts

ATHENS, Nov. 16 (NYT).—Premier Constantine Caramanlis urged his Cabinet ministers recently to eradicate personal favoritism from government. This curse, he said, undermines efficiency at a time when Greece must modernize its methods to compete against the more advanced countries of Western Europe.

His remarks were greeted with public approval and private derision. Asking Greeks to give up what they call "rousfeti" is like asking them to give up retsina, their national wine flavored with pine resin. It was noted that the Premier had appointed his brother as one of his chief aides.

Defendants of favoritism maintain that all countries have patronage. In the face of the monstrous Greek bureaucracy, they say, personal intervention can be the quickest—and sometimes the only—method of getting something done.

'An Uncle in Koroni'

To its critics, favoritism dominates and distorts the process of government. Decisions are made almost entirely to promote personal or party interests. The luckiest Greeks have "an uncle in Koroni," an allusion to the former location of the gendarmerie's headquarters.

Sotiris Papapolitis, a member of parliament and a former professor of politics, said that the system of favoritism developed during the 400 years of Turkish rule when Greeks could never trust the government to rule fairly or efficiently. Indeed, the word "rousfeti" comes from an Arabic word adapted by the Turks, conveying the Oriental flavor of many Greek customs.

Moreover, Mr. Papapolitis noted, Greece has always had a highly patriarcal society, and after independence in 1830, the state became the principal "father figure"—the main provider of jobs and security. Naturally, he added, people sought to curry favor with legislators and other notables who could influence the state machinery, and to offer votes in exchange.

Foreigners are hardly immune. A European diplomat was called by a shipowner who wanted a visa for his niece. When the diplomat asked if she had applied through proper channels, the shipowner was shocked; the family had not thought of that.

The system reflects the deep suspicion that government simply does not work impartially. A common request is to get a student into university; when the reply is that entrance examination are graded by computer, the supplicant often replies: "Ah, computers. You can do whatever you like with them!"

Paying for Ticket

The main problem is that the bureaucracy is crammed with incompetents who multiply inefficiency. Paying for a parking ticket in Athens requires at least 11 stops on four floors of police headquarters. A journalist recently waited four hours in a government office to discuss a tax problem. When he called the minister in a rage, the matter was settled in 10 minutes, so the next time he will go direct to the top.

Those who lack connections feel frustrated and often leave the country. As Mr. Papapolitis noted, "Many Greeks find their full potential only when they go abroad." On the other hand, he commented, "you would have a revolt on your hands" without the system, since people would feel too insecure.

Work Is Started For Tomb of Mao

PEKING, Nov. 16 (Reuters).—Trees, paving stones and lamp posts were uprooted in Tienanmen Square today as thousands of laborers worked on a mausoleum for the late Chairman Mao Tse-tung.

Civilians and soldiers began clearing the site yesterday and worked through the night under floodlights. Posters are on view urging the workers to finish the job as soon as possible, and a Western diplomat said he understood the target date for completion was July 1—the 56th anniversary of the founding of the Chinese Communist party.

Mexican Rat Peril

MEXICO CITY, Nov. 16 (UPI).—Mexico may have a rat population of 53 million by the end of this century and suffer enormous food and crop losses from the rodents, a Mexican physician warned.

Keystone.

THE AUTUMN LEAVES KEEP FALLING DOWN — So an inventor in Illinois has devised this portable blower to clear lawns, sidewalks, paths, etc. The only hitch is that a neighbor might blow the leaves right back.

China Disaster Area Is Center Of 2d Quake Within 5 Months

PEKING, Nov. 16 (Reuters).—The earthquake disaster zone of North China was today recovering from a severe jolt which rocked major cities almost 400 miles apart.

Officials gave no indication of damage or casualties, but they confirmed that the center of last night's earthquake was near Tangshan, the industrial city that was virtually flattened by a massive quake in July.

They reported that the latest tremor registered 6.9 points on the open-ended Richter scale. Observers said the jolt undoubtedly hampered the wide-ranging reconstruction program established in the area after the summer disaster. The new chairman of the Communist party, Hua Kuo-feng, is in charge of the program.

The tremor shook Peking, 100 miles west of Tangshan, but today there was no sign of serious new damage in the capital.

It was also felt in the northerly Manchurian city of Shenyang. Foreign students there said that people ran into the streets "but everything was soon back to normal."

Coal-Mining Center

Tangshan, an important coal-mining center, was once a city of about a million people. More than 100,000 were reported killed in the July disaster. Some analysts think that the toll was far higher.

Since July, no foreigners have been to Tangshan, but a handful have traveled by train across part of the devastated zone. They reported few buildings standing and whole villages in ruins.

The Tangshan disaster has damaged the economy. Building materials, other supplies and technical personnel have been diverted to the area.

The region's coal output, needed by North China industries, may also have been affected, a Western analyst said.

2 Hard-Line Nationalists at Geneva Talks

Blacks Urge Dec. 1977 Rhodesia Takeover

GENEVA, Nov. 16 (NYT).—Two hard-line nationalist leaders at the stalled conference on the future of Rhodesia demanded today that Britain schedule a "definite and ceiling date" for the breakaway colony's independence under black majority rule.

In a particularly harsh joint statement accusing Britain of attempting to widen the split between the conference's four nationalist delegations, Joshua Nkomo and Robert Mugabe demanded that the transfer of power from the white Rhodesian minority government of Prime Minister Ian Smith be set for Dec. 1, 1977.

Despite the rigid stand taken by the two nationalists, there is no suggestion on any side that the talks were on the verge of collapse.

Mr. Nkomo and Mr. Mugabe said in their statement that the Patriotic Front that they had formed for the talks "totally rejects" the British position that no fixed date for independence can be set before all the constitutional and administrative processes for the transition to black rule are completed.

'Serious Doubts'

The Patriotic Front, the two leaders said, is "compelled to entertain serious doubts about the overall British intentions" regarding the conference because of what they termed the "imprecision and equivocation" of the British plan.

Although already well known, the plan was formally presented yesterday by the conference chairman, Ivor Richard of Britain, to the delegations representing four black nationalist factions and the Rhodesian government.

Britain estimates that it will take 15 months for the transitional processes to be completed once they are outlined and the composition and powers of a biracial interim government for the period until independence have been settled at the talks here. The Smith regime has asserted that it will take up to 23 months to achieve independence.

Bishop Abel Muzorewa and the Rev. Ndabaningi Sithole, the other nationalist leaders at the talks, also have called for the fixing of a firm date for independence. They have agreed, however, to the chairman's suggestion that this issue be bypassed in order to get to the other questions before the conference.

'Substantive Issue'

But the two hard-line nationalists said it would be "futile" to bypass the issue. "We regard the fixing of a firm date for independence as a substantive issue before this conference because of the need for certainty and clarity of direction, and the definite commitment of the British government," they said.

However, Mr. Richard, Britain's ambassador to the United Nations, ignored the injunction of the Patriotic Front in the statement read by Mr. Mugabe at the brief plenary session. Later, at a private meeting, he discussed with the Rev. Sithole the question of how to examine the issue of the structure of the proposed biracial government and scheduled a similar meeting for tomorrow with Bishop Muzorewa.

The Patriotic Front team also called today for a deadline to be set for the conclusion of the conference itself to insure that the Dec. 1, 1977, independence date that they feel the conference should fix "cannot be sabotaged."

Angola Renews UN Application

UNITED NATIONS, N.Y., Nov. 16 (AP).—Angola has renewed its application for UN membership, blocked in June by a U.S. veto. The latest bid followed a U.S. veto of Vietnam's membership.

In a letter to the president of the Security Council, the ambassadors of Benin (Dahomey), Libya and Tanzania asked for an urgent meeting to consider Angola's application.

The United States blocked Angola's original bid because of the continued presence in the African nation of an estimated 12,000 to 15,000 Cuban troops.

War in Rhodesia Intensifies; 29 Guerrillas Reported Slain

SALISBURY, Rhodesia, Nov. 16 (AP).—Rhodesian security forces said today that 29 guerrillas have been killed in the last 24 hours, possibly the highest total reported for such a period in four years of war.

In a series of ground and air operations over the last two weeks, security forces said they have killed more guerrillas—141—than in all of last year, when 140 were reportedly slain.

The operations have cost the lives of seven servicemen this month, the highest reported toll for any similar period. Fourteen security force men were killed in action last year.

It was also reported that a farmer, Arthur Cummings, 28, was murdered by guerrillas at his homestead south of the northwest Rhodesian resort town of Victoria Falls. He was the 56th white victim of 622 civilians slain by insurgents in the war.

Twenty-four civilians have lost their lives this month, a third the number killed last year.

More than 10 persons a day have been killed in the war this month. In the last two weeks, 179 persons—civilians, government troops and guerrillas—have lost their lives, according to official lists.

The intensity of the conflict has increased in the last four-and-a-half weeks since guerrilla commanders ordered an escalation of offensives from their sanctuaries in Mozambique, Zambia and Botswana—an effort to strengthen their positions at the Geneva peace conference.

Incursion Is Reported

MAPUTO, Nov. 16 (Reuters).—Mozambique said tonight that Rhodesia landed paratroops Thursday in an attack on a town across the border and had lost seven planes in four days of fighting.

Mozambique radio said Rhodesia flew in the airborne troops to attack Mavue, a town close to the frontier in Gaza Province.

The Mozambique news agency, in a report available in Dar es Salaam, said the Rhodesians occupied a military base at Mavue Thursday. It did not say whether they still held it.

But fighting had continued until yesterday, with Rhodesian ground troops, supported by armored cars, coming across the border to link up with the airborne force, the agency said.

It said that the 30 Rhodesian aircraft used in the fighting included bombers.

Kissinger Note Won Smith Backing for P

(Continued from Page 1)

more supportive but not very optimistic.

When Mr. Kissinger arrived in Pretoria on Sept. 17, he said that chances for progress were better on the problem of independence for South-West Africa (Namibia) than on Rhodesia.

On Sept. 18, Mr. Vorster told Mr. Kissinger that if he saw Mr. Smith the next day, there was a "reasonable" chance that the Rhodesian would agree to the proposals being talked about.

On Sept. 19 at 9:30 a.m., Mr. Kissinger and Mr. Smith met at the home of U.S. Ambassador William Bowdler, accompanied by their aides.

Mr. Smith passionately defended the need for a white-led Rhodesia to fight Communism in southern Africa, arguing for U.S. aid and against U.S. pressure.

Mr. Kissinger coldly presented him with intelligence estimates that predicted military and economic disaster in a year, and said that Communism would only increase in Africa if there was no move toward a negotiated settlement now that would allow moderate blacks to take power in Rhodesia.

That evening, the Americans and Rhodesians gathered at the hotel of Mr. Vorster for the climactic talks.

Mr. Kissinger handed Mr. Smith a list of five points that, he said, must be the basis for a Rhodesian settlement.

He asked Mr. Smith to agree to the plan and make his acceptance that night. Mr. Smith slowly read aloud the first point, "Rhodesia agrees to majority rule within two years."

According to participants in the meeting, Mr. Smith then looked around the room and said, "You want me to sign my own suicide note."

There was only silence. Later, Mr. Kissinger was to say it was the most "painful" moment in his life watching Mr. Smith agree in effect to the capitulation of his government.

But Mr. Smith refused to accept the points that night. He said that he would recommend acceptance to his government and party, but added that he needed additional "sweeteners."

Two-Tier Regime

Specifically, there was the question of the two-tier government that would run the interim regime before final independence.

The British, who had legal responsibility for Rhodesia, had proposed—and Mr. Kissinger had accepted—that there be a council of state, evenly divided between blacks and whites, and a council of ministers with a black prime minister and with the majority of portfolios held by blacks.

Mr. Smith wanted assurances that the chairman of the council of state and the defense and law and order ministers be white. Mr. Kissinger said he was not sure that the blacks would agree, having already agreed to the other points.

Finally, Mr. Kissinger allowed Mr. Smith to include the reference to a white chairman for the council of state in brackets, indicating that the matter was not decided yet. The paragraph described the council as having "executive authority."

Graham Pollard, Literary Prober, Dies at Oxford

OXFORD, England, Nov. 15 (Reuters).—Graham Pollard, 73, a bibliographer, author and the first director of London's Institute of Historical Research, died here today.

He was chiefly known to the public for his exposure, with colleague John Carter, of the forger Thomas Wise who had marketed fraudulent "first editions" of small works by eminent Victorian authors.

Mr. Pollard was president of the Bibliographical Society in 1960-61 and was awarded its gold medal in 1969.

Louis Camu

BRUSSELS, Nov. 16 (IHT).—Louis Camu, 71, former chairman of the Banque de Bruxelles, died Friday at his home in Alost, Belgium.

Mr. Camu had been chairman of the Banque de Bruxelles for 23 years until its merger last year with the Banque Bruxelles Lambert. He was a former president of the Belgian Bank Association and had been president of the banking federation of the European Common Market, of which he was the founder.

John P. Stevens Jr.

EDISON, N.J., Nov. 16 (AP).—John P. Stevens jr., 79, retired chairman of J.P. Stevens & Co., died Sunday. As chairman of J.P. Stevens, from which he retired in 1965 after 53 years on its board, he was instrumental in the merger three decades ago of nine modest-size companies into the current major textile corporation.

Mrs. Niwa Kawamoto

OTSU, Japan, Nov. 16 (AP).—Mrs. Niwa Kawamoto, Japan's oldest person, died at her home today, about three months after her 113th birthday. Mrs. Kawamoto married at 19 and had eight children. Two are still living.

Sir Frederick Pile

LONDON, Nov. 16 (Reuters).—Sir Frederick Pile, 92, who was in charge of Britain's anti-aircraft defense throughout World War II, died here Sunday.

K. S. Ramachandran

NEW DELHI, Nov. 16 (Reuters).—K.S. Ramachandran, 65, a former general manager of the Press Trust of India news agency, died here yesterday after a brief illness. Mr. Ramachandran had retired in February.

2 Dissident Jews Suddenly Freed By Soviet Union

MOSCOW, Nov. 16 (NYT).—Soviet authorities yesterday suddenly released two Jewish dissidents who had faced possible prison sentences of up to five years for protests staged in central Moscow last month.

The move was greeted with amazement by other activists, who said they could not remember another instance in which criminal charges against dissidents had been dropped.

"It's unprecedented," said Anatoly Shcharansky, a leading activist who wants to emigrate. He said that the two men, Boris Chernobylsky and Dr. Iosif Ass, both 32 years old, had been told by officials that although the charges of "malicious hooliganism" lodged against them were valid, the men were being freed because the offenses were their first and they had families. Each man is married and has two small children.

A leading dissident, Vladimir Slepak, attributed the release to "pressure from the United States." During the protests, he had received a telegram of concern and support from Jimmy Carter, who was then campaigning for the presidency. Sen. Edward Kennedy, D-Mass., had also cabled his support.

Ulster Gunman Kills Militiaman in Belfast

BELFAST, Nov. 16 (AP).—A gunman killed a part-time soldier of the Ulster Defense Regiment last night and wounded another in the shoulder at Lurgan, about 20 miles southwest of here, the army reported.

A spokesman said the two men were ambushed while patrolling on foot in the center of the town. The gunman escaped.

Ceylonese Seeks Waldheim Post

UNITED NATIONS, N.Y., Nov. 16 (NYT).—Another Third-World diplomat has thrown his name into consideration for the post of secretary-general, threatening the chances of the incumbent, Kurt Waldheim of Austria, for election to a second five-year term.

In a cautiously worded statement, Hamilton Amerasinghe of Sri Lanka, president of this year's General Assembly, declared his willingness to serve in the top UN executive post, but only if he should emerge as the unanimous choice of the Security Council.

The council is expected to meet in secret session early next month to decide on its recommendation for routine General Assembly approval. So far, the names of Mr. Waldheim and Luis Echeverria, the outgoing President of Mexico, are before the council.

Saxbe Leaving Delhi

NEW DELHI, Nov. 16 (AP).—U.S. Ambassador William Saxbe will leave India Saturday at the end of his diplomatic assignment, the U.S. Embassy announced.

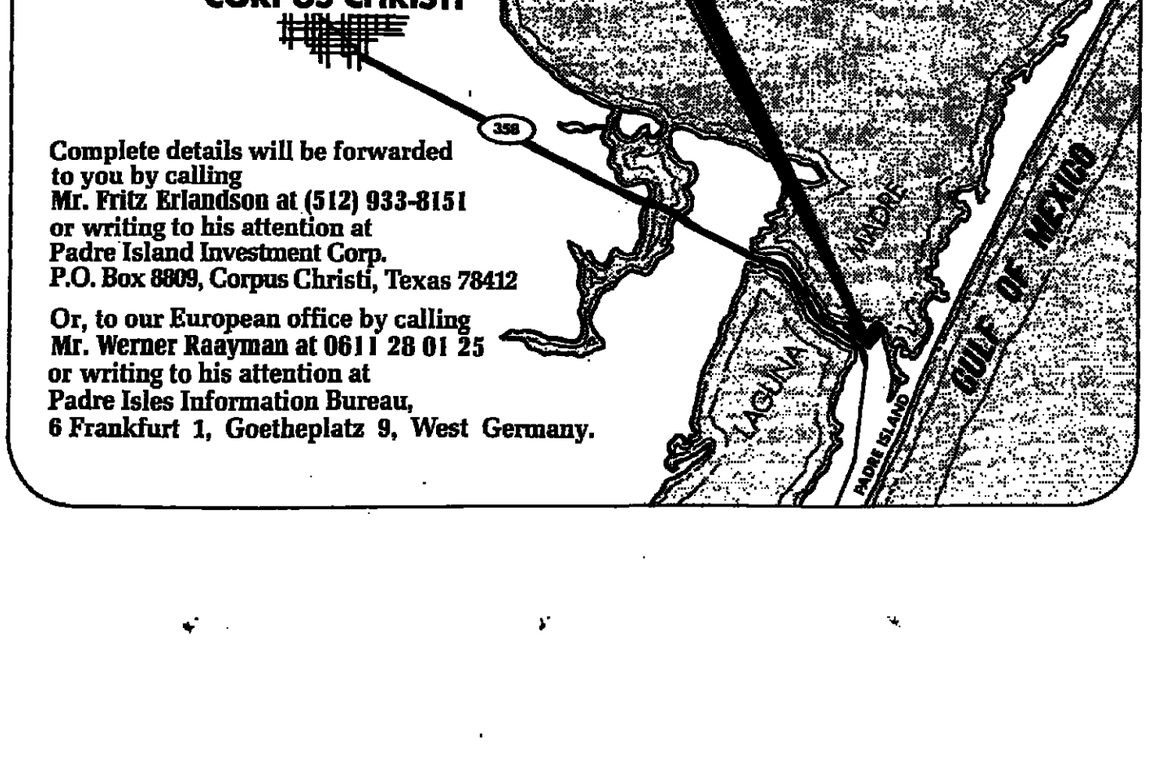
BUSINESS OPPORTUNITIES

MAJOR MARINA SITE FOR SALE

LOCATION TRIPLE 'A'

BOATS TO SLIPS RATIO 12 to 1



The marina site on Packery Channel leading out to the Gulf of Mexico, is located within the boundaries of the internationally famous water resort community, Padre Isles.

Boating, sailing and fishing are year round activities in this area of the Southern Gulf Coast of Texas. Less than two miles away is the Padre Isles Country Club, golf course, swimming pool and tennis courts.

Nearby Corpus Christi has a municipal marina with 421 slips which have been 100+% occupied since 1970 and presently have a waiting list of 200. Its director maintains that the growing demand will dictate a need for 884 slips by 1980. Based on the two county boat registration, the boat to slips ratio is 12 to 1.

The Padre Isles marina site comprises 30 acres of land and a 37 acre basin owned by the State of Texas. All dredging permits have been acquired for immediate construction of 400 wet slips. There is enough commercially zoned acreage for the construction of shops, condo's, hotels, restaurants etc.

We believe this business opportunity to be an extraordinary one. Everything is ready. The boat owners of Texas are waiting for you.

Complete details will be forwarded to you by calling
Mr. Fritz Erlandson at (512) 933-8151
or writing to his attention at
Padre Island Investment Corp.
P.O. Box 8809, Corpus Christi, Texas 78412

Or, to our European office by calling
Mr. Werner Raayman at 0611 28 01 25
or writing to his attention at
Padre Isles Information Bureau,
6 Frankfurt 1, Goetheplatz 9, West Germany.

ON PATROL—Syrian peace-keeping troops move through a street in downtown Beirut.

Sarkis Orders Official Services Resumed

BEIRUT, Nov. 16 (AP).—President Elias Sarkis ordered swift resumption of government services today as Beirut enjoyed its first day of peace under Syrian military occupation.

With Syrian soldiers and tanks standing guard, traffic jams formed at the National Museum crossing point between Moslem and Christian sectors of the city.

The Syrian troops, many of whom have never seen a city as large as Beirut, tried to direct the flow. But Lebanese driving habits were often too much for them and snags developed on major arteries.

"They are happy to be back at it again," said a Lebanese, chuckling at the cacophony of honking and racing motors in a bottleneck.

Crumbled Buildings

Scores of Lebanese picked through the downtown commercial center, where some of the worst battles raged in the war that began 19 months ago. Fathers brought their children to show them the crumbled office buildings and rubble-strewn streets where fighting continued until the 12,000 Syrians moved in.

"You want to see some bodies?" a Lebanese said to a French photographer touring the area. "I know where there are four of them, right over here."

Mr. Sarkis's orders called for reactivation of government ministries and departments within 10 days. He appointed a seven-man commission to organize the resurrection of what is in effect a dead government.

Many government buildings were occupied during the fighting.

These buildings were taken over yesterday by Syrian soldiers, who are to hand them back to the legal Lebanese government headed by Mr. Sarkis. But many buildings lie in shambles.

In addition, many civil servants worked in various capacities ranging from street fighter to radio technician for the leftist and rightist militias. Reintegrating them into a single corps of functionaries able to work together seemed to be a difficult task.

At the top, Premier Rashid Karami has been split from the Christian-run legal government for months, though he never fully sided with fellow leftist Moslems in the struggle. Other ministers also spun off from the Cabinet according to their religion, and it was difficult to see how they could expect to run their ministries effectively again.

Mr. Sarkis was reported planning a round-table discussion with rightist and leftist leaders to find some common political ground before trying to form a new government. But first he must supervise the final phase of the Syrian occupation, at Sidon and Tripoli.

Tripoli, 60 miles south of Beirut, and Sidon, 25 miles south, are Lebanon's second and third largest cities. They are to be occupied within the next few days to complete an Arab League truce plan decided at two Arab summits last month in Saudi Arabia and Egypt.

Food Relief Program

ROME, Nov. 16 (UPI).—The UN Food and Agriculture Organization today announced an emergency program to provide food relief for four months for 1,350,000 victims of the Lebanese civil war.

FAO director-general Edouard Saouma, himself a Lebanese, announced the decision after several days of meetings with a Lebanese government delegation led by Labor and Social Affairs Minister Ghassan Tueni.

Mr. Saouma said he authorized $4.7 million in immediate aid from World Food Program emergency resources for the first month of relief operations.

Carter to Confer With Ford and Kissinger

PLAINS, Ga., Nov. 16 (AP).—President-elect Jimmy Carter will meet with Secretary of State Henry Kissinger here Saturday for a briefing on foreign policy and will confer with President Ford in Washington next week, it was announced today.

Mr. Ford and Mr. Carter agreed in a telephone call last night to have their staffs work out arrangements for their meeting. The day for the session has not been decided yet, White House spokesman John Carlson said.

Mr. Carlson said Mr. Carter put in a telephone call to Mr. Ford as the President returned aboard Air Force One yesterday from a California vacation. Mr. Ford returned the call when he arrived at the White House.

White House Press Secretary Ronald Nessen described the Ford-Carter call as a "cordial, businesslike conversation" that lasted seven minutes. He said the President did not accept the call on the plane because "Air Force One communications are not really secure, and I suspect that was the main reason."

Liaison Men

Mr. Carter's staff said Mr. Kissinger will be accompanied Saturday by Lawrence Eagleburger, the under secretary for management at the State Department, who is handling department liaison with Mr. Carter during the transition from the Ford administration.

Mr. Eagleburger was scheduled to meet later today at the State Department with Anthony Lake, who has been designated by Mr. Carter to head his foreign-policy transition team. Mr. Lake is expected to see Mr. Kissinger before the secretary travels to Georgia.

Vice-President-elect Walter Mondale, who will be in Plains on Friday for a meeting between Mr. Carter and CIA director George Bush, will also attend the Carter briefing with Mr. Kissinger.

Contact With Congress

Congress also was making contact with Mr. Carter. A dozen major Democratic congressional figures, including most of the rivals for the leadership of the Senate majority, will meet tomorrow in Georgia with the President-elect, retiring Senate majority leader Mike Mansfield, D-Mont., said today.

Virtually all are chairmen or ranking members of committees with jurisdictions covering economic legislation. It will be the first post-election meeting with Mr. Carter for the leadership of the Democratic majority in Congress.

Meanwhile Hamilton Jordan, the campaign manager who engineered Mr. Carter's election, is emerging as the political architect of his administration.

Mr. Carter's announcement yesterday of the process he will follow in staffing his administration follows a blueprint Mr. Jordan submitted last week. The President-elect has placed Mr. Jordan in charge of carrying it out by coordinating the selection of Cabinet members and other top administration officials.

Ford Is Working On 1978 Budget

WASHINGTON, Nov. 16 (AP).—President Ford is devoting time to one of the last major tasks of his presidency: preparing the federal budget for 1978.

A three-hour conference on the budget that Mr. Ford planned today was to be his longest work session since Election Day.

Mr. Ford, wife Betty, daughter Susan and son Jack returned to Washington yesterday evening from Palm Springs, Calif., where the President spent eight days unwinding from the campaign.

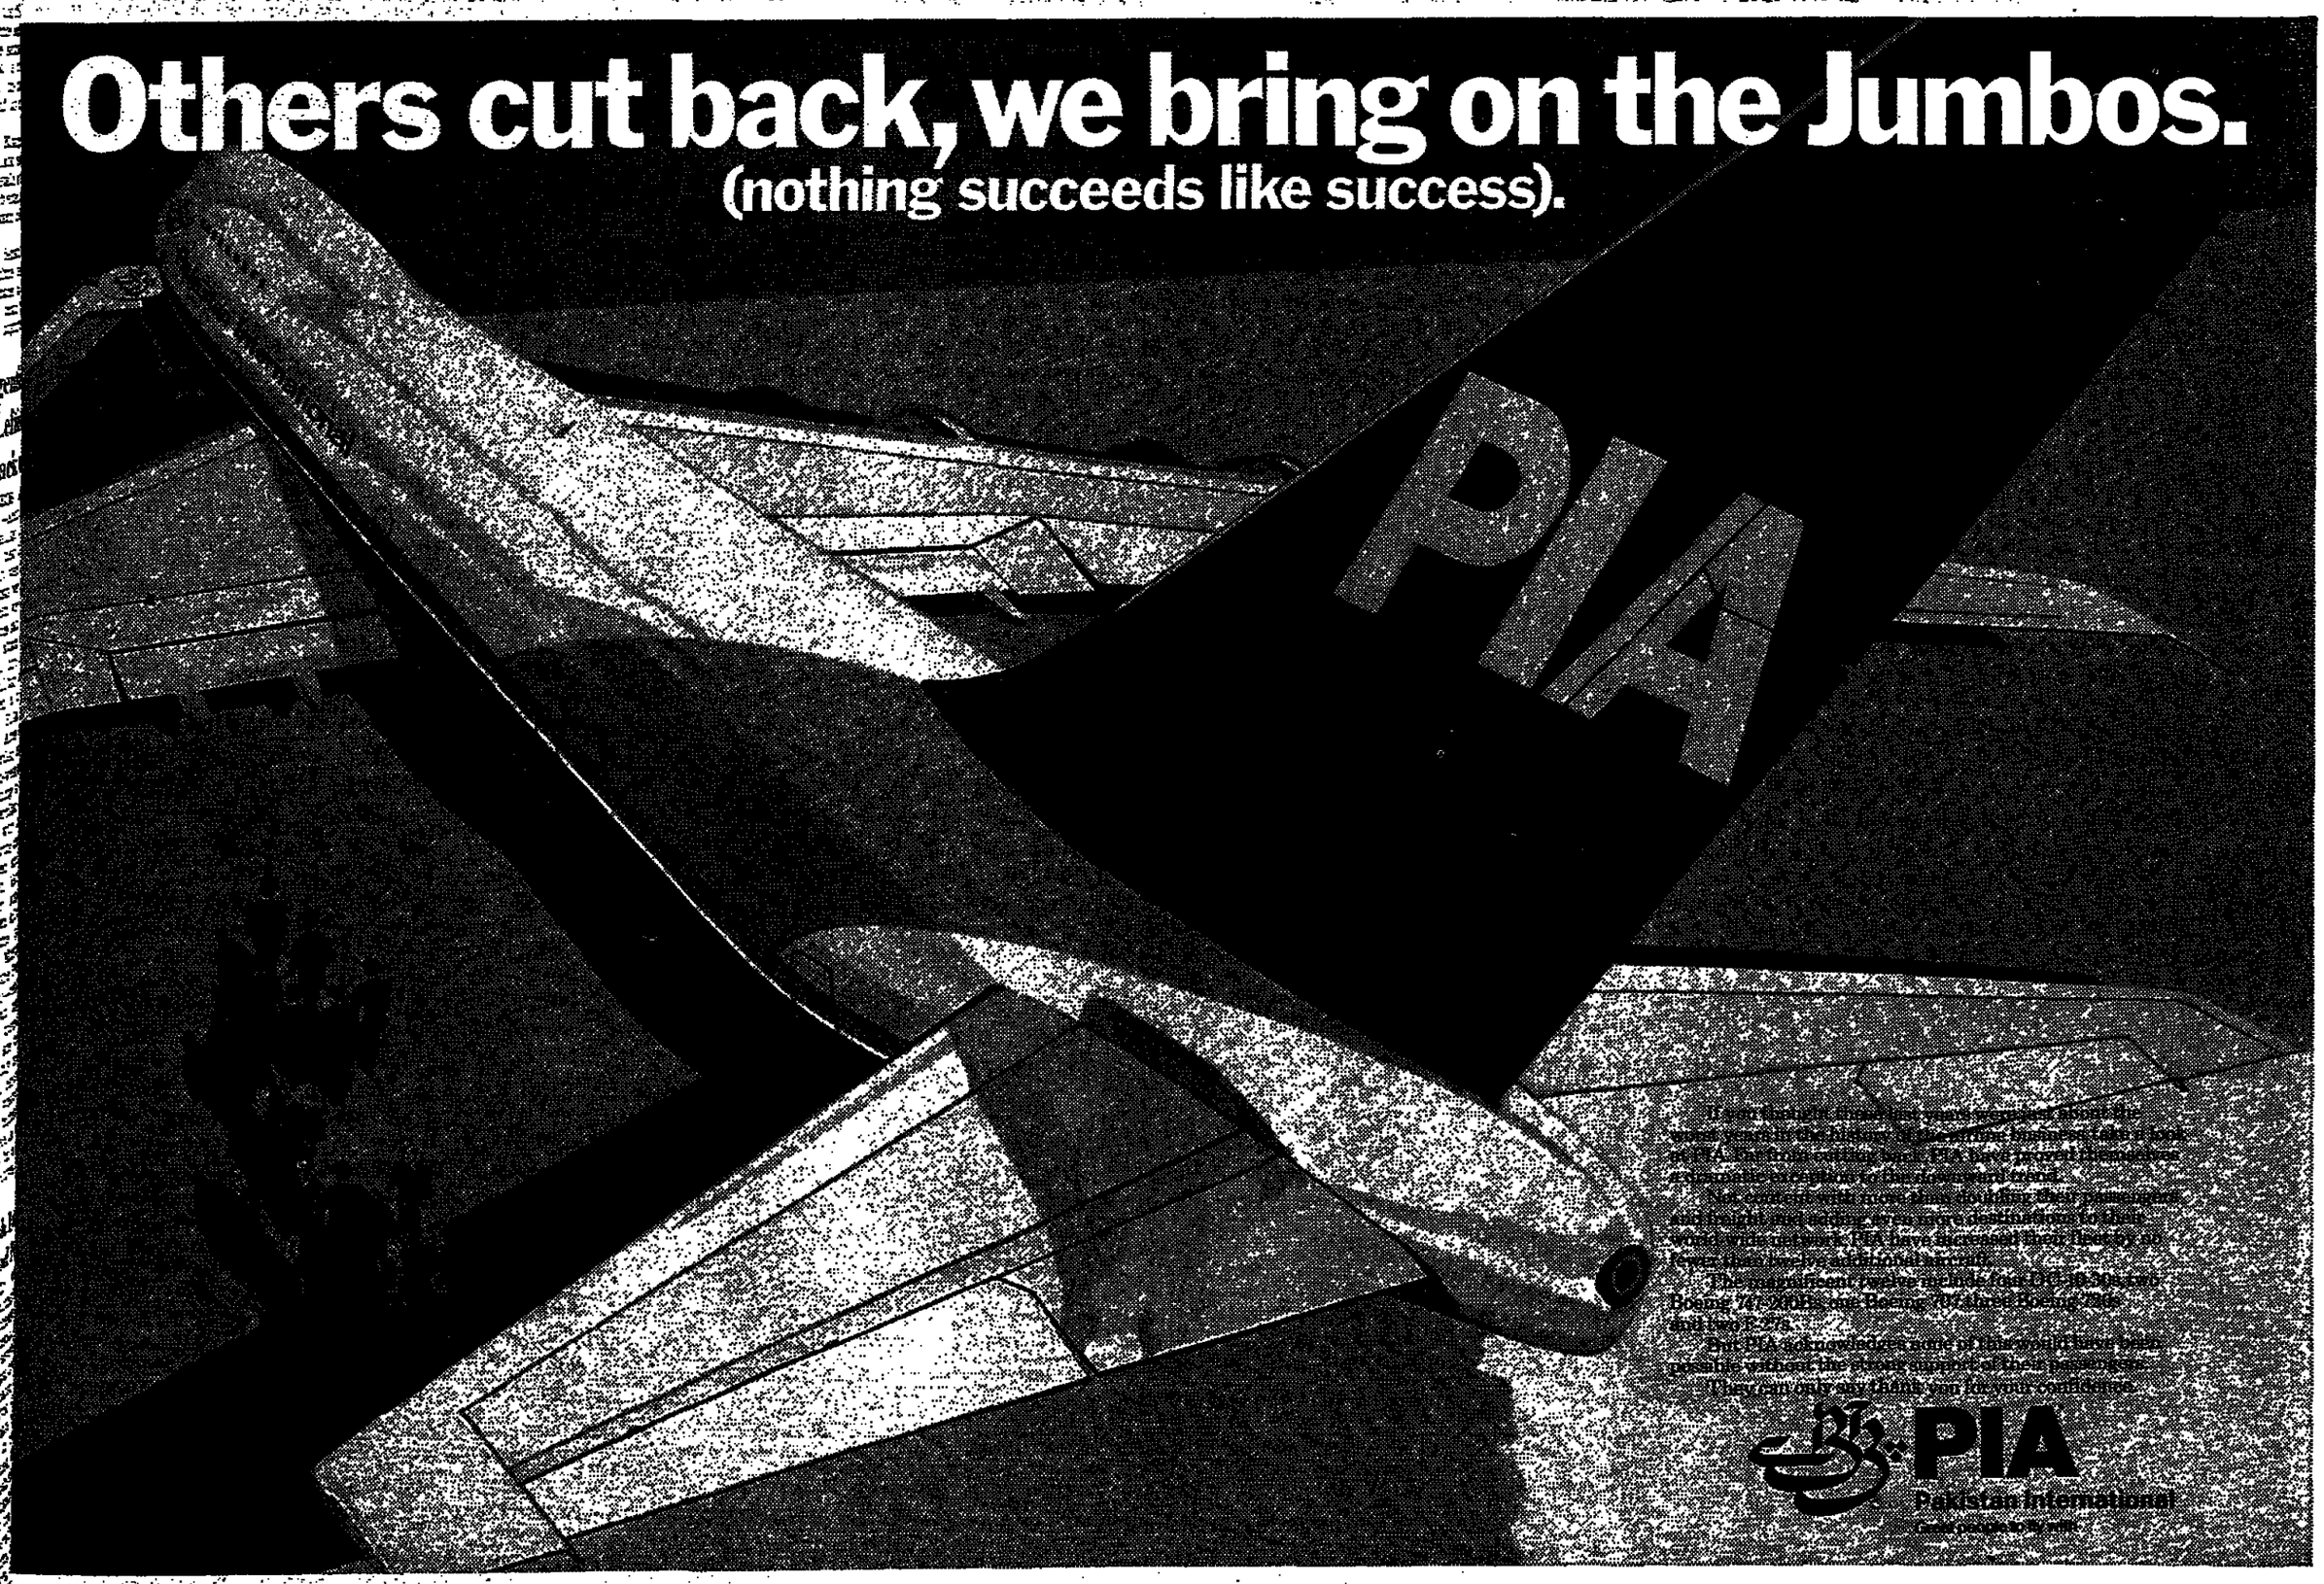
Discover the distinctive taste of Glenfiddich pure malt.



Unlike blended whisky, Glenfiddich has a full-bodied smoothness all of its own.

Its pure taste comes from the fact that it is 100% pure malt.

And from the fact that it's still made in the same traditional way by the fourth generation of the Grant family.

So when you discover the distinctive taste of Glenfiddich for yourself, you'll soon appreciate why it's the world's finest Scotch whisky.

Mr. Carter's World

World events and the world's leaders have been kind to the United States in this election year. No major crisis thrust itself into the presidential contest. The candidates were able largely to ignore turbulence on the international scene, such as China's leadership change, civil war in Lebanon, elections in Italy and West Germany, Britain's economic plunge and Europe's monetary disorder. But pressures now building in these and other areas will require presidential decisions in the early weeks of the Carter administration.

A rapprochement with Peking has been sought by Moscow with increasing zeal since Mao Tse-tung's death and state-to-state contacts are likely to improve slowly, despite ideological disputes. This does not suggest any need for panic in Washington. China's pragmatic leaders are unlikely to abandon the triangular relationship with the United States and the Soviet Union that has served Chinese as well as U.S. interests since 1971. But the balance could shift gradually to U.S. disadvantage.

Soviet-U.S. relations thus could readily be affected. Moves to reinforce Soviet interest in detente and restraint are essential. If the Strategic Arms Limitation Talks (SALT-2), shelved for almost a year by President Ford, are to be concluded rapidly, Pentagon opposition will have to be overcome or overruled. Together with a new move on trade and credits, undertaken with congressional accord, a SALT treaty could lay the basis for the long-delayed meeting that Soviet party chief Leonid Brezhnev wants. In return, there could be pressure on Moscow to carry out its pledges to reduce the Cuban expeditionary force in Angola that, otherwise, might turn up elsewhere in southern Africa.

Before meeting with Brezhnev, President Carter will want to meet with his allies. There is much to be said for another economic summit on the pattern of Rambouillet and Puerto Rico—but this time involving the Common Market, as well as the national leaders of Europe and Japan. It would permit political consultation as well as economic decisions to reverse the trend toward renewed world recession. If the drift toward Communist participation in the governments of Italy and France is not to become irreversible, the economic atmosphere in Europe must be altered. Economic leadership from Washington could also pave the way for a new approach to West Germany and France to halt the export of reprocessing plants, which fabricate plutonium for nuclear bombs.

A new move to negotiate a Mideast settlement is vital to defuse the world's most explosive region, even if substantial progress is unlikely before the Israeli elections in October. New proposals are needed to revive the stalemated North-South dialogue in Paris, bogged down on issues of Third World debts and commodities.

The Ford administration's defense budget will require overhaul, with multiple decisions on the B-1 strategic bomber, the Cruise missile, the Mobile ICBM, the Trident submarine, terminally guided warheads and other weapons systems that could prejudice arms control prospects.

The pressure for vital international decisions which will not only shape the course of the new administration but affect the fortunes of all nations clearly makes the selection of talented and experienced aides in the areas of diplomacy, defense, intelligence and arms control a task of utmost urgency as Carter prepares to assume his awesome responsibilities.

THE NEW YORK TIMES.

Controlling U.S.

Arms sales to foreign states stood at the $3-4-billion level when President Nixon took office. They hit $13 billion two years ago, and they're flying at $10-11 billion now. This is not simply a case, as some alarmed (and partisan) people have claimed, of either a military-industrial complex or a balance-of-power philosophy running amok. For the Nixon administration had, at the beginning, a cogent political rationale for boosting arms sales. At a time when the United States, departing Vietnam, was plainly diminishing its capacity to project its own power abroad, it made sense for allies and friends to acquire the means to better defend and reassure themselves. This was the "Nixon doctrine." It was vulnerable to abuse, as are all policies, but it was no fraud. That it meant jobs and profits for Americans did not wipe out that fact.

Something unexpected then happened. The oil-price increases put into the hands of a few Middle East countries the resources to render the Nixon doctrine largely irrelevant. These states were suddenly in a position to build up arsenals out of all proportion to the threat—essentially, Soviet pressure—that the United States had hoped to equip them to resist. Israel's case was separate but similar. Using not oil revenues but, in large part, aid dollars, it accelerated its weapons acquisitions, too. It was this unforeseen sequence, and not any dark design, that made a hash out of the guidelines that U.S. policy, foreign austerity and the then-lower state of weapons technology previously applied. The Ford administration never got back on top of the situation. Realizing this, the public sensed that the conventional-arms race was spinning out of control.

Fortunately, things look brighter. There is the election of a president who professes to be outraged by the moral and political implications of the United States' being "the world's leading arms salesman." The Congress has under its belt a year's experience with the complex legislation it wrote to give it a share in arms-transfer decisions, and is presumably now better aware of how to bring its influence effectively to bear. And an informed constituency for restraint is coming into being to offset in some measure the already existing constituency for sales. One citizen group, the UN Association, is today releasing a report, "Controlling the Conventional Arms Race," which usefully breaks this juggernaut problem into bite-sized pieces for public understanding. A new membership organization called New Directions is trying to figure out how best to add its weight to others already lobbying for controls. In brief, a more favorable political context appears to be shaping up.

What is so far lacking is an agreed framework in which foreign requests to buy arms can be judged—not necessarily a "Carter doctrine" but a set of standards for defining the U.S. interest in foreign military sales. There must also be devised a set of tactics by which these standards can be enforced. It is not enough, for instance, to determine that economic pressures and inertia must be subordinated to foreign policy. A better way must be found to bring the other major arms suppliers, European and Communist, into the pattern. Getting a handle on arms sales is one of the most challenging, and most essential, tasks the new administration will have to face.

THE WASHINGTON POST.

Consensus Statement

The part played by the United States in arriving at the UN Security Council's unanimous "consensus statement" on Israeli occupation of Arab territories was entirely constructive, and deserved praise instead of the rather hysterical blame it has received.

It is generally agreed—by Israeli diplomats among others—that the moderating influence of Ambassador Scranton and the U.S. delegation succeeded in achieving a far less harshly worded statement than would otherwise have been the case. In fact, the statement, critical as it is of the Israeli settlement policy in occupied territories, is in complete conformity with the previously expressed U.S. position on this issue.

While it is obvious that the Israeli government would bitterly object to any statement criticizing such settlements and other facets of its occupation, it is equally obvious —or should be—that the most useful thing the United States could do would be what it did do: to exercise its influence on the side of restraint, while at the same time—without sacrificing the friendship of Israel—to try to maintain a tenable relationship with the more moderate Arabs by demonstrating that the United States was not automatically hostile to whatever position they might take.

If there is to be any hope at all that the United States will retain some leverage in advancing negotiations toward a peace in the Middle East, the United States must have the confidence of both sides; and it cannot have that unless it is perceived by both to be able to form its own independent judgments. It is in the interest neither of the United States nor Israel to demand—or to expect—any less.

In the International Edition

Seventy-Five Years Ago

November 17, 1901

NEW YORK—A message from Salt Lake City says that a severe earthquake occurred throughout Utah yesterday with 20 distinct shocks being felt. Property to the extent of over $500,000 is reported to have been destroyed. The number of deaths or injuries is not yet known. But it is known that the Mormon temple at Richfield was badly damaged.

Fifty Years Ago

November 17, 1926

PARIS—These literary round-the-towners seem to be tumbling over one another in the rush to get out books with Paris backgrounds. The very latest is "The Sun Also Rises," by Ernest Hemingway. It contains a great deal of the Left Bank, a dash of the Grand Boulevards and the great open spaces of the sanded arenas south of the border. Hemingway is not nice to his friends.—From the column of Arthur Moss in the New York Herald.

'Okay, Bring in the New Guy . . .'

A Case Study of a Nuclear Deal

By Flora Lewis

PARIS—The ticklish case of the Franco-Pakistani atomic deal, still to be resolved, reflects the intricate political rivalries that prevent any broad, effective international agreement to control nuclear proliferation. But the case also reflects a slow change in world opinion: the dangers of nuclear proliferation are beginning to worry the increasing number of countries in a position to supply the equipment and materials others could use surreptitiously to make bombs. The French agreement to sell a $1-billion reprocessing plant to Pakistan showed how atomic energy has become big business, and how commerce, domestic politics and foreign policy often conflict.

Pakistan decided it wanted the plant after India set off a nuclear explosion—clearly establishing Pakistan's main foe as the world's sixth nuclear power. France, which has never signed the nonproliferation treaty but has always said it would abide by its terms, has also never veered officially from the Gaullist policy of "national independence," interpreted as a refusal to accept outside constraints on atomic policy and a determination to compete with the United States on the production and export of high technology.

President de Gaulle chose to focus on computers, color television, and advanced aviation—specifically the Concorde—as the key to modern strength. However, the expensive French efforts have failed or fallen behind other countries. Atomic energy remained a major hope.

Inadequate

Accordingly, after long negotiations, the French government gave its approval March 17 to close the deal with Pakistan for a nuclear reprocessing plant. This was after the International Atomic Energy Agency in Vienna said the terms complied with its safeguard standards, standards which the United States among others now considers inadequate and far from well policed.

Inside France the decision represented the dominant role of the Foreign Trade and Industry Ministries on atomic export policy, and the continued force of Gaullist precepts. It had nothing to do with any French desire to tilt the Indian-Pakistani dispute.

The United States reacted, pointing out that Pakistan cannot for many years ahead justify the need for a reprocessing plant in its energy program and that, regardless of assurances, the sale would give Islamabad the capacity to make plutonium for bombs.

The arguments were exchanged on a fairly quiet, official level, however, without overt pressure from either side until suddenly, last August, on his way from Tehran to Lahore, Pakistan, Secretary of State Henry A. Kissinger told newsmen that consummation of the deal would endanger U.S. military and economic aid to Pakistan.

It was, high State Department officials later said, an inadvertently awkward and provocative way to press the United States position, especially since Mr. Kissinger was to fly directly from Pakistan to France for an elegant weekend at Deauville. French Prime Minister Jacques Chirac, about to leave the government, took the occasion to rebuke the U.S. secretary of state and confirm his own credentials as an ardent defender of France's sovereign right to disagree with the United States.

Suspicion

The general French perception of the affair was that the United States really wanted to keep as much of the international atomic energy market as possible open for its own exporters. There was widespread suspicion that Washington was not above using the threat of proliferation to cover its own commercial ambitions. Besides, strategic experts from many countries have begun to resign themselves to the idea that the spread of atomic weapons is inevitable in the nuclear age, and that the real issue is not how to prevent it but how long it will take and where the first slip-up will come.

Energy shortages provoked by the 1973 oil crisis sharply increased interest in atomic power and fears of dependence on the political whims of outside energy suppliers. It became clear that the usefulness of heavy investment in atomic plants depends necessarily on assurance that atomic fuel will always be available. A reprocessing plant is one guarantee that any country will have its own fuel, although it also guarantees the availability of weapons-grade plutonium.

The dangers for the world are coming to be more keenly appreciated by responsible governments. That is why six countries, including the Soviet Union, responded to Mr. Kissinger's secret invitation to join the "suppliers' club" to set export guidelines after the Indian explosion. Fifteen suppliers are now in the club, although they have yet to reach precise, effective agreements.

French President Valéry Giscard d'Estaing was more sensitive to Mr. Kissinger's private arguments than Mr. Chirac had been to the public ones. The first clear sign of change in Paris came when Mr. Giscard announced the formation under his office of a special national council on atomic energy policy. Until then, bureaucratic quarrels between French ministries and agencies had made it almost impossible to enforce any foreign policy except that of trying to earn francs with exports.

Policy Shifts

Gradually, French policy shifted until Foreign Minister Louis de Guiringaud declared last month that it is now "parallel" with that of the United States on central issues of nuclear proliferation. Mr. Chirac is out of office. Still, he and his friends are watching these developments, and an open French reversal, with France canceling the signed Pakistan contract, would cause trouble here.

Instead, the French government has let it be known that if Pakistan chooses to renounce the purchase, it won't complain. So far Pakistani officials are taking the stand that it is up to France to renege on its signature if it wants. Besides, the Pakistanis argue, with six nuclear powers, one more wouldn't really hurt the world.

In effect, that has left it up to the United States to find a way to persuade the Pakistanis to back down, as it did when South Korea signed a nuclear deal with France. Canada, which unintentionally provoked the trouble by providing the equipment secretly misused by India, has now joined the fray by threatening to stop supplying the uranium rods Pakistan needs for power if it goes ahead with the reprocessing purchase.

So it seems to be only a matter of maneuvering to save face before the Franco-Pakistani deal is canceled, staving off the proliferation threat a little longer. The demand for nuclear energy and guaranteed fuel supplies is still at least as insistent as the fear of the spread of bombs, however, and proposals to resolve the question are still general and controversial.

Meanwhile, West Germany has an agreement to supply a similar reprocessing plan to Brazil. Presumably, that will come under fire next.

Sweet and Sour Talk

By C. L. Sulzberger

PARIS.—This week's Brezhnev-Tito colloquy in Belgrade is a most important dialogue and also one about which little apart from formal statements will be known—at least for months to come. Tito, the first man to thumb his nose at Stalin and get away with it, is now 84 and unwell, despite occasional displays of remarkable vitality.

Leonid Brezhnev, who may not be as sly as Malenkov or as flamboyant as Khrushchev, is without doubt by far the most successful of Stalin's successors in the Kremlin. Nearly 70, he is also old (by any standards but Tito's) and he may be equally unwell. So it is not unlikely this may be their last get-together—and their most important.

Almost certainly the agenda of their conversation must be dominated by one subject—postmortem policy. Does Moscow still respect the declaration it reluctantly issued in 1955, acknowledging the integrity, independence and equality of one of the smallest Slavic states by the hugest?

Trust?

If so—and Brezhnev has already insisted it is—how much trust may shrewd and tough old Tito place in such an asseveration? After all, he had his ins and outs with Stalin himself, the rough grandmaster of Slavic political chess. Even Khrushchev slaughtered Hungarian politicians who had sheltered under Yugoslavia's flag in 1956 (a year after he took the independence pledge) accused of a crime somewhat comparable to that of their diplomatic hosts —Titoism.

Tito, both brave and wily (and aided by Nehru and Nasser), caught on to the Third World emphasis of Mao Tse-tung's diplomacy long before the Chinese giant learned it. He also knows about Robert Ardrey's "territorial imperative" as applied in human hunting grounds, like Soviet spheres of interest.

Is there a certain contradiction between Brezhnev's promises as implied—and as applied? The implication is that Yugoslavia is a pal and, as a good Marxist state, has every right to practice its own interpretation of dogma according to national requirements.

However, its application may be more critically viewed by what happened to Dubcek's Czechoslovakia in 1968. Dubcek's government was even a member of the Warsaw Pact, Moscow's anti-NATO. Tito's isn't.

It is five years since Brezhnev visited Belgrade although he and the Yugoslav marshal have had four tête-à-têtes elsewhere. One significant point of this particular meeting is that it is in Yugoslavia and "potential" post-Tito leaders are likely to attend ceremonial entertainments. But toward such "potentials" the Russians have not always been adroit.

During the early Tito-Stalin honeymoon Milovan Djilas was Moscow's favorite young Yugoslav acolyte. Djilas swiftly proved too liberal, too brave and too patriotic for such a role. The Russians (who had had—and still have—a group of clandestine Yugoslav admirers) then made an unsuccessful play at Alexander Rankovic. He had his differences with Tito but he was never addicted to treason. They even tried vainly to diddle the rising Stane Dolanc, a contemporary Yugoslav stalwart.

Twenty-eight years after asserting their political independence of Moscow the Yugoslavs are preparing with much subtlety to maintain their freedom of action. They perceive that the Kremlin, in the wake of the 1975 Helsinki accord, is clamping a tighter grip on Eastern Europe.

They also see that once again Soviet spokesmen are talking more and more of a "socialist commonwealth." And they remember precisely what that meant as applied to Hungary by Khrushchev and to Czechoslovakia by Brezhnev.

Furthermore it is well known to one and all (as Damon Runyon used to say) that Brezhnev's name is associated with two doctrines: (1)—Encircle China via India and North Vietnam and (2)—Assert the right to intervene in "socialist" states when things go wrong (from a Kremlin viewpoint).

Hoxha's Vow

Yugoslavia is a long way from China but it is not without significance that Albania's boss, Enver Hoxha, while remaining noncommittal on the Chinese post-Mao succession struggle, has promised to support Yugoslavia in any showdown with Moscow.

The background to the Brezhnev-Tito talks is consequently intricate. Already the skillful Yugoslavs have let it be known to the West that they will stand up totally for their freedom against anyone (which includes the United States, whom they conjecture may have made a spheres-of-influence deal with Moscow).

President-elect Carter did nothing to remove that suspicion during his pre-election campaign. Yet, via Greece, Britain and the Netherlands, Belgrade quietly told NATO some weapons available in the Western arsenal would be welcome if the imminent atmosphere proves to be less sweet than sour.

Letters

Nonparticipation

Re C.L. Sulzberger's column (IHT, Oct. 18):

Mr. Sulzberger accurately perceives nonparticipation in government as a symptom of deep disturbance. But, invoking Solon, the War of Independence, the boob tube, etc., in short, moralizing about the phenomena or attempting to shame participation, is as useful as capital punishment to a psychotic. Oddly enough, it tends to confirm what most nonparticipants perceive: The lack of any necessary connection between what or how they do or do not vote and the consequent behavior of their government.

By virtue of his position, Mr. Sulzberger can influence his government's behavior to some extent; by contrast, his vote is insignificant in that respect. I suggest that the apathy Mr. Sulzberger describes stems from a pervasive sense of helplessness in a growing part of our population and that this helplessness is the upshot of the continuing erosion of the ability of our citizens to control their government. Our government has become a de facto proprietor, it is no longer the servant of the electorate.

If Mr. Sulzberger would revive avid interest in government and bring forth qualified leaders, let him use his position to promote at least partial repeal of pay-as-you-go taxation and force each citizen to present himself to the tax collector on his birthday and pay his tax in coin of the realm—not checks. I believe Mr. Sulzberger would suffer an embarrassment of the interest thereby created.

MICHAEL T. AQUINO.

...y Peck, Lee Remick, Harvey Stephens in "Omen."

The Incredible 'Omen' In French Movie Houses

By Thomas Quinn Curtiss

...s, Nov. 16 (IHT).—You ...n't have to believe in spooks ...reciate a good ghost story. ...e story must coax you into ...ary credulity.

"The Omen" (at the Ma... Richelieu and Quintette ...glish) makes suspension of ...ity extremely difficult if not ...ight impossible. The film ...d great commercial success ... United States, which sug... that a segment of the public ...em converted to a belief in ...rath by "Rosemary's Baby" "The Exorcist" and is now ...e of swallowing any pre... ...ous premise.

...sider this one: Due to a ...p in the maternity ward of ...an hospital, the wife of an ...ican diplomat is presented ...ith her own infant (which ...ed) but with a baby father... Satan. Are you with me? ...child, though raised with ...l care, grows up to be a little ...making things hot for his ...parents after the diplomat ...nes the U.S. representative ...e Court of St. James's. The ...ssador learns the satanic ...t and, advised by a wizard ...ake immediate measures ... murder Lucifer's offspring. ...rest you must discover for ...self—but it includes a threat ...the junior devil may one day ...ected president of the United ...es.

...he primary function of the ...astic is to capture the imagi...n and make its eerie ...ns the spectator's own. "The ...n" does nothing of the sort, ...ining singularly silly from ... to finish.

...egory Peck keeps a stiff ...r lip as the insane ambas... who would *turn Herod*. Lee ...ick conveys the role of the ...ying wife with so much ...ness and light that one prays ... Satan's victory. There is, ...ever, an amusing performance ...Harvey Stephens as the devil's ...dear son. He smirks appeal... at the outlandish carry... on of his elders, trying to ...k their necks at every op... ...unity and to call a halt to ...nonsense. He is only 12, but ...oks like presidential timber. ...ll certainly vote for him.

...ery artist is at liberty to ...t whatever subject he chooses. ... Dreyer, the eminent Danish ...tor, made a memorable film ... witchcraft. Luis Bunuel ...is to adapt Huysmans's "La... " a novel about satanism as ...ticed in Paris during the ...s, a fascinating prospect. "The ...n" falls flat because its direc... tor, *Richard Donner*, is *unable* to lure us into his never-never land.

* * *

"Une Femme à Sa Fenêtre" (at the Balzac, Dragon and the Montparnasse) also treats of the diplomatic world. But without reading the Drieu La Rochelle novel on which it is based, the film is often difficult to decipher. It begins in Greece in 1936. The average spectator will probably not recall with any accuracy the temper of that land and that time. The mummified political background is scarcely of dramatic aid, being superimposed on the romance betweeen a diplomat's wife and a Communist agent, who is wanted by the police. There are so many flashbacks and flash-forwards that only the presence of Japanese tourists in an Athens hotel in the finale reveals that we have been transported to the post-war era.

Heavy with pretense and weighed down with dull dialogue, the film despite its time jumps is sluggish and confusing in its progress across Europe during the troubled thirties and the war years. Director Pierre Granier-Deferre fails to bring it persuasively alive. Romy Schneider is the passion-ridden woman. Philippe Noiret, Victor Lanoux and Umberto Orsini are the men who muddle through her not very interesting career.

* * *

The second International Film Festival of Paris is taking place at the Empire (41 Avenue de Wagram). On the official selection program are Werner Herzog's "Herz aus Glas," Volker Schlondorff's "Der Fangschuss," Luigi Comencini's "Lo Scopone Scientifico," Rainer Werner Fassbinder's "Chinesisches Roulett," Giuliano Montaldo's "L'Agnese Va a Morire," Elio Petri's "Todo Modo," André Techine's "Barocco," Daniel Duval's "L'Ombre des Châteaux," Solomon Chouster's "Toujours Avec Moi" (from the Soviet Union), Carlos Diegues's "Xica da Silva" (Brazil) and Alan Rudolph's "Welcome to L.A." (U.S.A.).

The festival schedule includes eight other sections.

Projections continue from 9 a.m. to midnight, with all showings open to the public, entrance fees ranging 10 to 15 francs. A subscription for 20 showings is available for 150 francs. The festival ends Nov. 19, with projections from 10 p.m. until dawn.

What It's Like to Be White in a Black U.S. School

Bernadette has long blond hair. In first grade, the black children fondled her hair and called her beautiful, according to her mother. By fourth grade, her mother said, she was hit, called "honky," excluded, and picked on by some girls. "Bernadette asks, 'Why do black kids say they're so much better?'" her mother reported. Yet Bernadette has black friends who sleep at her home and she at theirs.

—Barbara Libarkin, "The White Child as a Minority"

By Lawrence Feinberg

WASHINGTON (WP).—At Washington's Shepherd Elementary School the "minority children," like Bernadette, are white. But, according to a study by a researcher at Catholic University, their experiences and feelings are similar in many ways to those of non-white minority children of different races and ethnic groups elsewhere in the United States.

In general, the study reports, the whites at Shepherd, who make up about 20 per cent of the school's enrollment, admire blacks and seek to be accepted by them. Many adopt black speech patterns and mannerisms while playing, it says, and a few even tell their parents they wish they were black because they've learned in school that "Blacks *do the good things.*" *Some also* are uncertain, the report says, which of their friends are black and which are white.

As they grow older, many of the white children become less comfortable, the report says, as members of a minority group. In fourth or fifth grade, when they reach ages 10 or 11, many of the whites complain that they are taunted because of their race, although they continue to have black friends.

The 117-page study, based on questionnaires and interviews with parents and children, was written by Barbara Libarkin.

Mrs. Libarkin, who is white, has had four children at Shepherd over the past eight years.

The study is one of the first ever done about white children in a majority-black school. Around the United States there were 1.3 million such children in 1972, the most recent year for which data are available. This amounts to about 4 per cent of all whites in public schools.

"Nobody really considered that (having minority whites) would be a variant of integration until very recently," said Gary Orfield, a research associate at the Brookings Institution. "By and large, these are the kids who don't get very much attention."

Mr. Orfield warned that it is risky to generalize from a case study, but he said that what Mrs Libarkin reports at Shepherd seems to be the exact obverse of a lot of things that happen in suburban districts (where blacks are in the minority). You see some of the very same problems in the reverse way . . . the white kids are dealt with like any other kid that's there, and they are supposed to adapt to the school. It's not perceived that they are a minority whose self-concept has to be dealt with, too.

"Integration isn't something that just happens in this society," he added. "It has to be dealt with self-consciously."

White and black parents who were interviewed about Mrs. Libarkin's study generally agreed with her findings, with some of the blacks noticing more racial separation at the school than the whites do.

"I see the racial consciousness increase as the children get older," said Enid Herndon, the president of Shepherd Parent-Teacher Association, who is black. "When my son was in kindergarten, he was just as likely to play with whites as with blacks. Now he's in second grade, and he doesn't have any white friends . . . the children tend to become friendly where the parents can relate to one another, and the black parents know each other better."

"It's the standard majority-minority situation," said Beverly Clemmer, a white parent. "I *think the blacks* are being better now than the whites have historically been to them. But it's hard sometimes for the white child who is in the situation."

Some of the black parents said they were distressed that white children felt excluded, but others were less sympathetic.

"Black people have been going through this for a long time," said Diane Robinson. "It was fairly amusing for me to hear white parents talking (about their children being left out) . . . I would expect that many things at the school would be directed toward blackness, and that's something they should have expected, too. They chose to come here themselves."

She added, however, that whites and blacks generally work well together at Shepherd.

"There's no real problem," she said. "At least I don't perceive it as a problem."

According to Mrs. Libarkin's study, most of the white parents came to the Shepherd area because it is integrated, and many were attracted by Neighbors, Inc., a pro-integration group that has been active since the mid-1950s. The blacks there are less concerned with integration than the whites are, she said.

Most of the families of both races are upper middle class professionals—with many lawyers, doctors, and senior government officials. Average income and education levels, according to census data, are about equally high for blacks and whites.

Among the children, Mrs. Libarkin said, "the white kids want to be part of what's going on, not because it's black, but because they're kids and they want to be part of the larger group . . . *It is a real change.* When I grew up, none of the white kids wanted to be like the blacks."

The black children have a "strong sense of ethnic identification," she said. "Being black is very important today, and if you are prosperous and well-educated, it is a very positive identity . . . the children who are not part of that ethnic identification feel left out and want to be part of it."

"It really requires a new mindset," she added, "to recognize that white children may have the same difficulties that black children sometimes do when they are in the minority. I didn't start with it."

A study completed last year of the white minority at Takoma Elementary School, about a mile from Shepherd, showed some of the same factors at work. That report, by Gretchen Schafft, found that there was a "division of territory" in the school with whites keeping away from poorly supervised areas and generally not taking part in after-school sports.

At Shepherd, Mrs. Libarkin said, not only are most of the students black, but so are the principal and most of the teachers. The curriculum emphasizes black history and accomplishments, with black leaders such as Martin Luther King Jr. and Malcolm X being studied as role models.

"Many (white) parents described their children's sense that there are more blacks than whites in the world," Mrs. Libarkin writes. "Noreen's mother said, 'She perceives herself as a minority. So it's only at the intellectual level that she sees blacks being discriminated against.' . . . The children incorrectly generalize based on their experience in a majority black city and almost entirely black school system."

Ancient Theater Is Uncovered in Western Greece

ATHENS, Nov. 16 (UPI).—Workers on a building site in the western Greek town of Arta have uncovered part of an ancient theater, an archaeological spokesman said yesterday.

Greek archaeologists who excavated the theater said it dates from the late 4th century B.C., the time of Alexander the Great.

The theater was not built in a natural hollow, like many ancient theaters, but was an artificial amphitheater raised on a huge mound of earth and supported by heavy retaining walls.

The semicircular stage was surrounded by tiers of limestone seats. Three rows of seats have been preserved and the bases of two staircases which divided the auditorium into three sections have also survived, Mr. Andreou said.

Behind the stage was a stone building with a tiled roof, fronted with green sandstone columns and covered in painted stucco, he said. It was used as dressing rooms and a store for stage props and machinery.

Entertainment In New York

NEW YORK, Nov. 16 (IHT).—This is how critics for The New York Times rate new films:

"Network," written by Paddy Chayevsky and directed by Sidney Lumet, is about Howard Beal (Peter Finch), one of America's most respected news commentators, who's being given the sack. Upon hearing the news, he announces to his viewing audience that he is going to commit suicide on the air. Later, he says he will apologize for the announcement. But on the air once more, he launches instead into a tirade of obscenities about America and skyrockets himself to stardom. Vincent Canby calls it "brilliantly, cruelly funny. A *topical comedy that confirms* Chayevsky as a major American satirist." His humor "is about as stern and apocalyptic as it's possible to get." The cast also includes William Holden, Faye Dunaway and Robert Duvall. "The film can be faulted with going too far and not going far enough" in its take-off of American TV and the people who watch it. But "it's also got something that very few films have these days, it's alive."

Irish Poet, English Prize

LONDON, Nov. 16 (AP).—Seamus Heaney has won the £1,000 W. H. Smith literary prize for his poems on the violent history of Ireland, "North." Heaney, 37, born in County Londonderry in Northern Ireland, lives in the Irish Republic.

Calder Show Postponed

PARIS, Nov. 16 (IHT).—The exhibition of recent sculpture by the late Alexander Calder planned by the Galerie Maeght in Paris has been postponed a week. The exhibition, which includes 46 sculptures and features Calder's illustrations for an Erskine Caldwell book, will open to the public Dec. 1.

If you've ever booked a hotel and ended up with just a room...

...it's time you stayed with us. Every Holiday Inn room comes attached to a whole string of free extras: a double bed per person, free T.V., private bathroom, swimming pool, free parking, saunas and sports facilities in many locations, transportation to and from Inns near airports... plus a lot of other *features you might not expect* from such a reasonably priced first-class hotel.

There are over 1700 Holiday Inns in the world and over 50 in Europe: Austria, Belgium (5 hotels), France (7), Gibraltar, Italy (3), Luxembourg, Monaco, Netherlands (3), Poland, Spain, Sweden, Switzerland (2), United Kingdom (11), West Germany (14)

For fast reservations, phone your travel agent, your local Holiday Inn hotel or one of these numbers: Brussels, Tel.: 720.60.77 - Eindhoven, Tel.: 44.42.33 - Frankfurt, Tel.: 295-065 Johannesburg, Tel.: 21.20.11 - London, Tel.: 722-7755 - Paris, Tel.: 686.50.87 Rome, Tel.: 23.31.90 - Stockholm, Tel.: 99.02.20 - Zurich, Tel.: 710.40.46

AMSTERDAM, RIJKSMUSEUM

Rembrandt country is Rabobank country.

"Trust" could well be an apt title for the portrait that Rembrandt made of himself and his wife in 1636.

Although it is only a small, seemingly simple drawing, Rembrandt succeeds in expressing something of the essence of human relations: confidence and trust.

Centrale Rabobank.
Dutch Masters in Banking.
Telex Holland 40200.

Confidence and trust are very much the elements that made Centrale Rabobank the big bank it is to-day. With its traditional agricultural background, Centrale Rabobank heads a co-operative banking group with well over 3100 offices in Holland and a balance sheet total of 46,1 billion hard Dutch guilders (about US $ 17 billion).

This makes Rabobank not just one of the largest banks in Holland, but also the bank with deep roots in almost all sectors of Dutch economic life.

We are now ready to expand worldwide with a full range of commercial and investment banking services. And we like to do it in the good Dutch tradition of solidity, with an eye for detail and with imagination.

7607010

M Introduces o Small Computers

LANTA, Nov. 16 (Reuters). ternational Business Ma- es Corp. today announced new, small computers, priced $10,000 to $100,000.

M said the series/1 model 3 model 5 are being offered purchase-only basis.

M did not describe the new hines as "mini-computers," they fall in the category as ted by most industry ana- s.

B. Rogers jr., president of s general systems division, "Series/1 represents a major in IBM's continuing efforts rovide small systems to solve problems of both small and e-scale data processing opera- s."

Oil Firms Reach Pact In Malaysia

Share in Production Of Oil, Gas Agreed

KUALA LUMPUR, Malaysia, Nov. 16 (Reuters).—Four foreign oil companies and Malaysia's national oil company Petronas have reached full agreement, after 18 months of negotiations, on terms for oil and gas production-sharing in Malaysia, Prime Minister Datuk Hussein Onn said today.

The companies are Exxon Production Malaysia Inc., Sarawak Shell Berhad, Sabah Shell Petroleum Co., and Pecten Malaysia Co.

Mr. Datuk Hussein, in a special announcement to the lower house of Parliament, said final details of the agreement were being drawn up by the companies and Petronas, and he hoped contracts could be formally signed on Nov. 30.

Speaking of the implications of the agreement, Mr. Datuk Hussein said Malaysia could look forward to rapid development of its oil and gas resources with all the benefits that these could bring to the nation.

Two months ago he told the oil companies that they must reach agreement by Nov. 15 or face a government take-over with compensation.

Search Suspended

Shell and Exxon suspended oil exploration when they started negotiations with Petronas, but they continued production of crude oil—165,000 barrels a day by Shell off the Sarawak coast and 5,000 barrels daily by Exxon off the Sabah coast.

Malaysian officials said that in terms of barrels, the oil companies had obtained a more favorable production-sharing arrangement with Petronas than that between foreign oil firms and Pertamina, Indonesia's national oil company.

Exxon announced today that it would resume oil exploration and development activities in Malaysia within six months of signing the production-sharing agreement with Petronas.

A company statement said it would take Exxon about that time to reassemble its work force, remobilize contractors and resume operations in the country.

Japan Bank's Action Seen Curb to Loans

TOKYO, Nov. 16 (AP-DJ).—The margin requirements that the Bank of Japan can now impose on foreign liabilities and currency deposits at foreign exchange banks will be used to keep banks from abusing easier dollar-based lending rules.

That appears to be the consensus among Japanese bankers concerning the new measures, officially announced yesterday.

Perhaps more importantly, the change is a basic part of the Ministry of Finance's scheme to promote financing in yen, they said. The ministry has been considering various measures on this line since the Japanese currency began to strengthen against the dollar last April.

The Bank of Japan announced today that margin requirements have been authorized for liabilities that foreign exchange banks in Japan have with nonresidents, except those involving the simple guarantee of loans. The new rules will also apply to foreign currency deposits by residents at the banks.

These margin requirements can be imposed at any time by the central bank's policy board, an official said. It is unlikely they will be applied any time in the near future, however, given the current highly liquid condition of the Tokyo money market, he said.

Bankers note that it is easier to announce policies such as the margin requirements when market conditions are relatively stable and liquidity high. In recent months the Ministry of Finance also has introduced incentives for yen-based payments of export and import bills. The object is to continue decreasing Japanese banks' short-term dollar borrowings while increasing yen financing.

It is estimated that Japanese banks have net liabilities of $15 billion in U.S. and Euromarket borrowings. Authorties are still concerned about avoiding the credit crunch that occurred after the Herstatt bank in West Germany collapsed, leaving Japanese banks exposed with large short-term liabilities. After the German bank failure, Japanese authorities banned foreign exchange banks here from making medium and long-term dollar loans overseas.

Banks have argued over the past year that their own conditions and those in the Euro-dollar market warranted a loosening of the curbs. It is estimated, however, that even under the new policy of allowing medium and long-term foreign-currency loans that the amount allowed will be minimal.

The Ministry of Finance will approve individual bank requests for such lending, but it is not expected to aggregate much more than about $200 million, a banker estimated.

Bankers said the measure is in part a sign that the Bank of Japan does not want to ease its monetary policies, despite criticism that its current policy tends to hold back the pace of economic recovery.

FINANCIAL NEWS AND NOTES

U.S. Firm Offers TV Plant to Sony

Westinghouse Electric Corp. has offered to sell its color television tube plant at Horseheads, N.Y., to Sony Corp. The Japanese firm says it is studying the offer but has not yet made any firm decision. Sony is manufacturing color TV tubes and assembling color TV sets at its own plant in San Diego. Meanwhile, Sony's U.S. subsidiary says it will vigorously defend a federal court charge by Universal City Studios and Walt Disney Productions that the sale, distribution and use of Sony's Betamax videocassette player/recorder violates the federal copyright law. Sony describes the Betamax as a "time-shift" machine. It can record a program on one channel while a different program is being watched, or it can record a program while the owner is away from home. Sony takes the position that the Betamax merely enlarges the audience for which television programs are intended and does not hurt any segment of the entertainment industry.

VW May Build Parts Plant in U.S.

Volkswagenwerk has taken initial steps that may lead to the construction of a multimillion-dollar parts plant adjacent to its new U.S. car-assembly facility near New Station, Pa. Last month, VW officials disclosed they were "thinking about" buying or building a big metal parts stamping plant. Since then, approval has been given by the parent company for the development of plans to construct such a plant. A final decision on the project has not yet been made by VW's U.S. officials and formal approval for financing such a venture has not yet been sought or granted by the parent company's ruling supervisory board in West Germany. Industry sources suggested such a project could cost up to $100 million. Stamping plants, along with engine plants, are among the more costly parts-making facilities needed for auto production.

MIM Outlook Is Called Uncertain

MIM Holdings Ltd. chairman Sir James Foots says he does not have the confidence to forecast this year's earnings on the basis of results for the first quarter, which showed earnings of $A11.3 million (about $13.44 million). In the year ended June 30, the Australian mining company's earnings fell to $A22.8 million from $A51.1 million the previous year, and $A91.6 million the year before that. "This three-year downtrend in earnings has been caused mainly by lower prices for the two major products, copper and lead, and increasing production and non-operating costs," Sir James says.

But Rate Slower Than a Year Ago

Eurocurrency Market Growth Quickens

BASEL, Nov. 16 (AP-DJ).—The narrowly defined Eurocurrency market grew at a faster pace in the second quarter than during the first three months of the year, but this expansion was slower than a year earlier, the Bank for International Settlements (BIS) said today.

Noting that the pickup in the second quarter was a seasonal one, the BIS said that European banks' external assets and liabilities in foreign currency grew by about $5.5 billion each, compared with rises of $3.1 billion and $1.6 billion, respectively, in the first quarter. For the first half, the increase in gross external assets was 3 per cent, or $8.5 billion, compared with 8 per cent, or $17.2 billion, a year earlier.

The BIS said that a contraction of interbank positions in the European reporting area was responsible for the slower growth this year. It said this contraction was in part linked with a renewed crisis of confidence in the Italian lira. This led to a reduction of Italian banks' positions on the interbank market.

But the volume of lending by European banks outside their own area continued to be high, the BIS said. Consequently, the slowdown in the growth of the market's net size, which excludes interbank positions among other things, was much less pronounced, it said. The estimated growth for the second quarter in the net size was about $8 billion, compared with $6 billion in both the previous quarter and the second quarter of 1975.

Reporting banks' direct liabilities to the United States increased by $2.4 billion while U.S. sources "will have accounted for a significant part" of the $2.7-billion growth in the banks' liabilities vis-à-vis offshore banking centers, notably those in the Caribbean, the BIS said.

The oil exporters accounted for about $3 billion, the largest quarterly increase since the 1975 first quarter, and a sharp reversal from the first quarter of 1976, when these countries' balances with European banks showed a small decline.

The BIS said that there was no supply of funds from the European reporting area. An inflow of non-bank funds was more than offset by a withdrawal of central funds and by reduced placements of commercial banks in the market. Reflecting weaker payments positions, deposits by other Western developed countries contracted by $1.3 billion. There was very little inflow of new funds from Eastern Europe, the BIS said.

The emphasis of new lending continued to be on countries outside the reporting European area and claims on these and on other Western developed nations rose by $1.5 billion. Oil exporters accounted for about $0.9 billion, and non-oil developing countries for about $1.4 billion in new funds. Credits to Eastern Europe rose by about $0.7 billion—41 per cent above their level of a year earlier, the BIS said.

The BIS said that on the broad measure of international lending—claims in both domestic and foreign currency of banks in Europe, the United States, Canada and Japan—new loans to non-oil developing countries totaled about $4.5 billion, of which about 60 per cent went to Brazil and Mexico. Loans to Eastern Europe were estimated to have increased by $1.6 billion and those to oil exporters by about $1.8 billion.

East Bloc Begins Borrowing From Oil-Exporting Nations

GENEVA, Nov. 16 (AP-DJ).—The Soviet Union and East European countries, which have been borrowing heavily from Western commercial banks to finance payments deficits, are establishing direct links with oil-exporting nations to tap their surplus revenues, according to the United Nations Economic Commission for Europe (ECE).

These efforts to diversify the sources of borrowing are "considerable," the ECE said in its annual economic bulletin published today.

The ECE said that the East Europeans have begun borrowing directly from the oil exporters for the construction of special enterprises. These credits will be repaid by the future produce of these enterprises. They have also begun participating in investment projects (including deliveries of machinery) in oil-producing countries for which they are paid partly in cash. "Already, several billion dollars are involved in such deals," the ECE said.

Last year, net lending by Western banks to the Soviet Union and East European nations increased by $8.7 billion, and during the first quarter this year by another $2.6 billion (an annual rate of $10.4 billion), the ECE said. At the end of March, Western banks' net claims vis-à-vis Eastern Europe and the Soviet Union reached almost $18 billion.

The UN group noted that though Western banks welcomed this surge in loan demand during 1974 and 1975, this year they have become reluctant to continue lending at such a scale. The banks have indicated that they are dissatisfied with the lack of information needed to assess the creditworthiness of these countries. Still, "demand for loans has so far largely been net," the ECE said.

It said that borrowing requirements of these countries in the immediate future will depend mainly on the growth of their exports and on their terms of trade, both of which are reported to be recovering since the early months of 1976. But the scope for these countries limiting their imports is not very large, the ECE said.

W. German Prices Fall

WIESBADEN, West Germany, Nov. 16 (Reuters).—The West German wholesale price index fell 0.1 per cent in October to 161.3 after a 0.2-per-cent fall in Septemeber, the Federal Statistics Office said today. The year-on-year rise was 5.6 per cent compared with 6.1 per cent in September. The index is based on 1962 equaling 100.

Iran Seeks to Renegotiate Terms of $500-Million Loan

By William F. Low

AMSTERDAM, Nov. 16 (IHT).—Declining interest-rate margins in the Eurocurrency market are likely to lead to the renegotiation of a $500-million loan to Iran. Informed banking sources report the Iranians are keen to obtain a premium lower than that initially negotiated. The weekly newsletter International Insider reports that the Iranian authorities now maintain that the country should be treated on an equal basis as a borrower with Venezuela. Last month, Venezuela successfully borrowed $1 billion for seven years on a spread above the London Eurodollar rate (LIBOR) of 1 1/8 points.

Negotiations for the Iran loan began last May when a small group of international banks agreed to lend $500 million for seven years on a margin of 1 3/8 points. Since then, conditions on the medium-term Euromarket have moved in favor of borrowers' and spreads have fallen.

It is not certain whether potential lenders—mainly U.S. banks—will go along with the Iranian request for a smaller spread. Says one bank involved in the deal, "It is not our fault the loan has not been signed by now. So the Iranians should stick to the original terms."

Signing of the loan has been delayed because of legal problems on the Iranian side. But these apparently have been resolved and signing was scheduled for the near future. Now the fate of the loan is in the balance.

Complicating the situation is a proposed financing for another Iranian borrower which seems certain to obtain a margin over LIBOR of less than 1 3/8 points.

The Industrial Credit Bank is inviting offers from Eurobanks for a credit of $150 million over seven years. One bank has proposed a margin of 1 1/4 points and there are unconfirmed rumors that another bank is incorporating a spread of 1 1/8 points in its bid.

U.S. Industrial Output Falls for Second Month

By Edwin L. Dale Jr.

WASHINGTON, Nov. 16 (NYT).—Industrial production, a major indicator of the performance of the economy, declined in October for the second consecutive month, the Federal Reserve Board reported late yesterday.

The drop was estimated to be 0.5 per cent from September, which in turn was revised downward. The report said "somewhat less than one-third" of the October decline was attributable to the strike at Ford Motor and other strikes, indicating that the rest of the drop reflected reduced demand for the output of the nation's factories, mines and utilities.

The report is bound to increase discussion of measures that might be taken by the incoming Carter administration to stimulate the economy, although it is unlikely in itself to lead to a decision to do so. Mr. Carter has said he wants to look at the development of the economy for the fourth quarter as a whole before making a decision on a tax cut or other stimulus.

Following a steep decline during the 1974-75 recession period, industrial production in the spring of 1975 began a sustained rise that lasted until August 1976. Then, contrary to nearly all forecasts, it suddenly dipped again in September and October.

Most economists continue to forecast a resumption of the upward trends for industrial production and other indicators, but doubts have begun to emerge.

The revision for September converted a preliminary estimate of no change in production to a decline of 0.2 per cent. The figure for the drop in October is still preliminary.

Declines in production were widespread, including basic materials such as steel, chemicals, paper and textiles and finished products such as clothing, household goods and business equipment.

Prices, Trade Rise on NYSE

NEW YORK, Nov. 16 (IHT).—The stock market, in an apparently conciliatory mood toward the incoming presidency of Jimmy Carter, closed generally higher over a broad front in one of the heaviest trading sessions since the national elections two weeks ago.

On the New York Stock Exchange, where activity had been sluggish since the Carter victory, 21.02 million shares changed hands today, up from 16.7 million yesterday.

Analysts said worries over Mr. Carter's presumed policy of excessive fiscal spending, a major factor in the post-election downturn, have settled down, although they ascribed part of today's rally to technical factors.

The Dow Jones industrial average, coming under heavy pressure late in the day, gave up more than an 8-point gain to close down 0.08 at 935.34.

Advances outnumbered declines by about 890 to 540.

Among the computer issues, IBM, which introduced two new small computers today, was off 1 at 263 1/2. But Digital Equipment rose 2 points to 51 1/4, while Hewlett-Packard was up 1 1/2 at 83 3/4.

One analyst said other computer stocks were not hurt by IBM's entry into the mini-computer business as it had been expected.

Auto stocks were also higher. General Motors rose 3/8 at 68 5/8 and Chrysler shares, still aided by the Army's award last week to Chrysler of the XM-1 tank project, were up 1/4 at 18 7/8.

Inland Steel rose 1 to 47. The company said it found a "considerable deposit" of high volatile coal in Illinois.

ENDESA - CHILE

220 KV NORTH TRANSMISSION LINE PROJECT

PREQUALIFICATION OF CHILEAN AND FOREIGN TENDERERS

The Empresa Nacional de Electricidad S.A. (ENDESA) intends to invite tenders for the construction and equipment supply of the 220 kv north transmission line project at the beginning of 1977.

The project is located along approximately 630 km north of Santiago, Chile.

The following should be the intended contracts:

LN-1: Supply and construction of the Cerro Navia-Pan de Azucar 220 kv transmission line (Santiago-La Serena, approx. 430 km), double circuit, including Cerro Navia control building and switchyard civil works, and equipment installation.

LN-2: Supply and construction of the Pan de Azucar-Maitencillo 220 kv transmission line (La Serena-Vallenar, approx. 200 km) single circuit, including Pan de Azucar switchyard civil works, Maitencillo switchyard and control building civil works, equipment installation and supply of the equipment for switchyards and control buildings at Cerro Navia, Pan de Azucar and Maitencillo.

The contractors will also be required to finance the cost of designs, equipment, materials, manufactures and works included in the corresponding contract.

Foreign contractors must participate for the construction works in joint ventures with technical and managerial participation of Chilean contractors, registered in ENDESA'S contractors register. The project must be completed during the first half of 1980. Specifications and drawings will be given only to those who will submit the complete prequalification information required with supporting evidence of having successfully completed works of a similar nature and can demonstrate that they have the resources, experience and organization to carry out the works.

Prequalifications requirements are available from November 22nd, 1976, on application to:

Mr. Luis Court, Casilla 1392, Santiago de Chile.
Price: 600 Chilean Pesos (U.S. $40).

Prequalification requirements may be obtained by post (send money order) or at Santa Rosa 76, Santiago de Chile, from 9 a.m. to 11:30 a.m. Monday to Friday.

Deadline for receiving the completed questionnaire is January 10th, 1977.

This announcement appears as a matter of record.

$32,000,000

Project Financing

has been arranged by

Parker Drilling Company Limited
(a Bahamian corporation)

a wholly-owned subsidiary of

Parker Drilling Company

to finance a four year drilling contract with the national oil company of Algeria

Sonatrach

Société Nationale pour la Recherche, la Production, le Transport, la Transformation et la Commercialisation des Hydrocarbures.

Financing provided by

Manufacturers Hanover Trust Company

The undersigned acted as financial advisor to Parker Drilling Company and Parker Drilling Company Limited and assisted in negotiations regarding the Project Financing.

Dye Price Suit Accord Offered

WASHINGTON, Nov. 16 (Reuters).—The Justice Department filed a proposed consent judgment today to settle the price-fixing suit it brought in 1974 against nine major dye manufacturers.

The agreement, if approved by the court, would prohibit the defendant companies from entering into agreements to fix dye prices or allocate customers or markets.

The firms named in the suit were Du Pont, Allied Chemical, American Cyanamid, Ciba-Geigy, GAF Corp., BASF-Wyandotte Corp., American Color & Chemical Corp., Verona Corp. and Crompton & Knowles Corp.

On the same day that the civil action was brought in 1974 a grand jury filed criminal charges against the nine defendants. All pleaded no contest to the criminal charges and were fined a total of $395,500.

Sales figures are unofficial

Unless otherwise noted, rates of dividends in the fore going table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex distribution

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only

Currency Rates

November 16, 1976

By reading across this table of yesterday's closing inter-bank foreign exchange rates, one can find the value of the major currencies in the national currencies of each of the following financial centers. These rates do not take onto account bank service charges.

	$	£	DM	FF	L.It.	Gldr.	BF com.	SwissF.	Dan.Kr.

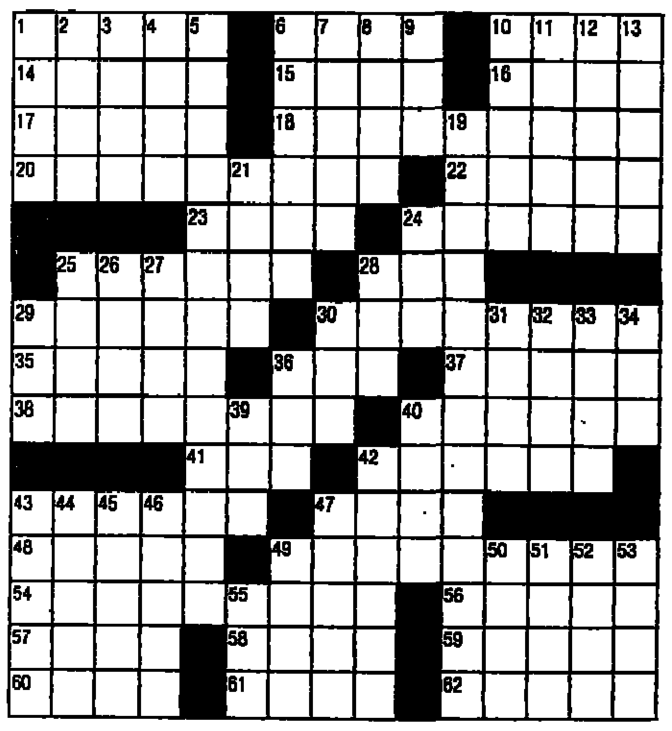
CORUM

Guess nobody ever dreamed that this authentic 1892 gold coin would celebrate the American Bicentennial in a famous watch!

We have created a special, limited issue of our precious patented coin watch, with ultra-thin movement and diamonds set on the dial.
You will always treasure this family heirloom.



Patent.

CORUM
Fine hand-made watches

At the finest jewellers. For a brochure write to CORUM, 2301 La Chaux-de-Fonds, Switzerland.

BOOKS

THE ARABS, ISRAELIS AND KISSINGER

By Edward R. F. Sheehan. T. Y. Crowell. 288 pp.

Reviewed by Terence Smith

IT has become fashionable of late to deride the significance of the interim agreements negotiated by Henry Kissinger in the Middle East after the October 1973 Arab-Israeli war. The pacts are frequently dismissed these days as peripheral rearrangements of the status quo ante in that troubled area. While it is true that the two Sinai pacts and the disengagement on the Golan Heights left the central issues in the Middle East conflict unresolved, it is also true that they were major accomplishments carried out in the face of long odds.

The pacts are highly sophisticated, open-ended armistice agreements that have secured the fragile cease-fire in that area for three full years. The agreements also deserve a place in the annals of diplomacy as the first —and at the moment only—tangible result of that unique, wasteful, ego-building diplomatic exercise known as the Kissinger shuttle. (It is to diplomacy what the Ali shuffle is to boxing: mostly showmanship, but it wins points.)

Mr. Sheehan, in this thoroughly admirable book, provides the first serious, detailed account of Mr. Kissinger's Middle East shuttles and the pacts they produced. It is a substantive, well reported, perceptive look at Mr. Kissinger's encounter with the Middle East —a bruising affair that left its mark on both the man and the area.

It is also good reading: a riveting, deftly written narrative peopled by flesh-and-blood figures with recognizable names like Meir, Sadat, Assad, Dayan, Rabin and Faisal. They come across as personalities rather than public figures and greatly enrich the book in the process.

Mr. Sheehan's own slant is evident throughout. The great bulk of his own experience as a foreign correspondent and Foreign Service officer abroad has been in the Arab world and most of his sources are Arab. (His voluminous acknowledgments, which take up seven closely printed pages, include many more Arabs and Americans than Israelis.)

As a result, the book is far friendlier to the Arab view than to the Israeli. His portraits of the Arab leaders, for instance, are consistently sympathetic, while those of the Israelis are cool, if not hostile. Israeli readers are not going to like it.

With that said, Mr. Sheehan's analysis of the political and military stakes involved in the Middle East is generally perceptive and fair-minded. He knows his subject well. The book is not overtly partisan, but the author has a point of view that comes through in the first pages.

The account traces the separate Kissinger shuttles a[...] Middle Eastern capitals th[...] to the 1973 Geneva confe[...] and subsequent disengag[...] agreements on the Sinai an[...] lan fronts. Mr. Sheehan, [...] research fellow at Harvar[...] companied the Kissinger pa[...] at least one of the shuttle[...] then returned to the area to [...] Arab and Israeli sources [...] fuller account of the discu[...]

When lengthy excerpts [...] the book were first pub[...] several months ago in F[...] Policy magazine, the inclus[...] long verbatim quotes from [...] Kissinger's closed-door se[...] with Israeli leaders caused a [...] furor. The secretary prono[...] himself "thunderstruck" b[...] leak, and a senior and [...] regarded aide at the Stat[...] partment was later off[...] reprimanded for having rea[...] passages of the transcripts [...] Sheehan, who evidently [...] copious notes.

The "thunderstruck" Mr. [...] singer was being disingenuo[...] the very least. It later em[...] that he had himself instr[...] the aide to give Mr. Sheeha[...] help he needed to prepar[...] account. Even that shallow [...] nanigan provides a rev[...] glimpse of the Kissinger [...] nique in action.

The book, then, is an as[...] if not actually authorized [...] count and, not surprisingly [...] Kissinger comes off very [...] Mr. Sheehan portrays him [...] gifted, insightful operator [...] saw a rare opportunity i[...] October war to improve [...] standing of the United Sta[...] the Middle East and dim[...] that of the Soviet Union.

But the author is not a[...] alloyed admirer of this je[...] Metternich. He faults him s[...] ly for his failure to attem[...] overall solution in the M[...] East and even more so fo[...] "myopic neglect of that ele[...] tary problem—the Palest[...] people."

Mr. Sheehan also appre[...] the special irony in the fa[...] was the first Jewish secreta[...] state who constructed what [...] author calls "the first coh[...] Arab policy for the United St[...] through his close contacts [...] Presidents Sadat of Egypt [...] Assad of Syria.

The book closes with a w[...] ing and an appeal. The U[...] States has "until the middl[...] end of 1977," in Mr. Sheel[...] view, to launch a new M[...] East initiative or face disas[...] consequences. He expects [...] to include a collapse of the S[...] regime in Egypt, a new war [...] oil embargo and possible b[...] ruptcy for Israel.

The only alternative, in [...] Sheehan's opinion, is a h[...] new negotiation leading to [...] overall Middle East solution [...] ed on an Israeli withdrawa[...] nearly the 1967 boundaries [...] the creation of a separate [...] estinian state on the West B[...] and in the Gaza Strip. An [...] bitious formula, and not one [...] ly to be put into effect by [...] kind of hectic, one-man d[...] macy described so ably in [...] book.

Solution to Previous Puzzle

BRIDGE— *By Alan Trusc[...]*

Perhaps the most freakish deal played in a recent team event is the one shown in the diagram. It is an excellent illustration of the guiding principle of bidding freak deals: underbid, but then keep bidding. The important thing is to play the hand, and the exact level is less important. Psychology is more important than technique. The opponents must be left guessing how strong the hand really is.

West was on the right track up to a point. Looking at an incredible hand with 12 guaranteed tricks and some hope of 13, he bid modestly to start with. After North's weak two-bid and South's conventional forcing response, he simply jumped to four hearts. The chance that this would end the auction was negligible, and even if this had happened, East-West would still have beaten the par result, which is for South to play seven spades doubled down two tricks.

Naturally enough, South kept bidding, and eventually introduced his spade suit at the level of six. West should now have persevered with seven hearts, with the odds enormously in his favor: playing the hand could result in a small loss or an enormous profit, while defending could lead to a big loss or a small profit.

Perhaps East should have [...] on in any event, since he [...] seven cards in his partner's s[...] including one significant ho[...] and nothing of value in def[...] If he had, South would have [...] to consider taking out insur[...] by saving at the seven-level.

West's big profit had alr[...] disappeared, and his hand o[...] lifetime turned into a disa[...] when he misguessed the def[...] and tried to cash two h[...] tricks. In view of East's pass[...] six clubs, he feared that So[...] was void in that suit.

The declarer happily ru[...] the second heart lead, d[...] trumps and claimed the slam.

Hall of Fame Oversights, as Viewed by Studs Lonigan's Creator

T. Farrell

By Red Smith

NEW YORK, Nov. 16 (NYT). —From now until February, sportswriters in every city in the major leagues will be favored with campaign literature from volunteers promoting various candidates for the Baseball Hall of Fame. It is almost always baseball, hardly ever football—which has shrines for college players and for professionals—or basketball or golf. Maybe that is because most of the electioneers are getting a trifle long in the tooth and were baseball fans in their youth because baseball was by far the most popular spectator sport then.

One such fan is James T. (Studs Lonigan) Farrell, who is nobody's campaign manager but does enjoy writing and talking baseball and remembering the players he watched when he was growing up in Chicago. Now and then, when he has time to kill between lectures on literature at Harvard or Notre Dame, he'll knock out something like this:

"Buck Weaver [one of the eight Chicago players who sold out the 1919 World Series] said to me that they had five great players on their team playing every day. He meant Happy Felsch, himself, Eddie Collins, Joe Jackson and Ray Schalk. Felsch was, if any contemporary deserved the honor, as good a center fielder as Tris Speaker. He was in Speaker's class defensively and he could hit also, but not as well as Speaker.

"Weaver was as beautiful a third baseman as anybody could have wanted to see. And if they had not been disbarred and had continued their careers, Eddie Cicotte and Lefty Williams would surely be in the Hall of Fame. Ray Schalk told me Cicotte had a fast ball at 35. Eddie Collins was high on Williams, a great control pitcher. His salary was $2,800.

"There could be no doubt about Hal Chase. He was the most sensational fielder I ever saw play. Schalk told me the two men from whom he learned were Eddie Collins and Chase. Chase, left-handed all the way, could play second better than a lot of right-handed second basemen.

"The only first basemen I'd class with Chase were George Sisler and Bill Terry. Sisler was so perfect he was dull to watch. He did everything right.

"Since they put the Tinker-to-Evers-to-Chance combination in the Hall of Fame, I think they should complete the famous Red Sox outfield by putting in Duffy Lewis along with Speaker and Harry Hooper. Lewis hit as well as Hooper or better, unless he was batting against Red Faber, against whom Ty Cobb hit about .226.

"Also, Connie Mack's $100,000 infield. Jack Barry was one of the best shortstops of his time. Red Faber would class him and Roger Peckinpaugh only with Phil Rizzuto and Pee Wee Reese, especially Rizzuto. Barry couldn't hit the weight of most pro football players, unless he was batting against Red Faber.

"Stuffy McInnes was one of the best in his time, finished with a batting average over .300 and just below Chase and Sisler defensively. Paul Waner considered Stuffy one of the best around, and Stuffy was at the end of his career when he played with Waner in Pittsburgh.

"Joe would have made it if his arm hadn't gone on him at about 25 or 26. He was something. Wahoo Sam Crawford wrote me, saying how much he agreed with my opinion of Wood. Schalk said he thought Wood belonged in the Hall of Fame.

"Tommy Holmes once remarked to me that the most unrecognized of the really great baseball players was Eddie Collins. He usually led his team in batting and in at least 15 seasons when he played in more than 100 games he batted over .300. He made more than 3,000 hits, had a 25-year average of about .333 and could do everything. Clarence Rowland said that, besides being a star, Collins was a team player. His honesty was a contribution to baseball that is unrecognized. They simply knew he was not for the fix in 1919.

Key Player

"He was probably the player most disliked by the eight called Black Sox. There were stories that they wouldn't even throw the ball to him in practice but I can't remember ever seeing that. He was the key player on two great teams, Athletics and White Sox.

"It seems Lefty O'Doul didn't have enough seasons as a hitter to qualify for Cooperstown—he started as a pitcher—but it is an understatement to say he knew how to hit a baseball. Another who would have made it if his arm hadn't gone too soon was Jack Coombs. He could win more games than Eddie Plank or Chief Bender until his arm went kerflooie. Nap Rucker is at least a borderline case. And Bobby Veach has been forgotten. Over 14 years he batted .310.

"Addie Joss would have gone down as one of the greatest of all pichers if he hadn't died when he was reaching a peak. Joe Gordon ought to be at least a borderline case. Or do you think he belongs in the acrobats' Hall of Fame? [The Yankees' second baseman was proficient as a tumbler.] I would say the same for Larry Doyle and Jake Daubert.

"Clark Griffith thought Muddy Ruel ought to be in the Hall of Fame. I never saw Johnny Cling but he was supposed to have been something. And Jimmy Archer was anything but negligible. You should have heard Casey Stengel talk about Archer and his squat throw. Ed Ruelbach was a hell of a pitcher.

"If Heinie Zimmerman had played up to his great natural ability longer, he would be one. He was dropper out of baseball for association with gamblers, according to Tommy Holmes. Jimmy Dykes is as eligible as Rabbit Maranville. Bullet Joe Bush was as good as some pitchers who are in. Carl Mays was, too, but he was one of the meanest. Earl Averill thinks Luke Sewell belongs.

"Do you use an electric typewriter? This is the second time in my life that I have?"

A reader would have bet it was the first.

Keep Lead in NFC East

owboys Hold Off Bills

, Texas, Nov. 16 (UPI). Staubach, bothered all withering Buffalo blitz, with his favorite re- ver Pearson, to score a and set up a fourth- eld goal last night that Dallas to hold off the 10.

story was the ninth of for the Cowboys and it ed their one-game lead St. Louis Cardinals in East.

s decision did not come the Bills' improved de- fense harassed Staubach into one of his poorest games of the year and shut down the Dallas running attack.

The Cowboys' chief offensive threat was Staubach-to-Pearson, a combination that was used nine times for 135 yards. The two most important catches of the night for Pearson came on back-to-back completions of 40 and 21 yards seconds before the end of the first half.

Herrera's Kick

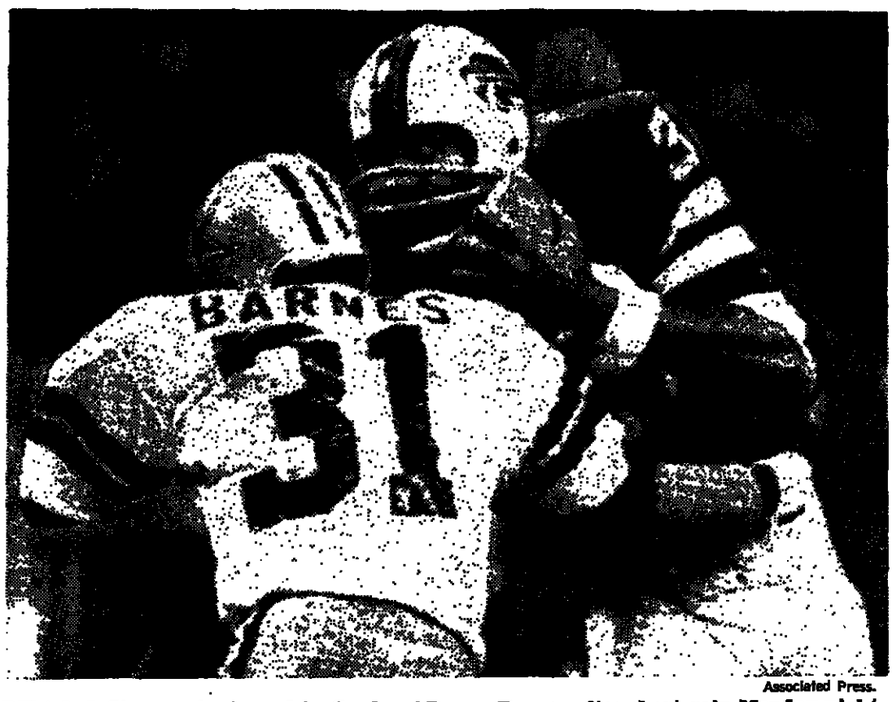
The 21-yarder resulted in a touchdown that gave Dallas a 14-7 lead, and the Cowboys could not improve on that advantage until Efren Herrera kicked a 43-yard field goal with 11:37 left in the game. A 16-yard Staubach-to-Pearson pass set up that field goal.

Buffalo cut the score to 17-10 when George Jakawenko kicked a 22-yard field goal with 1:57 remaining in the game. But quarterback Gary Marangi threw an interception when the Bills got their hands on the ball with 25 seconds left and they thus suffered their sixth loss in a row and fell to 2-8.

Dallas, after making only one first down in the first period, scored early in the second period on a two-yard run by Preston Pearson. But Buffalo capitalized on a fumbled punt moments later and tied the game on a 27-yard pass from Gary Marangi to Reuben Gant.

Staubach, who had suffered an attack of flu earlier in the week, had hit only 4 of his first 12 passes before he and Pearson combined for their two key plays at the end of the first half.

Missed Chance



With less than 30 seconds left in the first half, Buffalo missed an excellent opportunity to take the lead when wide receiver Bob Chandler failed to hold a Marangi pass that would have resulted in a 65-yard touchdown play.

The Bills punted on the next play and Dallas took over at its 44 with 25 seconds remaining. Instead of running out the clock, Staubach threw deep to Pearson across the middle for 40 yards to the Bills' 21. Then he lobbed the ball over Buffalo safety Doug Jones and Pearson caught it four yards deep in the end zone for the go-ahead score.

Dallas constantly threatened to break open the game in the third period but was stopped by a series of controversial penalties.

The Cowboys limited Marangi to only one completion in seven attempts during the third period and trapped him twice for 16 yards in losses.

Staubach completed 15-of-34 passes for 202 yards.

Associated Press.

Bills' O. J. Simpson is stopped by Cowboys' Benny Barnes after short gain Monday night.

ozelle Testifies in NFL Suit o Halt Legal Sports Betting

ILMINGTON, Del., Nov. 16 (AP).—If legal sports gambecomes widespread it could make fans suspicious of play and ruin the image of pro sports, National Football e Commissioner Pete Rozelle said yesterday.

ozelle was the first witness at the trial of an NFL lawsuit it sports betting in Delaware, the first state in the to legalize such wagering through a state lottery. The has attracted the attention of other states looking for de sources.

ozelle said that legal gambling on pro football could family groups from stadiums and lead to fans' booing teams if they felt a game's outcome did not match their

e also said that widespread legal gambling would place nous pressures on his league and could make fans sus- as of every play if it had an effect on the margin of y, or point spread.

he NFL has filed suit against Delaware's scoreboard lot- seeking damages and a permanent injunction to halt all s-pool betting.

n response to questions from attorneys for the state, le acknowledged that the NFL had not taken action st either Nevada or Montana, where types of legal sports ling are offered.

e said that Nevada and Montana were isolated and posed f a threat than Delaware in the spread of legal gambling. he state denied any violation of laws and said that its f pro football games in the lottery violates no property s because the games and scores are in the public domain.

ult on 49ers-Rams Game y Decide Division Race

By William N. Wallace

YORK, Nov. 16 (NYT).— game in pro football this will be in San Francisco, he 49ers take on the Los Rams, whom they de- earlier, 16-0.

utcome will go a long ard deciding the race in ional Conference's West- vision, where the Rams half-game lead over the San Francisco has lost a row and the Rams two. contest between Wash- and St. Louis is a last- air for the Redskins, who games behind the Car- n the NFC East.

ardinals, who have lost ice, would seem to have nference wild-card play- tion in hand if they fail h Dallas for first place ivision. In the AFC, the gland Patriots are the wild-card contender and layoff fever has gripped

were about 2,000 fans at airport to greet the team return from Baltimore petting the Colts. The were astounded because never happened to them "It's nice to know some- es," said Steve Grogan, rterback.

obscure third-year pro 141 yards as Cunningham's ment.

er quarterback was lost year when Lynn Dickey Green Bay Packers sepa- shoulder against Chicago. eft Bart Starr with one quarterback. Carlos

is he? A 12th-round draft Brown has been on the or two seasons and did ood work last summer in on games when Dickey rt. The Packers will add r quarterback and have free agents in mind. Eagles are contemplating ng quarterbacks, Roman l for Mike Boryla, who had game against Cleveland. The only trouble there is a commitment to younger players by coach Dick Vermeil. He has said that the trouble with the Eagles in the past was that the coaches never had the patience to develop young quarterbacks.

Gabriel is 36, Boryla 25.

Hart's Showing

There were plenty of plaudits for Jim Hart, the St. Louis quarterback, for his showing in the second half against the Rams. "I don't think he has ever played better," said Harry Gilmer, the team's quarterback coach. Hart completed 13 of 16 pass attempts and he threw the ball away on two of the incompletions.

His line helped as the Rams never were able to touch Hart. That proved a point to Bud Goode, the noted computer analyst. An adviser to the Rams, Goode told coach Chuck Knox that Los Angeles would have to sack Hart at least twice if it was to win the game.

Goode equates a quarterback sack to be worth 2 points. If team X, for example, has four sacks and team Y has two, then 4 points should show up in the final score in favor of team X.

In World Cup Qualifying Match

English-Italian Soccer War Resurfaces Today

ROME, Nov. 16 (UPI).—War will break out between Italy and England at 2:30 p.m. tomorrow in the Olympic Stadium here with the start of the World Soccer Cup qualifying match.

Italy and England represent European teams widely considered over the hills as major soccer powers. England failed to qualify for either the 1974 World Cup or last year's European Nations cup. Italy had a poor performance in the World Cup and also saw its hopes of qualifying for the European Nations Cup vanish when held 0-0 by Finland in Rome.

But such is the rivalry between the two nations that tomorrow's match here will have special significance. It could also show whether either team has been rebuilt into a potential winner.

The two teams last met in June in the U.S. Bicentennial Tournament. The Italians took a convincing 2-0 halftime lead but then went to pieces in the second half and England won, 3-2.

2,500 Policemen

The stadium here will be packed with 79,000 who will be watched by 2,500 policemen carrying rifles, gas grenades, truncheons and riot gear. There also will be Italian Football Federation officials.

British commentators and England team manager Don Revie have implied in a series of "war dispatches" that the England team is about to be massacred by Italy's players, who will be egged on by the huge crowd.

They have recalled that Italy captain Giacinto Facchetti punched British fullback Dave Clement at the Bicentennial game won by England in New York. Both players will be in the lineup tomorrow.

Facchetti later apologized, saying "something inside me snapped," but added that England's players are "no league of gentlemen."

Revie, who arrived last night with his team, predicted a 1-0 victory for England—but added: "I'll tell you what I think about the crowd after the game."

Government Move

The Italian government has become involved in the game, ordering television coverage to be deferred nearly four hours to avoid massive absenteeism.

London bookmakers Ladbrokes are giving 5-4 odds on Italy winning.

Referee Abraham Klein of Israel, reports one Italian newspaper, will be carrying a gun for fear of Palestinian kidnappers. Klein will become a government official during the match because penalties for attacking him will then be far stiffer.

He may need all the help he can get if Italy loses.

In recent games in Italy, a linesman was shot dead, a referee's ear was bitten off, a woman was killed by a policeman who fired his pistol when his team scored, and 69 fans were given a total of 80 years in jail seven years ago for laying waste part of Caserta in two days of rioting.

Sickness Clouds Proell's Return

SALZBURG, Nov. 16 (UPI).—The comeback of Austrian five-time World Ski Cup winner Annemarie Proell-Moser scheduled for next month may be postponed because of illness, ski officials said today.

Proell had to undergo minor intestinal surgery during the weekend and will have to stay in bid another week before returning to the slopes, they said.

Proell, 23, announced earlier this month that she plans to end her retirement and compete in all World Cup races this season. The season's opening World Cup race will take place Dec. 8-12 at Val d'Isere, France.

Russians to Play WHA

PRAGUE, Nov. 16 (UPI).—The Soviet national ice hockey team will play six to eight games against the best teams of the World Hockey Association in Canada this winter, Soviet coach Boris Kulagin said here.

In NHL Action

Canadiens Take 14th Victory, Open 11-Point Division Lead

MONTREAL, Nov. 16 (UPI).—The Montreal Canadiens' 4-2 victory over St. Louis last night gave the defending Stanley Cup champions 14 victories—more than any other National Hockey League team.

The Canadiens also have 31 points, better than any of the other 17 teams. And they opened up an 11-point margin over the Los Angeles Kings in the NHL's Norris Division.

"It was a big victory for us," claimed Canadiens coach Scotty Bowman. "We've been playing very well lately, but we only managed to tie our last two games before this one.

"It just shows that as long as you shoot the puck, eventually it goes in," Bowman added, referring to Saturday's game when his team took 50 shots but had to settle for a 3-3 tie against Colorado.

Doug Risebrough scored what proved to be the winning goal with just two minutes left in the second period as Montreal went ahead 3-1. It was Risebrough's sixth goal of the season—four of them have been game-winners.

"Sometimes statistics are deceiving," Risebourgh said. "I may have four game-winning goals but you can't read too much into that, because when I score them we have a big lead, only the other team comes back to get more goals."

Steve Shutt's 19th goal of the season, an NHL high, on a rebound at 10:16 in the final period, gave Montreal a 4-2 lead.

"I guess I'm back on the pace after being shut out in two games," Shutt said.

Mario Tremblay and Yvan Cournoyer scored for Montreal in the second period. Larry Patey replied for the Blues. Former Canadien Chuck Lefley scored for the Blues at 9:05 of the third period.

St. Louis goalie Eddie Johnston was forced out of the game at 19:10 of the middle session. A hard shot by Shutt hit Johnston in the mask, injuring his jaw. Ed Staniowski finished the game in the St. Louis net and gave up the final Montreal goal.

Monday's Game

Montreal 4, St. Louis 2 (Shutt, Risebrough, Tremblay, Cournoyer; Patey, Lefley).

Keystone Pioneer Takes U.S. Trot

INGLEWOOD, Calif., Nov. 16 (AP).—The favored mare Keystone Pioneer captured the $109,800 American Trotting Classic at Hollywood Park in the record time of 2 minutes. 12 3/5 seconds for 1-1/8 mile.

With Billy Haughton driving, the only mare in the field took the lead turning into the backstretch and stood off challenges from her eight male foes to win by 1 1/4 lengths Friday night.

Savoir, winner of this classic the last two years, finished second, with the French trotter, Equileo, owned by actor Alain Leion.

Lemon Appointed White Sox Pilot

CHICAGO, Nov. 16 (UPI).—Bob Lemon, a baseball Hall of Famer, was named manager of the Chicago White Sox yesterday, leaving a coaching job with the American League pennant-winning New York Yankees.

The choice of Lemon, 56, to succeed 68-year-old Paul Richards, who will remain with the club as a consultant, was announced by president Bill Veeck.

Lemon, seven times a 20-game winner with the Cleveland Indians, managed once previously, for three years with the Kansas City Royals.

"Lemon did an extremely creditable job with the Yankees, and I feel he'll prove to be the manager we need," Veeck said. "We got permission from the Yankees to talk to him. He's a 24-hour-a-day fellow and I feel we are fortunate to have him as a manager."

Valdes Plans Fight

NICE, Nov. 16 (UPI).—Colombian middleweight Rodrigo Valdes will meet American Willie Warren Dec. 20 or Dec. 21 in this Riviera resort in his first fight since May, organizers said.

Former ABA Stars Are Shining Brightly in the NBA

By Sam Goldaper

NEW YORK, Nov. 16 (NYT).—In all of its years of struggle, the defunct American Basketball Association had claimed its individual standouts were on par with those in the rival National Basketball Association. After a month of play following the consolidation of the leagues, five of the top 10 NBA scorers were ABA players last season.

George McGinnis of the Philadelphia 76ers, an ABA alumnus, makes it six. McGinnis, with a 27.3-point average, is in third place, behind Kareem Abdul-Jabbar of the Los Angeles Lakers (29.3) and Pete Maravich of the New Orleans Jazz (28.1).

David Thompson of the Denver Nuggets is fourth with a 25.1 average. The others in the top 10 are John Williamson of the Nets (24.6), Dan Issel of the Nuggets (24.1), George Gervin of the San Antonio Spurs (23.5) and Billy Knight of the Indiana Pacers (23). Incidentally, Gervin and Knight, both forwards, have been playing in the backcourt, as has Thompson.

* * *

Jo Jo White of the Boston Celtics has played in 373 consecutive games. The Philadelphia 76ers will retire Hal Greer's uniform, on 15, Friday when they meet the Jazz. In 15 seasons, Greer played 1,122 regular-season games, a league mark. But the record is about to be broken by John Havlicek of the Boston Celtics. If Havlicek, who has returned to his sixth-man role, does not miss a game before Friday he will tie Greer's mark that night and break it Saturday.

* * *

Earl Monroe and Bill Bradley are expected to play and Jim McMillian is not when the Knicks oppose the Atlanta Hawks tonight at Madison Square Garden. All missed Saturday night's victory over the Milwaukee Bucks. Spencer Haywood will be ready to leave the injured list after tomorrow night's game against the Washington Bullets, in which case one player will have to be cut. The likely prospect is Neal Walk, since New York has three other players who can play center—Lonnie Shelton, John Gianelli and Haywood... Of the 36 games played last week, the road teams won 9... Rick Barry of the Golden State Warriors, the free-throw percentage leader three of the last four seasons, has made 52 straight free throws, six fewer than the league record set last season by Galvin Murphy of the Houston Rockets.

* * *

The Bullets, seeking ball-handling help, signed Bob Weiss and placed Jimmy Jones on the injured list. The 6-3 Weiss, cut before the start of the season by the Buffalo Braves, had played six seasons in Chicago for Dick Motta, now the Washington coach... The New Orleans Jazz placed Gail Goodrich on the injured list because of a sprained right foot. He must miss at least five games... Leonard Gray, the Seattle SuperSonics' bulky forward, is sidelined with fluid on the right knee.

NBA Scoring

Mugging Grandmother

By Russell Baker

NEW YORK—Another problem we have in New York is children beating up grandmothers. Sometimes they kill them, although the usual thing is just robbery. Sometimes the children are quite young—10, 12, 13 years old. Sometimes the grandmothers are old enough to be great-grandmothers. The other day, two pubescent boys did a street-mugging job on a woman who later told policemen she was 103 years old.

Baker

This may have been a new record for assault across the ages. You can't be sure. If such records are kept at all, they are bound to be unreliable, since we go for long periods here in New York not being interested enough in this kind of assault to keep the records very well.

This week, all attention focuses on beaten grandmothers and insensitive childhood, and everyone is solicitous of the terror in which old people now live. The police, of course, will make special efforts. City Hall expresses concern. Cries of public outrage. Etc.

Next week, we will have the same responses for a new problem, but there is no point in being cynical about the ease with which New York transfers its alarm from one insoluble problem to another. In a city this size a problem is very lucky indeed to get a whole week's play in the news: Most problems are lucky to get 10 seconds on the local TV roundups.

In any case, one of the things you do here when there is a heavy problem in the news is leap to sociological conclusions about what it all means. The battered-grandmother movement is particularly ripe for much speculation, since almost any conclusion you leap to is bound to touch on some of New York's most sensitive nerves and guarantee a satisfying argument that will take everybody's mind off the batterings of old people.

My own inclination, for example, would be to explain this kind of crime in terms of family breakdown. Even a child reared by criminal parents will be taught a decent respect for old people, if only out of self-serving motives in his felonious parents, who, anticipating the inevitability of dotage, will want the successor generation of criminals to do the decent thing by their forebears.

It is reasonable to conclude that most criminal parents, upon learning that a child of theirs has beaten and robbed a grandmother, would give him such a forceful lesson in the nastiness of abusing the elderly that he would never do it again. The fact that this crime is gaining popularity among New York children suggests that either they have no families to underline such lessons, or that such families as they may have are no longer doing their jobs.

The suggestion that families ought to be doing such work will irritate certain modern thinkers who contend that the family is obsolete and—worse—a social prison in which the creative impulses of its members are stifled.

What we now have in New York is a lot of really rotten kids exposing their true nature because family influence has failed to train them to conceal it. The percentage of really rotten people on earth has probably been constant over the millennia; the barbaric periods differ from the civilized in the breakdown of constraints which, in civilized times, keep the bad people from behaving perfectly naturally.

The most romantic interpretation of the perils of New York's old people is that it is an expression of America's contempt for or hatred of old age, and its idiotic worship of youth. This strikes me as great fun to argue over gin, but pretty silly. Americans may do ridiculous things, like installing new glands and putting 44-inch waistlines into custom-faded jeans, in order to hold onto the memory of youth. The number of us who beat the daylights out of grandmothers en route to the supermarket is, however, infinitesimal.

When you find a couple of lads born in the age of LBJ assaulting a woman born in the administration of Ulysses S. Grant, it is just as sensible to argue that today's youth is reacting in rage against the corruption of the Grant gang as to contend that it is expressing a national contempt for old folks. What we have are some very bad children who lack the family background required to channel their felonious instincts into more socially acceptable activities.

New Noahs In Panama

By Joanne Omang

Los Angeles Times.

John Walsh with a rescued sloth makes his way across new lake.

CANITA, Panama (WP).—John Walsh's fiberglass boat, with its cargo of sloths and spiders, speeds across the lake here—it used to be a jungle.

Walsh, 35, has a flotilla of four boats (the fiberglass craft and three shocking pink dugout cannoes), a dozen Panamanian and Cuna Indian assistants, and $70,000. These are his arms for Noah II, a project to rescue the animals which would either drown or die of starvation as the water rises behind the new Bayano Dam.

The lake used to be a hilly, roadless jungle along the Bayano River, the home of ocelot, deer, monkeys, jaguars, anteaters, rat-like agoutis and big-eyed kinkajour. At least 43 species of animals—not to mention birds and insects—are threatened by the rising water.

For nearly a year, Walsh's flotilla has been patrolling the new lake, skimming through the dying tops of royal palm trees whose roots are 100 feet down in the old jungle floor. The lake will reach its maximum depth of 177 feet next March. They look for animals trapped on islands—they used to be hilltops—to take them to high ground. The project was organized by the London and Boston-based International Society for the Protection of Animals. The organization's attempts to win financial support from large U.S. corporations has so far failed. Noah II is going forward mostly on Walsh's personal fund-raising efforts and prodigious energy.

It is patterned on Noah I (in which Walsh, an American, played no role) which involved saving animals at the Cariba Dam on the Zambesi River in Rhodesia. The new Panamian dam will supply hydroelectric power to Panama City 65 miles to the west.

"We'll try to have (Gen. Omar) Torrijos out here for the first black panther we find," Walsh said, referring to Panama's military ruler. The Panamanian government has promised to supply the project with free gasoline and has eased import restrictions and customs red tape on the equipment Walsh brought in: outboard motors, medicine, camp equipment, testing materials and humane capture equipment.

The animals are brought back to the team's thatch-roofed camp after capture, where they are fed and examined for disease. They are then released.

Critics have worried that moving the entire animal population will unbalance nature in the surrounding high ground, which has been declared a wildlife refuge. "Nobody really knows how many of any kind of animal a given area can support or does support," Walsh said. "We're coming up with a lot of new information on that."

Solving the Riddle of Three Cypriot Columns

PAPHOS, Cyprus (NYT)—For centuries, travelers to Paphos puzzled over three stone columns poking out of the ground near a medieval church. Recent excavations have now shown that the columns belonged to one of the largest and earliest Christian basilicas ever built on this historic island.

The site is particularly interesting because Paphos was the capital of Cyprus during Roman times. Saul of Tarsus and Barnabas, a native Cypriot, came here in about AD 48 and converted the proconsul, Sergius Paulus, the first Roman official to accept Christianity.

Saul—he was first called Paul in Paphos—had quite a difficult time here. The newly discovered basilica, which dates to the 4th century, stands next to a small marble pillar. Tradition says that the missionary was chained to this pillar and given 39 lashes before winning over the proconsul.

No direct evidence has yet come to light, but Athanasios Papageorghiou, the director of the excavation, said of the basilica: "It must be connected to St. Paul."

Cyprus has always been a crossroads of people and ideas, and in the last few years archaeologists have added several fascinating fragments to the complex picture of the island's religious history.

Last summer, a team from the University of Glasgow was excavating a prehistoric site near Paphos and discovered a highly stylized female statuette more than a foot tall. Archaeologists believe this idol represents a fertility goddess worshipped here in the third millennium BC.

This goddess later evolved into Aphrodite, the Greek deity of beauty and love. Legend says that Aphrodite was born from the soft sea foam that washes the south coast of Cyprus about 10 miles east of here. One of the most famous temples to Aphrodite—it is mentioned in Homer—was built near that spot.

Last season, a Swiss-German group from the University of Zurich dug near the temple and found a small limestone table. It resembles tables unearthed in Greek and Cretan sanctuaries of the late Bronze Age.

About 70 miles east of Paphos lies the site of ancient Kition, a town founded by Greek colonists in the 13th century before Christ. Investigations in 1975 uncovered a small ivory tube that has now been identified as an opium pipe.

The pipe was found in a temple dedicated to a fertility goddess and was probably used to induce a state of ecstasy during religious rituals, according to Dr. Vassos Karageorghis, the director of the project. The temple was later rebuilt by Phoenician settlers who worshipped another version of Aphrodite, known as Astarte.

PEOPLE: India Orders Contestan[t] To Drop Miss World

Tuesday India ordered Naina Balsaver, 18, to withdraw from the Miss World contest in London as a protest against South African racial policies. She will become the fourth dropout if she follows orders. Monday the Liberians ordered Laurine Johnson, 18, out of the race. Contestants from Swaziland and Mauritius quit earlier. The issue is the presence of two contestants from South Africa, one white and one black. Contest officials have blamed the withdrawals on Sanroc, the anti-apartheid group which inspired the 17-nation black walkout from the Olympic Games in Montreal. Sanroc is pleased to take the credit. Chris de Broglio, its secretary, said Tuesday that he had sent a cable to Prime Minister Indira Gandhi, asking her to intervene. Commenting on India's withdrawal, he said that "this shows that once countries are informed of the position, they are prepared to take action." He expects more dropouts.

Composer Benjamin Britten, 62, is seriously ill, according to a member of his household. Lord Britten has had heart trouble for some time. He will remain at his home in Aldeburgh in eastern England because there is "nothing a hospital could do anymore."

* * *

Averell Harriman turned 85 Monday and the Washington establishment turned out in full force for a party at the Cosmos Club honoring the American statesman. Among them: Secretary of State Henry Kissinger, Sens. Hubert Humphrey and Stuart Symington; former ambassadors David K.E. Bruce and Ellsworth Bunker. Also on hand was the Russian ambassador, Anatoly Dobrynin. Crawling out from under an avalanche of praise, Harriman tried to add some perspective to the proceedings: "You all know how difficult I was to work with—and I am really very grateful for you being able to take it."

* * *

Daniel Schorr, who tangled with Congress over making public the secret report on the operations of the Central Intelligence Agency and eventually resigned as a CBS news correspondent, signed a contract Monday to do a book that should disclose some of his problems. Called "Final Assignment," the book is to be published next fall by Houghton Mifflin. Schorr says, "The book will be personal, but I will not be satisfied to have it simply personal. United Press International.

UDDLE—Spanish Prime Minister Adolfo Suarez lean down to confer with Garcia Ramal, president of the nomic Council, during the Cortes debate on reform.

Right Bloc Threatens Reform Bill In Cortes

MADRID, Nov. 17 (UPI).—Citing a procedural technicality, a bloc of right-wing members of the Cortes today threatened to withdraw their support from a government bill that would give Spain a Western-style parliamentary system.

The bloc, the Popular Alliance of six former Franco ministers and their supporters, gave the warning on the second day of debate on the reform bill, which will need a two-thirds majority of the 531-seat Cortes to pass.

The warning was a blow to the government's efforts in what is generally expected to be a very close vote.

The alliance spokesman said that his group of more than 100 deputies would abstain unless it had its way. Under Cortes procedure, every abstention amounts to a no vote since the needed two-thirds majority is based on the overall number of deputies present.

The alliance is attempting to change the electoral system provided by the bill to one that the rightists consider more stable and which is believed to favor them. Their maneuver to try to get the change centered on current Cortes voting procedure.

The technicality at issue was whether amendments are voted on, before or after the bill as a whole.

The alliance said that it backed the bill but wanted the amendments to be voted on before the proposed law. However, the speaker of the Cortes has already announced that the decision on the overall bill would come first.

Popular Alliance spokesman Cruz Martinez Esteruelas told the deputies, "If the bill is put to a vote before the vote on the amendments, my position and that of other [alliance] deputies, with regret, would be abstention."

If the full bill is voted first, the deputies would have to decide on the reform before knowing whether or not it will be amended.

In all, 18 speakers took turns in presenting amendments to the bill, but none called for scrapping it.

The chamber was half empty and relaxed today after yesterday's tension, when two ultra-rightist deputies predicted chaos and violence if Spain reverts to democracy.

Voting System

Most of the amendments deal with the question of how the new parliament should be elected. The bill proposes that the future lower house—the Congress of Deputies—be picked under a system of proportional representation, with seats alloted to the parties in direct relation to the popular vote.

Several amendments propose the exclusive use of a majority system under which large parties are favored at the expense of smaller ones. The bill calls for the majority system to be used in the upper chamber, the Senate.

The government and the opposition parties of the left and center prefer proportional representation in order to give all political forces a say in the issues which will have to be tackled by Spain's first freely elected parliament in 40 years.

The Popular Alliance pronounced itself firmly for the majority system in both houses. Politicians say that the alliance, considered a potentially powerful vote-getter, would greatly benefit from such a system.

Mr. Martinez Esteruelas argued that the proportional representation system was not necessarily more democratic and that it tends to breed instability.

United Press International.

ON PATROL IN RHODESIA—Members of the Rhodesian African Rifles, described as the best black fighting force in Africa, fording a stream during sweep in area where guerrillas were said to be operating.

Rhodesia Army's Gains Help Regime at Home, in Geneva

By Robin Wright

SALISBURY, Rhodesia, Nov. 17. (WP).—The white-minority government here is making dramatic headway in containing black nationalists' thrusts in both the four-year-old guerrilla war and the 11-year-old constitutional dispute.

The guerrillas' setbacks have bolstered the 270,000 white Rhodesians' morale, which had been sagging. But the military gains are perhaps more important to the minority regime's position at its Geneva talks with four African nationalist leaders on terms for a transfer of governing power to Rhodesia's 6 million blacks.

Since Prime Minister Ian Smith's government accepted the principle of majority rule on Sept. 24, both the Rhodesian forces and the guerrillas based in neighboring Mozambique and Zambia have intensified their efforts, with the insurgents vowing to establish majority rule by military victory and the Rhodesians hoping to show their strength and determination by repulsing the guerrillas.

The scale of Rhodesia's recent gains is reflected in the rising guerrilla death toll. In the last 17 days, 173 insurgents have been killed, surpassing the total of 140 slain in all of last year.

Today's military communiqué announced the deaths of 33 guerrillas, which is the highest death toll in a single day of defensive operations and surpasses yesterday's record of 29. That brings

● At Geneva, differences between the black negotiators become more apparent. Story Page 2.

Ties Seem Closest in Years

Brezhnev, Tito in Accord On Voluntary Cooperation

By Malcolm W. Browne

BELGRADE, Nov. 17 (NYT).—Soviet Communist party leader Leonid Brezhnev concluded three days of talks with Yugoslavia's President Tito today, leaving the impression that their two countries are on the closest terms in many years.

The two leaders reiterated long-standing ideological differences between their two countries, but asserted that these should be no bar to effective political and economic cooperation on a "comradely and voluntary" basis.

A communiqué issued by Mr. Brezhnev and Mr. Tito on the former's departure for Moscow disclosed little more than the general lines of their talks, and a spokesman said later that details would be worked out in subsequent discussions.

But the communiqué strongly hinted at a general rapprochement, not only in relations between the Soviet Union and Yugoslavia, but between Moscow and the entire so-called nonaligned group of nations, of which Yugoslavia is a prominent member.

It spoke repeatedly of partnership of "nonaligned, Socialist and progressive" nations in the common struggle against "imperialism and colonialism."

The statement also seemed to imply more active future consultations between Moscow and Belgrade on foreign policy questions, and closer relations for Yugoslavia with Comecon, the Soviet-led economic bloc.

Invasion Talk Scorned

The two leaders even asserted that they "attach great importance" to "the expansion of cooperation ... in information-propaganda activities, in the press, radio and television."

During his visit, Mr. Brezhnev repeatedly scorned speculation in the West that the Soviet Union might at some point invade this country.

Today, President Tito expressed similar views. In a brief signing ceremony at his palace here, he spoke enthusiastically of prospects for strengthening relations with the Soviet Union, and added: "That is a reply to all those who speculate about [Soviet intervention] here."

A spokesman for the conferees said they had not discussed any details of future economic cooperation or coordination of foreign policies, although their foreign policies are already similar in many respects.

They agreed that although steps should be continued toward the "relaxation of tensions" between East and West, "the policy of imperialism, neocolonialism and all forms of domination and exploitation remain the main threats to peace, independence and equality of peoples."

The question of Soviet relations with China did not arise, the spokesman said. The U.S. electoral campaign was discussed "only in passing," he said, with the hope that "relaxation of tensions" with the United States would continue.

Joint Policies

The two leaders reiterated such joint policies as a call for Israel to end the occupation of territory it has held since the 1967 war with the Arabs, and for the creation of a state of Palestine.

They called for a special session of the General Assembly of the United Nations to take up the question of "complete disarmament."

Conference sources said that there had been no difficulty or delay in drafting today's communiqué, in comparison with Soviet-Yugoslav communiqués of earlier years.

The Soviet-Yugoslav compromise phrase to describe their new relations, as used in today's statement, is as follows:

"The free choice of different roads to Socialist development, [and] internationalist, comradely and voluntary cooperation between the two countries in the spirit of the teachings of the lofty ideals of Marx, Engels and Lenin."

The spokesman said that the question of whether the Soviet Mediterranean fleet could have access to Yugoslav ports had not arisen.

7 Are Killed as Palestinians Try to Seize Hotel in Amman

AMMAN, Nov. 17 (AP).—Four Palestinian terrorists seized the Intercontinental Hotel and some hostages here today, but were overpowered by King Hussein's troops in an attack that left seven persons dead.

Three gunmen, two employees of the luxury hotel and two soldiers were killed, a government spokesman said. The fourth gunman was seriously wounded.

Two guests, one identified as an American of Jordanian extraction, a hotel employee and a soldier were wounded, the spokesman said.

He said that the gunmen identified themselves as members of a Palestinian group called Black June, formed to protest the Syrian invasion of Lebanon last June. Its members attacked a Damascus hotel in September. One attacker and four hostages were killed in that raid and the three surviving gunmen were hanged publicly.

Today, the gunmen charged into the hotel lobby, across the street from the U.S. Embassy, at 9:50 a.m., firing automatic weapons, the spokesman said.

A short time later, streets around the hotel were sealed off. Special Jordanian troops stormed the hotel lobby and quickly forced their way up to the second and third floors.

The gunmen retreated to the fourth flood.

The Palestinians attempted to have a note delivered to the army officer in command of the siege by a hotel guest, the spokesman said. The note attacked the "Riyadh and Cairo decisions" of Arab heads of state which legitimatized Syrian intervention in Lebanon.

The spokesman said that Jordanian authorities refused to communicate with the attackers, adding that King Hussein personally ordered the final attack on the gunmen.

Just before 2 p.m., the troops inside the hotel stormed up from below, while other soldiers landed on the roof of the seven-story building by helicopter. There was only a brief battle.

King Hussein visited the hotel after the battle to congratulate the army commander who directed the operation.

ew Quebec Leader Pressed o Forgo Independence Bid

By Henry Giniger

ONTREAL, Nov. 17 (NYT). n the wake of the stunning tion victory won Monday by separatist party of Quebec vince, strong pressure is being ught by local and national eralists against any attempt the incoming provincial government to break away from nada.

ené Levesque, who as head of triumphant Québec party is become premier of this French-aking province in about 10 s, was warned by Canada's me Minister Pierre Elliott deau, and others that he had andate to govern the province not to lead it to independence. a news conference yesterday, Levesque responded by saying he could not be expected to ndon his long-term goal of in-endence but that he intended rule as a provincial premier in the present structures for next four years.

e said his immediate goals financial recovery, economic lopment and an honest and administration. He acknowledged that he had been brought to power largely by an electorate protesting the previous government's failure in those fields.

With only 41 per cent of the popular vote, his party captured 69 of 110 seats in the provincial legislature. The Liberal party, which had governed Quebec since 1970 with big majorities, was ousted and Premier Robert Bourassa and 11 other ministers were defeated in their own districts. Liberals, getting 34 per cent of the vote, won 28 seats. The National Union, Quebec's main conservative force, was third with 18 per cent and 11 seats. Two seats went to minor groups that accounted for 7 per cent of the vote.

Mr. Levesque said yesterday that he wished to see Quebec "master in its own house" and in "a new and equal association with the rest of Canada." He called Monday's vote historic because it had cast off "ancestral chains" and "fear of change."

But he repeated his assurances that he did not intend to write

20,000 in London Protest Cuts in Public Spending

LONDON, Nov. 17 (Reuters).—Twenty thousand union members and Labor party workers marched up to the gates of Parliament tonight demanding that the government avoid making cuts in public spending.

Police stood shoulder to shoulder outside the Parliament buildings a the demonstrators, led by nine left-wing Labor members of Parliament, came to a halt. A police force of 2,500 stood by in side streets or accompanied the marchers as they walked from Hyde Park to Westminster, blocking traffic in central London.

About 3,000 demonstrators were allowed inside Parliament in relays to talk to their representatives.

The demonstration was in direct opposition to the Labor government's policy aimed at strengthening the country's currency.

mergency $300-Million Loan o Portugal Approved by U.S.

By Bernard Gwertzman

ASHINGTON, Nov. 17 (NYT). he Ford administration has dy approved an emergency of $300 million to Portugal has decided to seek the approval of Congress for U.S. participation in a $1.5-billion long-loan to help the government Premier Mario Soares stay in .

Administration officials said erday that the decision on aid package, which could unt to a total of about $800 lion in U.S. assistance, was de last week by President Ford the strong backing of the e Department. The amount he short-term loan was said be about $300 million, with source putting the figure at million.

formal announcement has delayed pending consulta-with leaders in Congress, uguese officials and other gn governments.

it it is already being regard-y State Department officials major decision, designed for first time to put maximum economic support behind the -month-old minority, Social-d government.

Decision Made

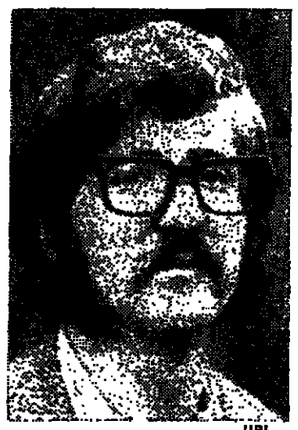
cretary of State Henry Kis-r, in a discussion yesterday parliamentarians from O countries, said that the ed States was considering a ram for "substantially in-sed economic aid" to Por-l and that a decision would conveyed to Portugal in the week. Officials said the de-n has been made.

the fiscal year that began 1, Portugal was scheduled to ve only about $55 million in omic assistance. The emer-y loan would represent a r increase in that figure as the U.S. participation of t 30 per cent in the con-lated $1.5-billion consortium lving West Germany, France perhaps some other states.

The short-term loan would be provided by the Treasury Department from its exchange stabilization fund, officials said.

The fund, established by Congress in the 1930s to stabilize the value of the dollar, provides loans of three to six months to countries hard-pressed for foreign exchange.

Portugal, which has a gold reserve of 86 tons, has seen its foreign exchange holdings dwindle to practically nothing. Much of its gold reserve is being used as collateral for loans already extended by Western European countries.



Pledge of Austerity

The Soares government, which has pledged an austerity program to get Portugal on its feet, asked for the loan of about $300 million late last month. The request received urgent high-level attention here because of the belief that if the United States did not come to Portugal's rescue, the country might plunge back into the chaos and leftist domination that existed for much of the past 2 1/2 years.

By law, the Treasury Department can provide the emergency loan without authorization from Congress. But officials stressed that they were consulting with members of Congress for informal consent—something that is expected to be given.

The U.S. participation in the $1.5-billion consortium, officials said, will require formal congressional approval next year. It is expected that the administration will seek permission to provide about 30 per cent of the consortium figure—about $450 million.

Officials in touch with members of Congress have reported wide support for the increase in aid to Portugal. Several Congressmen earlier in the year had called on the administration to provide more aid than it had planned to help the Soares government gain wider support.

Philip Agee

U.K. Moves to Deport Agee, American Who Wrote on CIA

LONDON, Nov. 17 (AP).—The British government said today that it would try to deport CIA critic Philip Agee on security grounds.

Mr. Agee, a one-time CIA officer who quit in disillusion, charged that U.S. pressure was behind the move. A Home Office spokesman termed the charge "total and complete nonsense."

Mr. Agee denied Home Office allegations that he had met with foreign agents and jeopardized British security by disseminating security information.

The rarity of the deportation step was believed to reflect the seriousness with which the government views the cases of Mr. Agee and Mark Hosenball, a U.S. reporter for the London Evening Standard, who received a notice of intention to deport at the same time.

Representations

The Home Office spokesman said that both Mr. Agee and Mr. Hosenball have two weeks to "make representations" to an independent tribunal of three public figures which advises the department on security matters.

The cases of Mr. Agee, 41, author of an anti-CIA book, now living in Cambridge, England, and Mr. Hosenball, 25, who came to Britain on a scholarship in 1969, were believed to be connected, but the Home Office spokesman refused to comment officially on any link between the two.

The spokesman said that Home Secretary Merlyn Rees had moved for deportation of Mr. Agee after considering "information" that the nine-year CIA veteran had "maintained regular contacts harmful to the security of the United Kingdom with foreign intelligence officers," that he "has been and continues to be involved in disseminating information harmful to the security of the United Kingdom," and "has aided and counseled others in obtaining information for publication which could be harmful to the security of the United Kingdom."

The spokesman declined on security grounds to give details.

"The allegations are totally false," Mr. Agee told reporters.

"I believe pressure has been put on the government here from the very highest level to order me out in an attempt to disrupt publication of my second book," he said. Mr. Agee's first book, "CIA Diary," caused a furor by naming a number of CIA agents.

Mr. Agee also suggested that

Both Sides Claim Victory in Brazil

RIO DE JANEIRO, Nov. 17 (AP).—Both sides claimed victory today from partial returns in Brazil's nationwide municipal elections.

About 40 million registered voters, required by law to cast ballots, chose mayors and city council members Monday, but complete returns are not expected until the end of the week.

The only legal opposition party, the Brazilian Democratic Movement, appeared to be sweeping urban centers and was leading 2 to 1 in Rio, a city of 5 million. The MDB was ahead by 20 per cent in Brazil's biggest city, Sao Paulo, which has a population of 8 million. The government-backed National Renewal Alliance, known as Arena, appeared on the way to winning the largest vote total as it carried smaller towns and rural areas.

Sarkis, Arabs Said to Discuss Israeli Role in South Lebanon

BEIRUT, Nov. 17 (UPI).—With four-fifths of Lebanon under the control of a multinational Arab peace-keeping force, President Elias Sarkis has begun a series of talks with key Lebanese and representatives of Arab nations about Israel's support for Christian rightist troops in the south of the country, the leftist-held Beirut radio said today.

"Sarkis has voiced his concern about the situation in the south and discussed the issue with various religious and political personalities," the radio said.

"He has said that he, along with the brother Arab countries, will take the necessary steps to put an end to Israeli provocations in the south," it said.

Christian rightist forces in the south have received arms and training from the Israelis and taken over a chain of villages along the border that provide Israel with a buffer zone.

The Syrian-dominated Arab peace-keeping force was not expected to penetrate below the Litani River in the south—because of the possible international repercussions of such troop movements near the Israeli border.

Israel has repeatedly said that it will not tolerate the Arab forces' presence near its borders.

The problem is not new. Before Lebanon's civil war started 19 months ago, this country's regular army did not venture within about nine miles of the Israeli border.

Political sources said today that Mr. Sarkis was planning a tour of Arab capitals in the near future. The sources said he planned to:

● Brief the Arab nations' leaders on the security situation in Lebanon after its occupation by the peace-keeping force.

● Discuss Lebanon's economic crisis and ways of rebuilding the country with the help of the Arab nations.

● Analyze the situation in the south.

Most of Lebanon was reported calm Wednesday, the second day after the Arab forces' entry into this capital.

Large traffic jams developed as residents poured into areas that had been closed to them for months. Syrian patrols mixed with civilians milling about in the battered commercial and port areas.

A 26-year-old Palestinian girl from west Beirut was not happy about the surprisingly rapid return to normalcy in the capital. "I'm still not going over to [Christian rightist] east Beirut," she said.

"It is depressing," she added. "All this has happened and now, first thing, everybody is out as if it had been nothing. It is the attitude. People are happy to be doing the same, stupid things. They don't seem to remember—Lebanon can't ever be the same."

Ford Says Sudan Is Eligible To Purchase U.S. Weapons

By George C. Wilson

WASHINGTON, Nov. 17 (WP). —President Ford has taken another significant step to deepen U.S. involvement in Africa by formally declaring the Sudan eligible for the purchase of U.S. military equipment.

His declaration, made public today in the Federal Register, is a significant step in U.S. efforts to encourage the Sudan to play a role as a counter to the more radical Arab and African states nearby.

Relations between the United States and the Sudan were strained severely in 1974 when Sudanese President Gaafar Numeiri commuted the sentences from life to seven years of the eight terrorists who killed U.S. Ambassador Cleo Noel jr., U.S. Counselor George Moore and Belgian envoy Guy Eid in Khartoum in 1973. Gen. Numeiri turned the terrorists over to the Palestine Liberation Organization.

Now, as a result of Mr. Ford's declaration to Congress that selling "defense articles' to the Sudan "will strengthen the security of the United States and promote world peace," the Numeiri government is eligible to seek military equipment from the United States.

The presidential declaration is expected to be followed by formal requests from the Sudan for U.S. help to combat subversion from within and attacks from without.

Libya, on the Sudan's northwest border, is the chief external danger to the Numeiri government. U.S. military officials said the Sudan has a long way to go to build a credible defense against Libyan forces and predicted the Sudan's modernization will start with basic items such as trucks, rifles and armored cars rather than sophisticated items such as U.S. jet fighters.

A source predicted the Sudan's first request would be for communications equipment, sensors and related items to keep track of subversives.

Dissident Sudanese Army units attempted a coup in July but were unsuccessful. The Sudanese government said after the attempted coup that it had "definite evidence that this aggression was plotted and carried out by Libya." The Sudan is expected to request U.S. arms to strengthen its border defense after internal security is improved in Khartoum itself.

The United States is moving to supply arms for Tunisia, another neighbor of Libya. Mr. Ford declares in today's Federal Register that it is "important to the national security of the United States" to sell Chaparral antiaircraft missiles to Tunisia.

The Chaparral sale to Tunisia is expected to total $58 million, 10 times the total military assistance to that country to date, according to Pentagon records.

Chaparral is the name for the U.S. Army system consisting of a heat-seeking missile fired at low-flying aircraft from a tracked vehicle. The missile is often combined with a 20-mm Gatling gun on the same vehicle to cover a wider area.

The launching vehicle costs about $700,000 and each of the four heat-seeking missiles on it, $55,000. Although the total cost of about $1 million would enable Tunisia to buy 58 Chaparral units with $58 million, administration officials predicted, the actual number would be about half that because of the cost of training and spare parts.

The Pentagon notified Congress in September that it intended to sell anti-aircraft weapons to Tunisia. Since Congress did not oppose the sale within the allowed 30-day period under the Arms Control Act, the Pentagon and State Department are free to complete the Chaparral sales agreement.

Tunisia will be able to buy the weapons on an installment plan under the foreign military sales program.

Sadat Seeks Carter Plan On Mideast

Peace Proposals Urged for Spring

CAIRO, Nov. 17 (UPI).—President Anwar Sadat today called on President-elect Jimmy Carter to give the Arab-Israeli conflict the highest priority and to present a proposal next spring to resolve the impasse because "without the United States a solution is not feasible at all."

Addressing a six-member visiting delegation from the House of Representatives, led by Rep. Lester Wolff, D-N.Y., Mr. Sadat renewed his bid for U.S. arms. He said he wants the United States to sell him "defensive" weapons, including F-5E jet fighters and TOW anti-tank missiles.

Asked what he would like the United States to do to help bring about an Arab-Israeli settlement, Mr. Sadat said, "Let President Carter learn all the details about this and let him in the coming spring come forward with an American proposal to both of us."

After Egypt receives such a proposal, "I myself, as a friend, shall tell you quite frankly what I can and cannot agree to and the Israelis also will do the same," Mr. Sadat said.

Heed Offer, Dayan Says

TEL AVIV, Nov. 17 (AP).—Israel should give serious consideration to Mr. Sadat's proposals for peace talks, former Israeli Defense Minister Moshe Dayan said today.

"It was the most important statement made by an Arab leader, and unless these were prior conditions, it was a basis for returning to Geneva," ex-Gen. Dayan told newsmen before flying to Paris to promote his autobiography.

United Press International.

LIGHT-UP TIME—Twelve women took part in a pipe-smoking endurance contest in Rome Sunday, won by Wilma Musico, who kept tobacco burning for 46 minutes.

New Quebec Leader Pressed To Forgo Independence Bid

(Continued from Page 1)

a new chapter in Quebec's and Canada's history until he had "the clear and explicit agreement" of the Quebec people.

The atmosphere in the business community was grim and nervous over the uncertainties introduced into political life. But there was no panic, with stocks and bonds dropping only slightly yesterday on the Montreal Stock Exchange.

The attitudes of those directing Quebec's economic affairs, heavily concentrated in the English-speaking community, were particularly important to Mr. Levesque's Quebec party, which is inheriting a difficult situation involving economic stagnation, high unemployment and a sharp drop in private investment. Businessmen pointed out that the Quebec party had not campaigned on the independence issue but had promised to get the economy moving upward.

Transfer of Power

While Mr. Levesque said at his news conference that he intended to govern within the present structures for the next four years, he does plan to have the legislature adopt a resolution authorizing him to start negotiations with Ottawa on a gradual transfer of sovereign power.

If negotiations break down, as expected, he then would ask for a referendum for a mandate from the people of Quebec either to continue to press for independence through agreement or to act unilaterally.

For Quebec legally to become a politically sovereign nation, the Constitution would presumably have to be amended, with approval given by the federal government, the nine other provinces and the British Parliament.

Britain would be involved as the mother country, because Queen Elizabeth II remains Canada's chief of state and the basis of the Canadian federation remains the British North American Act of 1867.

Mr. Levesque, 54, is universally respected, even among the most outspoken opponents of his ideal of independence.

Honesty, Competence

During the election campaign, virtually everyone had something nice to say about him—that he is honest, sincere, competent or level-headed. Many who said those things then went out to campaign against him because of the danger that these qualities would help Mr. Levesque to separate Quebec from Canada.

He has restored respectability to the idea of independence.

In 1970, three years after he broke away from the Liberal party to form what is officially called the Parti Québecois, another group—a separatist fringe organization known as the Quebec Liberation Front— began to set off bombs, to kidnap and to murder. Independence was consequently associated with terror. But within six years the Quebec party has been able to overcome this reputation and to persuade people that if independence is achieved, it will be by democratic means.

Mr. Levesque comes to his present success after acquiring a solid reputation as a thoughtful journalist and an efficient Cabinet minister able to work within the present system.

In May, 1960, he entered politics on the Liberal party ticket and was elected a deputy in the provincial legislature. A month later he was named the province's minister of public works and hydraulic resources and in 1961 he was appointed minister of natural resources.

Nationalization

It was he who was responsible for nationalizing Quebec's hydroelectric power but the move did not leave as bad a taste as it might have in this traditionally capitalist province. He was acknowledged to have been equitable with the private power companies and to have paid a fair price for their properties.

His feeling that Quebec must control its own resources and culture grew and in 1967 he broke with the Liberals and founded the Sovereignty Movement, which developed into the Parti Québecois the following year.

He led this party into an election for the first time in 1970, winning 23 per cent of the votes and seven of the 108 seats in the provincial legislature. In 1973, the party won 30 per cent of the vote but only six seats. On Monday it captured 41 per cent and a clear majority in the provincial legislature.

Andreotti Plans To Name Big Tax Evaders

ROME, Nov. 17 (UPI).—Premier Giulio Andreotti, trying to make his economic austerity program more acceptable to the common man, said yesterday that he planned to let Italians know toward the end of the year who the big tax evaders are, and what is being done about them.

"In a matter of months we have already detected tax evasion for a total 450 billion lire [$520 million]," Mr. Andreotti said in an interview with the weekly magazine L'Espresso.

He said the names of accused tax evaders have been withheld so far in order not to interfere with continuing investigations.

U.K. Moves To Oust Agee

(Continued from Page 1)

the alleged U.S. pressure could have been prompted by his recent public report on CIA activities in Jamaica to a group in London called Concerned Americans Abroad. He said that while in Jamaica he had named nine CIA agents on the Caribbean island.

Mr. Hosenball said the move to deport him "undoubtedly hinges on some story I did in my capacity as a journalist for Time Out magazine."

He worked for the magazine from 1972 to last July. During that time, it published names of some alleged CIA men in London as part of a general inquiry into CIA activities in Britain.

Link Uncertain

Mr. Agee said that he could not tell whether his case and Mr. Hosenball's were linked, adding that, "I have worked with Mark and many other journalists on the question of the CIA presence in many different countries."

Mr. Hosenball said that he had talked with Mr. Agee, but never worked directly with him.

One reason for the deportation move, Mr. Agee said, "is that the CIA has a new chief of station in London and this might be done as one of his first orders of the day."

U.S. Embassy spokesman William Hamilton said that he had checked with appropriate embassy authorities on both Mr. Agee and Mr. Hosenball and "as far as I can find out, there have been no such representations" from U.S. to British authorities in either case.

House Race Results

WASHINGTON, Nov. 17 (UPI).—Rep. Lloyd Meeds, the Democratic incumbent, has been declared the winner in Washington state's 2d Congressional District. However, a recount is still to be held.

Study Finds Pluto May Be Smaller Than the Moon

WASHINGTON, Nov. 17 (AP). —The planet Pluto appears to be much smaller than previously believed and has methane ice on its surface, according to a report by astronomers on observations from Kitt Peak National Observatory in Arizona.

They said that Pluto could be smaller than Mercury or even the earth's moon—which would make the outermost planet the smallest in the solar system, instead of the 3,030-mile-diameter Mercury.

Pluto, which circles the sun at an average distance of 3.6 billion miles, has been estimated as being between 3,600 miles and 4,200 miles in diameter. The earth, circling 93 million miles from the sun, is 7,900 miles in diameter.

In a report in the journal Science, University of Hawaii astronomers said methane ice would make Pluto seem larger than it is by reflecting more light than a dark, rocky surface would.

The astronomers said they calculate that Pluto could be slightly smaller than the moon, which is 2,160 miles in diameter, and could even have a diameter as small as 1,750 miles. They said their new measurements were made by examining near-infrared light reflected from Pluto. Light reflected from a substance can indicate what it is.

Muzorewa Sees 'Cheap' Politics

Black Delegates in Squabble At Conference on Rhodesia

GENEVA, Nov. 17 (NYT).—Bishop Abel Muzorewa, leader of one of the black nationalist factions at the conference on the future of Rhodesia, accused two other nationalist delegates today of resorting to "cheap power politics."

The accusation underscored the divisions between the four nationalist leaders at the conference, at which the white minority regime of Prime Minister Ian Smith is also represented.

Yesterday, two of the black leaders, Joshua Nkomo and Robert Mugabe, asserted that the conference's British chairman, Ivor Richard, had adopted tactics "aimed at accentuating divisions" among the nationalists.

They alleged that Mr. Richard had shown partiality by providing Bishop Muzorewa and the Rev. Ndabaningi Sithole, the fourth nationalist representative, with documents not given them. Mr. Richard rejected the charge of partiality.

In a letter to Mr. Richard, Bishop Muzorewa said that the accusation by Mr. Mugabe and Mr. Nkomo, who have formed a loosely knit "Patriotic Front," implied that he was negotiating "under the table" with the chairman.

"We feel insulted that our integrity is being questioned and our good name sacrificed at the altar of cheap power politics," he said.

Bishop Muzorewa published the letter after a long private meeting with Mr. Richard on the structure of the projected biracial government that would hold office during the transition of rule from 270,000 whites to the 6 million blacks.

First Talks on Transition

Mr. Richard yesterday had the first of his talks on the transitional government with Mr. Sithole after the "Patriotic Front" delegates had announced in plenary session that they opposed having the conference take up any other issue before Britain had fixed a firm date for Rhodesia's independence under black rule. London has never recognized the Smith government's unilateral declaration of independence in 1965.

The conference has been deadlocked on this issue virtually since its start on Oct. 28. Britain has refused to set a precise date, saying that independence could only be declared once all the constitutional and other transitional processes have been completed. London estimates that this would take 15 months from the successful conclusion of the current talks. The "Patriotic Front," however, insists that independence day must be Dec. 1, 1977.

Bishop Muzorewa's plan for the transitional period calls for London to appoint a governor on the advice of the interim prime minister, who would be elected by all Rhodesians on a one-man-one-vote basis.

Under the prime minister would be a 34-member executive council whose seats would be proportionally divided among the parties represented in the election for prime minister. The council would name a commission to draft the constitution for an independent Zimbabwe, the African name for Rhodesia.

Smith Regime Bolstered by Army's Gains

(Continued from Page 1)

this year's "terrorist kills" 1,356. Thirty-eight members of Rhodesia's security forces have been killed this year.

The guerrilla campaign, [illegible] over three years limited to border clashes on the northeastern border, has intensified to "search-and-fight" confrontations along the entire border and deep inside the country, forcing Rhodesian troops into combat offensives that could have serious political repercussions.

Rhodesia has acknowledged two hot-pursuit raids across borders, early in August and in last month. In addition there are growing indications that the army has launched a series of small hit-and-run campaigns across its 800-mile-long border with Mozambique.

Although the Rhodesian government said reports of a massive air and ground attack last Thursday on Mavue in Mozambique's southern Gaza Province were "not worthy of comment" there is limited evidence that contact did take place. Mavue is known to be a base for both insurgents and Mozambique Frelimo forces.

A Rhodesian source indicated that the scale of the operation was exaggerated by the Mozambique news agency. He said that no aircraft were shot down and that it was not a major clash.

Supplies Seized

But it is believed that large quantities of Soviet and Chinese military supplies were destroyed or confiscated in the raid, as in two earlier attacks.

Mozambique radio said yesterday that Mavue was "destroyed" during the offensive, and that Mozambique soldiers were killed. A news bulletin also claimed that seven Rhodesian aircraft were shot down and several Rhodesian soldiers killed.

Mozambique radio disclosed yesterday that Angola's Minister of Defense Henrique Carreira, Tanzania's Interior Minister Aasham and Rosario San Pedro, a member of the Cuban Communist party's Central Committee, were in the Mozambique capital to discuss the guerrillas' status and strategy.

But there is, as yet, no confirmation evident among Rhodesian military officials about the possibility of foreign intervention. Disclosures that two battalions of Tanzanian troops had moved into Mozambique to support the guerrillas did not seem to alarm officials here.

Talks May Shift On Disarmament

UNITED NATIONS, N.Y., Nov. 17 (AP).—UN Secretary-General Kurt Waldheim proposed yesterday that the permanent site for international disarmament negotiations be moved from its traditional center in Geneva to the new conference center being built in Vienna.

In a report to the General Assembly, Mr. Waldheim asked that his proposal be placed before the 31 countries of the Committee on Disarmament. "It will be for that body to indicate its position on this matter," he said. The disarmament talks have been held in Geneva every year since 1[illegible]

Dutch Woman Spied, Israel Says

TEL AVIV, Nov. 17 (Reuters). —A 24-year-old Dutch woman, whose arrest in September led to the uncovering of a pro-Palestinian guerrilla squad in the Netherlands, has been charged here with spying.

The district prosecutor charged that Ludina Janssen had gathered secret information about Ben-Gurion International Airport, where she was detained on her arrival on Sept. 21, with the aim of damaging Israel's security.

Her lawyer, Felicia Langer, told the judge that Miss Janssen was not mentally balanced, and requested a psychiatric examination. The judge agreed to the request and said he would decide whether the woman was fit to stand trial after the examination.

Largest China A-Blast Is Reported by U.S.

WASHINGTON, Nov. 17 (Reuters).—China exploded a four-megaton nuclear device in the atmosphere early today, the largest ever detected in China by the United States, the U.S. Energy Research and Development Administration said today.

The test took place over the Lop Nor nuclear test site in western China. It was the fourth nuclear test conducted by the Chinese this year, the spokesman said.

New Zealand Radio, TV in Fiscal Squeeze

WELLINGTON, New Zealand, Nov. 17 (Reuters).—Prime Minister Robert Muldoon said New Zealand's radio and television services were in financial trouble and with help would have to leave bills unpaid to pay wages a month.

The Prime Minister said Cabinet had asked the Treasury to report within a week on interim measures to help the two corporations, Radio New Zealand and two television chann Their main source of revenu advertising.

Jakarta Imposes Ban On Newsweek, Staff

JAKARTA, Nov. 17 (UPI). The Indonesian government has banned the U.S. news magazine Newsweek and denied its correspondents entry into the country, the chief national security official, Adm. Sudomo, announced.

He did not say when the measure became effective. But it is believed to have been ordered immediately following the appearance of the magazine's Nov. 15 issue in which an article entitled "Indonesia: Fading Hopes" was critical of President Suharto's administration and family.

Target Date Is Feb. 15

Carter Plans to Move Quickly On a Budget for Fiscal 1978

By Hedrick Smith

WASHINGTON, Nov. 17 (NYT). —President-elect Jimmy Carter has set Feb. 15 as a target date for presenting to Congress his own "budget-in-brief" for the 1978 fiscal year, one of his principal aides said yesterday.

If that deadline is met, this would put Mr. Carter well ahead of previous incoming presidents in shaping the budget process and the spending priorities of his administration.

Jack Watson jr., transition coordinator for Mr. Carter, said that "decision-forcing events" would impel Mr. Carter to take early action on the overall budget, on defense spending and particularly on whether to proceed with production of the controversial B-1 bomber; on jobs and stimulating the economy; and "incomes policy," described by other Carter aides as meaning guidelines and public hearings to persuade business and labor to exercise restraint on wages and prices.

"His early decisions will telegraph his aspirations for his administration," Mr. Watson said in an interview.

Mr. Watson, who yesterday for the first time assembled the Carter transition staff of more than 100 persons, sketched a picture of an administration that would give a central role to the White House Office of Management and Budget in helping the new President set priorities while leaving the Cabinet secretaries as strong administrators of their departments.

Mixed Cabinet Seen

In a separate, impromptu talk with reporters, Hamilton Jordan, former campaign director and now chief talent hunter for Mr. Carter, said that he was sure the new administration's Cabinet would include some Republicans or independents.

Mr. Jordan, asserting that his task was "to find the best people" from among several thousand already proposed, said there was no advance commitment to form a bipartisan Cabinet. But he added, "I'm sure it's inevitable that there will be some Republicans or independents in there, as well as Democrats."

Mr. Watson, who has overall supervision over both the budget and policy analysis divisions, disclosed that in discussions with Paul O'Neill, deputy director of the Ford administration's Office of Management and Budget, he had sought permission for Carter aides to sit in as observers while the Ford administration prepared its budget for the 1978 fiscal year. That budget is to be submitted to Congress on Jan. 17, three days before President Ford leaves office.

Having Carter aides present while the Ford budget is formulated, he said, would be helpful to the incoming administration in preparing its own alternative budget proposals. But because of political sensitivities for both the Ford and Carter camps, he acknowledged, "it doesn't look good right now" for this kind of access. Nonetheless, he praised Ford administration officials for their "uniformly cooperative" attitude toward the Carter transition operation.

Mr. Watson said that soon after taking office Mr. Carter would be forced to make a number of early decisions on government spending and that was one reason why he had set Feb. 15 as the target for presenting Congress his own alternatives to the Ford budget. More than once, Mr. Watson described these as "budget proposals" or a "budget-in-brief" rather than a complete substitute budget.

In 1961, the incoming Kennedy administration had ambitions of presenting a complete budget of its own by April 15, but had to abandon those plans as overly ambitious. Other incoming administrations have not moved as rapidly as Mr. Carter evidently intends to.

In the case of the B-1 bomber, Mr. Watson said that Carter planners were making preparations for a presidential decision by Feb. 1. On that date, the bomber is to go into production unless Mr. Carter decides against it. His aides have already indicated privately that eliminating or cutting back appropriations for the B-1 is one of the easiest ways for him to keep his campaign pledge to cut defense spending by $5 billion to $7 billion.

In describing the likely organization of the administration, Mr. Watson repeated campaign commitments to a strong Cabinet but also said, "There's only one place with a government-wide perspective and that's the president," indicating that Mr. Carter himself would keep control of setting priorities for his administration in spite of his public commitment to a strong Cabinet.

Strong NATO Seen as Goal By Kissinger

WILLIAMSBURG, Va., Nov. (UPI).—Secretary of State Henry Kissinger predicted yesterday that the American people would support strengthening NATO and said that the alliance would not be worried if a rapprochement is reached between China and the Soviet Union.

In a foreign policy speech to the North Atlantic assembly, its first since the presidential election, Mr. Kissinger said, "Now that the campaign is over, all Americans will support without doubt the strengthening of NATO."

He also said that he would confer with President-elect Jimmy Carter later this week in Plains, Ga., "to answer completely all his questions and to assure that he takes over under the best possible circumstances."

Concerning a possible rapprochement between Peking and Moscow, Mr. Kissinger said, "I do not believe that it is in the interest of the West to give the impression we are panicked about possible rapprochement."

Their Own Reasons

"They quarreled for their own reasons and they will have a rapprochement for their own reasons," he said.

Mr. Kissinger was warmly applauded when he said that the best policy would be to "let these two Communist powers handle their own relations and not give the impression that we can manipulate it for our own ends."

The secretary of state expressed the belief that Mr. Carter would continue to improve relations with Peking. But he said that he felt it would be unfair for him to state publicly now at what pace he felt Mr. Carter should strengthen those ties.

Mr. Kissinger told the assembly that he could not speak for the Carter administration, but he emphasized that U.S. foreign policy in recent decades had been nonpartisan. He said he would personally "continue supporting the principles for which we have stood,' adding, "If that helps us have a more effective foreign policy, I would be delighted."

"The United States will always stand for peace," he said in remarks that in many respects had the overtone of a farewell address. "We will always uphold the peoples . . . and will strive to bring about a world that is better than the one in which we found ourselves in any given moment," Mr. Kissinger said.

Planning Group of NATO Begins Meet in London

LONDON, Nov. 17 (UPI).—Defense ministers of eight NATO countries began a secret two-day meeting today to review allied nuclear preparedness and the growing Soviet nuclear threat.

They met as NATO's Nuclear Planning Group, whose current members are Britain, Canada, West Germany, Greece, Italy, the Netherlands, Norway and the United States.

A NATO spokesman said that the meeting opened with a report by Defense Secretary Donald Rumsfeld on the state of the East-West nuclear balance in the field of strategic nuclear weapons. The spokesman said that Mr. Rumsfeld reviewed U.S. progress in strategic nuclear weaponry, including intercontinental ballistic missiles and submarine-borne missiles.

He also gave the latest U.S. assessment of the expanding Soviet nuclear capacity, the spokesman said.

The spokesman added that the group also reviewing the latest NATO thinking on the use of tactical battlefield nuclear weapons and their possible use if conventional weapons fail to halt a Communist attack against Western Europe.

New U.S. Nuclear Sub

NEWPORT NEWS, Va., Nov. (UPI).—The Navy commissioned the USS. Los Angeles last weekend, putting into service the first of a line of high-speed nuclear submarines. It was launched in 1974.

Associated Press.

PLAINS TALK—Vice-President-elect Walter Mondale arriving in Plains, Ga., where he was greeted by the President-elect, Jimmy Carter. They were to meet for talks with some congressional leaders yesterday in Lovejoy, Ga.

Plains Will No Longer Be so Plain

ATLANTA, Nov. 17 (AP).—Jimmy Carter's hometown of Plains may soon get public restrooms and a police force doubled from one to two men as part of state help in handling its prominence.

Street resurfacing and first aid facilities also are under discussion for Plains (population 683) where generations of Carters have lived.

The southeastern Georgia town and its two-block business district have been a tourist magnet since Mr. Carter won a string of primary elections in the spring.

The number of visitors grew as the campaign wore on. The Sunday after Mr. Carter's victory over President Ford, state officials said they logged more than 1,200 tourists.

Gov. George Busbee, Mr. Carter's successor in that office, said he is considering creation of a task force to help the town overcome the problems of its newly acquired fame.

Congressmen Travel Again On Taxpayers

By Mary Russell

WASHINGTON, Nov. 17 (WP). —Members of Congress have again found the post-election period a good time for foreign travel.

Among the travelers are at least four lame ducks who announced months ago that they would not seek re-election. Three of them are spending more than two weeks abroad at taxpayers' expense.

The most extensive trip is being taken by Rep. William Randall, D-Mo., the chairman of the House Select Committee on Aging, who is retiring.

Rep. Randall, 67, left Nov. 5 and will return next Sunday after visiting Yugoslavia, Romania, France, West Germany, Afghanistan, Pakistan, Egypt and Italy.

An aide said Rep. Randall was studying cell-regeneration projects in geriatric centers in Belgrade and Bucharest, then joining members of the Select Committee on Narcotics for the rest of the trip. Rep. Randall is not a member of the Narcotics Committee.

18-Day Trip

The retiring chairman of the House International Relations Committee, 70-year-old Rep. Thomas Morgan, D-Pa., is on an 18-day visit to Taiwan, the Philippines, Indonesia, Australia and New Zealand to study foreign-policy interests in the Far East.

Retiring Rep. Edward Hutchinson, R-Mich., 62, has joined a House Judiciary Committee trip to Egypt, Israel, Jordan and Kenya to study problems of international terrorism and refugees.

Rep. James O'Hara, D-Mich., who lost a primary bid to succeed Sen. Philip Hart, D-Mich., is planning to attend the United Nations Educational, Scientific and Cultural Organization conference in Nairobi.

2 Are Undecided

Two senators who were defeated in re-election attempts, Frank Moss, D-Utah, and Gale McGee, D-Wyo., have not decided whether they will attend a conference on South African problems in Lesotho. Another defeated senator, John Tunney, D-Calif., has dropped out of the Lesotho trip.

At least 25 senators and 50 congressmen who will remain in office next year are traveling across the globe from Antarctica to Finland between now and the time the new Congress convenes Jan. 4.

Carter Campaign Used Entire Fund Of $21.8 Million

PLAINS, Ga., Nov. 17 (AP).—President-elect Jimmy Carter's campaign spent all of the $21.8 million allotted to it from federal funds, his staff announced today.

In a report issued today, Mr. Carter's office said it spent all of the money allocated to the campaign by the U.S. Treasury under the new political finance law—and could have used more.

It said the campaign staff totaled 1,544 persons just before Election Day. It listed media expenses of $10.5 million, with $7.8 million spent on television advertising. The statement said the maximum salary was $2,000 a month, but this was cut to $1,800 at the start of September, when salary reductions were imposed.

"While the limitation on the amount of funds available meant that many frills had to be eliminated and some tough decisions made . . . public funding permitted the campaign to be run in a very business-like fashion and eliminated the dependence on large contributions," Robert Lipshutz, the campaign treasurer, said in the statement.

However, he said, "additional funds could have been put to effective use."

Java Floods Kill 130

JAKARTA, Nov. 17 (UPI).—The worst floods to hit east Java in 20 years left at least 130 persons dead during the past weekend, reports reaching here yesterday said.

U.S. Diplomat's Visa Revoked By Russia in Act of Reprisal

By Peter Osnos

MOSCOW, Nov. 17 (WP).—The Soviet Union has revoked the visa of a senior U.S. diplomat here in retaliation for a similar action by the United States against a Soviet official, a U.S. Embassy spokesman said today.

The moves took place some weeks ago but were not disclosed, officials indicated, while efforts were under way to persuade the Russians to change their minds about the American, Marshal Brement, who was the embassy's political counselor. Mr. Brement, 44, a Soviet-affairs specialist, left for vacation and home leave in August and was subsequently informed he would not be allowed to return.

U.S. officials would not disclose the identity of the Russian involved but said his visa had been withdrawn because he was "engaging in improper activities in the United States." The Soviet Foreign Ministry did not respond to a reporter's query on the matter today.

'Purely Retaliatory'

"It was perfectly clear that the action taken against Marshal Brement was purely retaliatory," said embassy spokesman Raymond Benson, "and the United States has urged the Soviet Union to reconsider."

The Russian had also been informed that he would not be readmitted while he was out of the country, said Mr. Benson, so neither case can be formally regarded as an expulsion, although that is the effect.

The reciprocal ousters provide the latest example of how revived Soviet-U.S. frictions in the last year or so affect representatives of the two countries.

In the heyday of the détente era between 1972 and 1975, such actions were either suspended or downplayed. Then last February, in the wake of U.S. displeasure over Soviet actions in Angola and elsewhere, it was disclosed here that the Kremlin was focusing strong radiation beams on the embassy building. Next the Russians protested strongly to the United States about harassment of their officials in the United States by Jewish extremist groups.

That point was driven home when U.S. diplomats here were subjected to telephoned threats, minor jostling on the street and bomb scares at the embassy building.

Retaliation of that sort had largely ceased lately. Today, however, an anonymous caller to the Soviet Ministry of the Interior warned that a bomb was set to go off in the pavilion at Sokolniki Park where an enormously popular U.S. exhibit to mark the Bicentennial has been drawing huge crowds all week.

After the building was hurriedly cleared, it took four hours for the Soviet bomb squad to arrive on the scene. Some U.S. officials suggested sourly that the incident had been concocted to discourage attendance at the exhibition. The mere fact that private grumbling of that kind is common among Americans reflects something of th current mood here.

5 Puerto Ricans In U.S. Jails Sue On Treatment

WASHINGTON, Nov 17 (AP). —Five Puerto Rican nationalists, imprisoned in the United States for more than two decades, have charged that the government has "pursued a conscious and systematic plan" to punish them for their political beliefs.

One of the plaintiffs is Oscar Collazo, who tried to shoot his way into Blair House on Nov. 1, 1950 while then President Harry Truman was inside. A companion of Collazo and a Secret Service man were killed.

The other four—Andres Cordero, Lolita Lebron, Rafael Miranda and Irving Flores—conducted an armed attack on the House of Representatives March 1, 1954. Five congressmen were wounded.

In a suit filed in U.S. District Court they asked that Cordero be released because he is dying of cancer and that, for the rest, there be an "immediate end to all discriminatory and politically motivated special treatment."

Mrs. Lebron charges that she has been subjected to "psychological and physical torture."

Cordero, who has had three cancer operations, asserts that his "terminal illness could have been prevented had he received proper medical care."

All five plaintiffs charge that their visiting rights were restricted and that their correspondence and reading has been interfered with.

Despite Nostalgic Rumblings

No Real Nazi Revival Is Seen in W. Germany

By Murray Seeger

BONN, Nov. 17.—For a few days recently some of the old fear words—Luftwaffe, Stukas, Iron Crosses, Hitler, Nazis—haunted the news in West Germany.

A "demonstration" in Frankfurt commemorated one of the ugliest events of the prewar Hitler days . . . A rally in Mannheim honored Nazi "war heroes" . . . The police in West Berlin arrested 13 people who had gathered around a bust of Hitler and possessed a machine gun.

All these incidents in a few days this month alarmed the small German Jewish community that survived the Nazi persecution or returned to the country after World War II, as well as other Hitler victims. They saw in them an increased nostalgia for the glory days of Fascism and the threat of heightened neo-Nazi activity.

A Bavarian group said:

"We former resistance fighters and persons having been persecuted by the Nazis see in this trend a grave danger to our democracy."

Heinz Galinski, leader of the West Berlin Jewish community, said the government and the country's democratic political parties should deal "more seriously and more thoroughly with the provocative activities of neo-Nazi circles."

More objective foreign analysts are convinced, however, that there is no real revival of Nazi activity under way in West Germany, despite a heightened national consciousness of the country's strength and prosperity compared with its Western neighbors, and a persistent concern over potential Communist attack from the east.

Bonn authorities try to differentiate among three kinds of manifestations—truly neo-Nazi conspiracies which involved glorification of Hitler and racism, and which are illegal; rightist nationalist political parties, which are legal, and nostalgic war veteran activities which are allowed if they do not violate the laws against resurrecting Nazism.

"We don't see any increase in Nazi activities," one Western political expert commented. "Most of the real Nazis are old and retired now. Certainly the activities going on are a far cry from a decade ago and earlier."

What was called a demonstration in Frankfurt turned out to be a random posting of pro-Nazi stickers around the city and the raising of a Nazi flag on a building where it was hardly noticed except by police who removed it. The events caused unusual alarm, however, because they came on the 38th anniversary of the infamous Crystal Night, Nov. 9, 1938, when Nazi gangs roamed German cities to smash the windows of Jewish businesses.

The Mannheim meeting was a rally of legal but extremely rightist political party at which some of the estimated 800 participants wore Nazi identification. The police confiscated a stone memorial dedicated to war dead and a wreath honoring Col. Joachim Peiper, an SS officer.

Peiper served a sentence for war crimes and is resumed to have died in a fire at his home in France in July.

A group of former French resistance fighters who call themselves the "Avengers" claimed responsibility for killing Peiper. The onetime underground fighters also said they were going to track down all surviving members of the Waffen SS, another elite Nazi unit that included many volunteers from occupied countries.

The Berlin raid was typical of the kind of actions taken regularly by the West German authorities trying to tread the narrow line between permitted political activities in a democratic state and illegal activities promoting Nazism.

For many authorities, the occasional manifestations of Fascist-type political activities in Germany are part of an international fascination with Hitler and the Nazis and a widespread, loosely connected network of rightist extremist organizations.

It is believed that some incidents in Germany may be provocations staged by Communist agents. "They are always trying to give the impression Nazism is still active," a Western intelligence source commented.

The neo-Nazis appear more dangerously active in countries other than West Germany, where glorification of Hitler and anti-Semitism are outlawed. But because Nazism was a German creation, any signs of its revival here attract the greatest attention.

Wartime Nazi sympathizers and collaborators have been arrested or tried recently in the Soviet Union, Communist East Germany, Italy and the Netherlands, as well as in West Germany.

British Karl Marx Was a Ringer, U.K. Record Office Now Reveals

LONDON, Nov. 17 (AP).—The Public Record Office, guardian of Britain's national archives, has scotched an attempt to prove that Karl Marx became British.

It said yesterday that West German Michael Knieriem had confused Marx with a namesake when he announced he had proof the father of Communism was granted British citizenship in 1877.

Mr. Knieriem, curator of the Friedrich Engels Memorial Museum in Wuppertal, West Germany, made the announcement this week after a search of files in London. He found an 1877 record of a successful citizenship application by a man called Karl Marx.

Marx, who was born in Trier in 1818, renounced his Prussian nationality in 1845. He was expelled and settled in Britain in 1849. He applied for British citizenship in 1874 but was turned down as "a notorious German agitator."

Mr. Knieriem claimed to have found the record of a second, successful citizenship bid by Marx.

But the record office said it "confirmed that by a coincidence there were two Karl Marxes and the one who was accepted as a British citizen was not the revolutionary." The second Karl Marx was a jeweler from Homburg, Germany. He lived in London and was described by the police as "fairly respectable."

E. Germany Calls Singer 'False' Red

Exiling Is Protested On Both Sides of Wall

BERLIN, Nov. 17 (UPI).—East Germany today branded its popular protest singer and composer Wolf Biermann as a false Communist "who was completely black inside but donned a red cap."

The Communist state provoked a wave of protest in West Germany yesterday by banning the singer from returning to the East. He moved to East Germany from his native Hamburg in 1953. Mr. Biermann, on his first two-week tour of West Germany in 12 years, said he found the expulsion "unacceptable."

The East German Communist party newspaper Neues Deutschland said Mr. Biermann's performance Saturday in Cologne to an audience of 7,000 had warranted the withdrawal of his citizenship because of its hostility to the East German society.

"For years he has spurted poison against the German Democratic Republic to the applause of our enemies," Neues Deutschland said.

Klaus Boelling, chief spokesman for the West German government, said the East German action demonstrated "the lack of spiritual freedom" in a state in which Mr. Biermann had taken on himself the freedom of expression taken for granted in democratic countries.

Exile Is Protested

BERLIN, Nov. 17 (Reuters).—A group of East German authors today protested to the government against the exile of Mr. Biermann.

They called on the Communist leadership to reconsider yesterday's decision to strip him of his citizenship and ban him from returning home.

His wife, Christine, who remained here with their 6-month-old son, Benjamin, said today she had been in contact with her husband. Friends said it was not yet clear whether she and the baby would be allowed to join the singer.

Exempt Ship Repair

Lords Turn Down Key Clause In U.K. Nationalization Bill

LONDON, Nov. 16 (Reuters).—Britain's Conservative-dominated House of Lords tonight defeated the Labor government on a key clause in a controversial bill to nationalize the country's aircraft and shipbuilding industries.

By 144 votes to 51, the peers upheld an earlier decision—despite the Labor government's demands—to exclude 12 ship-repairing firms from the measure.

Tonight's defeat was the second major setback to the government's legislative program in the last week. Abstentions last Wednesday by two Labor members in the House of Commons cost the government a crucial vote on a bill to extend the rights of dockers to inland cargo-handling jobs.

The dock bill will become law as it stands, a weakened version of the government's proposals. The same fate may now await the nationalization measure. The only way the government can get the nationalization bill passed before the end of the current parliamentary session next week will be to accept the decision of the House of Lords.

The alternative is to invoke the Parliament Act in the next session beginning Nov. 24. This would enable the government to overrule and bypass the House of Lords, but it would delay the bill for several months because of necessary procedural stages in the House of Commons.

However, the Labor government, which now has an effective majority over all other parties of only two in the House of Commons, cannot be confident the nationalization proposals eventually will be approved.

The difficulties which the administration has had in getting its disputed legislation through the House of Lords has brought renewed calls from Labor left-wingers for the abolition of the upper chamber.

The critics accuse the unelected body of flouting the will of the elected House of Commons.

A Labor Member of Parliament, Gwilym Roberts, said tonight that he would seek to question Prime Minister James Callaghan "as a matter of urgency" about changing the political balance in the House of Lords by nominating Labor members from each parliamentary constituency for a peerage.

"This would have the advantage of getting working people in the House of Lords, provide a Labor majority in the upper house and would remove some of the arguments between the government and the Labor party," Mr. Roberts said.

(From yesterday's late editions.)

House Serves Subpoenas on Assassinations

WASHINGTON, Nov. 17 (UPI).—The House Select Committee on Assassinations began serving about 10 subpoenas today in search of new information on the murders of President John F. Kennedy and the Rev. Dr. Martin Luther King Jr.

The main targets of the subpoenas are believed to be material from FBI and CIA files as well as testimony from some individual witnesses.

The subpoenas were signed last night by the committee chairman, Rep. Thomas Downing, D-Va., after an all-day meeting in which potential witnesses were discussed and the subpoenas approved.

Both Rep. Downing and Richard Sprague, chief counsel for the 11-member panel, declined to say to whom the subpoenas were directed, stating only that there were "quite a few." But a committee spokesman today said they numbered "about 10."

Laos Asks Paris To Recall Attaché

PARIS, Nov. 17 (Reuters).—Laos has asked France to withdraw its military attaché, a French Foreign Ministry spokesman said.

The Laotian authorities "considered the presence of a military attaché unnecessary because there is no military cooperation between the two nations," the spokesman said.

He added: "The same measure is to be applied to other Western countries."

Black Congressman Gets South Africa Visa

DETROIT, Nov. 16 (Reuters).—Rep. Charles Diggs, D-Mich., leader of the congressional black caucus, who has repeatedly been denied permission to visit South Africa, has received a visa, his office here said today.

The congressman will visit South Africa during the next few weeks to study the racial situation there, an office spokesman said. He is a strong critic of South Africa's apartheid policies.

Utah Prisoner Better After Pill Overdose

SALT LAKE CITY, Nov. 17 (AP).—Convicted murderer Gary Gilmore, who took a sleeping-pill overdose in an apparent suicide pact with his girl friend, was improved today and in fair condition at a hospital here.

But the girl friend, Nicole Barrett, 20, remained in critical condition and comatose in a hospital at Provo, 40 miles to the south.

Gilmore, 35, who said he prefers death before a firing squad to prison, and Mrs. Barrett were found unconscious yesterday morning after taking overdoses of sleeping pills. He was found in his prison cell and she at her apartment.

The Utah Board of Pardons today extended Gilmore's stay of execution until Dec. 6 because of the suicide attempt.

Gilmore's dose of 10 to 20 tablets was described as sublethal.

He was described as in very serious condition and in a moderate coma throughout the night. But an assessment today from the University of Utah Medical Center upgraded his condition to fair and said Gilmore had been taken off a respirator.

Debate on Israel Reset by Unesco

NAIROBI, Nov. 17 (UPI).—Debate on a controversial United Nations agency resolution condemning Israeli actions in occupied territories was postponed today after Western nations introduced a series of amendments to soften the draft's language.

The two-page draft was introduced by a bloc of Arab and African Countries at the general conference of the UN Educational, Scientific and Cultural Organization, but final action was postponed until tomorrow to allow delegates time to try to reach a compromise formula on its wording.

The United States, Australia and Canada introduced amendments to try to eliminate the strongest anti-Israeli statements or soften the language.

Chile to Release 10 Youth All but 20 Held for Political Reason

SANTIAGO, Nov. 17 (AP).—The military government announced that it is releasing all but 20 political prisoners held without charges in Chile.

The 20 exceptions include Luis Corvalan, secretary-general of the outlawed Chilean Communist party, the statement said.

But it added that Chile has "initiated efforts" aimed at the release of Mr. Corvalan in exchange for the freedom of Soviet dissident Vladimir Bukovsky.

The announcement was read by Gen. Hernan Bejares, the interior minister. It said that those being released unconditionally are persons held by virtue of a state of siege in force here.

The government previously said that 280 persons were being held under state of siege provisions as of Sept. 30.

Eighteen persons being held under these provisions will be released only when foreign countries are ready to receive them as exiles, the announcement said.

It did not name the 18, but said the condition was imposed because of "their special danger to state security."

The other two exceptions are Mr. Corvalan and former Senator Jorge Montes, also a Communist. The government said it would release Mr. Montes if Cuba freed former Cuban official Huber Matos, "jailed by the Castro regime for more than 15 years."

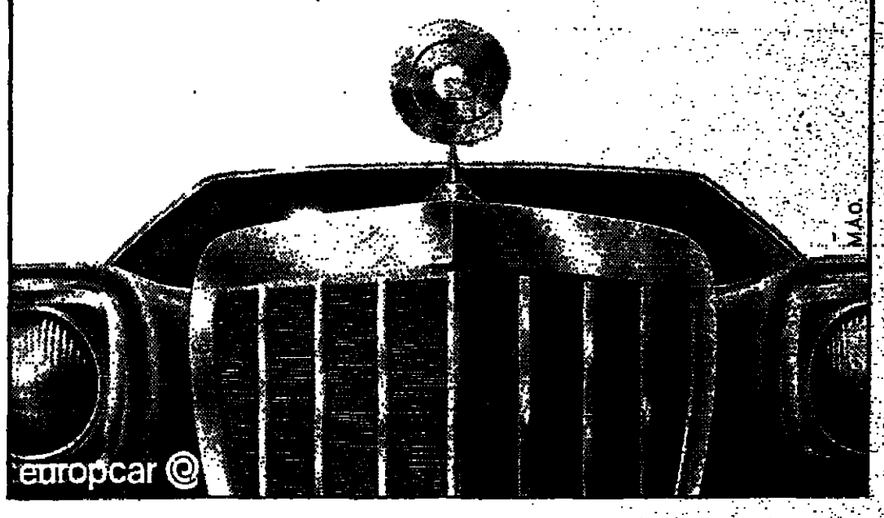
13 Hurt in Jetliner Fire

DENVER, Nov. 17 (AP).—A Houston-bound DC-9 jetliner caught fire and overran a runway during takeoff at the airport here yesterday, and 13 persons were hospitalized with minor injuries. The blaze, of unknown origin, was quickly extinguished.

FOCUS ON ENERGY

December 6, 1976
a special report by the
International Herald Tribune

The 1973 oil embargo brought about a spectacular shift in the energy plans of the Western world and has made a major impact on the economies of Europe and of the United States.



In its first in-depth study on energy, the International Herald Tribune will report on energy financing, the different sources of energy, and how the various Western governments are trying to tackle energy-related problems.

In addition to regular distribution with the newspaper, Focus on Energy will be sent by the International Herald Tribune to 1,800 leading industrialists and bankers throughout the world.

For details and advertising information contact:

March to Literacy

Nigeria Inaugurates Effort For Full Primary Education

By John Darnton

LAGOS, Nov. 17 (NYT).—Six-year-old Benjamin Disu has to be at 6 a.m. to get to school on time. He does not have all of his school books yet and the school building he goes to is so overcrowded that it is on double session. But Benjamin, and his parents, are not complaining.

"He is the first in my family to go to school," said his father, Gabriel Disu, a cow slaughterer in the sprawling slum of Yaba. "His life will not be the same as mine."

Nigeria has just begun the most momentous "march to literacy" undertaken by an African nation—universal primary education. The country's literacy rate is believed to be about 25 per cent.

The program began this semester when all 6-year-old children throughout the federation were given the right of free admission to schools. It will be extended as the current class moves from grade to grade, so that at the end of five years it will cover the entire primary system.

5-Year Plan

By 1980, at the end of a five-year development plan, the government plans to make primary education compulsory. It clearly hopes, as the head of state, Gen. Olusegun Obasanjo, said in beginning the program last month, that "by then the benefit and importance of education will be so appreciated by all Nigerians that making it compulsory will be mere formality."

The program has encountered many problems in starting. It has strained resources and represents a substantial financial commitment—$800 million for the first year alone, not including the cost of school construction. Last year, there were 4.8 million children in primary school. This year, there are 8 million, including 2.5 million beginning their 6-year-olds. By 1981, the figure will rise, in theory at least, to 18 million pupils, which is more than the population of most African countries.

This semester, the country needed 60,000 new classrooms and 163,000 additional teachers. About 300,000 more teachers will be required over the next five years. To meet the need, the military government has taken over 156 teacher-training colleges and plans to build 74 new colleges, each with a student population of 1,000.

Still, there are not enough teachers, not enough supplies and not enough classrooms. Instruction programs have been lagging. In the Cross River State, almost half the new classrooms required were not ready and so the opening date was postponed for 814,000 pupils. In Ondo State, churches and mosques had to be used as makeshift classrooms. In the capital of Lagos, some schools are on triple sessions.

Shoddy Construction

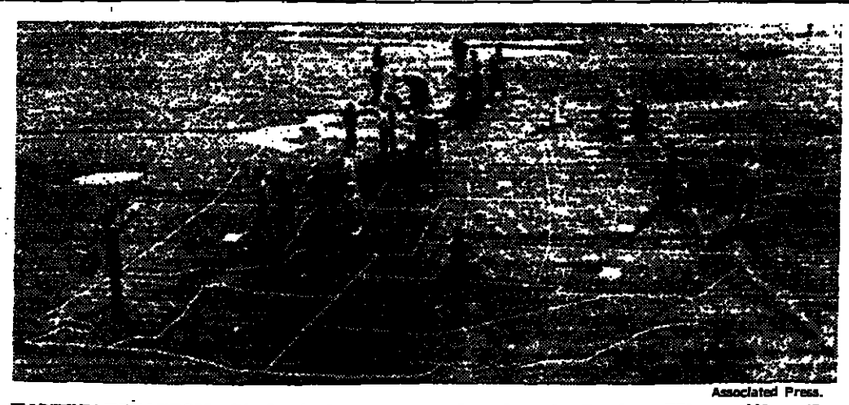
In the northeastern section of the country, construction work by local contractors was so shoddy that some schools were blown down or carried away by floods. A thousand students who arrived last year for an emergency two-year teacher-training course discovered, after they arrived, that the buildings to house them had only just been started.

Some teachers have been refusing assignments to rural areas because they lack amenities.

The government's attitude has been that, despite all of the shortcomings, universal primary education is such an important goal that it cannot be postponed.

Gen. Obasanjo said: "These problems are not such as to deter us from making a start which we believe is in the right direction, and it should make no difference even if some of the children have temporarily to study in improvised and makeshift accommodation. This is normally the lot of pioneers in any venture."

Universal primary education is seen as essential in Nigeria for civilian rule, which has been promised in 1979, and also as a means of reducing tribalism and equalizing opportunities between the Moslem north and the Christian and pagan south, which is more developed.



All-Consuming Goal

To many Nigerians, especially in the south, education is an all-consuming goal—a graduate degree is seen as a passport to move out of the crushing poverty. In past years, corrupt officials in secondary schools have accepted bribes to admit unqualified students and the universities have been shaken by scandals involving forged admissions certificates.

At the same time, little value is placed upon an education leading to blue-collar work, even when it is highly skilled. In 1973, there were only 34 technical and vocational schools, with a student population of only 22,568. The total population of the country is around 80 million.

Had the military government dropped the plan for universal primary education, which was promised by the previous regime headed by Gen. Yakubu Gowon, it would have instantly lost much of its popular support.

If the program succeeds, Nigeria will be the first black African nation to live up to a commitment to provide primary education to its entire population, as a matter of right and not privilege.

Thais Keep U.S. Spy Gear Ready for Use

By Lewis M. Simons

UDORN, Thailand, Nov. 17 (WP).—The Americans who operated Ramasun, the most secret of all U.S. electronic spy stations in Asia, have left, but the Thais who are now maintaining the station think the Americans will return.

"They took only a few key pieces of equipment with them when they left," said Col. Taweep Sattanon of the Thai Army's Supreme Command Forward, one of three officers in charge of Ramasun. "That's all they'd have to bring back with them to get operations going again."

The question of reopening Ramasun, with its implications of binding Thailand resolutely to the United States and further isolating it from its Indochinese Communist neighbors, has quietly surfaced since the military take-over in Bangkok Oct. 6.

The new regime has made defense a top priority. The government was empowered last week to borrow $1 billion to buy sophisticated weapons. Where the weapons, or the money, will come from is still undecided.

Radio Frequency

The Ramasun spy base is seen as part of the lure to draw military aid from the United States. The base, which was closed in June as part of the overall U.S. military withdrawal from Thailand, was prized by the Pentagon for its ability to monitor a variety of low-frequency radio transmissions and other activities in Vietnam and parts of China. According to a senior Pentagon official, the facility could not be entirely replaced anywhere else in the world.

A U.S. Embassy official in Bangkok and a senior Thai Army officer, both of whom refused to be quoted, insisted categorically that spying operations at Ramasun would not resume.

Nevertheless, the Thai Army is maintaining Ramasun at a surprising level of readiness and spending more than would seem necessary on a facility that supposedly has no future.

Ramasun itself gives a passer-by the impression of a ghost town. Located on the outskirts of the provincial capital of Udorn and 10 hours' drive up the U.S.-built "Friendship Highway" from Bangkok, its vast, towering antenna is a mute reminder of unending conflicts in Southeast Asia.

Outside the high chain-link fence that rings Ramasun, establishments like Tom's Gems, the Golden Gate Bar and Massage and Slim's Tailor Shop, which catered to the Americans, are now closed and shuttered.

But inside, there is still considerable activity. Some 300 soldiers from Supreme Command Forward, the Udorn Army District and the Counterintelligence Corps are maintaining the base. Electric generators are operated around the clock.

"Just running the generators is costing the government 19,000 bhat [nearly $1,000] a day," Col. Taweep said.

Editor Is Released

BANGKOK, Nov. 17 (Reuters).—A Thai magazine editor, Phansak Vinyarat, who was among several journalists arrested after last month's coup, has been released on bail and has left temporarily for the United States, police said.

U.S. Envoy Quits Yugoslavia Post

WASHINGTON, Nov. 17 (UPI).—President Ford today accepted the resignation of Laurence Silberman as ambassador to Yugoslavia, effective immediately.

Mr. Silberman was an aide in the Justice Department under former Attorney General William Saxbe starting March 13, 1974. He served briefly under the present attorney general, Edward Levi, but quit in April, 1975, and became ambassador to Yugoslavia a month later.

As envoy here, Mr. Silberman was reditd with bringing pressure that won the release from a Yugoslav prison of Laszlo Toth, a U.S. citizen who, on a visit to his native Yugoslavia, was accused of industrial espionage. President Tito denounced Mr. Silberman for "giving lessons about our internal and foreign policy and interfering in our affairs."

But Without Liquor

Austere Saudi Capital Goes Cosmopolitan

By Eric Pace

RIYADH, Nov. 17 (NYT).—In a fragrant barber shop Saudi sheikhs have their mustaches trimmed by a Palestinian. At the Riyadh airport, a flock of Japanese businessmen is shepherded by a Sudanese. In the hotels the restaurant buffet tables are thronged with Americans, Britons, Frenchmen and Italians—and the waiters are mostly Egyptian.

This solemn and secretive capital, set in the remote heart of the Arabian peninsula, is getting to be downright cosmopolitan thanks to the government's oil revenues of $30 billion a year.

The main decisions about how all that money is to be spent are made here in Riyadh, which was the stronghold of the ruling family even before the modern Saudi state was formed—and before the oil money started rolling in.

Over the years the government has grown increasingly tolerant of strangers, so foreign businessmen have been trooping through, trying to get in on the action, and workers from less affluent nations have come to seek their livelihoods along the capital's dusty boulevards.

Price Roller Coaster

The results include a babble of tongues and accents and a variety of tastes in beverages, not all of which can be legally fulfilled in this austere society, and a roller coaster of prices.

Up-to-date statistics are sparse. Recent estimates are that in addition to 4 million to 5 million Saudis, there are perhaps 1.5 million non-Saudis, mostly Yemenis, scattered across the country.

Among the foreigners are more than 20,000 Americans, many of whom have arrived since the current oil boom began late in 1973. The influx of Americans and other high-spending foreigners has helped to drive prices up by well over 30 per cent a year, by some estimates, although the government says it has been braking inflation lately.

"The heat is dying down now, although it's true the economy is still pretty warm," Mansour al-Turki, the deputy finance minister, told a visitor.

As part of the effort to restrain prices, the government has been pressing contractors to provide their own housing for their imported employees. Nonetheless, scores of foreign technicians are roosting in the capital's hotels, which have for a long time been badly crowded.

Those foreigners who arrive without ironclad reservations are often reduced to crisscrossing the city by taxi, pleading with hotel receptionists to let them in. An Italian salesman, his smile momentarily gone, blurted to a competitor for hotel space, "It's nothing but trouble, trouble, trouble!"

A stiffer upper lip was displayed by Faisal al-Bashir, assistant deputy planning minister, while speaking with a European interviewer. "To develop a country," he observed, "one must make sacrifices in comfort, if not financial sacrifices."

Riyadh's weather is dry and often very hot, which makes people thirsty. The government is going to great lengths to quench thirsts with ordinary water; obtaining tastier fluids is sometimes problematical.

With the Riyadh population rapidly expanding—it is estimated at 750,000—the government is planning to augment the supply of water with an elaborate system of pipelines and wells, tapping additional underground supplies and desalting as necessary.

Water From Syria

Some foreigners have preferred bottled water that used to come from Lebanon, but that seems to be a casualty of the civil war there. Now they are being served a variety from Syria.

Since alcohol is officially forbidden in Saudi Arabia, where the state religion is a puritanical brand of Islam, foreigners are also visible at hotels and restaurants sipping wistfully at imported nonalcoholic apple juice and a nonalcoholic beverage resembling beer.

A traveler is told that hard liquor is surreptitiously purveyed despite efforts to enforce prohibition. A British businessman reported that a Jordanian truck driver smuggling Scotch whisky overland could earn enough in a few trips to retire—if he was not caught by Saudi patrols.

EEC Gives $18 Million For Italian Quake Aid

BRUSSELS, Nov. 17 (Reuters).—The commission of the European Economic Community today announced a grant of 15 million units of account (about $18 million) for reconstruction projects in the earthquake-shattered Friuli region of Northern Italy.

The money represents a quarter of the 60 million units of account ($72 million) the commission has pledged for reconstruction work. It will be used to rebuild an aquaduct as well as roads and industrial sites.

Chile Jails 53,000 to Youth Allegedly Beaten by Police

PHILADELPHIA, Nov. 17 (AP).—A federal jury yesterday awarded $53,000 to a student who was threatened with a gun and kicked by a Philadelphia policeman after being charged with stealing a 79-cent bag of pistachio nuts.

The jury ruled in favor of Elliot Branch, 22, a student at the University of Pennsylvania. Mr. Branch was accused by the manager of a fruit store of stealing the nuts. When Mr. Branch denied the theft and refused to sign a paper admitting guilt, a security guard was alerted and the police were summoned.

Mr. Branch claimed in his suit that he was taken to a police station where detective Martin Vitkow kicked him in the face. He said Mr. Vitkow held a gun to his neck and threatened to shoot him if he did not sign the confession. Mr. Branch signed, but the shoplifting charge was not pursued.

Quebec Separatists' Gain

"It all depends on my showing," said Robert Bourassa after leading the Liberal party back to power in Quebec in 1970 and taking office as premier of the largely French-speaking province. "If my government can find jobs for all our people, they will see it is to their advantage to stay in Canada, and the separatists will lose strength."

This week, Quebec voters passed judgment on the "showing" of Bourassa's government. The result was a brutal rejection of the Harvard-trained economist—who lost even his own seat in the Provincial Parliament—and a decisive victory for the Parti Québecois, which is dedicated to establishing Quebec as an independent nation, dismantling Canada as it now exists. It was thus a heavy blow also for Canada's Prime Minister, Pierre Elliott Trudeau, himself a Quebecer, and for the cause of Canadian federalism.

* * *

The importance of this result for Canada's future cannot be depreciated by the facts that the separatist party tried to bury separatism as a campaign issue; that many Quebecers voted for that party not to advance separatism but to protest a weak economy, inept leadership and government corruption; and that more than 52 per cent of the voters still supported parties pledged to keep Quebec in the Canadian federation.

René Levesque, who founded the Parti Québecois in 1968, promised in the campaign only that a referendum on separation from Canada would be held within two years. But Premier-designate Levesque at 54 is a vigorous leader completely dedicated to the idea of an independent Quebec linked to Canada only by a customs union and some joint financial institutions. He will certainly deploy the considerable powers of the government of Canada's second-largest province to work for that end.

A drive for secession in Quebec will dramatically affect the political health of the rest of Canada. Canada's largest newspaper, the Toronto Star, foresaw these developments resulting from a separatist victory

"All the regions of this country so laboriously pulled together in a national structure will begin to look in other directions for their salvation. The Western provinces will be tempted by the United States. The Maritimes will be cast adrift. Ontario will lose its markets in the rest of Canada and be forced into greater dependence on the United States."

It remains a mystery why Premier Bourassa called a new election two full years before the end of his mandate, with his Liberal government still commanding an overwhelming majority in the National Assembly (as Quebec calls its parliament). He insists it was to give Quebecers the opportunity to help define "their province's place and powers in a new Canada," prior to a fresh round of constitutional talks in Ottawa next month —but he surely knew the campaign would not be waged on that lofty issue.

Bourassa recognized the existence of widespread cynicism about government, in Quebec as elsewhere, and he knew the risks of going to the polls at a time of inflation and 10 per cent unemployment. He must have known also that his policies of designating French as the only official language and of making it more difficult for the children of both English-speaking Quebecers and new immigrants to attend English schools had provoked bitter reaction.

Yet, he plunged ahead, found himself on the defensive on a host of issues and discovered too late that alienated voters could no longer be rallied by dire warnings about the perils of separatism. Out of the Assembly himself, and with his party caucus slashed from 97 to 28 deputies, Bourassa at 43 may find his political career at an end.

* * *

Trudeau's immediate prospects are not quite so unfavorable, though the national government has been buffeted for a year by resignations and dissension. The Liberals recently lost two "safe" House of Commons seats in by-elections, and polls show the party at its lowest standing since 1958. The Quebec election is a personal disaster for Trudeau because he took office in 1968 as the Quebecer in Ottawa who could galvanize the spirit of federalism in Quebec, rout the separatists and push bilingualism and biculturalism all across Canada.

Perhaps no one could have accomplished more in this sensitive area: but the triumph of the Parti Québecois is a measure of the failure of the Prime Minister who earlier this year could declare confidently that "Quebec separatism is dead."

THE NEW YORK TIMES.

'We Hear It's Informal Dress and Everyone's Invited.'

A New Stalin for China?

By Victor Zorza

WASHINGTON.—The position of Mao's successor, Hua Kuo-feng, is by no means as secure as his propaganda machine would have us believe. He has got rid of Mao's wife and her allies, but his attempt to gather all the power in his own hands is being challenged by some of his associates in the leadership. On the surface, they have closed their ranks after the purge of the four radical leaders. But while the world is being regaled with colorful stories about the radicals' supposed crimes, under the surface a new struggle is taking shape.

The first Peking statements which acclaimed Hua as Mao's successor were models of restraint, leading Western analysts to conclude that the Mao cult would not be followed by the cult of Hua. It was ridiculous to imagine that Hua could step into Mao's shoes, they reasoned—and the Peking Politburo, which drew up those early statements, was obviously of the same mind.

The first speech by a Politburo member, the mayor of Peking, Wu Te, who presented Hua to the nation as Mao's successor, was designed to show Hua as a member of the collective leadership, certainly the leading member, but no more than the first among equals. His emphasis was more on the defeat of the "gang of four" than on the personal merits of Hua. The speech was reinforced by a joint editorial in the three leading papers, including the Liberation Army Daily—a convention which is used in Peking to tell the nation that an article represents the agreed views of the whole Politburo as well as the army leadership.

Cult of Hua

But a week later a major effort to boost the cult of Hua became evident in a Peking press article. The defeat of the four was now said to "prove the great role played by the leader of the party." The recent events, it said, had demonstrated "the remarkable quality and outstanding ability, the revolutionary boldness and farsighted vision" of Comrade Hua as—guess what?—"the leader of our party."

The article seemed to be arguing the case for personal rule by Hua as against the case for collective leadership which was being argued by others unnamed. First it discussed the theory of political leadership, drawing on Lenin to show that a Communist party "must have a leader." To students of Communist leadership struggles, these passages from Lenin have an eloquence all their own.

They were used by both Stalin and Khrushchev to reply to their associates in the Kremlin who were challenging their attempts to build up their personal rule. Now it was Hua who was telling his own challengers that for Communists "to deny the leading role" of the party's leader was to disarm the party.

Who was it that dared to "deny" Hua's leading role? The purpose of the article was stated in its conclusion: "We must defend the leader of our party." But who was attacking him? Certainly not the "gang of four," which is safely in prison.

The evidence suggests that Hua's opponents are to be found within the Politburo itself. If the article had received the full approval of Hua's associates in the Politburo, it would have been published as a joint editorial of the three papers. But it appeared only in the Liberation Army Daily, under the signature of its own editorial department. The army had been instrumental in securing the succession for Hua. Now it was warning Hua's Politburo associates that they had better forget about collective leadership, and knuckle under to him.

The next major article on the subject, after another week, showed that the opposition to Hua was coming under increasing pressure. It was no longer just Lenin, but the whole history of the Communist movement that was used to show that the party must have its "own Marxist leader." Now Hua's opponents were being warned that when there is no "revolutionary leader" who could unite and organize the nation, "the revolution suffers setbacks and fails." They were thus being told that by challenging Hua's leadership they were risking the defeat of the revolution.

The same article took a big step in building up the personality cult of Hua, who was now lauded as a man of vision and revolutionary mettle. His actions showed his "wisdom and insight, his farsightedness and resolution." The fulsome praise was acquiring the characteristic overtones of Communist leader worship. Hua was modest and prudent, selfless and open, straightforward and loyal to the party.

Like a Reply

The article read like a reply to those of Hua's colleagues who argued that a man with his limited experience should at least share power with his associates. Hua, the article maintained, had undergone "a long period of testing and amassed a wealth of experience"—although the fact of the matter is that both the duration and quality of his experience are considerably less than those of other Politburo members. Was his regional leadership experience and specialized police background as security minister appropriate to the new circumstances? He was, the article insisted, "an outstanding Marxist leader who has the talent and the ability to take charge of the overall work of the whole party and the whole country." Was anyone questioning his ability to stick to Mao's teaching? He "can faithfully carry out Chairman Mao's behests to the letter."

But this second article, too, originated in the Liberation Army Daily. The party press published no editorials of its own on similar lines. At the most, it reported some of the praise being bestowed on Hua. The Politburo persisted in its refusal to authorize a joint editorial marking its submission to Hua. The army had to press ahead on its own with a campaign against Hua's opponents in the leadership.

Against this background, the Peking posters which have repeatedly announced the appointment of Li Hsien-nien, the Politburo's economic expert, as the new premier, acquire a new significance. If Li becomes premier, then Hua must give up the post. Official spokesmen say that the posters are wrong, but their appearance in the streets is probably inspired by those of Hua's associates who would like him to give up at least the post of premier, now that he has become the party's chairman and the army's "supreme commander."

Even Mao did not hold all three posts. They all know, if only from China's painful experience in recent years, that power corrupts, and they want to make sure that no one acquires the absolute power that corrupts absolutely.

The issues in the new Peking struggle are thus as momentous as any in the previous leadership conflicts. But once again intelligence experts in the West, who have come to rely on espionage for their facts, are refusing to give due weight to the analytical evidence in the absence of what they call "collateral" confirmation.

At the beginning of the year, they refused to accept the evidence suggesting that Chou En-lai's chosen successor, Teng Hsiao-ping, was in danger of being unseated by the radicals, and when the worst came to pass, they merely confessed their surprise. When Hua took over the leadership, they disputed the evidence which showed that he was being challenged by the radicals. Then they argued that after Mao's death the factions in the Politburo would close their ranks, when the analytical evidence was again pointing to a showdown between Hua and the radicals.

The CIA has at long last instituted an elaborate enquiry, by a man its officials describe as an impartial outside expert, into these major failures of intelligence. But even as they admit past errors, they are once again failing to perceive a development which in some ways could be more important than all the others—the possible rise in China not of a new Mao, but a new Stalin.

NATO's Readiness

Sens. Sam Nunn, D-Ga., and Dewey Bartlett, R-Okla., ask a good question. Is NATO ready to fight the right conventional war, the one likeliest to occur? Their tone seems alarmist; since NATO's nuclear arms remain strong, any deficiency in conventional forces that materialized would not of itself "invite" Soviet aggression. Yet their broader answer is sound and, indeed, is already accepted in the Pentagon and in West Germany, the country that would bear the brunt of a Warsaw Pact attack. The Atlantic alliance has been slow to react to the disturbing and unwarranted buildup of Soviet conventional forces in East Europe. It should modernize its forces and planning to counter the kind of brief and intense attack the Russians are now in a position to make—on short notice. Otherwise, NATO might be forced to use its nuclear weapons first and early, or to contemplate giving in.

Overall, NATO, prodded in particular by former Defense Secretary James Schlesinger, has taken certain steps to modernize along the lines sketched by Sens. Nunn and Bartlett. But, the United States and West Germany aside, the West Europeans have done less than they might have It's mainly a question of money. The Europeans hesitate to identify a threat—a quick, massive attack—that they're not ready to pay to meet. That's why Sen. Nunn's new push is helpful. He is well informed and increasingly influential and, unlike the retiring Sen. Mike Mansfield, D-Mont., he does not advocate unilateral U.S. troop cuts in Europe. The Europeans would do well to weigh his judgment of what they must do to keep the United States responsibly involved.

We do not think, however, that the Nunn-Bartlett approach is the last word. For, though NATO has a modernizing job to do, it has some time to do it. The imbalance in conventional forces is being addressed, if slowly; the danger point is more prospective than real. The Warsaw Pact's substantial advantage in tanks, for instance, must be measured against NATO's exceedingly sophisticated new anti-tank missiles. A new President is taking office, one with military credentials of his own and with an evident disposition to look with a fresh eye at familiar problems like NATO planning.

What Mr. Carter should ask, in our view, is how best to combine military preparedness with force reductions. NATO-Warsaw Pact force reduction talks have been droning on for years with only political results. They have allowed the West to sidetrack Mansfield-type sentiment for unilateral troop withdrawals, and they allowed the East to draw the NATO countries into the Helsinki conference on European Cooperation and Security. But the talks have not produced force reductions. This goal is worth further pursuits. NATO has a real interest in maintaining European stability at lower levels of risk and cost. Europe's security is, of course, too important to be made hostage to negotiations that the Russians may want to string out just to play on the West's political vulnerabilities. Yet there could be ways to make force reductions serve the same goal of NATO security that force modernization is intended to serve That is the prospect we would like to see the next administration explore.

THE WASHINGTON POST.

International Opinion

French Politics Still Fluid

Although present divisions between President Giscard and Mr. Chirac may be embarrassing, it should also be remembered that they do not have to be wholly reconciled in order for a government of the present kind to remain in power. It would be perfectly possible for Mr. Chirac and the Gaullists to conduct a right-wing campaign in 1978 and for the President's Independent Republicans to present themselves as moderates, and yet come together again after the elections, if between them they still had a majority. Taking these considerations and the by-election results into account, it would seem that the French political situation is still fluid, and that a Communist-Socialist victory—widely taken for granted in France—should not be assumed.

—From the Financial Times (London).

Seventy-Five Years Ago

November 18, 1901

MINNEAPOLIS—The Times in an editorial today said: "New York is a long way off and its municipal problems may seem at first glance to have no great bearing upon the affairs of other cities, but that assumption is erroneous. Tammany's success would have meant imitation of its methods elsewhere. Tammany's defeat shows decent citizens everywhere how the insolent forces of corruption and extravagance may be met and conquered. The New York struggle is not without its value in every American city."

Fifty Years Ago

November 18, 1926

NEW YORK—Before as large and brilliant an assemblage as ever witnessed a work in the Metropolitan Opera House, Giacomo Puccini's posthumous opera "Turandot" with text by Giuseppe Amaldi and Renato Simoni, had its American premiere here tonight. Maria Jeritza sang the title role with the hitherto untested Prince Lauri Volpi in the role of her suitor. The diamond horseshoe and the orchestra seats were filled with the glittering ranks of the social register.

'Playing for Tears'

On Nixon's Memoirs

By Joseph Kraft

WASHINGTON—President Ford's telephone call to former President Nixon in California reminds me of something I nearly forgot. That is the sample chapter of Mr. Nixon's memoir of his presidency which came my way not long ago.

By itself the document is a piece of sentimental trash. But a word seems in order partly because there are one or two contentious items in the text, and partly because so much false information has been spread about the first draft of the sample chapter.

Probably the most important is that in the first draft, at least, Nixon does not deny his guilt. He acknowledges that he approved the basic Watergate cover-up plan, including the effort to use the CIA to ward off the FBI investigation. He further admits that the original decision to cover up led him into a long series of lies in which he used the power of the presidency, including responsibility for national security, to protect himself and his friends.

Minimizes Guilt

To be sure, the guilt is minimized. As Nixon has it, the original decision was a casual one, made under prodding from his chief of staff, H.R. Haldeman, for the purposes of preventing the blowing up of a big scandal that might compromise John Mitchell and others. Nixon gives the impression of a man who incidentally, almost without realizing what he was doing, stepped onto the conveyor belt that took him over the cliff.

A second point of interest involves the pardon, or more specifically the meeting which took place between the White House chief of staff, Gen. Alexander Haig, and the Watergate special prosecutor, Leon Jaworski, on the day of the resignation. That meeting has always been an object of suspicion, and the final report of the Watergate special prosecutor deepened doubts instead of clearing them away.

A Deal?

Nixon deepens the doubts further. In the sample chapter he claims that Gen. Haig returned from the meeting to inform him that he had nothing to fear from the special prosecutor. That could be an innocuous reassurance —Haig's correct conclusion after his conversation that Mr. Jaworski was not interested in prosecuting a former president and had doubts about whether a fair trial could be obtained.

But another interpretation is open. It is that Haig improperly raised the issue of letting Nixon off, and that Jaworski gave him assurances. That point is central to the question of whether or not there was a deal allowing Nixon to get off before he resigned. Since Nixon, in his account tends to support the view that something like a deal had at least been offered, Haig ought to break his long silence and elucidate.

The more so as Nixon treats Haig—like almost everybody else involved—in cavalier fashion. The former president speaks of "mutiny" by Haig at one point when the general insisted on releasing the tape of the conversation that finally proved beyond a shadow of a doubt Nixon's guilt. Nixon deals in the same way with virtually everybody else who at any time gave him less than total loyalty. Thus such "99-per-centers" as Sen. Hugh Scott and Barry Goldwater, the then chairman of the Republican National Committee and the present CIA Director George Bush, the former Attorney General William Saxbe and numerous other persons in the White House and the Congress are one point or another fed in the flames.

The only 100 per cent loyalists —apart from Ron Ziegler, Rose Mary Woods and Steve Bull of the White House staff—are the Nixon family, especially daughter Tricia, whose diary is extensively cited, and her husband Edward Cox. Mrs. Nixon is, of course, also in the magic circle. But she is cited almost not at all. Indeed, her silence is deafening.

Clutched at Straws

The place of honor given the tiny handful of persons who urged him to tough it out the way destroys Nixon's central claim about the final days. The fact is that he had made up his mind to resign, but only wanted to do it in ways that would not weaken the powers of the presidency. To the contrary, the internal evidence is that, until the very last moment, he clutched at every possible straw that would keep him in the White House.

Perhaps worst of all in the dreary chapter is the larger case Nixon makes for himself. He virtuously eschews the plea that his wrongs were balanced by important achievements, particularly in foreign policy. Instead he plays on the tears, going on ad nauseam about the beauties of the White House, the closeness of his family, the loveliness of the yacht Sequoia. He argues his last big political case as he argued his first one, on the level of the family dog Checkers.

The Revolt of U.S. Medical Deans

By Harry Schwartz

SAN FRANCISCO—The deans of most U.S. medical schools joined together here the other day to open the latest front of the general war against the ever more intrusive dictation from Congress and the bureaucracy in Washington.

The order from Congress that a group of U.S. students studying abroad be admitted to medical schools was the specific issue that touched off the deans' revolt at the annual convention of the Association of American Medical Colleges. But this was merely the straw that broke this particular "camel's" back.

Cynics, of course, will say that the medical school deans want the impossible. The deans welcome the rich flow of federal and state millions that make the medical schools' operations possible, but they don't want the pipers who pay the bills to call the tunes to which the schools must dance.

Tried Hard

This assessment is probably overly harsh. The medical schools have tried hard to meet the social demands put upon them this last decade and to give good value for their money.

Thus in the last 10 years or so, for example, the nation's medical school enrollment and the annual number of U.S. physicians graduating have roughly doubled. So efficiently and quickly has the production of doctors been raised in this country that Prof. Eli Ginzberg of Columbia University's Graduate School of Business warned the medical school officials here that a staggering surplus of doctors is just over the horizon. By the early 1980s, Prof. Ginzberg estimated, this country will have many more doctors relative to population than any of the world's other industrialized nations that are trying to give their citizens first-class modern scientific medical care.

The medical school leaders feel that they have served the nation well in other areas as well. They have substantially increased the number of minority and women medical students, even at the cost of giving the former preference over some highly qualified applicants who happen to be of the "wrong" sex or race.

The medical research accomplishments of the country's medical schools have already made the United States far and away the world leader in the fight against disease and death. The record of Nobel Prize-winners in medicine since World War II is, to an amazingly great extent, primarily a list of individuals who have taught at, or been trained by, or who have done their research at U.S. medical schools.

The Demands

What drives the medical school deans besides themselves, however, is the constant evidence they see that, no matter what they accomplish, those who control the monetary strings in Washington and in the state capitols are never satisfied and keep on posing ever more demands, many of them frequently mutually contradictory.

Some of the anger of many of the deans is directed at particularly powerful governmental figures who are seen as having a dangerous taste for meddling in medical school affairs to an extent far beyond those individuals' knowledge and competence. In Washington, Sen. Edward M. Kennedy, D-Mass., is often named in this connection. In New York State, the man most often blamed is D. Kevin Cahill, Gov. Carey's chief adviser on state medical policy.

Finally, the medical school patience is being tried beyond endurance by the proliferating labyrinth of laws and regulations that Congress and the bureaucrats have spewed out in an effort to control medical care costs and to impose government control over the future growth of the U.S. medical system. Whatever the original intent of Congress, this infinitely complicated web of regulations and laws always seems to entangle the medical schools most and to threaten very seriously both their autonomy and their ability to do their job.

Timidity

It is a symptom of the timidity of the medical school deans that when their revolt against bureaucratic oppression finally erupted these last several days it was not over any of the great issues that really endanger the future of U.S. medical education, but on the minor issue of the relative handful of Americans studying abroad.

Congress has directed the medical schools to admit these students after two years of foreign study if the individuals involved can pass a certain specified international medical competency examination. These students and their parents are apparently the only group the medical school deans feel it politically wise to challenge openly. After all, this group consists of a relatively small number of people, the students involved are predominantly white and predominantly male, and they and their families are relatively affluent. In short, they don't have too few some a political "clout."

Official Commission Favors Australian Uranium Export

CANBERRA, Nov. 17 (Reuters).—A government-appointed commission here has mapped a whole new course for the Australian economy.

Australia appears ready to launch itself into the nuclear age as a purveyor of uranium, of which it is believed to have 21 per cent of the world's known reserves.

Most of them lie unexploited in Australia's Northern Territory, locked away by a government embargo on uranium mining and export.

Now a three-man commission, charged with deciding whether the environmental drawbacks of uranium mining outweigh the commercial advantages, has given a cautious go-ahead for a uranium boom to begin.

In terms of hard cash, the rewards are staggering, an estimated billion dollars a year in export earnings. Yet the decision is likely to have an even greater impact on the Australian economy.

On current projections, uranium exports will displace wool as Australia's major export earner in the years ahead. Under federal government guidelines, which require the industry to be 75-percent locally owned, they will return greater rewards than the rest of the mining sector, where foreign control runs to more than 60 per cent.

Up to Government

As yet, the proposals of the commission, headed by a little known Canberra Supreme Court judge, Russell Fox, are merely broad outlines requiring federal government ratification.

When the commission's 200-page report was produced—a second report still in preparation deals specifically with the Northern Territory reserves—it approved the mining and export of the huge reserves in principle, although only under stringent safeguards.

That was the news the Australian stock markets had been waiting for. Uranium stocks bounded ahead as investors rushed to cash in on what they obviously regarded as the green light to uranium development.

Spelling out the commission's recommendations, Judge Fox told newsmen, "The hazards of mining and milling uranium, if those activities are properly regulated and controlled, are not such as to justify a decision not to develop Australian mines."

The commission specifically recommended that no decision to mine or sell uranium be made unless the government could terminate the activities permanently or temporarily at any time. It said furthermore that Australia should sell the product only to nations that had signed the United Nations nuclear nonproliferation treaty.

The government, it said, should strictly regulate uranium mining development by setting up a permanent watchdog advisory council and, with an eye to the future, suggested it evolve an energy policy coupled with research into other forms of fuel and a program of energy conservation.

Some of the companies controlling the five major Australian deposits expressed readiness to begin mining next year, apparently in anticipation of favorable recommendations in the commission's second report.

Four of those deposits, which account for more than 300,000 tons of uranium oxide, are in the Northern Territory, where final approval for mining is seen as the only hope of dragging the area out of a recession caused by a slump in the beef industry.

The tropical territory, known affectionately as the "top end," comprises 18 per cent of the Australian continent, but due to its harsh terrain, hot climate and sparse population it has made a disproportionately small contribution to the nation's development.

Nothing's changed about Beefeater for over 150 years.

Some things you simply cannot improve upon. That is why, since 1820, Beefeater's secret recipe has remained unchanged. The same family has taken the same care in achieving the same unmistakable taste and inimitable character that makes Beefeater unquestionably the world's finest gin.

Beefeater from London. Unquestionably the world's finest gin.

Gallup Criticizes U.S. Press: 'Is Dirt-Digging Journalism?'

By Richard M. Weintraub

WASHINGTON, Nov. 17 (WP).—Pollster George Gallup, who has been sampling U.S. public opinion for more than four decades, has delivered some biting views on the U.S. press and on U.S. domestic and international news broadcasting.

Here are some examples:

● "I think we have credibility and that's important, but it's credibility for what end? I mean, what in the hell good is credibility if you don't go on to try to tell people what is good?"

● "I believe that if a foreigner, someone in Europe or Africa, read The New York Times every day, I'm not at all certain he wouldn't have a much worse opinion of the United States than he would otherwise—The Washington Post, you could put in [include] any paper."

● "I think in this era of investigative reporting and so on, his [a journalist's] job is digging out the dirt. I am not even certain this is good journalism."

Mr. Gallup's views surfaced recently after excerpts circulated within the Voice of America with a covering note from U.S. Information Agency director James Keogh saying that the pollster's approach to news deserves attention. The remarks were made during a meeting last February of the U.S. Advisory Commission on Information, a group of citizen advisers to the USIA and Congress appointed by the President.

Mr. Gallup, who serves as a public opinion consultant to the State Department on foreign attitudes toward the United States, was a professor of journalism and an advertising executive before he started the American Institute of Public Opinion in 1935.

The transcript of the meeting shows the pollster said that he found himself "at odds with most of the working journalists of today." Most journalists, he said, assume that "if it isn't bad news, it isn't news. That seems to be it."

Mr. Gallup said that in international broadcasting "we're trying, supposedly, to reflect the truth. Now I would argue vigorously that when you listen to a broadcast from the United States —and I would say this applies to all the services—you get a picture of the United States as a sort of crime-ridden country.

"You get a picture of a lot of chaos in the labor-management world. You get a picture of confrontation, political confrontation. You get a picture that is not a very good one and, I believe, would do far more harm than good. In fact, I've often thought, wouldn't people have a better opinion of the United States if they never listened one minute?"

Policeman and Bandit Die in Milan Shootout

MILAN, Nov. 17 (Reuters).—A policeman and an escaped prisoner were killed and another man was badly wounded in a battle between police and bandits in a Milan square today, police said.

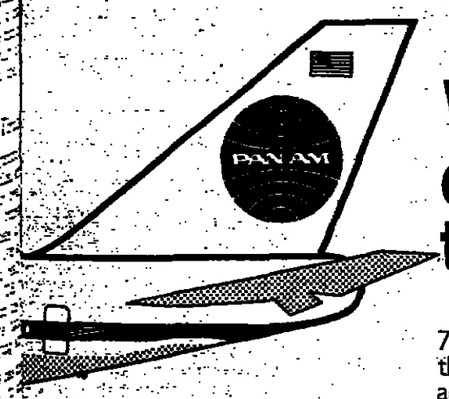
The battle began when a car being tailed by a police car stopped, four men jumped out and started shooting. Two of the men escaped.

Carter Objection On Brazil A-Deal Rejected by Bonn

BONN, Nov. 17 (AP).—Rejecting President-elect Jimmy Carter's criticism, West Germany yesterday reiterated its determination to conclude a multibillion-dollar nuclear deal with Brazil.

Foreign Ministry spokesman Klaus Terfloth said that Bonn and Washington agree on the principles of nonproliferation. He added that the Brazilian deal went beyond that, to include controls for technology, which he said were later adopted by other supplier-countries.

Mr. Carter said Monday that he would seek through normal diplomatic channels to abrogate the sale of plutonium reprocessing plants by the Germans to Brazil and by France to Pakistan.



Mr. Terfloth gave no indication that Germany would stop the supply of nuclear technology to Brazil. He said that in executing the Brazilian deal, Germany heeded the nonproliferation principles and that it would stick to them.

The nonproliferation treaty provides for the control of nuclear plants by the International Atomic Energy Organization. Beyond that, Bonn and Brasilia signed a pledge with the IAEO to include control of the nuclear technology which the Germans supply. Brazil also pledged to obtain permission from Bonn prior to re-exporting any of its German-supplied nuclear material.

Taiwan Party Chief

TAIPEI, Nov. 17 (Reuters).—Premier Chiang Ching-kuo, 66, was been re-elected chairman of Taiwan's ruling Kuomintang party.

Travel in style.

We are the last daily 747 flight to New York.

Every evening at 6.00pm a Pan Am 747 leaves London for New York. It is the last 747 to New York from anywhere in Europe.

Think about it. You can still put in half a day or more at the office before boarding your flight in London. And there are frequent connecting flights to London from major European cities.

You fly in true Pan Am 747 comfort. Dinner, with a choice of three entrees in Economy Class or the Upstairs Dining Room for First Class passengers (remember to reserve a table), is followed by entertainment*. There is a choice of two of the latest movies or eight tracks of stereo sound. And you arrive in New York, at Pan Am's own Worldport Terminal, at the right time for a good night's sleep ready to start the next day properly refreshed.

Next time you fly the Atlantic, ask a travel agent to book you on the last 747 flight of the day from London.

PAN AM
The world's most experienced airline.

*Regulations require a nominal charge for entertainment in Economy.

Expanding into Germany? Start at Rheinland-Pfalz, the "Crossroads Bank"

There are advantages in starting at the right place. And with the right bank.

Our location is ideal.

First, Mainz is part of the expanding Rhein-Main commercial complex – at the Crossroads of the German economy. Not only is this a sizeable market in itself, it is an ideal base for further expansion.

Second, we are at the gateway to the state of Rheinland-Pfalz. In this high-potential state you will find everything you need for expansion: you'll have sufficient labour, adequate energy supplies and a strategic location with direct access to Germany's and Europe's main transportation arteries. All that, plus a state government whose close co-operation with foreign businesses is reflected in measures which are specifically designed to benefit you and make your start easier. (They'll even pay up to 20 per cent of your investment.)

And with us as your bank you will have a reliable, well informed partner. Not only are we a highly respected, all-purpose bank (assets DM 16,000 million), we are also specialists in large, long-term loans – a practical combination for you.

Contacts will be no problem for you either. We have connections all over Germany. But in Rheinland-Pfalz we can be especially helpful since we serve as a central clearing bank for the 45 savings banks in the state.

Remember, one of the most important aspects of expansion is choosing the right location.

If you want to start at the Crossroads, talk to Rheinland-Pfalz, the Crossroads Bank.

Drop us a line. Or send us a telex. Our number is 4 187 885.

WEST GERMANY

Darmstadt's Three-Ring Art Circus

By David Iams

DARMSTADT, West Germany (IHT).—Darmstadt has opened a three-ring exhibition devoted to the art movement most visible here: Jugendstil, the German counterpart of art nouveau.

The show takes its name—"Ein Dokument Deutscher Kunst 1901-1976 (A Document of German Art 1901-1976)" from an exhibition here in 1901. It has three main parts, each with a different emphasis, in the three locations. But the city itself is part of the show, for there are few places where Jugendstil has left more of a mark.

Jugendstil, like art nouveau, was part of an applied art movement that swept Europe in the late 19th century. In England it was associated with the arts and crafts movement of John Ruskin and William Morris. In Germany it took its name from the magazine Jugend (Youth), which was founded in Munich in 1896 to propagate the new form.

A Synthesis

Whatever its name, experts associated with the exhibition agree, the movement was a conscious effort at creating a style of decoration by synthesizing art and life.

According to German critic Dolf Sternberger's introduction, "Panorama of Jugendstil," in the first of the exhibition catalogue's five volumes, the movement was influenced by Japanese art, which had been discovered by Europeans only a few years before. It was marked by "animation of surfaces, the cultivation of dynamic lines, the prevalence of ornamentation, fillings and recesses, the interplay between black and white, entwining borders, waves, curls and roots, the softening of the structural, lack of symmetry, curves, flowing, bending creatures..." The youth that gave Jugendstil its name, in turn, was equated with spring, freedom, innocence and novelty.

Darmstadt's homage to this wide-ranging, exuberant movement was put together by the city's cultural office and museums after a year's work and includes more than 1,300 pieces of furniture, utensils, ornaments, rugs, tapestries, paintings, sculptures, posters and books from all over Europe. The show, which drew more than 50,000 visitors in its first two weeks, runs through Jan. 30.

At the Hessische Landesmuseum, which has Europe's largest permanent Jugendstil collection, the 19th-century precursors of art nouveau and Jugendstil are displayed, plus classic examples of each style.

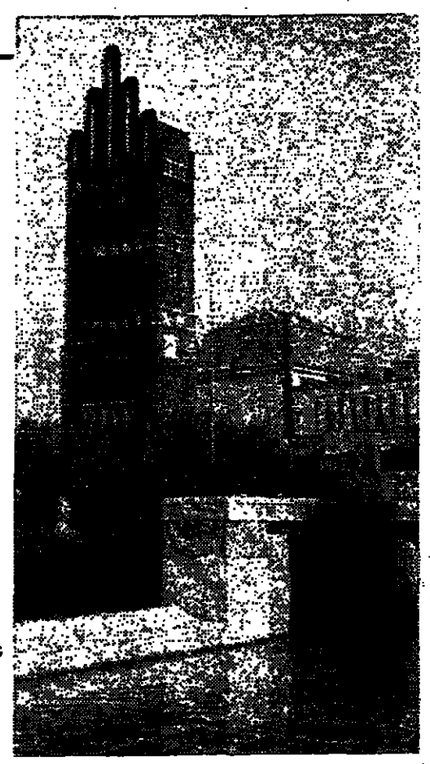
The museum's entrance, for instance, is arched by one of Hector Guimard's Paris Métro entries; underneath stands a 1908 Opel double phaeton. Inside are works by Morris, Henry Van de Velde, Carlo Bugatti and Richard Riemerschmied, to name just a few artists.

At the Kunsthalle, the movements in painting that developed in Germany parallel to Jugendstil from the turn of the century to World War I are followed. Among the 150 paintings and sculptures brought together for this part of the exhibition, subtitled "Academy, Secession and Avant-Garde," are works by Munch, Kandinsky, Kokoschka and Klee. (The Jugendstil movement was known as Secession in Austria.)

The third part of the exhibition is located at the Mathildenhöhe, a rise overlooking the ci', where there is an exhibition hall abutted by a five-pronged tower itself a striking product of the Jugendstil era here and a city landmark. The emphasis here is on the role Darmstadt played in Jugendstil.

History

There is a touch of Jugendstil's self-conscious purposefulness to the exhibition itself. Seventy-five years ago the Mathildenhöhe was the scene of the "Document of German Art 1901."



Hesse's last grand duke, Ernst Ludwig, wanted to make Darmstadt a cultural center comparable to Berlin or Munich. In 1899 he established an artist's colony on the Mathildenhöhe with seven charter members, most of them in their twenties. The best known of them was the Austrian architect and designer J.M. Olbrich, a founding member of the Vienna Secession.

The seven were given land on the Mathildenhöhe. In return, Ernst Ludwig expected to see them not only develop a national art style to counter French and English influences, but also to revitalize the local handcraft production of goods that would be attractive but cheap.

After a successful debut at the German pavilion of the 1900 Paris World Exhibition and building an atelier on the Mathildenhöhe, the colonists presented the first of four exhibitions here. The 1901 "Dokument Deutscher Kunst" featured the houses built for the artists, mostly designed by Olbrich, plus their furnishings.

The original colony began breaking up the next year, although new members joined and Olbrich stayed on until 1908, designing the exhibition hall and tower where this part of the exhibition is now showing.

The current show displays many of the articles created by the colony. The biggest single display is a complete office, including wood-paneled walls, designed by Hans Christiansen, one of the original seven. There is furniture, tableware and ornaments: a piano by Olbrich, a pair of women's laced leather boots, also by Christiansen. In addition, there are models of the Mathildenhöhe colony as it appeared at each of the exhibitions, as well as how it looks today.

The Hochzeitsturm at the Mathildenhöhe, one of Darmstadt's Jugendstil landmarks and site of part of the retrospective show.

MUSIC IN LONDON

Rejoicing and Regretting With Harry Belafonte & Co.

By Henry Pleasants

LONDON, Nov. 17 (IHT).—There was cause for both rejoicing and regret as Harry Belafonte returned to London after an absence of 18 years last night to open a short stay at the Palladium and wind up a world tour that has kept him and his "international company" on the road for the past nine months.

There was, to begin with, the rejoicing, the format—or most of it. None of the now so commonplace and exasperating wait until after the intermission to welcome the star. Belafonte was out there right at the rise of the curtain, launching immediately into a sequence of those reflective, melancholy and wistful ballads which have been a Belafonte specialty for a good quarter of a century.

In dress, movement, gesture and facial expression, too, he was very much the Harry Belafonte of old, lithe, graceful and mercurial as ever. And there was all the old charm when he spoke, as he did, eventually, and rather too much.

He remained on stage for most of the show, withdrawing from time to time to make way for his assisting artists, a delightful, voluminous percussionist and singer named Paluni Prince and Rhetta Hughes, a singer from Texas who did not quite reach the heights of the introductory hyperbole.

There was further cause for rejoicing in the work of the backing band, Kilimanjaro, and a small vocal group playing and singing highly sophisticated arrangements by Belafonte and the band's director, Bob Freedman, providing immaculate and discreet support in a variety of idioms ranging from pop gospel through calypso to Africa. The sound system, too, was examplary.

If the evening seemed to run downhill from that ballad opening, it was partly because there were no more ballads to speak of and partly because too many of the uptempo, novelty set pieces, either alone or with his associates, were allowed to outstay their welcome. This was most conspicuously the case with a ghastly sing-along at the end, with gallery pitted against balcony and balcony against parterre on "Matilda," a Belafonte calypso hit back in 1953, with Belafonte holding forth endlessly in some kind of Pakistani dialect.

It would be a pleasure to add that the Belafonte voice is as unblemished as the Belafonte body. It isn't—or at least it wasn't last night. If his hoarseness was not a passing indisposition, he needs a long vocal rest.

Greek Jeweler Goes Back To Prehistory for Ideas

By Hebe Dorsey

PARIS (IHT).—When Ilias Lalaounis says "diamonds are a girl's best friend, he means it—but not in the usual way.

He says jewelry has a talisman value. "People are attracted to certain stones and certain shapes by deep rooted, animal instincts. People were once so attached to their jewels that they even wanted to be buried with them."

Mr. Lalaounis, who just opened shop in Paris (at 364 Rue Saint-Honoré), is a gentle, fifty-ish Greek jeweler, whose family have been watchmakers and jewelers for four generations. He is known to the general public for his colorful animal jewelry (rams, horses and snakes), inspired by Greek mythology, which he designed for Zolotas, his cousin and former partner.

During the 1960s, this jewelry was widely copied. The originals were status symbols—Jackie Onassis wore them, often a ring on each finger.

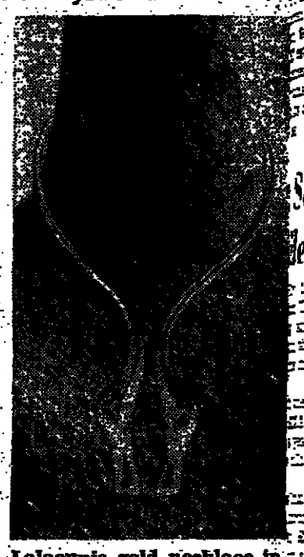
Boutiques

Since 1979, Mr. Lalaounis has been on his own. He has opened 10 boutiques in Greece, five in Switzerland. He will soon open in New York.

His success has been an inspiration to his countrymen. Today there are 20,000 jewelers in Greece, as opposed to 2,000 in 1960. About two-thirds of their production is exported. Mr. Lalaounis estimates that the value of Greek jewelry sold each year is around $100 million.

He launched his Paris branch with a collection of 340 models inspired by prehistoric tools. "Jewelry must follow general trends," he said, in his handsome beige-silk and brown-suede Paris locale. "People are now looking for roots and going back to ways of life outside the modern rushed tempo."

While designing his prehistoric line, Mr. Lalaounis spent a lot of time at the French archaeological museum in Sant-Germain-en-Laye, as well as in Greek museums. He also has an extensive library.



Modern Looking

The resulting pieces are starkly simple and, despite their inspiration, look like the best of modern abstraction. "Art was born," he said, "when man, creating the tool, created the object.

"All prehistoric instruments are made to human measure and can be grasped by the hand of man," he continued. "From what was once an extension of the hand, we have made an ornament for the hand."

Copying a prehistoric arrowhead found in Australia, Mr. Lalaounis designed a sober necklace. Another piece was inspired by a harpoon. He also has some animal jewelry but this time he took as model the animals on the walls of the Lascaux caves. The symbol of this collection is a violin-shaped pendant, a stark rendition of a goddess of fertility.

Since he went out on his own in 1970, Mr. Lalaounis has done a collection a year. The most famous was his rich Byzantine line, followed by his bio-symbolic (resembling what you see through a microscope) and a "movement in space" line (symbolizing outer space with gold and precious stones).

Lalaounis gold necklace inspired by cave paintings in Dordogne, France.

Persian Ms. Pages —$1.25 Million

LONDON, Nov. 17 (UPI).—Seven pages from a 16th-century Persian manuscript sold for a record $1.25 million today in London.

The seven folios from "one of the most sumptuous manuscripts ever created"—seven of a total of 759 originally in the manuscript—brought prices "which exceeded everyone's expectations," a spokesman for Christie's said.

The manuscript is the Houghton "Shah-Name," owned by Arthur A. Houghton jr., a former president and chairman of the Metropolitan Museum of Art in New York.

A London dealer paid a world record £280,000 for the first page—"The Death of Zahhak." Christie's said this was an auction record not only for a Persian manuscript but for any Persian work of art. The "Shah-Name" had 258 miniatures.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

CONSTRUCTION overseas and U.S.A.
Architectural and Construction management company with extensive projects in Mideast seeks top people for New York city office and overseas projects.
Career Opportunities in New York
Technical Assist. to V.P. of Construction Services. Registered Architect with 10 to 15 years architectural, contract and project admin. experience Some overseas experience preferred.
Overseas Personnel Coordinator. 5 years experience in personnel recruiting and related personnel experience. B.A. in Personnel or Psychology desired. Some overseas experience preferred.
Mid-East Assignments
Candidates for following positions should have 5 to 10 years experience in commercial, university, hotel or multi-family construction projects.
Resident Managers - B.A. in Architecture or Civil Engineering. Project management experience required.
Resident Architects - B.A. in Architecture. Extensive field, design and administration.
M/E/P Engineers - B.A. Engineering. 5 plus years overseas building construction experience.
Construction Managers - B.A. desired. Minimum 5 years mgt/supervisory experience.
Overseas assignments include housing, transportation, annual leaves, shipment of household goods and liberal benefit package. Prior overseas experience strongly preferred, especially in M.E. or developing countries. Send confidential resumé with complete salary history to:
Box D.5,566 Herald Tribune, Paris.
An EEO Employer M/F.

RF Communications Division
Communications Professionals
International Opportunities with Harris
RF Communications is a steadily growing division of Harris, a diversified, decentralized electronics company with volume now passing the half-billion level. Our division is a leader in the design, development, and sales worldwide of two-way radio communications systems and equipment. These are available career openings:
AREA SALES MANAGERS (Europe, Africa, Mid-East Far East)
You will take responsibility for marketing in a designated geographic area. Activities will include dealer review, education, training and assistance; customer proposal preparations and negotiations; market planning and forecasting; and development of sales strategies. Requirements include a broad technical background, BSEE or equivalent, and a minimum of 5 years successful marketing and sales experience, preferably in communications systems.
OVERSEAS SITE MANAGERS AND ADMINISTRATORS
Take total management responsibility for large communications systems, including contract negotiation, installation, maintenance, and customer support. In-depth experience is required with UHF, VHF, HF, and tropo systems, plus pertinent administrative abilities and background.
FIELD SERVICE TECHNICIANS
Assume responsibilities for installation and maintenance of two-way communications systems, and customer training and liaison. Thorough knowledge of HF, UHF, VHF and SSB equipment is preferred. These positions offer room to broaden and further develop skills, and have advancement potentials.
Please send resumé, with salary data, in confidence to:
Personnel Department, Harris Corporation,
RF Communications Division, 1680 University Avenue,
Rochester, New York 14610.
HARRIS COMMUNICATIONS AND INFORMATION HANDLING
An Equal Opportunity Employer M/F

Worldwide Swiss Company
is seeking a
Graduated Engineer in Mechanics or Electricity
for its Agency in MOSCOW
We offer:
- An interesting job in technical Administration and Sales Promotion;
- Possibility to make career in an international company;
- Free flat and free car;
- Home leave.

Required are:
- Engineering background;
- Commercial/management experience;
- Fluency in English, Russian, would be an asset;
- Age: 25-35; single or married without children.

If you are interested in this challenging position, please send your resumé to:
Box D 5,565, Herald Tribune, Paris.

DIRECTIONAL DRILLING SUPERVISORS
EASTMAN WHIPSTOCK needs experienced Directional Drillers for assignments in Europe, Africa and Middle East. We are also looking for Drillers/Tool Pushers with offshore experience to train as Directional Drillers. Package includes annual leave or rotation, schooling, medical, housing and/or living allowance, pension, profit sharing, guaranteed monthly bonus.
Send details of experience, age, family status and references in confidence to:
Larry Holt, Vice President
Eastman Whipstock (UK) Ltd.
389 St. Margaret's Rd. Twickenham TW1 1PP, England.

For Our Equipment Leasing Operations in
EUROPE
We Require An Experienced, Multi-Lingual
CREDIT and COLLECTIONS DIRECTOR
A broad spectrum of commercial credit and collections background in Northern and Western Europe, and fluency in English, German, and French are major qualifications. You will join a large, American-owned leasing company, and travel from a base in Amsterdam, one of today's most attractive cities. Reporting to the Director of Finance, this position involves supervision of a staff of 8 persons.
INTERVIEWS IN EUROPE OR U.S.
Please send resumé detailing experience and language ability, including salary history, in confidence. Convenient interviews will be arranged.
Box D 5,554, HERALD TRIBUNE, PARIS.

a challenging management opportunity for an experienced
VALVE & PIPING ENGINEER
Reporting directly to Vice President Engineering & Research, this key management opening requires a valve specialist from near the top of the industry. While compensation will relate to experience, it can be made sufficient to attract an engineer already holding a senior position and perhaps hesitant to move.
Company: a long established, significant manufacturer of valves, head office in Italy, selling world-wide, being an independent subsidiary of a progressive American multi-national group. Products: gate, globe, check, pressure seal, butterfly & cone etc., 2½"-40", thru 2500 lbs, to ANSI and all main standards, plate fabricated and cast in steel alloys, iron and bronze with applications in the oil/petrochemical, power generation (steam & nuclear), industrial processing, water & sewage distribution and marine industries.
Basic requirements: a candidate's general engineering capability and proven ability to design new valves, modify/improve existing designs, run a drawing office and coordinate customer field service while working in Italian & English will be the main factors under assessment. Design knowledge of any valves outside the present range would be a plus. Age open but 35-55 is envisaged, relocation to northern Italian head office is necessary and can be assisted; some travel but probably less than 10%.
Position: to work initially with the Vice President restructuring and strengthening the Engineering & Research Department of about 80 people and then to assume total responsibility for one or more sections as finally restructured. Prospects are excellent and the opportunity to participate in the formation of new departmental operating conditions is unique. Exploratory confidential responses are welcome, however, prior to interviews a typed C.V. & photo covering personal details & studies, company/work history & salary progression plus telephone contact should be submitted to the consultants handling this recruitment in English & Italian.
Reply quoting. IHT 104 stating the nearest airport/city convenient for interview to:
MOBILEPLANTMEN

EXECUTIVES AVAILABLE
PURCHASING MANAGER
16 years experience with American multinational companies in widely used consumer products (confectionery, food, hygiene), pharmaceuticals, ethical & hospital products. Fluent: English, French, Spanish, Arabic. Seeks position in France, Belgium, Spain or Greece.
Write for C.V.:
Box D. 5,563, Herald Tribune, Paris.

EXECUTIVES AVAILABLE
TECHNICAL SALES/LIAISON ELECTRONICS
French, 53. Fluent technical English. Just back from the U.S. seeks position with Paris-based multinational co. Accepts travel. Available now.
Write: Box D 5,562, Herald, Paris.

INTERNATIONAL MANAGER
Swiss American, 44, multilingual, outstanding record of achievement in accounting, finance and general management, currently in Switzerland as Managing Director U.S. manufacturing company's subsidiary operating EEC, faced with gradual retreat of group from Europe, seeks challenging activity with multinational group out of Europe.
Write: Box D 5,564, Herald Tribune, Paris.

VICE PRESIDENT - MANAGER
US citizen, Wharton MBA, mid-thirties, with commercial and banking experience. Seeks more responsible management position with U.S. industrial firm in Germany or U.S. 8-years overseas experience, primarily in Europe, strong management, sales, finance, personnel, and public relations background. Excellent knowledge of all aspects of business in Eastern Europe as well as in Western Europe and the Middle East. Proven success. Good commercial, banking, and government contacts. Fluent German as well as French and Spanish.
Write to: Box D, 5,568, Herald Tribune, Paris.

GENERAL MANAGER
15 years proven record of international industrial marketing and sales management. Expert in cost reduction, sales promotion, profit minded Self starter, ideal for foreign subsidiary set-up and management. Italian, 40, engineer, five languages.
Box 535, Herald Tribune, Via Della Mercede 55, 00187 Rome - Italy.

apan Studying Ways o Meet EEC Demands

KYO, Nov. 17 (Reuters).— ness leaders and government ficials here are working on to satisfy European Com- Market demands for a cut- in Japan's exports and an ease in imports to reduce its rade surplus, a government esman said today.

overall export pruning pro- is expected to be presented e community before the EEC nit meeting starts at the e on Nov. 29, he added.

e major outstanding problem een Japan and the Common ket is the community's de- d that Japan, the world's st shipbuilder, reduce its uction program to 4 mil- metric tons a year by 1980, spokesman for the Ministry nternational Trade and In- y said.

was speaking after four days h-level trade talks in Brus- which ended yesterday, dur- which community commis- r Finn Olav Gundelach also ided cuts in Japanese ex- of cars, steel, electrical ap- es and ball bearings.

e Finance Ministry today an- ed a trade surplus of $1.14- in October, with exports 6 per cent from the same th last year to $6 billion while rts increased by only 10 per

e latest Trade Ministry es indicate the surplus could to over $8.2 billion in the financial year ending next h. Japan's surplus in trade the Common Market is ex- d to reach $4.2 billion, ac- ing to EEC estimates.

major Japanese argument in nse of criticism of its large is that its deficit on invi- such as shipping and tourism this year is expected to amount to $6 billion.

Some $2 billion of this is likely to go to the Common Market, with Britain taking $1.5 billion because of the activities of the London financial district.

The Trade Ministry spokesman today described as "unfair" the demand that Japan keep its share of the British car market to below 10 per cent. But he said he hoped Japanese car exporters would comply because of the delicacy of the problem.

Points to Others

He said other car-exporting nations should also be asked to curb their sales in Britain, and cited ministry figures showing that while Japan's share of the British car market had risen slightly to 9.7 per cent so far this year from 9.3 per cent last year, the total share of the British market taken by imports had increased to 27.5 per cent from 24.8 per cent.

Japan has already agreed to voluntary export restraints for steel and has given assurances that ball-bearing exporters would raise their prices, following European charges of dumping.

A Transport Ministry spokesman said it would be impossible for Japan's shipbuilding industry to go beyond its plan to cut production in 1980 to 6.5 million tons, or about one-third of the country's existing capacity of 19 million tons.

The Common Market demand for a cutback follows accusations by European shipbuilders that Japan obtains most of the orders for new ships by undercutting European prices.

Would Get Half

The spokesman said the 6.5-million-ton figure would give Japan half of the expected world demand for 1980 of 13 million tons.

The remaining share is being cut into by new competition from countries such as Brazil, South Korea and Taiwan.

On the import side, the Trade Ministry spokesman said it was reviewing non-tariff barriers criticized by the EEC.

Reduced import duties on whisky, chocolate and ballpoint pens were under consideration, as well as increased imports of processed EEC goods like meat, cheese and biscuits, he said.

But he stressed there was a limit to how much imports could be increased until the quickening pace of Japan's economic recovery boosted demand for imported goods.

FINANCIAL NEWS AND NOTES

Du Pont Sees Lower Net in Quarter

Du Pont's fourth-quarter net income will be "somewhat under $2 a share," compared with $2.87 a share earned in the period last year, said Irving Shapiro, the company's chairman. Fourth-quarter net would be affected by continued weakness in the man-made fibers business and foreign exchange losses, particularly those resulting from recent devaluations of the Mexican peso, he says. Earlier this week, the company declared a year-end dividend of $1.75 per share on common stock that included the normal $1.25 quarterly dividend and an extra 50 cents a share. The payment will bring total Du Pont dividends for 1976 to $5.75, or $1 higher than total 1975 dividends. Mr. Shapiro says that Du Pont's business is thriving in products other than fibers and that 1976 earnings from the non-fiber business are expected to fall into the $8.50 to $9-per-share range.

Union Carbide Cuts Profits Projection

Union Carbide Corp. says that earnings for 1976 will be "somewhat less" than had been projected at the end of the third quarter, due to continued sluggishness in domestic and most foreign economies. Carbide had predicted that 1976 net would be up about 20 per cent based on "an anticipated fourth-quarter improvement in business." In 1975, the company earned $6.23 per share. Through the first nine months of 1976 Carbide earned $5.46.

Toyota, GE in Technical Pact

Japan's Toyota Motor and General Electric Co. of the United States have reached a basic agreement on technical links in various fields, Toyota Motor Sales Co. Ltd says. Details of the arrangements are left for further discussions, Toyota adds. The Japanese firm already has a tieup with GE in the marketing of GE air conditioners and refrigerators in Japan. Toyota declined to comment on a press report that it will supply its metal surface processing and metal pressing technology to GE. Yomiuri Shimbun reported the U.S. firm is expected to supply Toyota with technology on large-scale integrated circuits, mini computers and fine chemicals.

Louisiana Land Buying Copper Range

Louisiana Land & Exploration Co. intends to acquire Copper Range in a transaction valued at about $50.3 million. Under preliminary terms of the anticipated agreement, Louisiana Land would issue 1.9 million shares, to swap 0.825 share of its common for each of the 2.3 million outstanding Copper Range shares. The merger proposal comes almost exactly two years after Copper Range and Amax Inc. announced merger plans. Amax, a big diversified metals producer, would have issued about $51 million in stock for 80 per cent of Copper Range. (Amax already owned the remaining 20 per cent.) The Justice Department, however, objected on the ground that it would diminish competition in the copper refining business, and a federal court barred the merger late last year. Besides its refinery, Copper Range operates an underground mine and other copper processing facilities in northern Michigan. It also has fabricating operations and runs a lumber business. Louisiana Land conducts exploration for nonpetroleum minerals—mainly coal, copper and other minerals associated with copper deposits—but this is not a major part of its business, which is the exploration and production of oil and natural gas.

But Aides Say It's Only a Matter of Days

OPEC May Postpone Oil Price Parley

By Clyde H. Farnsworth Jr.

PARIS, Nov. 17 (NYT).—The Organization of Petroleum Exporting Countries is considering postponing a crucial oil-price meeting next month at which increases have been predicted that could aim a new blow at the world economy.

"There is nothing definite yet," said Kanayo Nwuwa Ozoeene, assistant secretary-general at OPEC's Viennna headquarters. "It is a political decision that must come from the ministers."

It was learned that Mohammed Sadli, Indonesia's minister of mines and hydrocarbons and current president of OPEC, is attempting to determine the position of other cartel members on deferral of the meeting.

The activity reflects mounting pressure on OPEC in the face of strong opposition to any price increases by the United States and other Western nations.

Yet more telling on any eventual decision may be the equally strong but less publicised pressure on OPEC from non-oil-producing Third World countries in the negotiations now under way between rich and poor countries to reform world economic structures.

Deferral would not mean OPEC has renounced price increases, but it would remove the threat for several months—time enough for OPEC to gauge progress in the rich-poor dialogue and assess the position of President-elect Jimmy Carter. Furthermore, OPEC could not be blamed for any further deceleration of the world economy.

Increase Opposed

Oil-price increases have been predicted at anywhere from 5 to 40 per cent. Last Friday the United States said no rise at all was justified, and served notice that it would be working with other industrial consumer nations to try to get OPEC to see reason.

Quietly, but forcefully, at the Paris-based North-South forum, the non-oil Third World countries, led by India, have been letting OPEC know of their own anxiety about further price boosts.

Evidence that they have been hitting sensitive OPEC nerves has come with the revival of the idea of a dual pricing mechanism under which Third World consummers would get oil cheaper than the industrial countries.

Saudi Arabia's Abdel-Aziz al Dukheil, who sits on the OPEC finance committee, said it might be possible to "waive something regarding oil prices" for the Third World. OPEC has so far considered dual pricing to be unworkable.

But there is an additional element in the year-end maneuvering now under way. If the industrial countries themselves are hit by new oil-price increases, intensifying their own inflation and unemployment, the willingness—and political ability—to make concessions to the Third World at the Paris talks would be much reduced.

Slight Postponement

[OPEC will definitely hold a price-fixing conference in Qatar next month, but possibly a few days later than originally planned, OPEC officials said today, according to Reuters.

[Sources said the possibility of a slight postponement was raised to avoid a clash of dates with the 27-nation Conference on International Economic Cooperation, due to start a ministerial session in Paris on Dec. 15, the date of the OPEC talks.

[OPEC is strongly represented in the nine-month-long Paris conference, where oil producers and consumers are trying to develop a new economic policy intended to be fair to both sides.]

But Still Opposes Carter 'Quickie'

Burns May Support U.S. Tax Cut

By Leonard Silk

NEW YORK, Nov. 17 (NYT).—Arthur Burns, chairman of the Federal Reserve Board, has let it be known that he does not necessarily oppose a tax cut and would even be willing to support one to improve the economy's performance and reduce unemployment—provided that it was the kind of tax cut that Mr. Burns thought would do the job.

The type of cut that he appears to favor would be broad-based, such as the one passed by the Democrats in 1964. That action reduced personal income tax rates, which had ranged from 20 to 91 per cent, to a range of 15 to 70 per cent. It also cut the general corporate income tax rate from 52 to 48 per cent.

But such a tax cut, even if it were held forth as a future promise rather than an early reality, would impose a new restraint on the Carter administration, as Mr. Carter's economic advisers see it. They are concerned that the surrender of tax revenues over the longer run might impose restraints on social expenditures, get in the way of more fundamental tax reform and even frustrate Mr. Carter's hopes of producing a balanced budget by the end of his four-year term.

Mr. Carter's closest advisers are increasingly urging an immediate tax cut in the form of a per capita tax rebate on 1976 taxes, which they contend would give the economy a boost without sacrificing future revenues.

Differences of opinion over tax cuts between the conservative Mr. Burns and Mr. Carter's liberal economic advisers have become a major subject of national economic debate. It began with the testimony of Mr. Burns before the Senate Committee on Banking on Nov. 11. Mr. Burns appeared to be attacking any effort by the incoming Carter administration to stimulate the economy by either tax cuts or spending increases. "Traditional policies of economic stimulation," he said, "might well be counterproductive."

Mr. Burns subsequently said his views had been misinterpreted, and that he was not trying to oppose Mr. Carter or to court conflict with the new administration, but rather was seeking to cooperate with it and to help the incoming President. He said he was only trying to warn against excessive government spending to spur the sluggish economic recovery.

Mr. Carter then said that he had received Mr. Burns's pledge of cooperation and felt that they would "find a substantial degree of compatibility." It is not known in what detail Mr. Burns's views on fiscal and monetary policy have been conveyed to Mr. Carter, but several of his leading economic advisers are well informed on Mr. Burns's current views.

The focal point of the policy controversy now is over whether, how, and how much to reduce taxes to stimulate the economy.

Mr. Burns says that he believes a "quickie" tax cut in the form of a rebate would probably do nothing to help the economy and might even hurt it. But the thinking among Mr. Carter's advisers is that it could not do harm and might constitute a form of necessary "pump priming" to get the economy's output flowing again.

Mr. Burns sees no need for haste with an immediate tax cut. He believes that it might shake business and public confidence, and be counter-productive, if it increased inflationary expectations.

Income Rises For Americans At Faster Pace

WASHINGTON, Nov. 17 (AP).—Increases in the pay and benefits for federal employees helped push up the growth of personal income in the United States at a faster pace in October, the government said today.

The Commerce Department said personal income grew at an annual rate of $10.2 billion, or 9.2 per cent, to $1,401.9 billion. That contrasted with an annual growth rate of $6.2 billion, or 5.5 per cent, in September.

On a per capita basis, the department said personal income for October climbed to an annual rate of $6,502, up 7.8 per cent from the year-ago month.

Burns, OPEC Reports Boost N.Y. Stocks

NEW YORK, Nov. 17 (IHT).—New York Stock Exchange prices maintained upward momentum in moderately active trading today.

Analysts attributed the higher close mainly to the market's oversold condition, but they said some of the strength was also due to a report suggesting Federal Reserve Board chairman Arthur Burns might favor a tax cut to stimulate the economy.

The Dow Jones industrial average was up 2.74 points to 938.08, after being up almost 5 points earlier.

Volume totaled 19.9 million shares, compared with 21 million shares yesterday. At the final bell, gainers topped decliners by about 960 to about 460.

After some early weakness, the market reversed course and moved higher on news that the Organization of Petroleum Exporting Countries may postpone next month's meeting in Qatar.

Oil stocks were again among the advances, with Exxon rising 3/8 to 50 1/8, Phillips Petroleum 1 3/4 to 58 7/8, Continental Oil 1 3/8 to 36 7/8 and Natomas 1 1/2 to 32 7/8.

Occidental Petroleum advanced 1/2 to 18 5/8. The government of Venezuela cleared the way for a $25-million compensation payment to the company for assets nationalized last year.

RCA was up 1/8 at 24 3/8. The U.S. government said it is dropping an anti-trust suit against the firm's NBC unit.

IBM rose 3 3/4 to 267 1/4 and Data General 3/4 to 45. Digital Equipment was up 1 at 52 1/4 and National Semiconductor 3/8 at 25 7/8.

TWA, which reported an October profit compared with a loss last year, rose 1/4 to 11 1/2.

Soybean futures continued to lead most commodity futures higher on the Chicago Board of Trade, closing with a gain of 21 1/2 cents a bushel.

Soybean meal prices advanced just over $5 a ton, but soybean oil closed mixed. Corn futures were up 4 cents a bushel in nearby options but the most distant December contracts lost 1 1/2 cents. Oats were up nearly 1 cent, but wheat futures closed 6 1/2 cents lower.

Soybean Output Seen Off

WASHINGTON, Nov. 17 (Reuters).—World soybean production in 1976 is forecast at 59.7 million metric tons, down nearly 10 per cent from 1975's record output but still the second highest on record, the Agriculture Department reports.

Exxon Said to Miss Target With No-Broker Bond Issue

NEW YORK, Nov. 17 (AP-DJ).—Exxon Corp. apparently failed to achieve two major goals in its novel $55-million sale of tax-exempt bonds directly to the public, market sources said today.

The oil giant awarded the 5.8-per-cent bonds at a price of 99.45 to yield about 5.84 per cent in 30 years. A minimum bid of $100,000 was required and 97 separate proposals totaling $198.3 million were submitted.

Nearly 72 per cent of the entire $55 million issue, which will be used to finance pollution-control equipment, was snapped up by four leading investment banking firms—indicating a lack of the broad investor distribution desired by Exxon, the sources maintain.

Intense interest had built in the sale because of an implied threat to another profitable source of Wall Street's business. Many securities firms already are experiencing a pinch on their capital because of the inauguration of negotiated brokerage commissions and a loss of their lucrative underwriting fees—which Exxon saved by going directly to the public—would cause a further financial strain.

Exxon's innovative sale, sponsored by its new financial executive, Jack Bennett, posed such a danger. Securities officials fear the direct offering ultimately might be adopted to the vast amounts of stocks and bonds issued by Exxon and other giant corporations.

The relatively hefty $100,000 minimum purchase in the Exxon bonds enabled the brokerage firms to purchase blocks of the bonds for reoffering in smaller amounts to their own clients.

"Essentially all the bonds wound up in the hands of a very few Wall Street firms so the retail customers got shut out completely," one source asserts. "In effect, Exxon had to settle for the narrowest sort of distribution, which now must be achieved in the traditional manner by those four or so winning bond houses," he adds.

Nor did the oil company obtain a significantly lower interest cost by sidestepping the usual underwriting process, in the opinion of several leading finance officials. "I honestly believe that the . . . interest cost set in this direct sale is almost exactly the same rate our firm would have charged to underwrite the bonds in a regular offering," declared one banker who obviously has a stake in maintaining that regular sales method.

U.K. Aide Urges World Help To Finance Sterling Balances

By Hobart Rowen

WASHINGTON, Nov. 17 (WP).—A high British government official, after a visit with President Ford, said here yesterday that the proposed $3.9-billion International Monetary Fund loan to Britain would be insufficient to stem a run against the pound.

Harold Lever, Chancellor of the Duchy of Lancaster and financial adviser to Prime Minister James Callaghan, said that unless there is international financing of Britain's $10 billion worth of external debt in pounds sterling, there could be no stability in the exchange rate.

That debt, commonly known as the "sterling balances," is held in about equal part by governments and private citizens outside Britain. In the past year, these holders of sterling have been unloading their pounds, helping to drive down the exchange rate.

Various ways of defusing the sterling balances have been suggested. Most of them involve a guarantee by other powers of some specific value of the pound. If it dipped below that level, the guarantors would make up the difference.

The idea is that with such a guarantee, most holders would be content to hang on to their pounds which earn a high rate of interest in London.

He said financing of the sterling balances would not only benefit Britain, but since it would promote stability, it is also in the best interest of the nations which would put up the money for a guarantee.

Mr. Lever said he had told President Ford, Treasury Secretary William Simon, and other officials of the outgoing administration that in his view, "this problem must be dealt with straight away, so that we're not dealing piecemeal with British problems."

Mr. Simon said, when informed of Mr. Lever's comments, that he still though it "premature" to talk about financing the sterling balances "without a full knowledge of the total dimensions of the problem."

In a telephone interview, he also said that he would be discussing the IMF loan and the British economic situation with Mr. Ford in the nex few days.

To Get 'Sympathetic Hearing'

LUXEMBOURG, Nov. 17 (Reuters).—Britain will get a sympathetic hearing from its Common Market partners if it requests financial backing to shore up its sagging economy and steady the pound sterling, Dutch Foreign Minister Max van der Stoel said today.

Mr. van der Stoel, current president of the EEC Council of Ministers, told the community's European Parliament that the Nine "have received no request from the United Kingdom for financial short-term or medium-term assistance, neither has the (EEC) commission submitted proposals to that effect."

But he said the Nine were ready to consider any U.K. approach, once its negotiations for a $3.9-billion IMF loan had been completed.

BankAmerica Adopts Code On Information Disclosure

NEW YORK, Nov. 17 (Reuters).—BankAmerica Corp. said today it has established a comprehensive voluntary disclosure code for giving the public access to information about its corporate and financial activities.

It said under its new code it will provide information on "problem loans" when "widespread public concern exists about a particular industry."

The holding company of the nation's largest bank also said it will disclose data on its market and bond services, international syndicated loans, management of corporate flow of funds and trust department services.

The code also requires it to disclose deposit and loan figures by major currencies, the effects of foreign exchange trading and translation profits and the dollar volume of credits to non-consolidated affiliates and institutions in which it has investments.

BankAmerica said the code requires it to provide a breakdown of its loans, including consumer loans, commercial and industrial loans and foreign loans.

Information on non-performing loans for which initial contractual terms are not being met will also be disclosed, it said. The bank will disclose its 10 largest holdings of municipal bonds and notes and details of defaults, extensions and moratoriums.

The bank will also disclose debt and equity holdings in companies exceeding $1 million.

Canada's Output Off

OTTAWA, Nov. 17 (Reuters).—Canada's seasonally-adjusted index of industrial production fell 0.1 per cent in September from the previous month to 120.5, Statistics Canada said today.

ENDESA - CHILE

220 KV NORTH TRANSMISSION LINE PROJECT

PREQUALIFICATION OF CHILEAN AND FOREIGN TENDERERS

The Empresa Nacional de Electricidad S.A. (ENDESA) intends to invite tenders for the construction and equipment supply of the 220 kv north transmission line project at the beginning of 1977.

The project is located along approximately 630 km north of Santiago, Chile.

The following should be the intended contracts:

L.N-1: Supply and construction of the Cerro Navia-Pan de Azucar 220 kv transmission line (Santiago-La Serena, approx. 630 km), double circuit, including Cerro Navia control building and switchyard civil works, and equipment installation.

L.N-2: Supply and construction of the Pan de Azucar-Maitencillo 220 kv transmission line (La Serena-Vallenar, approx. 200 km) single circuit, including Pan de Azucar switchyard civil works, Maitencillo switchyard and control building civil works, equipment installation and supply of the equipment for switchyards and control buildings at Cerro Navia, Pan de Azucar and Maitencillo.

The contractors will also be required to finance the cost of designs, equipment, materials, manufactures and works included in the corresponding contract.

Foreign contractors must participate for the construction works in joint ventures with technical and managerial participation of Chilean contractors, registered in ENDESA'S contractors register. The project must be completed during the first half of 1980. Specifications and drawings will be given only to those who will submit the complete prequalification information required with supporting evidence of having successfully completed works of a similar nature and can demonstrate that they have the resources, experience and organization to carry out the works.

Prequalifications requirements are available from November 22nd, 1976, on application to:

Mr. Luis Court, Casilla 1392, Santiago de Chile.
Price: 440 Chilean Pesos(U.S. $40).

Prequalification requirements may be obtained by post (send money order) or at Santa Rosa 76, Santiago de Chile, from 9 a.m. to 11:30 a.m. Monday to Friday.

Deadline for receiving the completed questionnaire is January 10th, 1977.

AGRICULTURAL INVESTMENT OPPORTUNITY WITH U.S. COMPANY

World's largest grower of «early» peaches and major soybean grower with extensive orchards in Florida and plantations in South America offers safe, profitable participation plan. You own the land, we plant, farm, harvest, build processing factories, sell your crop, pay you solid return. Guaranteed returns first 3 years of 10%, 10¼% and 10½%. Fourth year earnings vary between 15 and 20%. Company 10 years old. Record of 20 consecutive lease payments to investors. While you earn this high return, your land is also growing in value. Multi-million dollar company, top D & B rating, currently working with thousands of satisfied investors the world over.

For further details, write to PUBLICITAS, H-118008, 1211 GENEVA 3, Switzerland.

AMC Offers Rebate On All New Pacers

DETROIT, Nov. 17 (Reuters).—American Motors Corp. said yesterday it is offering a customer cash rebate of $353 on all new 1976 and 1977 Pacers delivered out of dealer inventories beginning today through Jan. 10 to further stimulate the small car market which has responded "favorably" to the announcement of a similar price reduction on the Gremlin last week.

Sales figures are unofficial.
Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.
a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.
x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.
cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.
vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.
Year's high and low range does not include changes in latest day's trading.
Where a split for stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

10%
ANNIVERSARY ACCOUNT
At demand
Interest rate guaranteed for 10 years

Everyone can open an Anniversary Account
Finansbanken is Denmark's leading bank in foreign deposits. For more than ten years, depositors from all over the world have taken advantage of the high interest level in Denmark and the favorable investment opportunities Finansbanken offers. Finansbanken is subject to the strict Danish Banking Laws. The Anniversary Account is an easy, problem-free way of placing funds.

What are the advantages of the Anniversary Account?
- 10 % interest annually
- interest rate guaranted for 10 years
- withdrawals at demand.

Deposits and withdrawals can be made at any time. Capital and interest on foreign depositor's accounts are not subject to taxation in Denmark.
The Anniversary account is held in fully convertible Danish kroner. The Danish currency is a member of the joint European float — the »snake«.

Information about the bank
Total assets more than 1.8 billion kroner
Share capital, paid up 80 million kroner
Reserves 71 million kroner
Liability-capital deposits .... 100 million kroner
Liability-capital, total 251 million kroner
Number of shareholders .... more than 30.000
Number of branches 43

How to open an Anniversary Account
With the coupon below, you can ask for an application form and further information covering the Anniversary Account and other attractive investment offers from Finansbanken. Upon receipt of your application form and first deposit we shall send you our receipt and confirmation for the new account.

Send this coupon to Finansbanken to-day

"Printed in Great Britain"

BOOKS

BLUE SKIES, NO CANDY.
By Gael Greene. Morrow. 288 pp. $7.95.

BEAUTIFULLY KEPT
By Barbara Condos. Warner Books. 287 pp. $1.75.

Reviewed by Anatole Broyard

IT WASN'T simply sex, Kate Alexander says to her current lover: "I was just being free." This is only one of a long list of objections that I have to Gael Greene's novel, "Blue Skies, No Candy." After thousands of years of political and social evolution, this is what freedom has come to mean, not only to Kate, but to a growing number of other women as well. To sleep with any man who excites her curiosity is represented as the ultimate expression of personal choice.

Kate is talking not about love, but about sex, although she sometimes confuses them. And one thing "Blue Skies, No Candy" *inadvertently does is to show us*, ad nauseam, what a circumscribed affair sex is when it is stripped down to nothing but the act itself. I am surprised that someone with a computer has not worked out all the permutations and combinations of sexual gesture and response and published them in their pitiful nakedness.

Even Kate's fantasies, or her lovers', never seem to reach beyond a bit of stereotypical sadism or masochism. After all the hard-earned sophistication of her people—their endless experimentation, comparing of notes, making of scenes all over the world—their fantasies still sound like Krafft-Ebing in a Classic Comics translation. Their assumption of ultimate expertise reminds me of the small-time horse player poring, with "the physiognomy of astuteness," over a racing form.

As you read "Blue Skies, No Candy," the question of psychopathology inevitably arises. How large a part can sex reasonably be supposed to play in an intelligent, talented and busy woman's life? If it upstages everything else, can we go on believing that this woman is "normal," that she is not neurotically driven to persuade herself of one or the other cliché that attaches to sexual behavior? Is she any better, say, than an alcoholic or a heroin addict?

Pessimists have suggested that it is the aim of our runaway technology to reduce the qualitative to the quantitative. Certainly this is true of much of the new sexual technology. Kate, the narrator of "Blue Skies, No Candy," writes about wanting sex all the time as if it were a condition to be envied. Every once in a while she pretends to despair of her own inexhaustible hunger—she stands back and looks at herself with an incredulous smile—but this is just an inverted form of boasting.

"I sublimate all my creative energy into sex," a student once said to me in a short story writing class I taught. In explaining why she did not write any stories, she seemed to be unaware of the fact that she had just turned the formula upside down. Kate Alexander makes the same mistake. She is supposed to be a talented novelist, screenwriter, yet she chooses to produce orgasms rather than art. In a final, dawning demonstration of the idea of art, she implies that the two activities are not very different.

"Blue Skies, No Candy" is a D. H. Lawrence celebration of the still mysterious synapse between men and women, only closer to Pavlov's dog than to Lawrence's laboratory of brittle chi-chi brand names. The depression felt after reading the book is not only the result of seeing a subject as sensitive as sex abused, but also of watching Gael Greene waste an unmistakable talent for writing.

"Beautifully Kept," by Barbara Condos, is an entirely different affair. A documentary recreation of the lives of several prostitutes of very rich men, written by a woman who was admittedly one of them, this is a poignant and poignant look below the surface face of Kate Alexander's world. These women go through many of the same motions that Kate does, but they do it without pretension: it is their living. They are the true technologists of sex, skillfully and tirelessly adapting themselves to the needs of the men who keep them.

They take care of their bodies as carefully as any other professional athlete: It is their stock in capital. Exercises, cosmetic operations, physical overhaul—all they battle constantly against time—and against the specter of boredom. Not only the fear of losing their "owners", who always demand novelty to fill the void left by the absence of love, but also boredom with themselves. In a sense, a professional mistress is a reductio ad absurdum of the existentialist: She must live each day as if she expected tomorrow, because there is no tomorrow in her life, just more of the same until she is too old to be sold and she can liquidate her jewels instead and sit on her nest egg.

If no man is a hero to his valet, he is even less than that to his mistress, for in many cases he pays her to suffer the scene he is ashamed to show to anyone else. His naked ego is even more loathsome to her than his undressed, middle-aged body. Unlike Kate Alexander, the mistresses in "Beautifully Kept" do not claim or even aspire to be heroines: They are survivors, mechanics of sorts whose job it is to keep a part of our social machinery in working order. Loneliness, self-contempt and suicide are often the chief occupational hazards of their job, but at least they have one important consolation: They do not have to lie to themselves.

It is ironical that "Beautifully Kept" is a paperback original while "Blue Skies, No Candy" is published in hardcover. I cannot derive an interesting generalization from this, but I will leave it to you to supply your own.

Anatole Broyard is a book reviewer for The New York Times.

BRIDGE — By Alan Truscott

Suit combinations are the building blocks of bridge, and many players feel that they know all they need to know about them once they are out of the beginner stage. They are wrong, however, for even experts are constantly finding new wrinkles in old combinations. Take this familiar situation:

NORTH
♠ Q654
SOUTH
♠ A1032

You need three tricks from this suit, and there is no hope of four. Should you cash the ace and lead to the queen? Lead to the queen and if it loses play the ace? Lead to the queen and if it loses finesse the ten?

Oddly enough, all these plays are equally good, and offer a 50-per-cent chance. The ace-play is desirable, because the declarer is slightly less likely to wind up with only one trick.

But put the eight and seven in the closed hand, as in the diagramed deal, and the picture changes completely. Now there is a right and a wrong play for three tricks, as the mathematically inclined reader may conclude after a 30-minute pause for analysis. And there is also a faint chance of making four tricks—by leading the queen and hoping for a singleton jack with West.

Six diamonds is a borderline contract for North-South, and was reached in this case after some slightly eccentric bidding by North. West led a trump, and the declarer recognized that sooner or later he must try for three spade tricks. Barring some unlikely development, such as the club ace coming down in two or three rounds, all the tricks are needed, so an end play is hardly feasible.

After drawing the missing trump, South's choice in spades lies between the play of the ace and a lead to the queen. Analysis shows that the two plays offer equal prospects if the suit splits 3-2. The ace-play is better if East has a singleton K-J-9, but worse if West has a void or a singleton nine.

As the cards lie, the choice is crucial. The play to the queen will lose, because South must finesse the ten on the next round with unfortunate results. Nobody could be expected to work out at the table the advantage of playing the ace first, which turns out to be about 60 per cent. So the declarer must rely on his intuition. He can cash the ace of spades and collect the jack on the next round to make the slam.

Yankee Catcher Voted AL's Best

By Murray Chass

NEW YORK, Nov. 17 (NYT).—Thurman Munson, the captain and most productive hitter on the first Yankee team to win a pennant in 12 years, yesterday became the first Yankee in 13 years to win the American League's Most-Valuable-Player award.

The voting for the award, which once seemed perennial Yankee property, was dominated by the New Yorkers, with competition coming only from the Kansas City Royals, the league's other division champion.

Munson, who batted .302 and drove in 105 runs, led a trio of Yankees who finished among the top five. He received 18 of a possible 24 first-place votes and a total of 304 points. Mickey Rivers was third with one first-place vote and 179 1/2 points, a half-point ahead of Rod Carew of Minnesota.

George Brett of Kansas City, the league's batting champion, placed second with two votes for first and 217 points, and two of his teammates finished among the top seven. Hal McRae was fourth with one first-place vote and 58 points.

Fidrych Placed 11th

Carew and Mark Fidrych, Detroit's rookie pitching sensation, received one vote apiece for the top spot. Fidrych placed 11th in the voting.

Munson, who received nothing lower than a third-place vote from the Baseball Writers Association panel (two writers from each league city), is the first Yankee and first catcher in the league to win the award since Elston Howard was named MVP in 1963.

When Howard was named, it marked the 10th time in a 14-year stretch that a Yankee had won. Yogi Berra, another catcher, and Mickey Mantle were named MVP three times apiece. Roger Maris won the award twice and Phil Rizzuto once in that period.

Although Munson had fervently hoped he would win this year's award and felt he deserved it, he wasn't certain he would get his wish.

"You know, I'm not going to win it on popularity," the catcher said a few hours before the award was announced. "So if I win it, you'll know I deserved it."

More Mature

Munson, who was the league's rookie of the year in 1970, alluded to a reputation he had built up in his first years in the majors as a player who could be discourteous and sometimes just plain nasty to interviewers. But this season he matured in his relationships with people other than his teammates and friends. At the same time, he maintained a batting prowess he had exhibited in 1975.

"I don't feel my season this year was as good as last year's," the 29-year-old Ohioan said. "I think it was super in the respect that we won the pennant, and defensively my season was better. But offensively, last year I had a hell of a year."

In 1975, Munson batted .318 and drove in 102 runs for a third-place team. He finished seventh in the MVP balloting that was won in a landslide by Fred Lynn of Boston.

Munson, however, received a lucrative four-year contract and also the title of team captain, the Yankees' first since Lou Gehrig.

World Cup Soccer

Italy Tops England, 2-0, in Rough Match

ROME, Nov. 17 (UPI).—England suffered a setback today in its effort to reach the World Soccer Cup finals when it was defeated by Italy, 2-0, in a crucial qualifying match at the Olympic Stadium.

England never really got going and the Italians pressed the way.

Italy striker Giancarlo Antognoni scored in the 37th minute of the first half after a free kick just outside the England penalty area.

Attacker Fabio Capello feinted as he was about to take the kick, which was passed by Franco Causio to Antognoni. Antognoni's shot at the goal was deflected by England striker Kevin Keegan but went into the net despite a dive by goalkeeper Raymond Clemence.

The second Italian goal was made in the 33d minute of the second half when Roberto Bettega headed the ball into the goal from a pass by midfielder Romeo Benetti.

Players from both sides were kept falling by hard tackling, elbowing and punching. But with the roar of 85,000 spectators behind them, Italy never was serious trouble.

There will be a return match between England and Italy at Wembley next year.

The victory put Italy atop the World Cup European Group II standings with four points out of two games played. England also has four points, but out of three games played. Finland has two points in three games and Luxembourg no points.

Italian Fouled

The game began to get rough after the first 10 minutes when defender Roy McFarland fouled Italy attacker Francesco Graziani.

The 24-year-old Torino player lunged at McFarland, but referee Abraham Klein stepped between the two men.

In the 13th minute, defender Michael Mills passed a high shot to striker Michael Channon, who headed it toward the Italian goal, but goalkeeper Dino Zoff pushed the ball out.

The really hard tackling and fouling came in the second half with an England team desperate following Italy's first-half score.

England showed its first concerted attack in the 11th minute of the second half when McFarland crashed into Graziani for the second time, knocking him down. Graziani lay on the ground for a moment as the crowd screamed, whistled and set off firecrackers.

In the 15th minute of the second half, Romeo Benetti flattened McFarland and, as he rolled in agony on the ground, the crowd yelled its approval.

Last-Minute Attack

Referee Klein later had to warn Channon and Italy striker Antonello Cuccureddu for kicking and elbowing.

Four minutes after Italy's second goal, England manager Don Revie tried to put in a strong attack by substituting midfielder David Clement with Kevin Beattie on the left wing. But Beattie was heavily marked by Roberto Bettega, and his two runs down the wing faded under Italian attack.

England could not take advantage of its 10 corner kicks to Italy's 4. Four of England's corners occurred in the last five minutes of the game.

Italy trainer Enzo Bearzot was jubilant afterward.

"At first we had trouble finding the space to get through," Bearzot said. "But after the first goal, everything was sufficiently easy. The English seemed almost ill at ease."

Credit Is Given

Bettega, told in the dressing room that the BBC correspondent covering the game called his goal "really fantastic," said: "The merit in such cases is always to a great extent of the player who made the cross. Romeo [Benetti] was very good."

Bettega said that, after being hit in the head with the ball, his vision was clouded in his right eye.

Revie, who had predicted a 1-0 England victory, said afterward, "I suppose a 1-0 victory for Italy would have been a fair result. They were very lucky with that first goal because it flew off Kevin Keegan into the net.

"Who knows what would have happened if he had not deflected it? It may have even gone wide of the goal," Revie said.

Revie said that the first Italy goal "came at a bad time for us," but that the second one was "very good—exceptional."

Of England's chances now, he said, "We are not in the driving seat now. It is up to Italy. We are relying on Finland to take a point off them. Then our job will be easier on the return leg in England next year."

France 2, Ireland 0

PARIS, Nov. 17 (AP).—France defeated Ireland, 2-0, tonight in a hard-fought World Cup qualifying match, winning three points from two matches in their efforts to reach the 1978 finals in Argentina.

E. Germany 1, Turkey 1

BERLIN, Nov. 17 (AP).—East Germany and Turkey battled to a 1-1 draw in their Group III World Cup qualification match today in Dresden.

The crowd was disappointed by the mediocre showing of the Olympic champion East Germans, who had been rated favorites in the first-leg encounter.

Oakland Players

ree Agents Tenace, Baylor gn With West Coast Clubs

OVIDENCE, R.I., Nov. 17).—The expected chaos in ball's bidding war for free ts was absent yesterday in signings of two former Oakl A's players by other West st clubs.

atcher-first baseman Gene ace signed with the San o Padres of the National gue while outfielder Don er went with the California els of the American League. aseball "superagent" Jerry nstein announced multi-year racts for the power hitters eparate afternoon news conces. He said that neither of two much-sought-after playwanted to get involved in a ter situation."

pstein said that he expected ee more signings to occur tly, "but I can't say when or re."

gels' general manager Harry on considered the signing of or a reunion because in the s Dalton had the speedy outer with the Baltimore Orioles. his is a somewhat frenzied d in our business. Obviously it e first time all of us in this ness have walked down this cular road of available free ts at the height of their ague career," Dalton said. e of us knew what to expect there is more to follow."

said there was obviously a of pressure on the players competing clubs, "but it smoothly and very well, in faith. It was never put up as a bidding contest: 'Come nd do this or do that.'"

h representatives have been up at Kapstein's Providence e for two weeks since the 's re-entry draft. He repre- 10 of the 22 players who me free agents this fall.

ree officials, working to owner Ray Kroc's pledge of ing a world championship n Diego, started negotiations Tenace on the day of the

Kapstein said there was e interest by a lot of clubs se "Gene Tenace is the underrated, overlooked player in the major leagues in the last three to four years."

Kapstein refused to reveal financial terms in either case, but said each player will be with his respective ball club "for the foreseeable future."

The free-agent signings were the second and third since the draft two weeks ago. The Boston Red Sox earlier signed relief pitcher Bill Campbell, formerly of the Minnesota Twins.

NFL Buccaneers Attract Davis For Next Season

NEW YORK, Nov. 17 (NYT).—Anthony Davis is going to play football again for his former coach, John McKay. Davis, who was a star running back at the University of Southern California under McKay, signed yesterday to play for the Tampa Bay Buccaneers of the National Football League next season.

Davis had to buy his contract from the Toronto Argonauts of the Canadian Football League, and said it was "in the best interest of my career" to buy his way out of the Toronto contract. He had a reported $10 million, five-year contract, but played only one season. "I didn't feel my talent was exploited. I touched the ball only four times a game from a rushing standpoint," he said.

The runner rewrote the record book for the Trojans, following in the footsteps of O.J. Simpson, another McKay protégé. Davis surpassed Simpson's career rushing total with 3,724 yards on 784 carries and returned 40 kicks for 1,361 yards and six touchdowns.

Ron Wolf, Tampa Bay's vice-president of operations, and Davis's agent agreed to the 1977 contract. NFL rules prohibit a player from the Canadian league from playing in the NFL in the same season. Davis will not even be allowed to practice with the Buccaneers this year.

Maravich Adds Some Punch to the NBA Jazz

NEW ORLEANS, Nov. 17 (UPI).—Pete Maravich has not only one of the best right-handed jump shots in the National Basketball Association, he also has one of the best right-hand jabs. The NBA's No. 2 scorer finished as the game's top shooter and leading puncher in helping the New Orleans Jazz to a 100-98 victory last night over the Portland Trail Blazers.

With 2:37 remaining in the second quarter and New Orleans leading, 45-40, Maravich got into a fistfight with Portland guard Dave Twardzik. Maravich landed a right to Twardzik's mouth and drew a punching foul, but remained in the game.

"It was an emotional game," Maravich said. "It had to be because we play three division leaders in four games this week and you've got to win at home."

Maravich complained to referees Jake O'Donnell and Ed Middleton several times before the fight that he was being fouled by Twardzik and the 6-5 Jazz guard even stopped play once to show the officials a scratch mark on his arm.

Twardzik, a 6-1 guard in his fourth year from Old Dominion, finished the night with 12 points and two broken teeth.

"We took him from here right to a dentist," said Ron Culp, Portland's trainer. "He broke two teeth. I don't think it'll do him any permanent damage or anything like that. It just hurts, that's all."

Culp said he was unable to tell whether Twardzik broke his teeth in the fight or earlier in the game when he was hit with an elbow by Jazz forward E.S. Coleman.

Maravich finished with a game-high 35 points and a personal career high of 15 rebounds despite spraining an ankle shortly after the second-quarter fight.

"The trainer put a castlike thing on my ankle and it limited my mobility," Maravich said. "It affected my shooting. I missed seven or eight straight shots at the end and if I had made them the game wouldn't have been close."

Spurs 114, Braves 112

At San Antonio, Larry Kenon dropped in two free throws with two seconds remaining to give the Spurs a 114-112 victory over Buffalo.

John Shumate hit a layup with 10 seconds remaining to put the Braves within two points, 113-110, until Kenon hit the insurance free throws for the Spurs.

Kenon finished with 25 points, 14 rebounds and three steals to lead San Antonio in every category as all eight Spurs seeing action scored in double figures.

The victory was San Antonio's fifth straight in a six-game home stand and improved its record to 7-6, while Buffalo dropped to 7-5.

Knicks 100, Hawks 97

At New York, Bill Bradley hit a long jumper with 1:27 left and Earl Monroe and Walt Frazier sank six free throws in the final nine seconds to lift the Knicks to a 100-97 victory over Atlanta and extend the Hawks' road losing streak to 26 games.

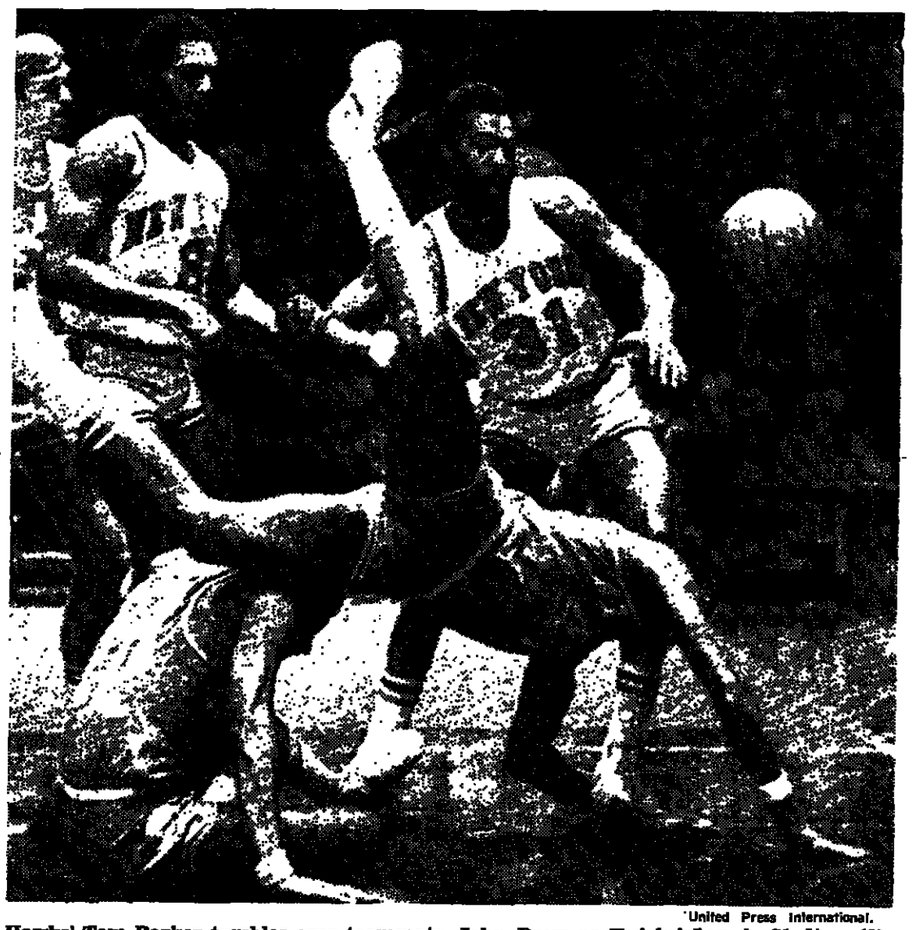
Bradley's running one-hander from the left corner gave New York a 94-93 lead. Monroe then sandwiched four free throws around a basket by Atlanta's Ken Charles, who scored 23 points, and Frazier hit two free throws with a second remaining after the Hawks' Tom Barker cut the margin to 98-97.

Frazier topped the Knicks with 26 points and Monroe scored 20, while Bradley had 8 of his 10 points in the fourth quarter. Tom Henderson scored a season-high 27 points for Atlanta, whose coach, Hubie Brown, was ejected from the game for two technical fouls.

Warriors 110, Sonics 102

At Oakland, Rick Barry scored 33 points, dished out 10 assists, and set an NBA record of 60 consecutive free throws while powering Golden State to a 110-102 victory over Seattle.

The victory was the second straight for Golden State, while Seattle suffered its 11th straight road loss, dating to last season.



Barry made eight consecutive free throws before missing on his ninth attempt. He erased the previous NBA mark of 58 in a row by the Houston Rockets' Calvin Murphy.

Kings 100, Bucks 91

At Omaha, Kansas City outscored Milwaukee, 15-5, early in the final quarter and went on to defeat the Bucks, 100-91.

The two teams entered the final period with the Kings holding a 73-72 advantage. Glenn McDonald hit a jumper from the corner to give the Bucks their last lead of the game, 74-73, with 11:44 left.

It was all Kings for the next four minutes. Scott Wedman hit three baskets and his three-point play at 9:20 put the Kings up 86-78. A jumper by Mike Barr stretched the Kings' lead to 10 and the Bucks couldn't close that gap.

United Press International.
Hawks' Tom Barker tumbles over teammate John Drew as Knicks' Lonnie Shelton (8) and Mel Davis go after the loose ball during Tuesday night's action in New York.

To Meet Houston or Texas Tech

Cotton Bowl Attracts Undefeated Maryland

By Mark Asher

WASHINGTON, Nov. 17 (WP).—The Cotton Bowl beat the Orange Bowl to the telephone and landed Maryland for its Jan. 1 game in Dallas against the Southwest Conference champion, it was learned yesterday.

The invitation is contingent on Maryland, 10-0, defeating Virginia, 2-9, in Saturday's regular-season finale in Charlottesville, Va.

Maryland athletic officials have said they would accept the first major bowl bid offered and they stuck to their word.

Upon being informally tapped by Cotton Bowl officials, Maryland in effect agreed to accept a bid when official invitations are offered at 6 p.m. Saturday.

Under NCAA rules, bowls and schools are not allowed to make commitments before that. But it is common practice, a business necessity, for the bowls and schools to show their "feelings." And it was common knowledge in the bowl industry last night that Maryland indicated a feeling for the Cotton Bowl's $975,000 plum. It would be the Terps' first major bowl appearance in 21 years.

The Cotton Bowl bid would benefit Maryland financially and prestigiously. According to Atlantic Coast Conference guidelines, Maryland would collect $125,000 off the top of the $975,000 pot and 40 per cent of the remaining $850,000 for a total of about $485,000. The other six ACC schools would be paid 10 per cent each, or $85,000.

"It's parity," said Maryland promotions director Russ Potts last week when asked what a major bowl bid would mean to the Terps. "Penn State goes out and tells a recruit, 'Look where we played on New Year's Day; where did Maryland play?' That is parity for us. That's the way we look at it."

Orange Bowl officials, who considered Maryland their No. 2 choice behind Pittsburgh to meet the Big-Eight representative, had hesitated. They wanted to await Pitt's decision, see how the five-way tie in the Big-Eight unfolds and to consider the Big-10 and Pacific-8 runners-up. (Pitt has opted for the Sugar Bowl.)

Earlier, an Orange Bowl source told the Washington Post that his group was fearful Maryland would take the first major bowl offered and that the Cotton would jump. His fears were realized.

The Cotton Bowl also had a dilemma. Wilbur Evans told the Washington Post on Monday that Pittsburgh, Maryland and Michigan were his bowl's top three choices. It became evident late Monday that Pittsburgh had been locked up by ABC-TV for the Sugar Bowl.

Michigan would go to the Rose Bowl by beating Ohio State on Saturday. That left Maryland as the most likely foe for the winner of Saturday's Houston-Tech game, which will all but decide the Southwest Conference representative.

The positives apparently outweighed the negatives on Maryland. A Houston-Maryland match might be a tough ticket sell, but the prospect of matching unbeaten Texas Tech against unbeaten Maryland on New Year's Day with an outside shot at the No. 1 national ranking for the winner was enough to live with that possibility.

It was the bowl that Maryland wanted. The Terps wanted their best shot at moving up in the rankings that have downgraded them all season. After last Saturday's games, Maryland's order of preference apparently was: Cotton, Sugar, Orange.

But athletic director Jim Kehoe said the Terps would not be choosey, taking the first major bowl that called.

Fernandez Retains Title

BILBAO, Spain, Nov. 17 (UPI).—Spaniard Perico Fernandez retained his European lightweight boxing championship, winning a 15-round decision over challenger Giancarlo Usai of Italy.

United Press International.
IN ACTION—Valery Kharlamov (17), the Soviet hockey star who was seriously ed in an auto collision in May, scores in a match between Army and the Wings.

HL Flyers Shut Out Red Wings, Barons Tie Kings

ADELPHIA, Nov. 17 (UPI).—Orest Kindshattered a scoreless tie with 2:05 to go ght with his fifth goal of the season as the elphia Flyers beat the Detroit Red Wings 2-0. rachuk angled a 15-foot shot into the net. lifted goalie Eddie Giacomin with 19 s left although it had Al Cameron in the box. The Red Wings had the advantage eoff at the time in the Flyers' end.

Bobby Clarke delivered the puck to Mel an, who scored the second goal into the net with seven seconds remaining in the game. Kindrachuk also got an assist on the goal.

At Inglewood, Calif., Gary Simmons turned in a spectacular 37-save performance in the net for Cleveland, but Los Angeles' Rogie Vachon was just as effective in making 31 stops as the Barons and the Kings fought to a 0-0 tie.

It was the second scoreless tie of the NHL season and the first shutout for each goalie.

The Kings bombarded the Cleveland goalie frequently, but Simmons was up to the occasion each time, including two shorthanded breakaways by Butch Goring midway through the second period.

Art Buchwald

Another Woodstock

WASHINGTON—The word has just been passed that Jimmy Carter is inviting 300,000 to 400,000 campaign workers and friends to his inauguration in Washington, D.C. Naturally, those of us who live in the capital are thrilled to hear that so many people will be coming here on Jan. 20. There will not have been anything like it since Woodstock.

Buchwald

I believe Mr. Carter's decision to send out so many invitations proves he doesn't know Washington at all. We really don't have that many hotels in the area. We can handle an American bankers' convention, and we just manage to accommodate the Daughters of the American Revolution when *they come to town every spring*. But when you talk about housing and feeding 300,000 or 400,000 people from all parts of the country, *Mr. Carter is going to have* a problem.

Even if he uses the indoor swimming pool and the Oval Office *for sleeping quarters, I can't* see him able to put up more than 10,000 people at the White House. Since the weather forecasters are *predicting a very cold winter, not* too many supporters will want to camp on the Mall or the Capitol steps.

Of course, Mr. Carter could open up the federal building and invite people to sleep there, but that would mean displacing thou*sands of federal employees who* are sleeping in them already.

There may be an effort on the part of the Carter inaugural committee to ask Washington residents to take people into their homes. I'm not sure now what kind of reaction they would get.

* * *

I called up Sen. Bob Dole and asked *him if he would be willing* to take in any guests coming to the Carter inauguration, and he hung up on me. Henry Kissinger *said that, unfortunately, Nancy* was redecorating their house in Georgetown, and they wouldn't have any room. The Fords said *they would be packing at the* time and couldn't take anyone in, and Teddy Kennedy *told me he* would be happy to put someone up, but, unfortunately, he has only one bedroom.

Even if we could find rooms for everybody, the question is how could we feed them? There are only 15 Kentucky Fried Chicken stands in all of Washington, 18 McDonald's hamburger outlets, 17 Burger Chefs and 12 Hot Shoppes.

The only experience Washington has had with handling so many people at one time was when the veterans of World War I came to town during the Hoover administration to protest their lack of bonuses, and Gen. MacArthur was ordered to drive them out of town.

In recent years we've dealt with mobs—during the Nixon administration thousands of students came to Washington to protest the Vietnamese war. Attorney General John Mitchell handled the problem by rounding everyone up, arresting them and locking them up in the R.F.K. stadium, which can't handle more than 51,000 people at one time.

Whether Mr. Carter would want to go to this extreme to handle his guests is something I don't know.

* * *

We admire the President-elect *for wanting so many people to* come to his inaugural, but we question his judgment in not thinking through what it will do to the town. We have about four places that can handle inaugural balls, so the majority of people will have to dance in the streets, possibly in the snow.

I'm not predicting trouble, but I believe Mr. Carter's first act as president may have to be to call out the National Guard on Jan. 20 and declare Washington a disaster area.

Every president has a right to have the inauguration of his choice, but Mr. Carter may have bitten off more than he can chew if everyone he invites to his swearing-in *agrees to come*.

If the President-elect decides to go ahead with it, I think he should pardon John Mitchell and make him chairman *of his in*augural committee. Mitchell may not have cleared the streets of Washington legally, but at least *he got the job done*.

Being Rich in West Germany

Some millionaires have acquired their money recently. Others, like Prince Johannes von Thurn und Taxis, have always been rich: 'One doesn't have to estimate the value of a thousand-year-old fortune.'

By Craig R. Whitney

REGENSBURG, West Germany (NYT).—Some of them have always had it. Some of them lost all of it in World War II but have made it back again. Some of them have acquired it only recently. All of them have trouble keeping it.

They are the West Germans with wealth. They have acquired and preserved it by a combination of hard work, a bit of luck and a conservative approach to business and politics.

Some of the same families that were rich before the Nazis came to power in the early 1930s are rich again. Others owe their wealth to the postwar "economic miracle," their fortunes built in such new enterprises as mail order houses, textiles and electronics. Whatever the source, the wealthy—among them 20,000 deutsche mark millionaires, worth $400,000 or more—are less an elite social class than an expression of the economic health of the country.

Fourth Highest

Per capita income is the fourth highest in the world, behind only the United States, Sweden and Switzerland. The average industrial worker makes about 11 deutsche marks an hour, not much less than the American average. The poorest third of the population of 57 million get 11 per cent of personal income; in the United States the figure is eight per cent, according to a recent study published in Paris.

Some of the millionaires inherited their money, an example being Prince Johannes von Thurn und Taxis, who lives on the top floor of a huge castle—with its own Roman Catholic chapel and a *glittering mirrored ballroom—in this eastern Bavarian* city. Others created theirs out of nothing—like Alfred C. Toepfer, an 82-year-old businessman in Harrisburg who works 12-hour days and does not have cushions on the plain oak *furniture of his modest office*.

Some have had to defend their wealth, among them Hans Gerling, a cool, elegant insurance magnate in Cologne who nearly lost his family enterprise after a bank failed two years ago. Others have moved up the economic and social scale only since the war, displacing the self-perpetuating dynasties of the past—people like Axel Springer, sole owner of West Germany's largest publishing empire, who jets between his villas in West Berlin, Hamburg and Switzerland and whose newspapers, book-publishing houses and distribution enterprises took in $500 million last year.

Nearly all of the rich of West Germany went to ordinary public schools, and they send their children to such schools. Money is not a common subject of conversation; indeed, the Germans, wealthy or not, prefer such euphemisms as "means" or "substance."

What sets the rich off from the middle class in a rich country is the dimensions of their existence. Their homes are spacious villas instead of efficient apartments. Their ski *resorts are in Switzerland instead of Austria. Their summer* cottages are on islands in the North Sea or the shores of Lake Constance, not on garden plots at the outskirts of town.

While a few like to show off their wealth, some act ashamed of it and all are defensive and cautious, anxious not to lose what they have attained.

The West Germans are becoming more conservative—that is the way they are voting—and less eager for change in their lives than they were, say, 10 years ago. Wealth and the traditional virtue of hard work seem to go together still, even for the richest among them.

One of the richest is Prince Johannes von Thurn und Taxis, who is also one of those who have always had their wealth. "I have my art, I don't collect it," he said. "Some people collect Renoirs. I surround myself with ancestors."

The feudal and anachronistic castle his family has lived in since 1790 dominates the unspoiled city of Regensburg. The kitchen still feeds 320 needy students and charity cases every noon while the prince dines on the third floor, a gloved steward at attention.

A 50-year-old bachelor, the prince lives in his castle apartments eight months of the year. The rest of the time is largely devoted to yachting at a castle near Munich—"a place I inherited from my great-grandmother."

"We," the prince said, meaning his family, "invented the mail and got the monopoly on mail service for the Holy Roman Empire in the 15th century. Before that we were robber barons, pirates really, in northern Italy." The emperors and popes and the Prussian kings rewarded the family with titles of nobility and landed estates—and the land is why the prince is wealthy.

Land Wealth

His family was out of favor during the Nazi regime. After the war, its vast estates in Poland and Yugoslavia were seized by the new Communist governments there, and the money it had in West Germany became worthless. But land—more than *80,000 acres of forest* and farm in the southern part of the country—kept its value.

The family began anew after the war with that base, plus the Thurn und Taxis brewery in Regensburg and the Fürst Thurn und Taxis bank, with five branches in Bavaria—and eight castles. Building on the profits from the enterprises, the prince bought more tens of thousands of acres of cheap rice plantations in Brazil, forests in Canada and a series of precious-metals interests.

One of these, Art Wire, in Cedar Knolls, N.J., is a former jewelry business that now sells to the aircraft and electronics industries.

Cautious, careful management has built the fortune into one of the biggest in the world. How much is it all worth? "One doesn't have to estimate the value of a thousand-year-old fortune," Prince Johannes replied.

Those few of his 3,700 employees who come in contact with him address him as "Your Highness." The servants wear wigs and the ceremonial costumes of the Spanish court at the hunting parties held every fall; blue livery outranks red. *Once a year the prince holds a Christmas party for the staff*, but, one of the castle employees said, "You do not go to him unless you are bidden."

PEOPLE: *A Tempest in The White House*

It was a routine press briefing as far as President Ford's press secretary Ron Nessen was concerned. But Jody Powell, who will be Jimmy Carter's spokesman when he moves into the White House in January, was waiting in Nessen's office. It would have been presumptuous for him to have been in the briefing room, he said later. "You'll get me soon enough."

"Soon enough" wasn't good enough for some reporters who asked Nessen if Powell couldn't come to the briefing room for questions. A few minutes later, Nessen announced over the loudspeaker system that Powell "declines to come down and talk to you on the grounds that you've been fed once today and that ought to be enough."

Ron Nessen

. . . his offic

It wasn't. A posse of newsmen headed for Nessen's office. Despite a firm invitation to leave, the reporters began questioning Powell. One of them told Nessen to stay out of the conversation. That did it. Nessen blew his lid and began shouting, "This is my goddam office."

Tempers subsequently cooled and Powell continued to reply to questions for several minutes. "I very much appreciate the hospitality he (Nessen) offered," Powell said.

UPI.

Spanish Premier Adolfo Suarez leaped to his feet and applauded when the Cortes approved government reforms.

Vote Is 425 to 59

Cortes Passes Reforms, Paves Way for Election

MADRID, Nov. 18 (UPI).—The Cortes (parliament) today approved a bill setting up a Western-style parliamentary system in Spain.

The bill, the most important part of the government's program of democratic reforms, was passed by a vote of 425 to 59, with 13 abstentions.

The bill amounted, as many speakers in the three-day Cortes debate said, to the decisive step in dismantling the Franco regime. It was passed two days before the first anniversary of the death of Generalissimo Franco, who ruled Spain for 36 years.

The Spanish people will have to approve the reforms in a referendum scheduled for the middle of next month.

Free Elections

The new parliament will be elected sometime in the first half of next year in what is expected to be Spain's first free elections in more than 40 years.

Approval of the bill after an often tense debate was a victory for King Juan Carlos and the Cabinet of Premier Adolfo Suarez.

Against the advice of many opposition groups, they had insisted on presenting the reform through constitutional channels and having it approved by the Francoist-dominated Cortes, even though at that time the chances seemed to be against winning approval.

The majority exceeded the needed two-thirds by far. With 497 of the 531 Cortes members present at the vote, the government needed 330 votes for passage.

Sigh, Grin

Mr. Suarez, 44, gave a sigh, then broke into a wide grin and applauded the deputies as the vote was announced.

The ballot, like the debate, had many dramatic moments.

In the final roll call, a deputy voted "no," then added. "No, out of loyalty to July 18"—the date of the start of the 1936-39 civil war that brought Gen. Franco to power.

Among those voting "yes" was Nicolas Franco de Pobil, a nephew of the late dictator. Gen. Franco's brother, Nicolas Franco Bahamonde, 84, a deputy, did not attend.

Those voting against the bill included Jose Antonio Giron, a leader of the right-wing Falange movement and president of the 500,000-member Confederation of Civil War Veterans, which is planning a rally in central Madrid Saturday to commemorate Franco's death.

A majority of the 35 million Spaniards favored the passage of the bill, according to the results of an opinion poll commissioned by the government and released hours before the final vote. Spaniards support the democratic reform by a margin of better than 20 to 1, the poll said.

Passage of the bill was assured this afternoon when a powerful group of right-wingers agreed to a compromise on a contested key point of the bill.

A spokesman for the right-wing group, the Popular Alliance, a bloc of 130 deputies that had threatened to withdraw its support from the bill, told the Cortes that the group had reconsidered its stand "in the interest of national concord" and to spare the nation the spectacle of "a Cortes unable to agree on political reform."

The issue, which had threatened to deadlock the debate, concerned the election system that will be used for the new two-chamber parliament proposed by the new law.

'Proportional' System

For the more powerful lower house, the 350-member Congress of Deputies, the government bill provides a "proportional" system of election under which seats will be allotted in direct relation to the popular vote.

The Popular Alliance had been pressing for a "majority" system that would favor big parties—including, presumably, the Alliance—at the expense of small parties. The right-wingers linked their demand to a technicality in the Cortes' procedure and threatened to abstain in the final vote unless they got their way.

Abstention would have meant almost certain defeat for the bill. Abstention amounts to a no vote because the two-thirds majority is based on the number of deputies present.

Cruz Martinez Estruelas, parliamentary spokesman for the Popular Alliance, said his group was prepared to accept the principle of proportional representation—provided "corrective measures" were written into the bill to prevent "excessive fragmentation."

He said one of the measures his group sought would give representation only to parties that obtain a certain percentage of the national popular vote.

Prolonged Applause

Premier Suarez and the 19 members of his Cabinet attending the debate joined the prolonged applause for Mr. Martinez Estruelas.

Government sources said the government had not objected to some "small corrections" as long as the principle of proportional representation was upheld.

The government—backed by the center and leftist opposition parties not represented in the Cortes—favors a wide representation of the nation's political forces in the new parliament.

Main Points of Reform Bill

MADRID, Nov. 18 (UPI).—These are the main points of the bill on political reform passed today by the Cortes:

- "Democracy in the Spanish state is based on the rule of law, the expression of the sovereign will of the people. The basic human rights are inviolable."
- Parliament is composed of the Congress of Deputies and the Senate. The 350 deputies of the Congress and 207 senators are elected by universal, direct and secret suffrage of all Spaniards over 21 years of age. The King can appoint up to 41 senators.
- The election system used for the lower chamber is proportional distribution of seats in relation to the popular vote, but with safeguards against "inconvenient fragmentation." Senators are elected under a majority system. There will be four senators per province and seven senators representing territories.
- The term of parliament is four years. The Congress of Deputies has precedence over the Senate.
- The president of the Cortes is appointed by the King.
- The King can submit any "political issue of national interest, whether it affects the Constitution or not," to a referendum.

Remove 'Wrecking' Amendment

Labor Challenges Lords on Nationalization Bill

LONDON, Nov. 18 (Reuters).—...e possibility emerged tonight ...a long and bitter confronta... between the Labor govern...nt and the House of Lords, ...e ancient upper chamber of ...rliament that is stubbornly ...isting some key Socialist leg...ation.

...rime Minister James Callaghan ...d his Cabinet decided this ...rning to fight it out with the ...rds over a bill to nationalize ...itain's aircraft and shipbuilding ...lustries, using Labor's slender ...-seat overall majority in the ...use of Commons to force a ...owdown.

The Commons tonight voted ...-278 to support the govern...nt and withdrew from the bill ...amendment that the Lords ...d attached to it.

Nonelected Chamber

The bill now goes back to the ...ds, the nonelected chamber of ...rs founded in the 13th cen...y. The Lords, which has a ...nservative majority, has been ...ing "wrecking" amendments ...a series of bills that many ...ord as "extreme Socialist mea...es."

...he struggle during the last ...weeks has led to calls from ...y Laborites that the "un...ocratic" upper chamber be ...ished.

...he amendment to the nation...ation bill would exclude from ...e take-over 12 profitable ship...ir companies.

...he Lords could insist on the ...endment and keep the bill ...g to and fro between the ...mbers until the end of the ...sent law-making session Tues...when all unfinished legisla...n automatically wiped out. ...he government would then be ...ced to begin a long constitu...al process to reintroduce the ...in the next session and over...any more Lords objections. ...his could take up to a year.

...ior Cabinet ministers are ...ntined, however, to confront ...Lords on the nationalization ...sources said. Some min...s were reported to be saying angrily that this was the most serious attempt by the Lords to "alter the will of the Commons" since early this century.

Mr. Callaghan said in the Commons today that the nonelected Lords had no right to take their own view on the aircraft and shipbuilding bill after the issue had been before the electorate in the Labor party manifesto and had passed through the Commons.

In another development, the way Britain runs its nationalized industries came under sharp attack today from key government advisers, who said useful lessons could be learned from France, Sweden and West Germany.

Describing relations between government and state industry as highly unsatisfactory, the advisers urged the setting up of a new policy council for each major industry.

The objections—involving what is described as a story of distrust and confusion—were made in a report to the British government from the National Economic Development Office, itself a government-sponsored body.

"Our inquiry has left us in no doubt that the existing framework of relationships, developed under governments of both main political parties, is unsatisfactory and in need of radical change," said the report of the 10-man study group led by Sir Ronald McIntosh, director-general of the Development Office.

U.K. Offers Dec. 20 Geneva Cutoff

GENEVA, Nov. 18 (UPI).—Britain proposed today that the conference here on Rhodesia's constitutional future end by Dec. 20 at the latest.

The proposal met one of the demands of two hard-line black nationalists and it was also seen as an effort to advance the talks into a discussion of substantive issues, such as the structure of a transitional, pre-independence government for Rhodesia.

The conference chairman, British diplomat Ivor Richard, suggested the deadline to "Patriotic Front" leaders Robert Mugabe and Joshua Nkomo, who for three weeks have insisted on a definitive independence date.

They also demanded the fixing of a deadline for ending the Geneva talks so that their proposed independence date of Dec. 4, 1977, "cannot be sabotaged" by continuing delays in negotiations.

Mr. Richard's deadline suggestion was obviously designed to placate the two while he continues to reject their demand for independence in 12 months. The Britan has said that his government cannot commit itself to any "immutable" date for independence under black-majority rule in Rhodesia.

Mr. Richard gave Mr. Mugabe and Mr. Nkomo a document containing the deadline proposal during a meeting this morning.

The document repeated Britain's earlier compromise formula of trying to complete the independence process by Dec. 1, 1977, or by March 1, 1978, at the latest—without either date being binding.

The two nationalists conferred privately on a joint response to the proposal. British officials were encouraged by the fact that the two black leaders showed no sign of wanting to quit the conference.

Mr. Richard later in the day gave a copy of the document to the other nationalist delegations' leaders, Bishop Abel Muzorewa and the Rev. Ndabaningi Sithole, and to Rhodesian Foreign Minister Pieter van der Byl, who heads the white-minority government's delegation.

Bishop Muzorewa and Mr. Sithole have not demanded a firm date for independence and Mr. Richard has already held preliminary talks with them on the structure of an interim government.

Conference officials have indicated that Mr. Nkomo, the less militant partner in the Patriotic Front, wants to get into discussion of an interim government but has held back for fear of alienating Mr. Mugabe, who represents the guerrilla movement.

The foreign ministers of Mozambique and Angola—Joaquim Chissano and Jose Eduardo dos Santos, respectively—arrived today, and their presence may add an extra complication.

Mozambique has an official observer delegation at the conference, together with the other "front-line" African states of Tanzania, Botswana and Zambia. Angola had not previously played any role in Geneva.

While the four black delegations are split into two camps and Mr. Mugabe and Mr. Nkomo also have differences, so have the observers—with Mozambique having pushed a hard line and Tanzania, Botswana and Zambia having urged Mr. Mugabe and Mr. Nkomo to compromise on the independence date issue.

● Smith finds no danger to Geneva talks. Page 2.

27 Are Executed, Ethiopia Reports

LONDON, Nov. 18 (Reuters).—Twenty-seven persons have been executed in Ethiopia for counter-revolutionary crimes, the Addis Ababa radio said today.

It said the 27 had been convicted of murdering "progressive people," destroying buses, planting bombs and spreading anti-government propaganda.

The broadcast gave no names. It said the death sentences had been approved by the governing Provisional Military Administration Council.

Afro-Arab Resolution

Unesco Vote Faults Israel Policy

NAIROBI, Nov. 18 (UPI).—Overriding vigorous Western opposition, a Unesco commission today overwhelmingly approved an Afro-Arab resolution condemning Israeli educational and cultural policies in occupied territories.

The commission voted 73-6, with 30 abstentions, for the two-page draft resolution at the general conference of the UN Educational, Scientific and Cultural Organization despite a nearly weeklong fight by the West to "soften" the more blatantly anti-Israeli statements.

But an alliance of Arab, African and Communist nations pushed Western amendments aside and adopted the original draft virtually intact.

Israel was joined mainly by Australia, Canada and the United States in opposing the resolution. Nordic and other West European countries abstained. U.S. delegates warned that the vote will certainly make it more difficult to persuade Congress to change its hostile attitude toward Unesco.

Plenary Session Vote

The commission vote must still be approved by a 141-member plenary session but delegates said this would be a formality.

Today's vote followed by a week a UN Security Council resolution calling Israeli settlement in the occupied territories illegal and an "obstacle to peace." That resolution opposed what the Arabs see as an Israeli effort to absorb the Gaza Strip, the West Bank of the Jordan and the Sinai Desert by encouraging Israeli settlement.

The most controversial article in the final approved form of the Unesco resolution read: "Condemning as contrary to human rights and fundamental freedoms all violations, resulting from Israeli occupation, of the rights of all populations in Arab territories to education and cultural life and particularly a policy of systematic cultural assimilation."

The Afro-Arab bloc made one concession to Western objections and agreed to delete a phrase in the original draft denouncing

(Continued on Page 2, Col. 5)

Russia Indirectly Reveals Secret Work Centers

By Robert C. Toth

...SCOW, Nov. 18.—The Jews ...d here recently for their sit...otests, the Tass press agency ...had been refused emigra... visas because of "their ...ledge of state secrets." ...ir knowledge, and that of ...reds of other Jews refused ...permission on the same ...nd, came from their former ...s of work, Tass said. The ...s of those places were sup... by the Jews when asked.

...viet authorities have thus ...ectly revealed a host of in...tions and operations where ...t and presumably military-...ed work is done. These in...

Three weather and four ...ographic research vessels ...e kind that Western intelli...ce has long suspected of ...ctivities.

...ix institutes of the Academy ...ciences, the petroleum in...y's Research Institute, an ...ute of biological synthesis, ...Civil Aviation Institute and ...apping Department of the ...her Bureau.

Numerous innocuously titled ...ch labs, many of which are ...l "postboxes" by Russians ...se they are identified by ...office box numbers rather than street addresses, such as the Experimental Construction Bureau of the Ministry of Chemical Industry.

The bureau is notable because, according to Mrs. Dina Belen, a chemical engineer who worked there and was refused an exit visa on secrecy grounds since 1971, it has an IBM 360 computer. The Russians have pirated such computers from Europe, but this one was apparently sold openly to the Chemistry Ministry in 1973.

The computer raises the broad issue, beyond the immigration question, of whether the West should not bar advanced technology sales to institutes where the Russians themselves say that "knowledge of state secrets" is available.

Another computer sale of this kind is about to be made. A news story from Washington recently said that the Ford administration will permit the Russians to buy a Control Data Cyber 73 for the Petroleum Ministry here. Indications are that it will go into the ministry's Research Institute, where Anatoli Shcharansky, 28, had worked until he applied to emigrate two years ago and was refused on the ground of state secrets.

The Moscow State Project Institute for Biological Synthesis has potentially more ominous secrets. Mrs. Ida Nudel, 45, refused exit since 1971, was also an economist working with herbicides and other agricultural chemicals, she said.

Her continued refusal on secrecy grounds—she was told last month not to bother again appealing her case for at least two years more—suggests that the institute did and still does classified research despite the Soviet-U.S. treaty banning biological weapons.

Electrical equipment aboard the weather ships Passad, Vikho, and Usson and on the oceanographic vessels Vize, Zubov, Shirshov and Korolev was the responsibility of Dmitri Shchiglik, 49, a senior engineer of the Hydrometeorological Service, who was refused an exit visa because of state secrets.

All of the individuals above insist they never had classified information, although they cannot vouch that other laboratories or projects in their institutes were also engaged only in nonsecret work.

The temptation is to see the Soviet authorities indiscriminately using the secrets label to dissuade Jewish scientists, engineers and other specialists from emigrating. The danger of a significant "brain drain" is hard to assess, but cautious officials might be frightened by statistics alone that show Jews overrepresented in sciences. Jews hold 14 per cent of science PhDs, but account for only 1 per cent of the population.

Moreover, the Russians consider secret much that is open in the West, such as crime statistics and opinion surveys. A Soviet engineer refused a visa on secrecy grounds worked at the Institute of Meat and Milk Processing. His secrets might be as mundane as how little meat actually gets into sausages, as a dissident joked. Or he might know how much meat has been stockpiled for the military.

The Russians also give secrecy refusals in cases that appear ridiculous at first, but then intriguing: As to a nurse, who turns out to have worked at the Cen-

LAST LINEUP—Political prisoners in a prison camp at Santiago lined up with their belongings prior to release.

297 Political Prisoners Are Released by the Chilean Junta

SANTIAGO, Nov. 18 (AP).—The military government released 297 political prisoners yesterday and today in what President Augusto Pinochet called a "magnanimous gesture."

Authorities set free 168 prisoners this afternoon, emptying a major detention camp 24 hours after a similar mass release.

The releases were part of a project that the government says is aimed at freeing all political prisoners held without charges under a state-of-siege law imposed three years ago.

"This freedom is a magnanimous gesture aimed only at showing the kind predisposition of the government," Gen. Pinochet said.

He denied that the releases were related to the election of Jimmy Carter to the U.S. presidency, as some foreign press reports have indicated. Mr. Carter has spoken critically of Gen. Pinochet's regime and other authoritarian governments.

"It is not true that I have let myself be influenced by Mr. Carter," President Pinochet said in the city of San Javier, 200 miles south of Santiago. He said that the releases had been planned since September.

The Roman Catholic Church issued a statement saying it was "delighted" with the release of the political prisoners.

The detention camp emptied today is Puchuncavi, 100 miles northwest of here. Authorities took the 168 prisoners from there to the Tres Alamos camp, on the edge of Santiago, for processing before their release.

Yesterday, 133 political prisoners were evacuated from Tres Alamos. Officials said today that 129 were freed and four were turned over to civil courts to stand trial on criminal charges.

The releases leave in detention 18 political prisoners who have not been charged, the government said.

They include Communist party chief Luis Corvalan and former Communist Sen. Jorge Montes. The government said Tuesday that it will release Mr. Corvalan if Moscow releases Soviet dissident Vladimir Bukovsky. Chile said it will free Montes if Havana releases Huber Matos, a former official in the Cuban revolution.

A government spokesman said today that neither the Soviet Union nor Cuba has responded.

The government says that the 16 others still in custody will be released into exile when foreign governments are ready to take them.

Thirteen have already been offered visas by 11 European and Latin American countries, the government press office said. A spokesman said no problem was expected in obtaining visas for the three others.

Federalists, Separatists Split Montreal Into Two Camps

By Henry Giniger

MONTREAL, Nov. 18 (NYT).—Quebec Province's momentous election on Monday has left this city geographically divided into federalist and separatist camps.

A casual look at the latest electoral map of Montreal Island reminds one of Cyprus, Beirut, Belfast or any other place where ethnic, ideological, religious and economic differences have split the populace into opposing groups.

What happens in the Montreal area is important to Quebec's future, because more than half the population is concentrated here. Almost a third of the seats in the Quebec provincial Legislature are filled by Montrealers, and most of the power of economic decision in Quebec is situated here.

Roughly speaking, the eastern half of Montreal is of French derivation and the western half English. The dividing line had traditionally been Saint Lawrence Boulevard, which runs through the center of the city from north to south. Quebec as a whole is about 80 per cent French-speaking, but this percentage is reduced to about 65 per cent on Montreal Island, because it is here that the great bulk of the English-speaking population lives.

The French half of Montreal shows up solidly for the Parti Québécois, the party that stands for independence. Of the 69 seats won by this party in the national House of Commons, the French part of Montreal supplied 17. On the western side, English Montreal gave the Liberal party 12 of the 28 seats that party managed to salvage from the wreckage. On the extreme western end of the island, the heavily English district of Pointe Claire also registered a federalist vote, but for the conservative National Union.

The vote showed a division not only between French and English but also between well-off and less well-off. There are well-to-do or at least middle-class districts in eastern Montreal, but as a whole there is a big sectional difference in incomes and in economic responsibility and power. One of the biggest grievances of the French Canadians, and consequently of the Parti Québecois, has been this disproportion between population and economic power, and the party has said it was "out to end the domination of the English over Quebec's economy."

Economic Split

This helps explain why disquiet reigns in the relatively affluent homes of western Montreal. Conversely, there is jubilation in the more crowded and plebeian eastern and southeastern sections.

Charles Bronfman, head of Seagram Distillers, chairman of the board of the Montreal Expos baseball team and one of the wealthiest residents of Westmount, threatened last Sunday to leave Quebec if the Parti Québecois won. Two days after its victory, he is still here and admitting that he had panicked. He now is saying he will stay and fight to keep Canada together.

Even tougher talk came from Bryce MacKasey, a Liberal party leader and former minister in the federal Cabinet, who came to provincial politics to help his political cause and won a seat in a western district, Notre Dame de Grace. Mr. MacKasey journeyed to Winnipeg, in the midwest, and declared to an English-Canadian audience, "Mr. Levesque is a dangerous man. Don't be taken in by Gallic smiles. He stands for independence and for nothing else."

René Levesque, as leader of the Parti Québecois, is to become premier of Quebec.

Ethnic Groups

More recently arrived ethnic groups in Montreal, such as Italians, Greeks and Portuguese, who are concentrated in the middle of the island, particularly in its northern sections, also influenced the election. They were furious with the Liberal government for trying to force their children into French schools, and consequently they contributed to the Liberal defeat, mostly by voting for the National Union. The Union gave them a chance to vote for federalism, which most of them support, and against the Liberals.

Robert Bourassa, the outgoing Premier, lost his district of Mercier, in the middle of Montreal, partly because a third of his electorate was of immigrant origin.

A class division among the French could be seen in the district of Outremont, on the western side of Montreal, where many middle-class and upper-class French live. It went to the Liberals by a narrow margin, because most of these French also favor federalism.

The relatively calm, wait-and-see attitude of opponents of separatism has been helped by the equally calm and reassuring words of Mr. Levesque, who has promised not to pull Quebec out of Canada unilaterally until a referendum gives him a clear mandate to do so.

Smith Finds No Danger to Geneva Talks

SALISBURY, Rhodesia, Nov. 18 (UPI). — Prime Minister Ian Smith today expressed confidence that the Geneva conference will survive the present stalemate.

He told the Rhodesia Herald that he did not believe the conference would collapse as a result of the demands by the black "Patriotic Front" that a shift to majority rule take place within a year.

The Patriotic Front comprises two of the four black groups represented at the parley: Joshua Nkomo's wing of the African National Council and the more radical Robert Mugabe's Zimbabwe African National Union.

The two men demand that Britain, from which Rhodesia unilaterally declared independence 11 years ago, confer independence on this country—a prerequisite for a transfer of power to the black majority—within one year.

Mr. Smith was commenting a day after Rhodesia released details of a 14-hour battle in the southeastern Honde Valley Monday. The fight resulted in the deaths of 31 guerrillas, the highest toll in the four-year war.

So far this month, security forces have killed 173 guerrillas —more than in all of 1975. Security forces have lost 13 men killed this month.

Senior military spokesmen say the guerrillas are waging an offensive to coincide with the Geneva talks, with between 1,200 and 2,000 men already in Rhodesia.

$500,000 Posted As Miss Hearst's Bail by Father

LOS ANGELES, Nov. 18 (AP).—Patricia Hearst's father posted $500,000 bail today and a state judge said that he assumed that a federal judge in San Francisco would release the young heiress from custody.

Superior Court Judge William Ritzi said that he would notify the Metropolitan Correctional Center at San Diego that Miss Hearst can be released if the federal judge agrees.

Judge Ritzi refused a request from Miss Hearst's attorney, Al Johnson, to reduce her bail to $250,000, but said that he would reconsider it after he hears the ruling of U.S. District Court Judge William Orrick.

"If she is released by the San Francisco court and if bail is substantial in that case, I certainly would consider reduction of bond," Judge Ritzi said.

Randolph Hearst, president of The San Francisco Examiner, appeared before the judge with his twin brother, David Hearst, and both signed documents giving personal surety to cover the $500,000.

Polish Unit Says Police Tortured Detained Rioters

WARSAW, Nov. 18 (UPI).—Polish workers who protested against government-planned food price increases last June were tortured during their arrest, the committee for the defense of the workers said today.

The committee said in a letter to parliament that the detained workers were forced by police into a so-called "health track"—a double row of policemen who beat them up with batons.

Similar "health tracks" were put up in various prisons where the workers were detained, the committee said.

"There is mounting fear that the methods of Stalinism may return to Poland," it said in the letter.

The committee said the main victims of these tortures were the workers at Radom, 65 miles from Warsaw, and of the Ursus tractor plant near Warsaw.

"A total of 96 cases checked in Radom revealed 93 tortures and more than half of the 94 demonstrators arrested in the Ursus plant were also beaten up," the committee said.

Saxbe, Leaving Post in India, Says Relations Are Improved

By William Borders

NEW DELHI, Nov. 18 (NYT).—Ambassador William Saxbe is leaving his post in India this week, feeling "encouraged" about what he sees as improvements in the often tumultuous relationship between this country and the United States.

"When we first came here, you never heard anything good about the United States or anything bad about Russia," he said. "Now you still hear nothing bad about Russia, but you begin to hear something good about the United States occasionally."

"I think that they are beginning to get the idea that we are not infiltrating their government, that we are not interfering in their affairs, or that we're not going to encourage someone to attack them if we don't like their form of government," Mr. Saxbe said during an interview in his office in the modern white and gold embassy building here.

Mr. Saxbe, who has been here since March of last year, declined several times to comment substantively on the stern new government that came to India a few months after he arrived, on the ground that it would be inappropriate.

Prime Minister Indira Gandhi and other Indian leaders, stung by U.S. criticism of what they have done here, have pointed out repeatedly that the United States has friendly relations with governments that are more repressive than this one.

Mr. Saxbe's response to that is, "I don't think they realize that a lot of the attitude that we read in the American press and we hear from members of Congress is a sense of disappointment, because they did have a pretty deep, hadworking democracy here for a great number of years."

He said that he had deliberately tried to avoid the "interventionist" U.S. posture of the past, and that it had worked, having achieved for the United States a greater rapport with the Indians than they had at the time of his arrival.

At that time India was still smarting over the U.S. tilt toward the Pakistanis in the 1971 war and the announced U.S. decision to resume arms sales to them.

Home to Ohio

Now the 60-year-old ambassador, a former Republican senator and attorney general, is going home to Mechanicsburg, Ohio, where he runs a cattle farm.

He was particularly critical of suggestions that the United States might put pressure on the Indian government by threatening to withdraw its aid. "Our contribution is so insignificant compared to the Indian economy," he said.

"This is something that I run into with Congress. They give them a little dibby dab of grain —and it's foisted on them many times because we want to get rid of it—and then we come and say: 'All right, now we'll tell you how to run your country.'"

Compared with its total domestic harvest of about 120 million tons of grain this year, India received 600,000 tons in aid from the United States.

Ford's Aid Plan For Lisbon Needs Carter Follow-Up

WASHINGTON, Nov. 18 (WP).—A Ford administration decision to spread a financial safety net for the Socialist government of Portuguese Premier Mario Soares will require follow-through action by the Carter administration, officials emphasized yesterday.

The project for aid to Portugal is intended to help Mr. Soares's minority government demonstrate it can survive without sharing power with Communists.

A $300-million emergency loan through the Treasury Department can be supplied in the remaining life of the Ford administration. But the larger objective is an international consortium to provide Portugal with about $1.5 billion, with the United States supplying about 30 per cent of that sum, or about $450 million.

"The program has been approved in principle in the Executive Branch," a State Department spokesman said yesterday while declining to discuss amounts or other details.

Raid in Jordan Claims 8th Victim

AMMAN, Nov. 18 (UPI).—An Egyptian banker injured in the Palestinian terror attack on the Intercontinental Hotel yesterday died of his wounds today, Amman radio said.

Kamal Abdul Gaber, manager of the Cairo branch of the Alexandria Bank, died at the Jordan University Hospital, the radio said. It gave no further details.

Mr. Gaber's death brought the casualty toll in yesterday's four-hour battle between four Black June terrorists and Jordanian Army commandos to eight dead and five wounded.

Richardson Starts Trip

LONDON, Nov. 18 (UPI).—U.S. Commerce Secretary Elliot Richardson arrived today to start a 16-day economic and commercial mission that will also take him to Romania, Hungary, Yugoslavia, Morocco and Portugal.

Rees to Allow 2 to Appeal U.K. Ouster

LONDON, Nov. 18 (UPI).—Home Secretary Merlyn Rees said today that two U.S. writers will be allowed to appeal personally to him before he serves a deportation notice on them.

"My decision at this stage," he told Parliament, "is only one of notice of intention to deport. Before proceeding to make deportation orders, I shall consider the advice of an independent advisory panel and also any representations they themselves may make to me directly."

Deportation notices were served earlier this week on Philip Agee, 41, a former U.S. Central Intelligence Agency operative, and Mark Hosenball, 25, a U.S.-born reporter currently working for the London Evening Standard.

Mr. Agee asked today that Mr. Rees reconsider his decision not to reveal the reasons for the deportation move.

"I would like him to name names, times and places," Mr. Agee said. "There is probably a legitimate explanation for anything they think I have done. The allegations are so vague and general that I just don't have a chance to explain."

Mr. Rees said notices were served on the two "because I concluded that their departure from the United Kingdom would be conducive to the public good and in the interests of national security."

He said Mr. Agee, who now resides at Cambridge and is working on his second book about the CIA, has been told the government has information "that he had maintained regular contacts harmful to the security of the United Kingdom with foreign intelligence officers, had been and continued to be involved in the dissemination of information harmful to the security of the United Kingdom and aided and counseled others in obtaining information for publication which could be harmful to the security of the United Kingdom."

Mr. Hosenball, a native of Cleveland, was told that the government has information "that he, in concert with others, had sought to obtain and had obtained for publication information harmful to the security of the United Kingdom and this included information prejudicial to the safety of servants of the Crown," Mr. Rees said.

Tito Will Keep Up Defenses Despite Brezhnev Pledge

BELGRADE, Nov. 18 (Reuters).—Yugoslavia has served notice it will not relax its defenses despite a public assurance from Soviet leader Leonid Brezhnev that the Soviet Union has no aggressive intentions.

Shortly after Mr. Brezhnev left here yesterday after a three-day visit, the Yugoslav news agency Tanjug gave extracts from an official report that said Yugoslavia's armed forces were capable of fighting against "any aggression, whether by land, sea or air."

Mr. Brezhnev, in a dinner speech here on Monday, ridiculed any suggestion that the Soviet Union was "a terrible, bloodthirsty wolf" that might one day devour the Yugoslav "Red Riding Hood."

He and President Tito signed a communiqué recognizing Yugoslavia's unfettered right to develop its own unorthodox form of Communism.

The communiqué followed closely the lines of a document adopted last June in East Berlin by a conference of European Communist parties, which recognized the principle of autonomy for national Communist parties.

177th SALT-2 Session

GENEVA, Nov. 18 (UPI).—U.S. and Soviet negotiators met for one hour 45 minutes yesterday at the Strategic Arms Limitation Talks (SALT-2). It was the 177th meeting in the second SALT round.

Unesco Vote Against Israel

(Continued from Page 1)

the "systematic Judaization of educational and cultural life."

Israel recently invited Unesco to send a mission to the territories to investigate the Arab allegations and Western nations argued that it would be unfair to condemn Israel before the facts were reported by the group.

"The resolution prejudges the results of a fact-finding mission contrary to elemental principles of fairness and equity," chief U.S. delegate Robert Kamm said in a statement after the vote. "Why has it been thought necessary to criticize Israel before a single member of the fact-finding mission has stepped inside a single school?"

He said other sections of the resolution raised "mere allegations" to the status of "objectively reached conclusions."

The United States two years ago cut off its Unesco contributions—more than $38 million—because of Unesco approval of what it considered anti-Israeli resolutions. U.S. Rep. Albert Quie, R-Minn., said today's vote would make it even more difficult to get Congress to change its mind.

Israel Sees Hostility

TEL AVIV, Nov. 18 (UPI).—Israel described the resolution approved by Unesco as "hostile." But a government source said the vote was unlikely to reverse an Israeli decision to permit a Unesco fact-finding delegation to inspect educational and cultural facilities in the occupied Arab territory.

But Tension Centers on the South

Most of Lebanon Is Reported Calm

BEIRUT, Nov. 18 (UPI).—Although fighting was reported continuing today in areas of the north and south not yet entered by the Arab peace-keeping army, most of Lebanon remained calm.

Palestinian leader Yassir Arafat left for Damascus to discuss the latest rifts in the guerrilla movement following clashes between the Syrian-backed as-Saiqa group and a rival Palestinian faction.

Most tension appeared to center on the south, where Israeli-backed Christian rightists have been fighting against Palestinian-Moslem leftist forces. Beirut and the other four-fifths of Lebanon occupied by the Syrian-dominated Arab army were reported calm.

Troops Massed

Witnesses said leftists and rightists have massed about 4,000 troops each in the area of Marjayoun a strategic Christian rightist-controlled town close to the Israeli border, about 41 miles south of Beirut.

They said that the Christian rightists have deployed along a seven-mile line from Marjayoun south to the border village of Adeissah, with the most leftists lined up opposite them on a 10-mile front stretching from below Kfar Tebnit to the Litani River and the hills above the town of Deir Mimas.

Both sides are equipped with tanks and heavy artillery, they said, adding that the Israelis were reported to have stationed troops and about 20 tanks below the far northern Israeli border settlement of Metulla, across the border from the Christian positions.

There were no reports of renewed fighting today, but tension climbed in the area following the capture yesterday by Christian-rightist forces of the formerly leftist-controlled village of Kfar Kala, close to the Israeli border and south of Marjayoun.

Open Secret

The Moslem-leftist forces charged that Israeli artillery and troops supported the Christian rightists, but this could not be confirmed. Although it has been an open secret that the Israelis have been providing arms and training to the rightists, so far there has been no hard evidence that Israeli soldiers have been involved in the fighting. However, there have been regular reports of Israeli "advisers" sighted among the rightist fighters.

In the north, the independent newspaper An Nahar said clashes have been going on since Sunday between rightists and leftists in the Tripoli area, with an escalation of fighting yesterday.

The Syrian-dominated Arab peace-keeping force has yet to extend its positions up the main highways from Beirut to Tripoli, in the north, and Sidon, in the south, a move expected this weekend.

Flights to Resume

PARIS, Nov. 18 (UPI).—Middle East Airlines and Air France said today that they were resuming regular flights to Beirut following the reopening of that city's airport.

MEA said that it would resume flights to Beirut tomorrow. Air France said that its service would begin soon.

Tories Lead Labor by 25%, Poll Shows

LONDON, Nov. 18 (UPI).—A Gallup poll published by the London Daily Telegraph today gave the opposition Conservative party a 25-per-cent lead over the governing Labor party.

Only a month ago, the Conservative lead was 11.5 per cent.

The latest figures were: Conservatives 55 per cent, Labor 30 per cent, Liberals 11.5 per cent, others 3.5 per cent.

The big jump in support for the Conservatives was said to reflect public reaction to Britain's current economic situation.

United Press International.

Willing to Advise Carter Team

Kissinger Sees a Good Chance For Settlement in Middle East

By Bernard Gwertzman

WASHINGTON, Nov. 18 (NYT).—Secretary of State Henry Kissinger says that the Carter administration will inherit an unprecedented opportunity to help achieve a Middle East peace, and he is willing to lend advice on how to accomplish it.

Privately and publicly in recent days, Mr. Kissinger and his principal advisers on the Middle East have spoken in unusually optimistic terms about the prospects for a Middle East settlement in 1977-78. This contrasts with their pessimistic mood at the height of the Lebanon civil war crisis and the U.S. election campaign.

Mr. Kissinger's optimism, however, has been scorned by Israelis and their supporters. They claim that he has been unduly affected by what they call an Arab "peace campaign" aimed at influencing the incoming Carter administration to adopt a conciliatory attitude toward the Arab countries and to pressure Israel for territorial concessions.

"We believe the objective conditions for progress towards peace in the Middle East are better now than they have been perhaps at any time since the creation of the state of Israel," Mr. Kissinger said Tuesday to parliamentarians from NATO countries.

"We believe that the countries of the Middle East, through the experiences of the last few years, have learned that nobody can impose a program on the other, and that the easing of the tensions between Syria and Egypt may create conditions in which progress can be started toward peace negotiations," he said.

Because of Mr. Kissinger's intense involvement in Middle East diplomacy in the last three years, Sen. Abraham Ribicoff, D-Conn. on a recent trip to the Mid East, proposed that Presidet-elect Jimmy Carter name Mr. Kissinger as a special Middle Ea peace envoy after the president's inauguration on Jan. 20.

When asked Tuesday night a reception here whether would be willing to serve as special envoy, Mr. Kissing showed little enthusiasm for t idea, but said he would be qu willing to provide advice to t Carter team on tactics and str egy in Middle East negotiation

He will see Mr. Carter on Sa urday in Plains, Ga., and t Middle East situation is to be o of the important topics of d cussion.

Mr. Kissinger believes that a result of the Lebanese confli the Palestine Liberation Orga zation has been seriously weake ed as a force able to opera against Arab-Israeli negotiatio

However, Israel's Prime Min ter Yitzhak Rabin, Defense Mi ister Shimon Peres and Foreig Minister Yigal Allon have e pressed skepticism about pea prospects, although they ackno edge that the Arabs, particula President Anwar Sadat of Egy have launched a major drive convince the United States their desire for peace.

Mr. Sadat has said recen that he is ready to negotiate peace agreement with Israel.

He continues to call for a to Israeli withdrawal from Ar land captured in the 1967 w and for the creation of a Pal tinian state on the West Ba of the Jordan and in the Ga Strip—conditions that Israel j jects.

Mr. Rabin has said that rath than strive for a comprehensi peace, further interim steps b tween Israel and Egypt and Sy and Jordan might be more fru ful.

Mr. Kissinger's optimism h tried many Israelis who belie that it puts undue pressure Mr. Carter to plunge into ne tiations and encourages the Ara to believe that U.S. support Israel is wavering.

Proposal to U.S. Firms

WASHINGTON, Nov. 18 (IHT)—Mr. Kissinger yesterday ing American firms to share th scientific and technological e pertise with the less-develop nations of the world, saying th such sharing would significan promote global stability a peace.

"The problem of world order the dominant one of our tim the secretary told an audience more than 300 people invited the State Department for a or day national meeting on scien technology and development.

The social and economic a pects of this problem, Mr. K singer said, will in the yea ahead determine whether t United States lives in a cooper tive, progressive atmosphere wi other nations or is continuous enthralled in strife with others

Israel Reluctant on Meeting Arabs in Geneva but Would Go

TEL AVIV, Nov. 18 (UPI).—Israel is reluctant to resume the Middle East peace conference in Geneva even if Egyptian President Anwar Sadat sticks by his reported offer to negotiate without preconditions, government sources said today.

But they said that Israel would be willing to go back to Geneva if Egypt turns down Jerusalem's proposal for bilateral talks aimed at ending the state of war between the two countries.

"We doubt that the most effective solution right now is the Geneva conference," a government source said. "We have already tried Geneva and we know what it looks like."

He said that the two days of formal talks at the December, 1973, Geneva conference "turned out to be another UN" with "the same propaganda speeches."

Israel, Egypt, Jordan, the United States, the Soviet Union and the United Nations took part in the two-day session. Syria, which had been invited, boycotted the talks.

Other Solutions

"We have come to the conclusion that after three years Geenva didn't do so well and we are looking for other solutions," the government source said.

The framework of the Geneva conference was used to formalize Israel's troop disengagement accords with Egypt and Syria, but Secretary of State Henry Kissinger worked out the actual pacts during peace shuttles to the region.

Despite Israel's concern about the outcome of new Geneva talks, the government source said, "We will accept it." He said that the government has never turned down Mr. Sadat's proposal despite skepticism about the intentions of the Egyptian leader.

In recent meetings in Cairo with two separate groups of U.S. legislators, Mr. Sadat said that he is ready to go to Geneva to discuss peace with Israel without any preconditions.

But the Egyptian leader said that his picture of an overall peace settlement would include an Israeli pullback from all Arab territory captured in the 1967 war and the creation of a Palestinian state. Israel is adamantly opposed to both.

Any Place, Any Time

Prime Minister Yitzhak Rabin said last night: "I'm ready to meet with Sadat, President of Egypt, in any place, at any hour and at any time. If he wants to meet with me in Geneva—he's welcome. If elsewhere, that's fine with me."

Government sources expressed doubt that Egypt really wants to resume the Geneva talks, saying that Mr. Sadat made his offer solely for propaganda reasons.

The Israeli government, using the United States as an intermediary, called on Egypt last spring to negotiate an end of the state of war between the two countries.

Israeli officials described such a nonbelligerency accord as a step short of a full-scale peace agreement, which, therefore, would require fewer Israeli concessions than full peace.

Calif. Population Up 1.5 Million in 6 Years

SACRAMENTO, Calif., Nov. (AP).—California's populatio has grown by nearly 1.5 millio in the last six years, partly b cause of an influx of thousan of Vietnamese refugees, officia said. Most of the new Califo nians, however, came from oth parts of the United States.

On July 1, the population California was 21,520,000, up fro 20,026,000 on July 1, 1970, accor ing to state estimates.

News Analysis:

All Washington Is Looking Toward Plains, Ga.

By Hedrick Smith

WASHINGTON, Nov. 18 (NYT).—There is a saying in Washington that a President's term begins not on the date of his inauguration but on the day of his election, and in some sense this is already true of the Ford-Carter transition in spite of repeated disclaimers from President-elect Jimmy Carter.

When he decided to stage his transition to the presidency from Plains, Ga., rather than set himself up in Washington, the private explanation from his aides was that he did not want to crowd President Ford in his final weeks in office.

Yet even from a distant vantage point in south Georgia, the President-elect has upstaged the President, and in the White House, the sense of release from the absolute rigors of exercising power has given vent to playfulness.

Fencing With Burns

While Mr. Ford was golfing recently at Thunderbird Country Club in Palm Springs, Calif., Mr. Carter was busy looking presidential behind a lectern conducting two news conferences before an expanded following of reporters.

In the two weeks since winning the presidency, he has not only captured public attention with his methodical preparations for selecting the principal figures of his administration but has also plunged into some delicate public fencing with Arthur Burns, chairman of the Federal Reserve Board, over the proper dosage of economic medicine for the nation's ailing economy.

Although modestly encamped about 800 miles south of the capital, he has summoned 15 Democratic congressional leaders to the gracious, white-pillared mansion of Georgia's Sen. Herman Talmadge, to sound them out on Cabinet appointments and his plans for government reorganization.

Tomorrow, Director of Central Intelligence George Bush will go to brief Mr. Carter on the international situations, to be followed on Saturday by Secretary of State Henry Kissinger. Within days, tens of prospective candidates for high government positions will be flying to the Plains airfield to line up for their Cabinet interviews.

In Washington, a Latin American diplomat warns U.S. journalists over luncheon that Mr. Carter will find the Panama Canal Zone negotiations one of his earliest, most explosive problems. And at the glittering black-tie dinner for the Tutankhamen exhibition at the National Gallery of Art, a journalist just in from Cairo and no longer interested in the shuttle diplomacy of Mr. Kissinger but eager to meet Mr. Carter's press secretary, demands:

"How can I arrange to meet this Jody Powell if he is in Georgia?"

Kennedy Eclipsed

For a city of endless gossipy interests in new champions, the impending ascendancy of the former Georgia governor has not only upstaged the Ford White House but even eclipsed the eternal speculation about the activities and ambitions of Sen. Edward Kennedy of Massachusetts.

"Suddenly the Kennedy talk has stopped," commented a veteran political speechwriter. "Imagine being the elder statesman of the Democratic party at 44?"

"Camelot has faded," said a congressional aide close to both the Carter and Kennedy camps. "A lot of the old Kennedy hands are hanging black crepe around Washington. They see that they are no longer a government in exile."

Yet although Mr. Carter may be moving rapidly to capture political initiative and capture public interest before his inauguration Jan. 20, the change in mood here is entirely normal for the political season.

Outgoing administrations, shorn of long-term power, are reduced in their final weeks to tinkering and valedictories. It happened in 1960, when President Dwight Eisenhower was largely dormant while national attention shifted to John Kennedy, or again in 1968 when President Lyndon Johnson holed up at his Texas ranch while Richard Nixon dominated the news from his headquarters at the Pierre Hotel in New York City.

Political Gravity

Outwardly, at least, Mr. Ford has taken this shift of political gravity in stride though not everyone in the White House has reacted with such equanimity. Ron Nessen, his press secretary, exploded in pique Tuesday when reporters started to ignore him in his own office in favor of Mr. Powell, the new spokesman for the incoming Carter administration.

But other Ford aides have seemed to enjoy the relaxation of releasing responsibility to their successors, gently poking fun at the arrival of the new entourage from the South. When Mr. Nessen introduced Mr. Powell to David Kennerly, the official White House photographer, Mr. Kennerly saucily offered a thickly accented Southern greeting: "Hi, how yew?"

Other White House staffers, mocking the eagerness of Democrats to find jobs in the new administration, circulated a parody of a job application for the Carter White House. Along with a series of test questions (Sample: What is the second verse of Dixie? How do you drain a pond? Or to what magazines do you subscribe?), it asked applicants to list the position they sought and also the "position you really expect to get."

And a few blocks away, the President Ford Committee headquarters summed up the Republican sentiment by hanging out a sign from its 10th-floor offices: "There goes the neighborhood."

Carter's Executive Reforms Win Support of Congressmen

By Helen Dewar

LOVEJOY, Ga., Nov. 18 (WP).—President-elect Jimmy Carter yesterday won tacit approval from congressional leaders for authority to reorganize the executive branch, subject to veto by Congress. He also pledged to consult with congressional leaders before submitting his major legislative proposals.

Despite reports that Mr. Carter and Congress would get off to a shaky start, he and 16 members of the House of Representatives and Senate Democratic leadership emerged smiling and pledging cooperation after a three-hour lunch at the white-columned home here of Sen. Herman Talmadge, D-Ga., about 30 miles south of Atlanta.

Both Mr. Carter and the congressional leaders said afterward that the former Georgia governor's campaign pledge for a bureaucratic overhaul was discussed in general terms and no objections were raised to the idea of reinstating recently expired presidential authority, dating back to the 1950s, to propose executive branch changes subject to congressional veto.

Mr. Carter will meet with President Ford at the White House on Monday afternoon for the first time since the election. They will discuss the transition between administrations.

Mr. Carter will not name any Cabinet members before Dec. 1, his press secretary said today.

During the campaign, Mr. Carter, charging that the federal bureaucracy was "inefficient" and "wasteful," said reorganization was a must and suggested that the 1,900 federal departments and agencies could be reduced to 200, although he did not spell out exactly how.

Efficiency Is Goal

"I would like for the Congress to take the fullest possible action commensurate with congressional restraints, with constitutional restraints, to direct me to make the executive branch efficient," Mr. Carter said.

He said no formal action was taken at the meeting but there was "remarkable compatibility" between himself and the congressional leaders on all matters discussed. Senate Finance Committee chairman Russell Long, D-La., said: "Everyone seemed to be favorable."

"If the meeting this afternoon was any indication of what lies ahead for this country insofar as congressional-presidential relations are concerned, the omens are all good," Senate Majority Leader Mike Mansfield, D-Mont., who is retiring in January, said.

"The President-elect said he wanted peace in the world, he wanted the economy of America to be moving and he wanted a balanced budget—we will work with him to that end," House Majority Leader Thomas O'Neill, D-Mass., said. He added, "He will have 100-per-cent cooperation from me."

'Very Fruitful'

Mr. Carter called it a "very fruitful interchange of ideas" and said he brought to it "a pledge on my part to do everything I can to restore harmony between the White House and the congressional leadership."

This was a reference to eight years of often-strained relations between the Republican-controlled White House and Democratic-dominated Congress.

Earlier yesterday, Mr. Carter's campaign treasurer, Robert Lipshutz, released a report that showed that the Georgian spent nearly $35 million in winning the Democratic presidential nomination and the presidency, including almost all of his $21.8 million in federal funds for the autumn campaign.

Mr. Carter spent $13.2 million to win the nomination and "within 1 to 2 per cent" of his $21.8-million federal grant for the general election campaign.

Planners Confident Capital Can Handle Carter Inaugural

By Karlyn Barker

WASHINGTON, Nov. 18 (WP).—City and police officials say they will be ready for and welcome the hordes of out-of-towners expected to accept President-elect Jimmy Carter's open invitation to attend a week of inaugural festivities here.

After the elaborate preparations made to celebrate the nation's Bicentennial, the officials and Mr. Carter's own Inaugural Committee say, they have the resources and knowledge to manage the crowds, even if hundreds of thousands show up for the inauguration.

"I have no apprehension about the ability of the city to be host to citizens across the nation," Mayor Walter Washington said earlier this week through a spokesman. "They should feel welcome and secure."

The mayor was described as being "very enthusiastic" about Mr. Carter's invitation to all Americans—including up to 400,000 campaign workers whom Mr. Carter is personally inviting—to attend a "people's" inauguration.

Detailing plans for activities centered around the Jan. 20 inaugural, Bardyl Tirana, co-chairman of the Planning Committee, said that the city "is looking forward to the crowds" and a week of special cultural programs to commemorate the event.

Mr. Tirana said that Washington "is a good place for a celebration," and the Inaugural Committee is preparing for a modest but well-attended one.

The events and special preparations, he said, will include:

- A special weeklong cultural program that will involve the Smithsonian Institution, the Kennedy Center, the National Gallery of Art, the American Film Institute and other museums and theaters.
- Opening museums, monuments and other attractions on a summer rather than a winter schedule.
- Six to eight inaugural parties—as opposed to formal balls—that will be held around the city the night of Jan. 20 and are expected to attract up to 45,000 persons.
- A special event in honor of the Vice-President-elect, Sen. Walter Mondale of Minnesota, and his wife, Joan, to be held before the inaugural.
- A special inauguration-eve gathering that, Mr. Tirana said, will be "celebratory" in nature and features performances. He did not provide other details.
- The traditional inaugural parade following Mr. Carter's swearing-in at the Capitol.

So far, the committee has received a "very, very favorable response," Mr. Tirana said, to the announcement about Mr. Carter's modest inaugural plans.

Study Finds 47% In U.S. Forces Are Drug Users

OKLAHOMA CITY, Nov. 18 (AP).—Nearly half the enlisted men in the U.S. armed forces regularly use drugs, a Department of Defense study shows.

According to the study, described in the November issue of Private Practice, an Oklahoma City-based medical journal, the conclusions were based on a 1974 unpublished study of 700 Army soldiers.

The magazine, the official publication of the Congress of County Medical Societies, said among the findings were:

- Forty-seven per cent of the men admitted using drugs regularly, nearly twice the rate (27 per cent) found in a similar study conducted in 1969.
- Forty per cent of the men said they had used marijuana; the rest either used a number of drugs or were exclusive users of another drug.
- Heroin use was admitted by about 5 per cent of the soldiers, but researchers said this may be low because of a big increase in the availability of Mexican heroin.

Concorde Texas Runs Are Under Negotiation

DALLAS, Nov. 18 (Reuters).—British Airways and Braniff International Airways opened talks yesterday on a plan for Concorde service between here and London by way of Washington. Two U.S. agencies would have to approve the program.

British Airways crews would man the supersonic airliners between London and Washington, and Braniff crews would fly them at subsonic speeds between Washington and Dallas-Fort Worth Airport.

Kekkonen, Kadar Confer

BUDAPEST, Nov. 18 (UPI).—President Urho Kekkonen of Finland and Hungarian Communist party First Secretary Janos Kadar today discussed bilateral trade and questions of European security and cooperation, the Hungarian news agency said.

Study of Contraceptives Gives Good Marks to the Diaphragm

By Morton Mintz

WASHINGTON, Nov. 18 (WP).—A long-term study of contraceptive methods is highly favorable to the diaphragm, with researchers finding "no material risks" other than pregnancy.

The pregnancy rate—2.4 per cent a year—greatly exceeds the 0.14 per cent in women in the study who used birth-control pills. But the rate is less than a quarter as high as has commonly been attributed to the diaphragm by family-planning specialists who have lumped together women who use the device reliably and properly (with spermicidal cream or jelly) and women who do not.

In addition to confirming the results of many previous audits of the relative benefits and risks of various forms of birth control, the study, by Prof. Martin Vessy and Prof. Richard Doll, aided by three associates at Oxford University, produced a few striking new findings, including:

- "Clear evidence of impairment of fertility after discontinuation of oral contraceptives," accompanied by uncertainty as to whether some pill users become permanently sterile.
- "Remarkably unfavorable" outcomes of unplanned pregnancies in women fitted with intrauterine devices (IUDs), both in terms of gestation in the fallopian tubes and of miscarriage.

A 52-page report on the study—published recently in the Journal of Biosocial Science, which is issued by the Galton Foundation in London—appears while the U.S. Food and Drug Administration here is preparing a major overhaul of the official birth-control pill labeling. "The available evidence does not yet allow a final balance to be struck between the benefits and risks associated with" the pill and the IUD, the report cautioned.

The study dates back to 1968, when the scientists, working with the Family Planning Association in England and Scotland, began enrolling volunteers—ultimately 17,032 women at 17 clinics.

The volunteers were all married, white British subjects 25 to 39 years old who had been using the pill for at least five months or who had previously not taken it and who had been relying instead on the diaphragm or the IUD, also for at least five months.

Almost 25 per cent of the women relied on the diaphragm for an average of nearly three years each. The number, 4,223, is approximately twice as large as that in the largest clinical study ever made of diaphragm use in the United States. In that U.S. study, made by Planned Parenthood, only 2 per cent of 2,168 users, including teen-agers, became pregnant, the organization reported in May.

The impairment of fertility in women on the pill appeared to be unrelated to duration of use and was especially marked in childless women.

"While the impairment diminishes with time, it is disturbing that there is still an appreciable difference in the results for the 'oral contraceptive' and 'nonoral contraceptive' groups 30 months after the discontinuation of birth control," the report said.

Ford Approves Production of 50 More Missiles

WASHINGTON, Nov. 18 (AP).—President Ford has approved production of 60 more Minuteman long-range missiles "to show our resolve" in the face of continued Soviet deployment of powerful new missiles, the Defense Department said yesterday.

The additional Minutemen, each equipped to carry three nuclear warheads, will be placed in storage, officials said.

The aim of the move, approved by Congress, is to keep open the only U.S. intercontinental ballistic missile production line.

The Pentagon indicated that a major factor in Mr. Ford's decision is the lack of U.S.-Soviet agreement on a long-term limitation on strategic nuclear weapons on both sides.

The action will leave the United States with 550 Minuteman-2 missiles and 450 single-warhead Minuteman-3 missiles combat position.

Congress voted $260.7 million after this year at Mr. Ford's quest to keep open the Minuteman production line if he decided it was necessary.

Dutch General Fears Battle Deficiencies

NATO Is Warned on the Need to Match Arms

By James Goldsborough

PARIS, Nov. 18 (IHT).—Allied armies will face serious combat difficulties unless there is increased coordination of weapons production and utilization, a prominent Dutch general said today.

Brig. Gen. Rudyard Lawson, speaking in conjunction with the publication of a study on arms problems within the Atlantic alliance, said that in some areas, notably communications, lack of coordination among the 14 NATO nations raised serious military questions.

But he said that last week's agreement between the United States and West Germany on developing common components for their new tanks was sound. "We can live with this tank compromise," he commented. He said it showed that nations need not abandon their armaments industry to achieve what the military calls weapons "interoperability."

The remarks by Gen. Lawson, who is on NATO's Arms Standardization Committee, drew attention to the growing debate within the alliance on the cost —both economic and social—of arms production, sales and duplication.

This debate has been fueled in recent weeks by several developments, including the tank replacements, U.S. difficulties with the European air defense missile Roland, a report by two U.S. senators on NATO's strategic deficiencies and the publication by the Atlantic Institute of a study called "Towards Rationalizing Allied Weapons Production," by Gardiner Tucker, former NATO assistant secretary-general.

Conventional War

The issue being posed today is how the NATO nations are to pay for a revised strategy that calls for increased emphasis on conventional weapons in case of a conventional war. This new emphasis means that everything from bullets and rifles to tanks and fighter aircraft must be improved at a time when many nations of the alliance are facing serious economic difficulties.

It does not mean that nuclear deterrents are being abandoned, only that an increasing number of military men think that war in Europe, if it comes, will be fought without nuclear weapons.

Gen. Lawson admitted that, for political and industrial reasons, it often is difficult for the NATO nations to avoid weapons duplication. But from a military viewpoint, he said, it was essential at least to achieve interoperability, "the ability of our forces to work together."

The new U.S. and West German tanks will be interoperable, he said, meaning they will share many common components, such as tracks, fuel and motors. This is important, he said, because "the first thing damaged in a tank battle is the tracks."

But many NATO systems are not interoperable, posing real battlefield problems. He said that tactical communications equipment was the worst example, meaning that unit commanders might not even be able to talk to each other. Another potential problem, he said, was aircraft. "We don't even know if the new MRCA and F-16 aircraft are interoperable," he said.

Three-Nation Effort

The MRCA aircraft is jointly developed by West Germany, Italy and Britain. The F-16 is used by the United States and several other allies. France uses neither.

Gen. Lawson agrees with the study by Prof. Tucker that the optimum solution would be specialization by different nations in different weapons, but so far there has been very little of this. The main culprit, all agree, is the United States, which buys very little from Europe.

The Franco-West German Roland missile was the first example of a major weapons system bought by the United States. That missile now has been modified by the United States at a cost of over $200 million, and the Europeans are no longer even sure it is interoperable—that is, can be fired from the same launcher—with their own.

The Warsaw Pact nations, Gen. Lawson said, have a much greater degree of interoperability, principally because the Soviet Union is the principal supplier of all their major weapons systems.

Russia 'More Threatening'

LONDON, Nov. 18 (AP).—Attempts by the Warsaw Pact to achieve military superiority are "destabilizing and a threat to peace," said a communiqué today from the NATO Nuclear Planning Group.

Joseph Luns, the Dutch secretary-general of the Western alliance, said at a news conference: "The Soviet military machine is more threatening than it was six or seven years ago—on land, on sea, in the air and in nuclear capabilities."

Obituaries

Man Ray, 86, Dada Artist And Innovative Photographer

PARIS, Nov. 18 (AP).—Man Ray, 86, the last notable survivor of the Dadaist art protest movement and an innovative photographer who was a vibrant part of the "lost generation" of Americans in Paris after World War I, died in his sleep today.

Mr. Ray, who was born in Philadelphia, had lived in Paris since 1921—a residence broken only by four years in California during World War II—but refused the label of expatriate, saying "I'm an American ambassador without portfolio."

When Mr. Ray came to Paris in 1921, he immediately moved into the Montparnasse literary and artistic circle. He was a friend of Hemingway, Fitzgerald, Picasso, Modigliani, Kandinsky, Pound, Calder and many others.

Dadaism was the literary, theatrical and artistic revolution of its time. It was an unstructured movement, born of revulsion over the waste of war and aimed at seeking new forms of expression. The name was born in 1916 when poet Tristan Tzara opened a dictionary and randomly spotted the word "dada".

An Extension

Mr. Ray, Marcel Duchamp and Picabia are often credited with extending Dadaism to art. But Mr. Ray said, "Nobody invented Dada. I might claim to have introduced Dada to New York."

Mr. Ray defined Dadaism in art as "a movement to express ridicule. We were destructive but I think we had a good effect on the art of the period. Out of our movement came the Surrealists, who were constructive."

And Dadaism was surely the forerunner of modern pop art.

The Museum of Modern Art in Paris gave Mr. Ray a retrospective exhibition in 1972, a rare tribute to a living artist.

Among Mr. Ray's early creations was a sewing machine covered with a blanket and tied up with a rope. It was called "The Enigma of Isadora Ducasse." He took a loaf of French bread to a foundry and had it cast in bronze, which he painted blue. He dubbed it "Pain Peint" [Painted Bread]—and was delighted with his French pun. His "New York 1920" was a jar filled with ball bearings in oil.

Dabbling in Cubism

Mr. Ray started his art career by dabbling in traditional representative art and Cubism. When he freed his imagination, galleries in New York were not interested. Among his baggage when he came to Paris were 30 paintings that turned out to be unappreciated on both sides of the Atlantic. He gave the paintings to anyone who liked them.

He turned to photography to make a living and did portraits of his friends in Montparnasse. He did fashion photography for Paul Poiret, the leading Paris designer of the day.

Mr. Ray's best-known photograph is "The Violin of Ingres," a sly work showing his favorite model, Kiki of Montparnasse, with her nude back painted to resemble a violin.

Later, he invented "Rayograms," strange black and white photographs produced without a camera by placing objects on sensitized paper in a darkroom.

In the 1950s Mr. Ray went back to painting, claiming that nothing new was happening in photography.

Maulana Bhashani

DACCA, Nov. 18 (UPI).—Maulana Abdul Hamid Bhashani, 94, a fiery hardliner revered across Bangladesh for his role in the country's independence movement, died yesterday in Dacca Medical College Hospital.

Anson Walker Perkins

KENOSHA, Wis., Nov. 18 (UPI).—Anson Walker Perkins, 78, who was one of the few surviving members of the 1928 expedition by Adm. Richard Byrd to the South Pole, died at his home Tuesday after a long illness.

Domingo Candia

PARIS, Nov. 18 (AP).—Domingo Candia, 80, an Argentine-born painter who spent much of his life in Paris, died yesterday, the Argentine Embassy announced. Mr. Candia's style was strongly influenced by Cézanne.

Louis G. Cowan

NEW YORK, Nov. 18 (UPI).—Former CBS television president Louis G. Cowan, 66, who developed "The $64,000 Question" and then left the network following quiz show scandals, was killed with his wife today in a fire in their penthouse.

UPI.

Man Ray with one of his works, a metronome with an eye on it. He called it an "indestructible object."

Cyril Richardson

NEW YORK, Nov. 18 (AP).—The Rev. Dr. Cyril Richardson, 67, church historian and expert on early Christianity, died at his Manhattan home Tuesday of a heart attack.

Dr. Richardson was a professor at Union Theological Seminary for 42 years. He wrote many scholarly works, including his widely known "The Doctrine of the Trinity," published in 1958. He was born in London, emigrated to Canada and graduated from the University of Saskatchewan in 1930. He was ordained an Episcopal priest in 1934.

Russia Indirectly Discloses Some Secret Work Centers

(Continued from Page 1)

tral KGB (secret police) Polyclinic, and to the deputy manager of the Seventh Heaven restaurant that revolves high up a Moscow TV tower.

"Refused for reasons of state interest," the restaurant man, Alexander Lukotsky, 39, said he was told. (State interest and state secrets are used interchangeably.) "You know why," authorities were said to have added. He insists that he does not know why.

But other Jews tend to stand away from him. "We make no judgment in his case," said one, which is unusual because the dissidents normally close ranks. Even when a potential emigrant has done secret work, they try to gild the lily a bit.

Thus, a man with a secrecy refusal since 1969 had long been described as "just a TV research engineer." Only recently, it turned out to have been reconnaissance satellite television. Similarly, "just a football player in the army" played for a missile unit, and "just an army doctor" was a surgeon with a missile brigade.

The conclusion must be that at least some of the secrecy refusals are valid. Being unable to know which ones are valid, however, the West could justifiably treat as secret installations all those where Russian "state secrets" were available to the Jews who were refused visas.

Soviet Interior Minister Nikolai Shchelokov last month told the sit-in protesters that the maximum refusal period here is five years. They immediately cited the seven-year wait of the TV engineer, the six-year wait of the missile surgeon and others.

He offered to look into such "mistakes" as he called them.

Dissidents are not optimistic that his promised look will make any difference, however, and they use the incident as another reason why they have demanded their reasons for refusal and the expected duration in writing. Only oral data are given now.

The most definitive Soviet statement on grounds for refusal came Nov. 10 in the Tass article that was printed in Izvestia. Two reasons were possible, it said: When the applicant had "access in the course of his duties to works or information that constitute a state secret," and when his departure "seriously infringes on the vitally important rights and interests of other citizens, for example, his dependent children or aged parents."

The Tass statement claimed that the rules for refusal conform to the United Nations covenant on civil and political rights of 1966 as well as the Helsinki declaration of last year.

S. Africa Places Restrictions on 12 Trade Unionists

JOHANNESBURG, Nov. 18 (Reuters).—Twelve trade unionists, virtually the entire leadership of South Africa's black trade union movement, have been served with banning orders isolating them from society, security police said today.

A banning order restricts a person's movements and forbids him or her from attending any meeting. Banned persons may not be quoted by newspapers.

Of seven unionists banned in Durban, six are whites who have been active in organizing the African trade union movement there, a security police spokesman said.

In Johannesburg, orders were served on the white organizer and black secretary of the local branch of the Metal and Allied Workers' Union, a black organization.

It was also confirmed that banning orders were served earlier in the week on three white leaders of the Urban Training Project, a body representing eight local African unions. Another person banned today was Jenny Curtis, 26, archivist since 1973 at the South African Institute of Race Relations.

Top Seismologist Quits in Sweden In Union Conflict

STOCKHOLM, Nov. 18 (UPI).—Prof. Markus Baath, head of the Uppsala Seismological Institute, has decided to retire because he cannot accept unions at his institute, sources said today.

Prof. Baath, 60, wrote a letter to Uppsala University Vice-Chancellor Gunnar Wickman this week saying that he would take a leave of absence until July 1, 1977, when he would enter early retirement.

Two academic unions had written to Mr. Wickman calling for talks with Prof. Baath for the creation of an institute board with representation from all categories at the seismological center.

"We called a meeting for this morning, but Baath did not come," Mr. Wickman said. "Baath has refused to enter into talks with the unions."

The forming of a representative board was in line with a current push for democratization at the various institutes of Uppsala University.

Thai Head Sees Better Ties to U.S.

BANGKOK, Nov. 18 (UPI).—Premier Thanin Kraivichien today predicted closer relations between Thailand and the United States, but said they will stop short of another U.S. military buildup.

Mr. Thanin told the first formal news conference he has held since taking office just over a month ago that he expects more U.S. interest in trade and technical exchanges.

When asked if he forsesaw any discussions aimed at reopening U.S. military bases, Mr. Thanin said, "I don't think it would extend as far as that."

Opium Smuggler Gets Burmese Death Penalty

RANGOON, Nov. 18 (UPI).—A Burmese court yesterday sentenced an alleged top dealer in opium, Lo Hsing-han, to death on charges of high treason.

The three-man bench also sentenced Lo to life imprisonment for smuggling opium, heroin, jade and gems out of this country and for the illegal importation of gold bars, automobile spare parts, arms and ammunition. His trial lasted more than three years.

Mao's Widow Called Arrogant, Demanding

Chiang Ching Target of Wave Of Critical Studies by Chinese

By Jay Mathews

HONG KONG, Nov. 18 (WP).—Mao Tse-tung's widow, Chiang Ching, is portrayed in a new study drawn up in China as a poker-playing, animal-loving insomniac who admired the empresses of ancient China and 40 years ago contributed to a birthday gift for her future husband's arch foe, Generalissimo Chiang Kai-shek.

The portrayal, by amateur journalists from the Wuhan University mass criticism group and the Kwangtung Chungshan Library, is not meant to be flattering. The authors are Communist party members determined to discredit the woman who allegedly tried to seize power after her husband died and who is now under arrest.

Despite the authors' purpose, the quotations attributed to her in the study reveal an individual who possesses a certain charming frankness. Miss Chiang leaves the impression of a somewhat impulsive political innocent.

"Some people said that I want to become Empress Lu or Wu Tse-tien," a Hunan provincial broadcast quotes her as saying. It goes on to indicate that she knew how few of China's generals and bureaucrats she could rely on, and it attributes this statement to her: "In point of class, I am more progressive than they. In point of capability, I am inferior to them. They could win over others as confederates."

'She Babbled'

The broadcasts always preface her quotations with "she babbled" or "she said crazily," but the words themselves reveal someone frankly admitting she is up against it: "I suffered great defeat. In July, August and September last year, the Politburo struggled against me for two months," a Hupei broadcast quotes her as saying. "I couldn't make it, though I wanted to. This time, I am not afraid of anything."

From places she visited in the last few years come reports that she was self-indulgent and had an arrogant disdain of common people. But Miss Chiang is also shown as someone who, as an actress and politician with no family ties or money of her own, overcame obstacles through sheer bravado and enthusiasm and never planned very far in advance. The stories suggest a woman who realizes that with her husband and sole protector near death she has time for one last bender before all the parties are over.

"On one occasion," said a Kwangtung broadcast, "when Chiang Ching came to Canton, she lived in a certain place by the side of the Pearl River. She was disturbed at night by noise. She fiercely ordered the public security personnel to seal off the traffic on the river and block the area to search for the noise. After a lot of hard work, the public security personnel finally found out that it came from some nearby factories, which were building ships. Chiang Ching immediately ordered the departments concerned to demand forcefully that the workers at this workshop should cease night production."

She always had trouble sleeping. No planes could land at the airport near the Summer Palace when she vacationed there. Cars had to turn off their engines a kilometer from a cottage she stayed in on Hainan Island.

When she visited a zoo, all the employees and other visitors had to clear out. "When she wanted to go to the Orchid Garden," said another Kwangtung report of a Canton visit, "there could be no dust on the leaves of the trees along the roadside there. When she wanted to go to the West Garden, there could not be a single flying insect there."

She sent favorite goldfish from Peking to Canton as air cargo. Three horses were taken by plane to Hainan Island so she could ride, the broadcasts said.

The staff of the Kwangtung Chungshan Library dredged up records of all the books on empresses that Miss Chiang borrowed. They delved even into her past as a Shanghai actress, a period it was always known could provide fuel for her enemies. "Chiang Ching acted in a play called 'Marriage Proposal' in September, 1936, in Shanghai and donated the income from her performance for a birthday gift to Chiang Kai-shek, the evil ruler and robber of the people," the library's report said. The two Chiangs were not related, but many Communists and pro-Communists were supporting the Nationalist leader in 1936 under the united front formed to fight the Japanese.

Zest for Poker

A fascination with the trappings of U.S. life seemed to stay with her, if the latest accounts can be believed. When telephoned to Mao's bedside four days before his death on Sept. 9, she was out of town enjoying a poker game —a pastime American reporters introduced to the Communists at Yenan in the 1930s. Unconcerned by the news of her husband, she kept the game going another few hours.

What might have been small things became huge sins. When she got to Mao's bedside, she had him turned over, an act the Peking news media now paint as attempted murder. He had been sick a long time, and she was a woman who never liked to wait. "The man must abdicate and let the woman take over," she is quoted as saying in a context that will probably never be made clear. "A woman, too, can be the monarch. Even under Communism, there can still be an empress."

Gaullists Reject Giscard Choice For Paris Mayor

PARIS, Nov. 18 (AP).—The Gaullist party today rejected President Valéry Giscard d'Estaing's candidate for the newly revived and politically powerful post of mayor of Paris as the struggle between the President and his Gaullist coalition partners took on new dimensions.

Yves Guéna, Gaullist party national secretary, announced he would head a delegation to see Prime Minister Raymond Barre "to call his attention to the gravity of the [Paris] problem."

In the first open breach in the alliance, Pierre Bas, a Gaullist parliamentarian and leader of the Paris coalition of the majority, said the Gaullists would run their own candidates in Paris in next year's municipal elections. The post of mayor will be revived after 105 years of central government control.

Mr. Giscard d'Estaing last week named Industry Minister Michel d'Ornano, a member of his own small Independent Republican party and mayor of Deauville, to integrate the coalition parties into a joint electoral list for the Paris elections, then run for mayor.

Singer's Ouster Draws Protests In East Germany

HAMBURG, Nov. 18 (UPI).—The protest wave against the East German repeal of the citizenship of popular protest singer and composer Wolf Biermann spread today to East Germany.

Several East German writers, including Stefan Heym, Stephan Hermlin, Heiner Mueller and Christa Wolf, and sculptor Fritz Cremer demanded that the East German government review its decision.

In an interview with the news magazine Der Spiegel, Mr. Biermann called the withdrawal of his citizenship evidence of an "enormous weakness" by the East German leadership. He called his expulsion "a reaction of fear by the Communist party in the face of a remarkable and fortunate change in East Germany in the last few years."

Mr. Heym, a former U.S. citizen who still writes in English, canceled a trip to West Berlin, saying he would not leave East Germany "until it is determined whether the re-entry visa for the [East] German Democratic Republic is valid also for writers and poets."

WINE

Going, Going, Almost Gone —France's Château Margaux

By Jon Winroth

PARIS, Nov. 18 (IHT).—Château Margaux has been a source of news and rumors for several years now. Are the Ginestet, Pierre and Bernard, father and son, selling it and if so, why and to whom? This is probably the single most glamorous piece of real estate on the market: 86 hectares and a magnificent Napoleon château, producing one of the world's greatest red wines, ranked a first great growth in the 1855 classification of the Médoc region.

Since the French Ministry of the Economy and Finances blocked the sale of Château Margaux to the American National Distillers Corporation earlier this year, the Ginestets have decided that the only way out for them is to hold a public auction, as they announced last night in a press conference at the Maison de l'Amérique Latine.

Young Turk

Three years ago Bernard Ginestet was still the Young Turk of the Bordeaux wine trade, his dark hair down to his shoulders and casually dressed in turtleneck shirts, as he proclaimed new philosophies in the wine trade, abandoned as precipitously as they were begun.

Last night his hair was short and graying, he wore a three-piece gray business suit. The Ginestets, whose company deals exclusively in Bordeaux wines, invested heavily during the boom and signed contracts with a lot of growers. They had to continue to honor these contracts even after the boom turned to bust as financing growing stocks of wine became ever more onerous, despite current rising sales of Bordeaux. Something had to go and it was Château Margaux, set up as a company separate from the Ginestet wine firm.

Last April they signed a contract with National Distillers to sell Château Margaux for some 82 million francs ($16.4 million). But the French government exercised its authority to stop the sale. No person, company or group outside the franc zone, outside the Common Market or non-resident in France can buy any property in France without the permission of the Ministry of the Economy and Finances. No reason was given at first, and later the government explained its fears that National Distillers would "bastardize" Château Margaux.

The Ginestets were told that the Crédit Agricole bank would help them out but this turned out to be impossible for several reasons. The bank was already a creditor of Château Margaux which did not make things easy, and had already loaned huge sums after last summer's drought.

So in desperation the Ginestets have decided that about the only course open to them is a public auction, which will put this precious national heritage in the hands of the highest bidder with no guarantees that quality be maintained as National Distillers had agreed to do. The date of the auction will be announced before the end of the year unless a last-minute buyer shows up. At public auction, anyone established in the Common Market can bid. If the government didn't like the idea of American ownership, perhaps they will prefer German, with revalued marks that will go far in France.

PARIS THEATER: Reviving Giraudoux Too Faithfully

By Thomas Quinn Curtiss

PARIS, Nov. 18 (IHT).—When Jean Giraudoux was in New York to see the S. N. Behrman adaptation of his "Amphitryon 38," he said he no longer recognized his play. Behrman had abbreviated many of its whimsical philosophical allusions and eliminated others, editing the text into a vehicle for its stars, Lynn Fontanne and Alfred Lunt, experts at sophisticated comedy. It became an immediate Broadway hit.

The revival of the play here at the Théâtre Edouard VII makes it seem, in retrospect, that there was theatrical wisdom in Behrman's minor surgery. True, the English version compromised with elements of the original, but it committed no open act of treachery. It simply took the script, cut it and transformed it into a better show.

Premiere

"Amphitryon 38" was first seen in Louis Jouvet's 1929 production. Giraudoux is often acclaimed as the foremost French dramatist of the between-the-wars era. The lofty position he occupied—and continues to occupy in certain histories of the period—requires brief explanation.

After 1918, none of the major figures of the prewar French theater—Porto-Riche, Brieux and Donnay—contributed anything of consequence. Claudel maintained his ban of the performance of "Le Soulier de Satin" and "Partage de Midi" (written or rewritten at that time). They were not staged until much later. Among the rising playwrights were Jean Sarment with his delicate dream dramas, Jean-Jacques Bernard with his quietism, H.-R. Lenormand with his Freudian exercises, Steve Passeur with his caustic psychological exposés, Marcel Achard, blending pathos and laughter, André Obey with his biblical fantasy "Noé," and his paraphrases of Shakespeare. Sacha Guitry stood at the head of the swelling ranks of boulevard authors which included many wits, though the most brilliant comedies of those decades were written by the Polish-born Alfred Savior.

Jean Cocteau was the whip of the avant-garde, while Antonin Artaud conducted his experiments underground, as it were, at special matinees. Now and again a new writer of promise would bob up—Gantillon, Pellerin and Raynal are names that come to mind—and then disappointingly disappear. Two came to stay: Marcel Pagnol with his Marseilles waterfront trilogy and Edouard Bourdet with his silken satires.

In the field of poetic fantasy Giraudoux ruled, with Obey and Cocteau, working away from the mainstream, as possible contenders. There was a noble purpose and a fine lyricism to Giraudoux's plays and there still is. Appropriating on several occasions the creatures of mythology, he gave them fresh form. The opera-bouffe composers anticipated him in this, but to different ends. They burlesqued their adopted gods and mortals. In contrast, Giraudoux used them as the instruments to voice his original views. He brought them closer by humanizing them, but he avoided all sentimentality. There was a salty, tonic tang to his gentle irony and he wrote exquisitely.

It remains a pleasure to hear the polished dialogue of "Amphitryon 38," retelling the story of Jupiter and Alcmène, the general's wife. The god visits her at night, disguised in the person of the husband who is away at the wars. Plautus, Molière, Dryden, Kleist have retold the story in bolder, broader terms. Giraudoux, in this 38th version, illuminates the old fable with revised lighting, flooding the sexual problem with a deep understanding of human foibles.

It is attractively performed at the Edouard VII. Simone Valère, a glowing vision, is a spirited Alcmène. She is presented not as a wife so loyal that she resists the temptation of immortality but remains in preference a mortal and suffer the mortal's fate, death, a typical Giraudoux conceit. Jean Desailly, a comedian of exceptional refinement, is an ideal Jupiter. He has the right presence and conveys with delightful élan the pompous, divine, occasional gaffes and embarrassments. Jean-Luc Moreau's Mercury, Jacques Fontanel's Sosie and Jean Paredes's one-man trumpeter are droll interpretations. As a sort of dessert, Yvette Chauvire comes on as Leda to tell about her experience.

Much of the revived play is beguiling, but there is perhaps too much of it, as Behrman himself admitted. It was, it must be remembered, written for the theater of 1928, its leisurely consideration of ideas, its philosophical discussions are today not suited to the library lamp but to mediated exposure at the footlights. The contemporary public is more restless and its words are not matched to action. Jean-Laurent Cochet's direction lets the text have its say, but a necessary theatrical vigor is lacking. Pierre Clayet's backdrops suggest a curtain Oriental setting, visually shifting the Greek legend into Arabian Nights territory. Jean Wiener has supplied strange incidental music. Time has not staled the elegance and high wit of Giraudoux's writing, but revivals of plays demand more resource and less enslaving reproduction.

Lipnitzki/Viollet

MUSIC IN FRANCE

A 'Lulu' for Lyons

By David Stevens

LYONS (IHT).—The Lyons Opera, whose methodical repertory building of the last few years already has included an excellent staging of Berg's "Wozzeck," has now turned to the composer's fragmentary "Lulu," with similarly impressive musical results and inevitably problematic zenith realization.

Although "Lulu"—rather, its completed and published two acts and the closing scene of the unfinished third and final act—had its world premiere in Zurich in 1937, less than two years after Berg's death, it is only in the last 10 to 15 years that it has begun to acquire some currency even in major opera houses. The Lyons production is only the third in France, earlier ones in Marseilles and at the Paris Opéra-Comique also having been based on the French text of André Tubeuf and Louis Ducreux.

Musically, this "Lulu" was a triumph, shaped primarily by the 34-year-old assistant house conductor, Sylvain Cambreling, who led his forces with demonic fervor and extravagant gestures, but who decidedly had the score, orchestra and singers well in hand, and who revealed in Berg's rich post-romanticism.

The Cast

The excellent cast coped securely with the score's highly varied vocal demands, but the emphasis was on its lyricism. The title role was taken by Carole Farley, an American soprano who has sung the role in Germany and elsewhere and is scheduled to make her New York Metropolitan debut in the same part later this season. She is a strikingly beautiful young woman with a silvery high coloratura that she deployed with such apparent ease as to make the most harrowing passages seem perfectly singable, if not understandable. In the semi-spoken passages her French was adequate to the imparting of necessary information, if not impeccable.

She was surrounded by a mainly French cast of musical equals, notably Georges Léciont as Alwa, Peter Gottlieb as Dr. Schön, Georges Gautier as the painter and Emmy Gregor, a statuesque figure, as the tragic lesbian Countess Geschwitz.

The visual presentation by Gaston Benhaim, the stage director, and Jacques Rapp, the designer, ignored a great many of Berg's explicit scenic instructions without offering anything very convincing in exchange. Rapp's basically single set was varied only by furniture changes in a cubic space open at the back, to which a surrealistic touch was added by chairs and tables growing out of the walls and ceiling. His costumes for Lulu were attractive on their own terms, but vague in suggesting a particular epoch.

Benhaim often required Lulu to move in ways that may have been intended to suggest the character's reptilian counterpart of the circus prologue. But Farley's attributes suggest Lulu's "sweet innocence" far more than her serpent-like seductiveness, so that these elaborate writhings came over as a kind of trashy shop-window eroticism that reached a bizarre climax in the final scene, with an approach to Jack the Ripper that would have gotten her arrested for soliciting in even the roughest city. Around this Lulu, Benhaim deployed her various male victims in movements of stiff, mechanical-doll brusqueness.

Missing entirely was the silent-film sequence between the two scenes of Act II, essential both for explaining the offstage events and a visual counterpart to the symphonic interlude. The final scene of Lulu's end as a London prostitute did not take place out of sight in an attic, with only her shriek to indicate violent death, but in full view in a foggy street (atmospherically set by Rapp), more brutal but somehow less shattering.

Berg's representation of the "eternal feminine" in "Lulu" can be taken on several levels and viewed from a variety of angles, but the abandonment of Berg's own realistic stage instructions can only be done at the production's peril, and here the losses outweighed the possible gains.

In the smaller parts, Christos Grigoriou was splendidly decrepit and asthmatic as Schigolch and Jean Brun stentorian and choleric as Rodrigo and the Animal Trainer. Performances continue to Nov. 30, with the French soprano Caroline Dumas sharing the title role with Miss Farley.

Lulu (Carole Farley) and the painter (Georges Gautier) with the "body" of Lulu's first husband.

Gérard Anselleem.

SHARPS & FLATS

BRUSSELS.—Johnny Griffin will be at Pol's Nov. 19 and 20 and then at the Anderlecht on Nov. 22. Memphis Slim will give a concert Nov. 20 at the Centre Culturel Jacques Franck at 8 p.m. Bill Coleman will be at Pol's Nov. 25-27.

* * *

MUNICH.—The Pasadena Roof Orchestra will be at the Circus-Krone-Bau Nov. 20 at 8 p.m.

* * *

The group Nazareth will be in Geneva Nov. 19 at the Palais des Sports (Champel) at 8 p.m. and then in Munich Nov. 21 at the Circus-Krone-Bau, also at 8 p.m.

* * *

The Golden Gate Quartet, continuing its German tour, is in Essen Nov. 19 for the Press-Ball; in Siegen Nov. 20 at the Siegerlandshalle; in Aachen-Ellendorf Nov. 21 at the Saal Geulen; in Pludershausen Nov. 22 at the Stauffenhalle; in Augsburg Nov. 23 at the Kongress-Saal; in Bad Rappenau Nov. 24 at the Sporthalle, and in Saarbruecken Nov. 25 at the Kongress-Saal. All concerts start at 8 p.m.

* * *

GENEVA.—Teddy Wilson will be at the Popcorn Club Nov. 22 and 23.

* * *

PARIS.—Tangerine Dream will be at the Palais des Sports Nov. 22 at 8 p.m. On the following night, Rod Stewart is at the Pavillon de Paris, also at 8 p.m., and Philly Jo Jones at the Riverbop Nov. 23 and 24. Jerome Van Jones is appearing at the Trois Mailletz.

* * *

Woody Herman celebrates his 40th anniversary as a bandleader with a concert in New York's Carnegie Hall, on Nov. 20.

* * *

This week's top single in the United States is "Tonight's the Night" by Rod Stewart, and in Britain, "If You Love Me Now" by Chicago.

WHY PALM COAST, FLORIDA, HAS BECOME THE PLACE TO OWN A HOME.

Find out why you should consider a new home or condominium in Palm Coast,* the water-oriented community on Florida's East Coast.

Location... Climate... and the facilities for year 'round fun. That's what's made over 28,000 people decide to buy land at Palm Coast, the new community by ITT Community Development Corporation. And over 700 families now live at Palm Coast.

Enjoy year 'round fun in the sun.

Palm Coast is a community just 24 miles north of Daytona Beach and 43 miles south of St. Augustine. It's the part of Florida with an ideal 3 season climate that gives you variety without bitter winters. In addition to 5 miles of ocean beach (just 12 miles from our Welcome Center), there's 10 miles of land along the Intracoastal Waterway (just 2 miles away). So there's plenty of water fun at Palm Coast: fishing, boating, swimming, water skiing, and relaxing on the beach.

Your condominium can overlook the water or our magnificent golf course.

The 152 luxury units in our Palm Club condominium offer comfort and convenience. They're two-story buildings that are a pleasure to live in. You'll be within yards of our 18-hole championship golf course. It is less than 1 mile to our fabulous Marina and Yacht Club, and nearby tennis courts: (Membership rates and fees for recreational facilities at your request.) Choose a one or two bedroom apartment or a two bedroom townhouse. You get a GE all-electric kitchen, with frost-free refrigerator-freezer, washer, dryer, self-cleaning oven, range and dishwasher. There's wall-to-wall carpeting, vinyl-floored kitchen, tile floored baths, a balcony or terrace, central air conditioning and heating. All included in purchase price.

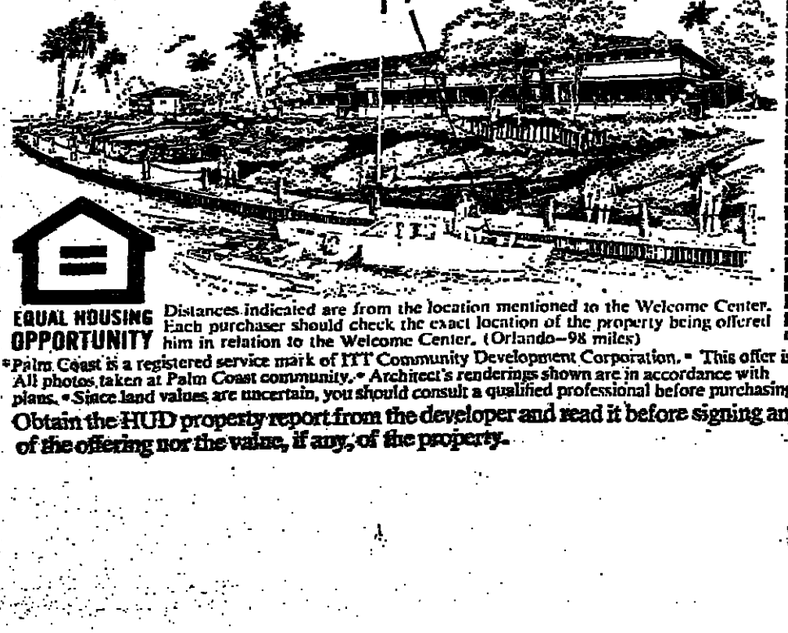
How you save money owning one of our condominiums.

Your monthly maintenance cost already includes lawn care, exterior maintenance, painting and repairs.

Then there are the tax benefits you get as a condominium owner.

Our dream houses fit your individual dreams.

At Palm Coast you can pick from a dozen new model homes, with 40 or more variations.



No matter which home you choose you'll get many extras and built-in luxuries. A Palm Coast home means comfort, easy care and more time to relax.

Take your first step toward owning a Palm Coast home now.

Whether it's for retirement soon or to join those who find Palm Coast a great place to bring up a family, now is the time to look into a home here. You also may want to have a home at Palm Coast where you can enjoy vacations now and for retirement in the future.

EQUAL HOUSING OPPORTUNITY

Distances indicated are from the location mentioned to the Welcome Center. Each purchaser should check the exact location of the property being offered him in relation to the Welcome Center. (Orlando—98 miles)

*Palm Coast is a registered service mark of ITT Community Development Corporation. • This offer is not valid where prohibited by law. • All photos taken at Palm Coast community. • Architect's renderings shown are in accordance with plans. • Since land values are uncertain, you should consult a qualified professional before purchasing. • AD14328(a)

Obtain the HUD property report from the developer and read it before signing anything. HUD neither approves the merits of the offering nor the value, if any, of the property.

OPEC Hesitates

The Organization of Petroleum Exporting countries appears to be considering postponement of a scheduled meeting next month at which it was expected to put through another oil price increase—variously estimated at anywhere from 5 per cent to 40 per cent.

It is conceivable that OPEC's hesitancy is a result of efforts by the United States and other oil-importing countries to exert countervailing power on the oil exporters. But this seems unlikely. Despite all the hullabaloo a few years ago about "operation independence," the failure of the United States to put together an effective energy development and conservation policy, combined with recovery from the depth of the 1974-75 recession, has made this country even more dependent on imported oil than it was before the Arab oil embargo.

What is actually deterring OPEC from an immediate and large price increase appears to be the danger to the world economy—and hence to the market for OPEC oil. The OPEC countries are particularly concerned, both politically and economically, about the threat to the poor oil-importing Third World nations with whom the oil-rich OPEC states are trying to make common cause against the advanced industrial countries of the West.

If OPEC were to impose another big price increase now, the strain on world markets resulting from both increased inflation and renewed slump could be unbearable. Balance-of-payments deficits of many countries, both developed and developing, could get out of control. Banks and other private lenders, already unable to expand their loans to foreign countries without going beyond the limits of prudent risk-taking, would have to cut back lending more sharply—and possibly see their existing loans go bad. The effect on the international monetary system and on world trade and investment could be devastating.

Caught in a bind largely of their own making and potentially disastrous to their own interests, OPEC leaders are searching for solutions which would require no sacrifice on their part. One gimmick under consideration would be to set up a two-price system, with a high oil price for industrial nations and a cut-rate price for developing countries. But such two-price systems might soon break down, and oil would leak from poor to rich, through a kind of black market.

Another OPEC solution, offered by the President of Venezuela, Carlos Andres Perez, would be for the oil exporters to use the threat of oil price increases as a lever to pry more help from the industrial to the developing countries—for instance, by scaling down the oil price increase in exchange for higher commodity prices and other trade concessions for developing countries in Western markets. But many industrial nations, of which Britain and Italy are only the two most conspicuous cases, already suffer from excess unemployment, inflation and payments deficits. To aggravate their problems now not only by higher oil prices but higher prices of other imported commodities would almost surely damage rather than help the market for products of the poor, developing nations.

There is no *Deus ex machina* for OPEC in this hazardous world economic situation. OPEC should recognize that oil prices, already too high, are severely jeopardizing international financial stability and ought to be reduced, and not raised, for the sake of their own economic future as much as for that of the rest of the world.

THE NEW YORK TIMES.

Congressional Watergate?

For the last several years, a mysterious Korean "businessman" known as Tongsun Park has been exceptionally active in Washington political and social circles. He was the chief organizer of a luxurious private club in Georgetown where, according to one informed estimate, about 300 members of Congress were entertained at parties at one time or another. But entertainment was only the beginning of Mr. Park's activities.

One former member of the House of Representatives says Mr. Park offered him substantial campaign contributions that he rejected. Another has told the press that he, too, rejected a proffered campaign contribution but that his wife then accepted a gift of $10,000 in cash from Mr. Park. Still another has testified to a federal grand jury about his relations with Mr. Park, including his secret partnership in an export-import business from which he drew $60,000 to $70,000 in profits. A distinguished present member has acknowledged that he received more than $3,000 as a gift from Mr. Park. And so it goes.

It is now apparent that Mr. Park is an intelligence agent for the government of South Korea. Though money, parties and junkets, his mission was to influence congressional opinion and to sustain a high level of U.S. military aid for his country. There are reports that as many as 80 members of Congress, including well-known figures in both parties, have been financially involved with Mr. Park.

Since the U.S. government through its CIA has intervened extensively in the political affairs of foreign countries and since U.S. corporations have bribed leading political figures in the Netherlands, Italy, Japan and other countries, Americans are in no position to point with moral disdain at South Korea. Nevertheless, corruption must be exposed and cleared up.

If the involvement of members of Congress is as widespread as fragmentary evidence now suggests, it is unrealistic to expect Congress to investigate itself. The Bobby Baker and Gulf Oil cases are melancholy precedents in this regard. Mr. Baker, the former secretary of the Senate, was driven from his post a dozen years ago and eventually imprisoned; but the public never learned the full story of his involvement with lobbyists and influential members of the Senate. Similarly, the list of recipients of large financial donations from the Gulf Oil Co. has never been made public. One of the recipients, a retiring senator, was briefly the subject of an inquiry by the Senate Rules Committee; but that excessively discreet body voted this fall to bury the subject.

Mr. Park's activities are now under investigation by a new section of the Justice Department established to look into allegations against public officials. Because of diplomatic immunity and the legal complexities of this affair, however, the Justice Department may be able to prosecute few, if any, of the participants. In that event, rumors of corruption would continue to swirl around the Congress. Another half-hearted inquiry by the Rules Committee cannot dissolve such a smog.

When the Watergate scandal raised grave questions about the integrity of the executive branch, Congress insisted upon the appointment of a distinguished attorney with full powers as an independent special prosecutor. If the Justice Department investigation is inconclusive, the public interest requires that Congress follow an analogous procedure, choosing an attorney to lay out the facts. Information is more important than indictments. This time there must be no cover-up on Capitol Hill.

International Opinion

Ireland and Extradition

The completion of the Council of Europe's Convention on Terrorism leaves this country in a decidedly peculiar position—it is, of the 19 member-states, the one most directly threatened by terrorism (witness the recent emergency legislation) and yet remains the only one of the 19 unable to put its signature to a measure specifically designed to help to combat that threat.

The explanation lies in that all too familiar albatross around the nation's neck, the 1937 Constitution. That commits Ireland to following the "generally accepted principles of international law" in its relations with other states, and the legal view is that the courts would find unconstitutional any attempt to implement the new convention, which specifically rules out what has been and still is a generally accepted principle, that political motivation for a crime grants the accused immunity from extradition.

The government's attempts to have an alternative provision allowing for trial on the spot, rather than extradition, obviously made little impression on the other states. The British make no secret of the fact that they regard this principle, as enshrined in the new Criminal Law Jurisdiction arrangements here, a poor second-best to extradition. . . .

—From the Irish Times (Dublin).

Seventy-Five Years Ago

November 19, 1901

WASHINGTON—Count Cassini, the Russian Ambassador, today visited Mr. John Hay, the Secretary of State. He was charged by the Czar to convey to Mr. Hay various cordial expressions of His Majesty's sentiments of a character complimentary to Americans. He also plans to see President Roosevelt and will deliver a personal message expressing His Majesty's condolence at the death of the late President McKinley.

Fifty Years Ago

November 19, 1926

PARIS—The work that is being done by the Rockefeller Donation in restoring and preserving the palaces, monuments and cathedrals of Versailles, Rheims and Fontainebleau was the subject of a talk by Mr. Welles Bosworth, who is in charge of the architectural work of the Donation. Mr. Bosworth spoke at the luncheon of the American Club of Paris. Mr. Bosworth lauded the generous spirit of Mr. Rockefeller in helping France, and the world.

'Four Years Is a Long Time, Dear . . . and What if Carter's Re-Elected?'

U.S. and Egypt: The Arms Issue

By William Beecher

WASHINGTON—In just four weeks the first two of six C-130 military transports promised to Egypt will roll off the assembly line in Marietta, Ga., ready for delivery.

It's doubtful the event will be noticed 125 miles to the south, in Plains, Ga., where President-elect Jimmy Carter is busily putting together a government and a program.

But one of the earliest and toughest decisions Carter will have to make, soon after assuming office, is whether to continue or fundamentally change U.S. policy toward the Middle East, and particularly toward Egypt, one of the prime movers in the Arab world.

Critical in Campaign

During the campaign Carter criticized large arms sales to the Middle East, the Arab boycott of firms doing business with Israel and escalating prices of Middle East oil.

But campaign rhetoric, however reflective of a candidate's true beliefs, does not always provide a good guide to subsequent policy decisions.

One of the first in this area facing Carter will be an urgent request from Egyptian President Anwar Sadat to honor commitments made by Secretary of State Henry Kissinger to provide more than token amounts of U.S. arms once past the 1976 election.

Sadat is known to want from the United States such weapons as F-5 combat jets, TOW anti-tank missiles, Hawk air defense missiles and either new tanks, or new engines to keep his Soviet-made tanks operating.

Carter's campaign criticism of fueling the arms race in the Middle East would seem to preclude his approval of such sales. But even if he were somehow willing, it is extremely doubtful that Congress, which expressed reservations about supplying six C-130 transports, would sanction advanced arms which could affect the military balance with Israel.

Shift of Jets

One could argue that 20 to 40 F-5s could hardly upset the balance. But Saudi Arabia is getting 110 F-5s, specially equipped to fire TV-guided Maverick air-to-ground missiles, and if Egyptian pilots were trained on their own F-5s it would raise questions about the possibility of a sudden shift of the planes from Saudi Arabia to Egypt in the event of another Arab-Israeli war. Such a transfer would make much less sense if Egyptian pilots were not thoroughly trained in the aircraft.

The Ford administration has encouraged Britain, France and other allies to sell advanced weapons to Egypt. But Sadat was told frankly after the fuss raised over the C-130s that no new deals would be considered by the United States until after the presidential election.

It's understood that Egypt has been reluctant to send 20 military officers to the United States for training in U.S. military schools, approved a year or so ago, until Washington bites the bullet on whether it will supply arms in quantity.

Some Ford administration officials wonder privately whether Carter will freeze arms sales to the Middle East and elsewhere pending a thorough re-study of U.S. weapons transfer policy worldwide, or whether, in the case of Egypt, he will perceive a need to provide something fairly early in order to nurture U.S. influence in Egypt.

Some policy-makers feel there are certain categories of military equipment that Egypt very much wants and that Israel, and its supporters in Congress, would not be all that upset about.

Communications

For example, Egyptian officers believe their tactical communications system is a shambles. They would like U.S. two-way radios and tactical switchboards. Cairo, in fact, has quietly sounded out U.S. officials about the possibility of setting up a factory in Egypt to co-produce a small U.S. walkie-talkie radio.

Egypt also is interested in U.S. helicopters, either direct purchase or co-production. It wants some helicopters to use in anti-submarine warfare and some for troop transport.

Sadat served notice of his mounting impatience when he told a visiting delegation of senators a few days ago that he understands a new administration must take some time to get its policy bearings, and that arms for Egypt are not popular in Congress, but that delay could be dangerous because "this area is so explosive."

He added: "I don't know whether Congress will agree if I ask the United States for arms. But I think it's an obligation now. We are friends and you know my policy. I have proved myself to you."

He was referring both to Egypt's severing of its military dependence on the Soviet Union and of its two Sinai disengagement agreements which had the effect of removing Egyptian forces from the common Arab military threat to Israel, for the time being at least.

Sadat took those steps largely because he believed the United States offered a better chance of pressuring Israel to settle outstanding issues and of rescuing the teetering Egyptian economy than did continued reliance on the Soviet Union.

But there are persistent reports that a number of Egyptian generals are growing increasingly bitter about planes and tanks breaking down for want of spare parts, and rumbling that unless Sadat can reverse the deterioration of the arms forces in the West, perhaps he had better swallow his pride and re-establish his Soviet connection.

During the presidential campaign, U.S. firms were denied permission to demonstrate such equipment, even a single tactical switchboard, in Egypt, well placed sources say.

Some government analysts feel the Carter administration might be interested in considering such nonlethal systems.

Tank Engines
